Fisher Scientific

ONE SOURCE. INFINITE SOLUTIONS.

Fisher Scientific 2008/09

Fisher Scientific
Supporting research for more than a century.

Fisher Scientific
Serving customers in more than 150 countries around the world.

Fisher Scientific
A family of global service brands for lab equipment, chemicals, and supplies.

Fisher Scientific
A customer-driven portfolio of service solutions—Freeing You to Achieve Success.

Fisher Scientific
Offering convenience and choice—from a single purchase to supply chain solutions.

Fisher Scientific
Delivering the products you need, when you need them, where you need them.

Fisher Scientific
A partner you trust.

Fisher Scientific

One Source. Infinite Solutions.

Fisher Scientific

We work hard to make ordering simple...

By Web

Visit **www.fishersci.com** and order 24/7 from your PC at your contract prices.

By Phone

Anywhere in the **United States: 1-800-766-7000**. In **Puerto Rico: 1-787-738-4231** M–F: 5 a.m. to midnight EST; Sat: 8:00 a.m. to 5 p.m. EST; plus 24/7 emergency service.

By Fax

Anywhere in the **United States: 1-800-926-1166**. In **Puerto Rico: 1-787-738-4600**
Orders accepted 24/7. Be sure to include catalog number, brief product description and quantity.

...and we're standing by, 24/7, for your convenience

By EDI

Continuous retrieval—transaction sets are received as soon as they are sent.
Rapid response—turnaround in seconds, no batch processing.
Cross-referencing—use your own part numbers and units of measure.

By Mail

Mail your order to a Customer Service Center —visit **www.fishersci.com** for the location nearest you. Non-account holders should send remittance *(certified check, money order or credit card number)*; a customer service representative can help you estimate shipping charges and tax.

In Person

Your Fisher Scientific account manager will visit your laboratory, listen carefully to your needs, and help you decide on the combination of products and services that best fulfills your requirements. Contact your account manager for quotations, technical information, product availability and ordering information. If you don't have an account manager, call **1-800-766-7000.**

For global exports & Latin America

Global Export Customer Service Center:

3970 John's Creek Court, Suite 500, Suwanee, GA 30024 USA
Telephone (inside the US): **1-800-955-5090** • Fax (inside the US): **1-877-756-9737**
Telephone (outside the US): **+1-770-871-4725**
Email: **exports@fishersci.com**

TAG IT!

With a Post-It® Flag...

- A convenient way to find the products you order most often
- Saves time!
- Markable!
- Reusable!

We CAN get it!

Hundreds of thousands of products
Virtually everything you need for lab, field or facility.

On the leading edge of science
Our Science Advisors keep us abreast of new developments and upcoming changes in the scientific community so that we can provide you with products and services to meet your changing needs.

From thousands of manufacturers

- World-leading vendors who are committed to delivering the highest levels of service and support
- And our own Fisher Scientific product lines - Fisherbrand, accumet, Isotemp and more —your assurance of quality, reliability and value.
- Third party procurement - If you need a product we don't sell, we can get it for you.

Choice and Convenience

ONE SOURCE. INFINITE SOLUTIONS.

Extensive Product Portfolio

- More than 800,000 products offered on www.fishersci.com
- Total product solutions with Third Party Procurement Program
- More brands and choices meet all laboratory needs

Life Science Solutions

- Single source for all of your life science projects including genomics, proteomics and cell culture
- Portfolio of over 22,000 antibodies at www.fisherantibodies.com
- Custom services provide product solutions that meet your specific research requirements, see www.fishersci.com/lifescience/custserv

Managed Services

- Freeing you to achieve success—more than 30 customizable services to meet your business needs
- Leading provider of onsite personnel and supply chain management services to the life science industry
- Improves productivity, reduces total cost of acquisition and ownership, and ensures compliance

Technical Webinars

- Learn about the newest product applications and technological advancements
- Interactive, real-time and instructive
- Accessible from the convenience of anywhere a PC is connected to the Internet

Publications

- BioTrack and Lab Reporter quarterly magazines highlight the latest life science and research products
- Brochures feature the newest products to hit the market
- To order literature, visit https://fisherlitr.corporatesrvcs.net

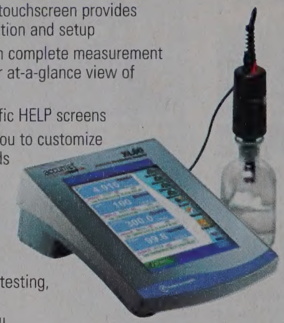
Fisher Scientific

accumet* Excel XL60 pH/mV/Temperature/DO/ISE/Conductivity Meter

A complete electrochemistry lab in one instrument, with unrivaled usability and connectivity

- Windows CE*-driven, full-color touchscreen provides unmatched ease of use in operation and setup
- Switchable numeric display with complete measurement data or graphic display mode for at-a-glance view of measured data over time
- User prompts and context-specific HELP screens
- Extensive setup screens allow you to customize the meter precisely to your needs



Top-of-the-line, research-grade meter

- Measures and displays 4 parameters simultaneously
- DO mode calculates 5-day BOD testing, OUR, and SOUR
- Conductivity mode accepts 2-cell and 4-cell probes
- ISE mode offers direct and indirect measurements
- pH mode accepts standard or Fisher Scientific accuFet* nonglass electrodes

accumet
XL60
4.010
100
300.0
99.8

Extensive GLP capabilities

- Customizable printer/computer output
- 1000-reading datalog capability
- Print Setup lets you print exactly what you want, when you want
- Displays time in 12- or 24-hour format, date in U.S. or international format
- USB port, RS-232 serial port and Ethernet

accumet
XL60

Choice of packaging options:

- **Meter Only** package includes meter, electrode support arm and bracket, 110V/220V power supply and operation manual.
- **Meter Kit/pH** package includes meter, Fisher Scientific accuCap combination pH electrode (13-620-130), ATC probe (13-620-19), electrode support arm and bracket, 110V/220V power supply and operation manual.
- **Meter Kit/pH-DO** package includes meter, Fisher Scientific accuCap* combination pH electrode (13-620-130), self-stirring BOD probe (13-620-SSP), ATC probe (13-620-19), electrode support arm and bracket, 110V/220V power supply and operation manual.
- Each package is also available with Certificate of Traceability to NIST* Standards.

Three-year warranty. Model XL60 is warranted to the end user to be free from defects in materials and workmanship under normal use for a period of three years. Call your Fisher Scientific Customer Service Representative for full details.

Package	Cat. No.	Each
Meter Only	**13-636-XL60A**	2768.54
Meter Only with NIST-Traceable Certificate	**13-636-XL60AC**	2881.04
Meter Kit/pH	**13-636-XL60**	3034.04
Meter Kit/pH with NIST-Traceable Certificate	**13-636-XL60C**	3146.53
Meter Kit/pH-DO	**13-636-XL60D**	3696.57
Meter Kit/pH-DO with NIST-Traceable Certificate	**13-636-XL60DC**	3809.07

SPECIFICATIONS

Model	**XL60**
Modes	pH, mV, Dissolved Oxygen, Concentration, Conductivity, Resistivity, Temperature
Display	640 × 480 pixel STN Color LCD; 4½W × 6"H (11 × 15cm). Measurement Characters: ¾"H (1.9cm). Other Data: 1/4"H (0.6cm)
Keypad/Controls	Touchscreen and External Keypad
Menus	Microsoft Windows CE* pull-down menu options; extensive Help screens.
Remote Access	Parameters remotely controllable and monitorable via Windows CE Remote Application Interface.
Connectivity	Ethernet port connectivity to LAN. USB Host/Device 1.1 connectivity to printer, PC, bar code scanner, mouse, keypad etc.
Data Memory	Internal: 1000 Data points. External: USB storage device connectivity, SDCARD Memory Interface ver 1.0, RS-232 connectivity.
Data Output	On Stable; via timer; Manual
Special Features	User upgradable software (Flash ROM via Ethernet). Powerup self test; error messages; alarm, real-time clock/calendar.
pH Mode	
Range/Resolution	-2.000 to +20.000pH/0.1, 0.01, 0.001pH; auto lock
Relative Accuracy	±0.002pH ±1 least significant digit
Buffer Recognition	Manual or Automatic: U.S., Euro, NIST or Custom.
Calibration Points	1 to 6
FET Electrode Input	Yes
mV Mode	
Range/Resolution	0 to ±2000mV (absolute or relative)/0.1mV
Relative Accuracy	±0.2mV ±1 least significant digit
Temperature Mode	
Range/Resolution	-10.0° to +110.0°C (14° to 230°F)/0.1°C
Relative Accuracy	±0.2°C
Compensation	Automatic or Manual
Ion Mode (Concentration)	
Range/Resolution	1×10^{-6} to 9.99×10^{10}/0.1, 0.01, 0.001
Relative Accuracy	±0.17n% (where n = the number of electrons exchanged in the electrode reaction process)
Calibration Points	5
Incremental Methods	Known addition, analyte addition, known subtraction, analyte subtraction
Conductivity Mode	
Cell Constants	0.1cm^{-1}, 1.0cm^{-1}, 10cm^{-1}
Conductivity Range	0 to 5×10^5µS/cm
Resistivity Range	3ohms·cm to 100megohms·cm
Salinity Range	0 to 90ppt
Relative Accuracy	±0.5% of Full Scale reading ±1 least significant digit
Dissolved Oxygen Mode	
Range/Resolution	0-60mg/L, 0-600% saturation/0.01mg/L, 0.1% saturation
Relative Accuracy	±0.1mg/L ±1 least significant digit, ±0.1% saturation
Inputs	2 BNC/pin, 2 ATC, 3 DIN (FET, 2- or 4-cell cond., DO)
Outputs	USB Host/Device, Bidirectional RS-232, Ethernet, SDCARD
Electrical Requirements	110V/220V 50/60Hz

Bel-Art Products

Scienceware* Secador* Desiccator Cabinets

Secador Desiccator Cabinets assure the safe and dry storage of humidity sensitive products, instruments and hygroscopic chemicals. Select from multiple models with electronic Auto Desiccant control or regular cabinets to utilize the drying agent of your choice.

Secador 2.0, 3.0, and 4.0 Large Desiccator Cabinets

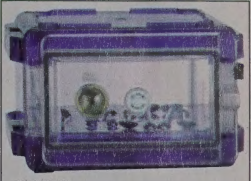
08-647-57

- Polystyrene shelves with waffle pattern for maximum air circulation
- Latches: two latches in horizontal or vertical configurations
- Vertical cabinets: three shelves adjustable up to four positions
- Horizontal cabinets: two shelves adjustable up to two positions
- Standard models are nonelectric
- Auto-desiccator models
- Built-in hygrometer
- Continual silica gel desiccation is regenerated every 20 minutes
- Reduces RH from 75% to less than 25% in approximately eight hours
- Keeps the RH at a constant level

Description	Dimensions	Cat. No.	Each
Vertical Standard Cabinets			
Clear	34.1W x 41.4D x 31.4cm H	**08-647-658**	302.57
Clear	34.1W x 41.4D x 41.7cm H	**08-647-657**	385.72
Clear	34.1W x 41.4D x 51.8cm H	**08-647-54**	550.00
Clear with Blue End Caps	34.1W x 41.4D x 51.8cm H	**08-647-55**	550.00
Horizontal Standard Cabinets			
Clear	51.8W x 41.4D x 31.4cm H	**08-647-58**	550.00
Clear with Blue End Caps	51.8W x 41.4D x 31.4cm H	**08-647-59**	550.00
Vertical Auto-Desiccator Cabinets			
Clear	34.1W x 41.4D x 31.4cm H	**08-647-656**	422.79
Clear	34.1W x 41.4D x 41.7cm H	**08-647-655**	505.00
Clear	34.1W x 41.4D x 51.8cm H	**08-647-52**	675.00
Clear with Blue End Caps	34.1W x 41.4D x 51.8cm H	**08-647-53**	675.00
Conversion Shelf, Horizontal to Vertical		**01-816-19**	24.31
Horizontal Auto-Desiccator Cabinets			
Clear	51.8W x 41.4D x 34.1cm H	**08-647-56**	675.00
Clear with Blue End Caps	51.8W x 41.4D x 34.1cm H	**08-647-57**	675.00
Conversion Shelf, Vertical to Horizontal		**01-816-18**	27.50

Secador 1.0 Small Desiccator Cabinets

- Latches: airtight, one latch construction
- Nonelectric
- Built-in hygrometer



08-647-51

Color	Dimensions	Cat. No.	Each
Clear	34.1W × 41D × 21.3cm H	**08-647-50**	155.58
Clear with Blue End Caps	34.1W × 41D × 21.3cm H	**08-647-51**	155.58

Secador Mini Desiccator Cabinet

For small humidity sensitive products or materials that are always needed near a work area

03-410-540

- 0.35 cubic ft. internal volume
- Molded of clear polystyrene and door is molded of clear copolyester for easy viewing of contents
- Positive latch on the door and two locking loops permit the use of a padlock or tamper evident seal to maintain security
- Built-in hygrometer
- Door opening: 23.6W × 12.7cm H

Description	Dimensions	Cat. No.	Each
Mini Desiccator Cabinet	33.8W × 25.4D × 21.6cm H	**03-410-540**	91.46

Fisherbrand

Humidity Sponge Desiccant

Absorbs 16% moisture by weight

- Tyvek* pack contains 10g sodium calcium aluminosilicate hydrate
- Maintains dry atmosphere in 2 gal. (7.6L) container
- Nontoxic, meets FDA specifications for use in direct contact with food and drugs, and certified as Class M3.5 (Class 100) cleanroom compatible
- Shell is resistant to chemicals, abrasion, and aging
- Disposable window type contains blue gel that turns pink when pack is exhausted
- Reusable type comes with Relative Humidity Card that changes from blue to pink when pack is exhausted; heat pack at 177°C (350°F) to regenerate

Humidity Sponge

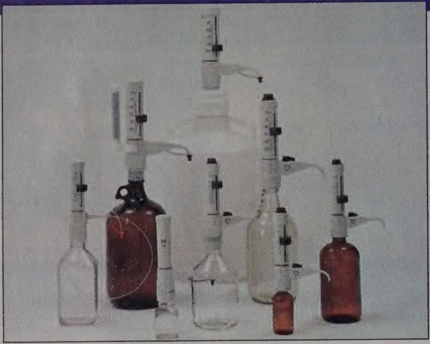
ORDERING INFORMATION:
Measures 3 × 3 × ¼" (7.6 × 7.6 × 0.6cm).

Description	Cat. No.	Pack of 40
Disposable Window Type	**07-580**	33.40
Reusable Type	**07-580-1**	31.33

brinkmann

Bottletop and ChemSaver* Dispensers

Always count on Brinkmann for reliable and convenient reagent dispensing from virtually any size bottle.



Brinkmann bottletop dispensers, shown with bottles and discharge/drying tube (not included).

Fixed- and adjustable-volume dispensers cover a volume range of 0.1 to 100mL, and deliver even the harshest reagents safely. Choose standard models or ChemSaver models, which recirculate the reagent used during the priming step. Accuracy ±0.5%,† precision ≤0.1%.

- Clear plastic sleeve surrounds the glass cylinder to protect against chemical hazards should the cylinder break
- Entire assembly rotates 360° for safe and convenient dispensing and easy access to volume adjustment
- Autoclavable without having to loosen valves or remove individual parts
- Reagent is wiped out of the cylinder with each stroke to prevent the buildup of residue that can lead to malfunction
- Filling valve, tubing, and even the piston can be individually replaced
- ChemSaver models eliminate reagent waste through the use of a recirculating safety valve that diverts reagent used in priming back into the reservoir bottle
- ChemSaver valve can be closed to prevent unintended flow of reagent
- ChemSaver models can be user-calibrated for fine adjustment of volume

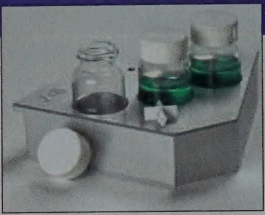
Volume	Increments	Mfr. No.	Cat. No.	Each
Fixed-Volume Dispensers				
1mL	----	2222060-8	**13-688-137**	380.00
5mL	----	2222070-5	**13-688-138**	380.00
10mL	----	2222080-2	**13-688-139**	380.00
Adjustable-Volume Dispensers				
0.1 to 2.5mL	0.05mL	2222000-4	**13-688-130**	380.00
1 to 5mL	0.10mL	2222010-1	**13-688-131**	380.00
2 to 10mL	0.20mL	2222020-9	**13-688-133**	380.00
5 to 25mL	0.50mL	2222030-6	**13-688-134**	510.00
10 to 50mL	1.00mL	2222040-3	**13-688-135**	540.00
20 to 100mL	1.00mL	2222050-1	**13-688-136**	800.00
ChemSaver Dispensers (Adjustable Volume)				
0.1 to 2.5mL	0.05mL	2222090-0	**13-688-140**	405.00
1 to 5mL	0.10mL	2222100-1	**13-688-141**	405.00
2 to 10mL	0.20mL	2222110-8	**13-688-142**	405.00
5 to 25mL	0.50mL	2222120-5	**13-688-143**	555.00
10 to 50mL	1.00mL	2222130-2	**13-688-144**	560.00
20 to 100mL	1.00mL	2222140-0	**13-688-145**	860.00

† For all except 1mL fixed-volume (13-688-137) and 0.1-2.5mL adjustable-volume models (13-688-130 and -140), which are accurate to ±0.6%.

brinkmann

Radleys StarFish* Multiexperiment Workstation

Turns your hotplate or stirrer into a multitasker



Affordable, flexible and modular workstation reduces time and clutter by simultaneously performing up to five experiments, from simple to complex. Easily handles reflux experiments and those requiring inert and vacuum conditions.

- Compact footprint fits on all commonly used hotplates
- Easy assembly—even complex reactions take less than five minutes to set up
- Interchangeable blocks accommodate all types of standard glassware—from 1 dram vials to 500mL round-bottom flasks and scintillation vials—on the same plate
- Modular design permits addition of scaffolding, condensers, extraction/digestion glassware, and other common laboratory accessories
- Optimized block and plate design provides the most even heating and stirring—improves results of downstream experiments
- Anodized aluminum for strong chemical resistance and fast heat-up

brinkmann Heidolph* LABOROTA* Rotary Evaporation Systems

Now backed by Brinkmann, Heidolph is the brand of choice for reliable Rotary Evaporators and Vacuum Pumps. Benchtop LABOROTA evaporators range from basic Collegiate* to advanced Efficient, Digital and Control models; industrial versions are also available.

13-876-300

13-878-432

Feature modular, expandable design, with all components designed to function together; handle flask sizes from 50 to 5000mL; individual power switches for control panel and heating bath; electronically controlled motor provides 20 to 270rpm

LABOROTA Collegiate Models offer:

- Economical rotary evaporator with hand lift and water bath
- Convenient large dial controls
- Water bath temperature range from 20° to 100°C, ±1°C
- 24/40 Glassware, including specified condenser, 1L receiving flask, 1L evaporating flask

LABOROTA 4000 and 4001 Efficient Models feature:

- Rotary evaporator with large analog rotation control knob
- Manual or motorized lift
- Water/oil heating bath with 4.3L capacity, 1300w heating capacity, 20° to 180°C range ±1°C; digital display of set temperature
- 24/40 Glassware, including specified condenser, 1L receiving flask, 1L evaporating flask
- Attachment for optional vacuum valve or Woulff Bottle

LABOROTA 4010 and 4011 Digital Models have all of the features of 4000/4001 models, plus:

- Digital display of rotation speed, vapor temperature and bath temperature

LABOROTA 4002 and 4003 Control Models, with all of the features of 4010/4011 models, plus:

- Built-in vacuum controller for automatic process control based on vapor pressure and temperature detection
- Programmability of up to nine of your most common applications
- Process timer allows for unattended operation
- T Function to stop distillation at your set minimum pressure
- P Function to hold vacuum setting constant throughout distillation
- Pressure ramps for gradient distillation of binary/tertiary solvent mixtures

Include one of these glassware assemblies:

Assembly G1. Diagonal condenser
Assembly G3. Vertical condenser
Assembly G5. Condensate trap
Assembly G6. Vertical condenser for reflux operation

REQUIRED ACCESSORIES:

Vacuum pump or system and associated sensors and connections

brinkmann Tuttnauer* Autoclaves

A wide range of benchtop and verticle top-loading autoclaves with capacities up to 85L and rapid cooling chambers—to efficiently sterilize all liquids and media, glassware, clothing, instruments and utensils.

Brinkmann/Tuttnauer Vertical Top-Loading Autoclaves

Provide automatic, microprocessor-controlled sterilization—safely and economically

Intelligent Control Technology sterilizes higher load capacities in shorter batch times, saving time and energy. Dual temperature and chamber pressure control systematically increases pressure and temperature throughout heating phase, helping to achieve chamber and sample temperature in half the time of other autoclaves. Cooling system available on select models.

130-880-100

Operating Features

- Largest capacity available—Model ELV 3870 features 85L chamber for Erlenmeyer flasks up to 5000mL
- Cooling coils—surround chamber for rapid, efficient cooling (ELVC models)
- Independent, front-mounted pressure gauge monitors chamber pressure for added user safety
- Dual built-in temperature probes accurately monitor sample temperature to ensure appropriate media sterilization
- Built-in printer satisfies GLP and SOP requirements; RS-232 for data transfer to PC
- Two wire baskets included
- ELVC series' rapid cooling system cools chamber after sterilization cycle
- Optional cooling cube available for ELVC models for even faster cooling
- UL-listed and CSA-approved
- Backed by Brinkmann with expert local Systems Specialists and after-sales Application and Service Support

Model	Version	Electrical Reqts.	Mfr. No.	Cat. No.	Each

Brinkmann/Tuttnauer Benchtop Autoclaves

tuttnauer
BRINKMANN

02-964-14

Compact sterilizers for fast, safe sterilization of solids and liquids

- Easy installation: no hardwiring or plumbing required
- Stainless-steel chamber and removable trays
- Large-capacity reservoirs with self-contained water supply
- Fast and slow exhaust for sterilizing solids and liquids
- Drying cycle removes residual moisture
- Heat-insulated, double-locking door; no burns
- Analog, electronic, and electronic printing models

Electronic Control E Series models add:

- Microprocessor controls and digital display
- Four fully-adjustable programs
- Temperature selection from 105°C to 137°C (221°F to 279°F)
- Low-water signal
- Standby heating
- **EP Series** adds printer for documenting sterilization procedures
- **2540EPK** features a larger heating element for accelerated cycle time; helps to meet U.S. EPA guidelines for autoclave operation
- **EA Series** models feature an air-driven pump; facilitates sterilization of wrapped and sealed instruments

Models listed below are electronic with 15 dia. x 27"D chamber and are for 220V 50/60Hz. Other models are available in different sizes and electrical configurations, including analog models. See p. 1736.

Model	No. of Trays	Printer	Stand	Mfr. No.	Cat. No.	Each

Brinkmann*/Metrohm* Karl Fischer Titrators

For accurate, easy-to-perform moisture determinations, count on Metrohm to get the job done right. A wide range of models and accessories are available to accurately determine water levels from 1ppm to 100%.

Titrino* Model 795 Karl Fischer Titrators

KF reagent 5 mg/mL
Waste

795 Karl Fischer Titrino with 703 Pump/Stirring Stand

Built-in multiple method storage creates and stores up to 100 methods for different samples and reagent concentrations

- 100ppm to 100% H_2O content measuring range
- Stirring begins automatically at the start of a titration and stops as soon as it is finished
- Large-screen display allows for easy programming and shows real-time titration curve, enabling you to quickly troubleshoot and change parameters during titration
- Dual RS-232-C interfaces allow simultaneous connection of balance and printer or PC
- Metrohm pump/stirrer aspirates Karl Fischer waste and adds fresh reagent at the touch of a button without exposing the titration vessel to atmospheric moisture
- Good Laboratory Practice (GLP)-compliant

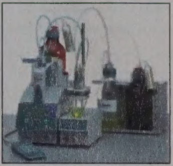
INCLUDES

Unit with Metrohm pump/stirrer, cell and buret; cell includes double-platinum indicator electrode, titration vessel, and all required accessories

Buret Capacity	Mfr. No.	Cat. No.	Each
5mL	20 85 820 6	**20-858-206**	7990.00
10mL	20 85 822-2	**20-858-222**	7990.00
20mL	20 85 824 9	**20-858-249**	7990.00
50mL	20 85 826 5	**20-858-265**	7990.00

Titrino* Model 787 Volumetric Karl Fischer Titrators

Dedicated, economical, single-method titrators for volumetric KF analysis



- Provide 100ppm to 100% H_2O content measuring range and reduced personal contact with reagent
- Automatic storage and retrieval of titer and blank values
- Calculate the result, mean, standard deviation, and relative standard deviation
- Backlit LCD for easy viewing of results
- RS-232-C interface allows connection of balance, printer, or PC
- Pump/stirrer aspirates KF waste, adds fresh reagent at the touch of a button without exposing vessel to atmospheric moisture

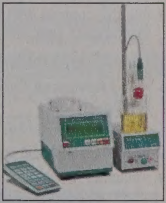
INCLUDES

Unit with Metrohm pump/stirrer, cell and buret; cell includes double-platinum indicator electrode, titration vessel, and all required accessories

Buret Capacity	Mfr. No.	Cat. No.	Each
5mL	20 85 060 4	**20-850-604**	6560.00
10mL	20 85 062 1	**20-850-621**	6560.00
20mL	20 85 064 7	**20-850-647**	6560.00
50mL	20 85 066 3	**20-850-663**	6560.00

Models 756 and 831 Coulometric Karl Fischer Titrators

Compact coulometric titrators determine trace quantities of water in liquids, solids, and gases down to 10µg



- Method memory creates and stores settings specifically for your samples and applications
- Use titration time and current to eliminate reagent calibration or standardization
- Large-screen display for observation of real-time curves for side reactions or titration progress, or scrolling through method parameters
- Choose cell without diaphragm to reduce reagent consumption and electrode contamination; standard cell with diaphragm
- Generate necessary reagent electrolytically in the titration vessel
- Precisely measured and controlled current allows addition of high-resolution reagent for trace moisture analysis
- Dual RS-232-C interfaces connect to a balance, PC and printer
- Good Laboratory Practice (GLP)-compliant

INCLUDES

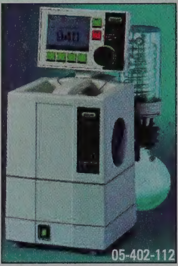
Platinum generator electrode, double-platinum indicator electrode, titration vessel, and all required accessories; magnetic stirrer is included with 20-815-108

Titrator	Mfr. No.	Cat. No.	Each
Model 756 KF Coulometer with Magnetic Stirrer and Built-in Printer			
Cell without diaphragm	20 81 510-8	**20-815-108**	8410.00
Cell with diaphragm	20 81 500-1	**20-815-001**	8300.00
Model 756 KF Coulometer with Model 703 Pump/Stirrer and Built-in Printer			
Cell without diaphragm	20 81 515-9	**20-815-159**	9050.00
Model 831 KF Coulometer with Model 703 Pump/Stirrer			
Cell without diaphragm	20 81 415-2	**20-814-152**	7750.00

BUCHI

Equipment for Evaporations, Vacuum Control and Melting Point Testing

V700/V710 Vacuum Pumps and Systems



05-402-112

Provide a complete solution for creating vacuum in the laboratory

The heart of these systems is a high-performance, oil-free, nearly maintenance-free vacuum pump. Wide range of accessories gives you a complete system that can make many tasks more efficient, and eliminate challenges encountered with large, centralized vacuums.

- Oil-free, chemical-resistant, PTFE diaphragm pumps
- Designed for use with all gases and vapors typically found in the lab
- Cover a wide range of classical laboratory applications
- Compact, space-saving design, built-in carrying handle
- Removable housing with built-in tools
- PEEK/glass head for extreme chemical resistance, instant visual detection of contaminants
- **V-700 Pump** has two stages, dual heads, flowrate of $1.8m^3$/hr., ultimate vacuum of <10mbar (24mbar with gas ballast)
- **V-710 Pump** has three stages, four heads, flowrate of $3.1m^3$/hr., ultimate vacuum of <2mbar (8mbar with gas ballast)

Optional Vacuum Controllers:

- **V-850 Professional Controller** for Standard Applications
- Vacuum or speed control of set pressure
- Intuitive controls with timer
- USB data interface
- Library with 43 solvent presets to simplify parameter selection
- **V-855 Advanced Controller** with Programmability for Special Distillation Tasks
- Stores up to 15 processes
- Easy/Vac automatic process control
- Automatic distillation; repeat function

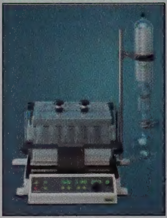
Syncore* Polyvap* Systems



05-402-348

Efficient, safe, and environmentally sound tools for multiple evaporation, even with high-boiling solvents

Interchangeable racks allow parallel evaporation of 4 to 96 samples, ranging in volume from 0.5 to 500mL.

- No cross-contamination
- High chemical resistance
- Environmentally sound operation (ISO 14000)
- Evaporation of high-boiling solvents like DMSO and DMF
- Fully transparent crystal racks in format 4 and 6
- Temperature Range: ambient to 150°C
- Vacuum Cover Temperature: ambient to 70°C
- Rotation Speed: 0 to 600rpm
- Programmability: nine time/temperature steps; up to 9 hr. 59 min. each
- Compatible with the Syncore Reactor and Syncore Analyst
- Operates on 120V; comes with S Vertical Condenser

Flask Size	Rack	Mfr. No.	Cat. No.	Each

Melting Point Apparatus

05-404-347

Simultaneously determine melting or boiling points

With highly accurate determinations up to 400°C, these systems are designed for continuous operation and allow two boiling points and three meltings points to be determined during a single cycle.

- Nine heating gradients from 0.1 to 20.0°C/min.
- Metal block serves as heating component, eliminates the need for silicone oil
- Compliance with Pharmacopoeia methodologies, e.g., Ph. Eur. II, Ph. Helv. VII, DAB 10
- Data recording via RS-232 port for GLP compliance
- Calibration with World Health Organization (WHO) standards
- Working memory for 10 methods
- Detailed IQ/CQ documentation available for model B-545
- No mercury thermometer, no silicone oil to dispose of
- **Melting Point B-540** employs visual observation of melting point
- **Melting Point B-545** features automatic determination of melting points with sample observation

Model	Mfr. No.	Cat. No.	Each
B-540	036581	**05-404-347**	3978.00
B-545	036582	**05-404-348**	5847.00

BÜCHI

Rotary and Parallel Evaporation Systems

P-12 Multivapor* Parallel Evaporation System

Compact instrument for parallel evaporation of up to 12 samples under vacuum conditions; designed to eliminate the time constraint bottleneck that occurs during extraction, chromatography and reaction processes

- Heat samples separately in cylindrical transparent water baths
- Vigorous vortex induced by a horizontal orbital movement of heating plate to prevent boiling retardation
- Vacuum manifold contains individual sample connections which conduct vapors to condenser assembly of the rotary evaporator
- Ideal for high throughput labs
- Connect P-12 to your rotary evaporator and use the same condenser/vacuum assembly for two instruments
- Prepare samples in advance, store in evaporation rack
- Reduce environmental impact vs. nitrogen evaporators
- Samples are visible throughout evaporation
- Meets ISO 14000 guidelines
- Accommodate various vessel types with up to 30mL working volume
- Compatibility with modern fast extraction techniques such as PSE or ASE eliminates sample transfer steps
- Parallel evaporation of reaction samples in the same reaction tube

SYSTEMS INCLUDE:

- P-12 Mutivapor platform
- Crystal rack
- Adapter set specified
- Vacuum cover
- Specified condenser and receiving flask, plastic-coated
- 100-120V power supply

Other configurations are available; contact your Fisher Scientific Customer Service Representative for details.

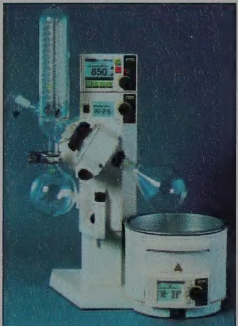
Rotavapor R-210 and R-215 Rotary Evaporators

Set the highest standards for ease of use and safety—provide a complete solution for all evaporator applications



Buchi R-215C Advanced 05-402-251

- Modular systems in Basic, Advanced and Professional configurations for distillation of all solvents
- Motorized quick-action jack raises and lowers evaporator
- Optional safety-coated glass protects operator
- Easy handling and fail-safe functionality
- Long-life sealing system reduces maintenance and cleaning time, increases efficiency
- Three-year warranty
- Extensive accessories
- Available with integrated vacuum controllers
- Choice of 7 condenser assemblies for numerous applications
- Handle flask sizes from 50 to 4000mL

See pp. 649 and 650 for a listing of popular configurations.

RII with Glass Assembly V, 05-402-287

RII Rotary Evaporators

For quick, gentle and economical evaporation procedures without cutting corners

- Manual quick-action jack
- 1300w heating capacity, control from 20° to 95°C
- 20 to 280rpm motor

SYSTEMS INCLUDE:

- Evaporator, manual lift and rotation control
- Glassware, specified condenser, 1L receiving flask
- 1L $ evaporating flask
- Heating bath

CORNING

Low Profile Cell Culture Flask

Frees up incubator space and gives you more cells with less subculturing

13-700-433

- 100cm^2 available growth area
- Rectangular with canted neck, corner cap for easy pouring and improved access to flask for pipetting or scraping
- Manufactured from optically clear virgin polystyrene
- Available with patented Corning* CellBIND* surface treatment for enhanced cell attachment or tissue culture treatment
- Vented cap contains a 0.2µm nonwettable membrane sealed to the cap, providing consistent, sterile gas exchange while minimizing risk of contamination
- Graduated
- 100% integrity tested
- Sterilized by gamma radiation and certified nonpyrogenic

Surface Treatment	Mfr. No.	Cat. No.	Case of 60

Baffled Polycarbonate Flasks with Caps

Baffles increase aeration for better growth, especially with insect cell lines and bacteria

13-700-432

- Increased aeration provides better cell growth, especially for bacteria and insect cell lines
- Erlenmeyer style
- Made from optically clear polycarbonate
- Graduated at 50mL intervals
- Sterilized by gamma radiation and certified nonpyrogenic
- Available with vent caps for applications requiring sterile gas exchange
- Two-position polypropylene plug seal cap (U.S. Patent No. 4,763,804) can be opened for gas exchange or closed for a liquid-tight seal

NOTE:

Non-baffled styles are also available in all sizes on our Web site.

CellBIND* Surface HYPERFlask* Cell Culture Flasks

Bar-coded and compatible with cell culture automation platforms

13-700-406

The novel Corning* HYPERFlask cell culture vessel offers 1720cm$_2$ growth area in the footprint of a traditional 175cm$_2$ flask. This high yield, high performance flask utilizes a multilayer gas permeable growing surface for efficient gas exchange

- CellBIND surface treatment increases oxygen content of the polymer surface, resulting in improved hydrophilicity and wettability for optimal cell spreading and attachment
- Rectangular polystyrene
- Growth Area: 1720cm
- Max. Working Volume: 560mL
- HDPE plug seal cap on a straight neck is designed for filling with growth medium
- Sterile

Disposable Spinner Flasks

Ready-to-use system comes with paddle and integrated magnet, eliminating the need for time-consuming assembly or cleaning and reassembly

07-201-153, 07-201-152 (left to right)

- Made of ISO 10993 polystyrene
- Comparable to conventional glass spinner flasks for growth of suspension cell lines and any attachment-dependent cultures using microcarrier beads
- Paddle size and height are optimized for each vessel size
- Magnet provides a smooth, even rotation at required speeds on any laboratory slow speed stirrer
- Heat buildup in the vessel is reduced by means of a specially designed flange that raises the vessel off the stir-plate surface
- Flared base provides extra stability and support

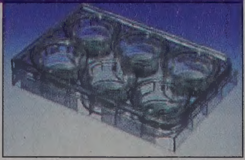
Transwell* Permeable Supports

Convenient, easy-to-use support devices for the study of anchorage-dependent and -independent cell lines



07-200-165

- Microporous inserts come preloaded in Tissue Culture Plates
- Available tissue culture treated in 6-, 12-, or 24-well formats
- Openings for pipet tips allow convenient addition and removal of media and samples from both compartments
- Patented self-centering design provides independent access to both apical and basolateral membranes of the cell monolayer
- Polycarbonate membranes are compatible with most organic fixatives and stains

APPLICATIONS:

Epithelial and endothelial cell culture; transport, migration/invasion, co-culture, and microbial pathogenesis studies

NOTE:

Additional Transwell products are available. Please visit our Web site for details.

Nonbinding Surface (NBS*) Microplates

Ideal for protein and nucleic acid binding at low concentrations, increasing assay signal-to-noise ratios

07-200-778 (top),
07-200-732

- Modified polymer surface is nonionic hydrophilic, minimizing bio-interaction within wells to reduce nonspecific binding and reagent costs
- Significantly reduces protein and nucleic acid binding to polymers, maintains enzyme activity, and inhibits adhesion of a number of cell lines
- Stable to aqueous solutions containing EtOH
- Use at temperature range of 4° to 37°C (39° to 99°F)
- Compatible with a wide range of plate readers, liquid handlers, and robotic systems

NOTE:

Additional NBS microplates are available. Please visit our Web site for details.

Square Polycarbonate Storage Bottles

Ideal for storage, mixing or sampling

13-700-412, -402, -400, -401

- Polycarbonate resin makes them more break resistant than other glass or plastic bottles
- 45mm size cap provides larger access for liquid transfer
- Screened graduations are easier to see when compared to molded
- Sterile; individually packaged
- Large marking spot
- Linear tear packaging
- Can be autoclaved once at 121°C and 15psi

INCLUDES:

Linerless, one-piece, autoclavable orange GL45 threaded polypropylene plug-seal caps

NOTE:

Repeated autoclaving weakens polycarbonate and is not recommended.

Timberline Analytical and Precision Balances

Easy operation, fast readouts, and reliability. Priced for those who need precision on a tight budget. Compact size takes up less space on the benchtop.

- Clear display and a keypad with large function keys
- Quick readouts using the latest weighing technology
- Toggle between two weigh units including grams, milligrams and ounces
- Automatic external calibration using a precision calibration weight (sold separately)
- Counting, percent weighing, formulation, average weighing
- RS-232 port standard for data transfer to printer or computer

WARRANTY:
Three years.

CERTIFICATIONS:
CE marked, CSA approved.

Repeater* stream and Xstream Pipetters

Repeater stream is suitable for all standard pipetting and dispensing applications. For added versatility, the Repeater Xstream can also perform titrations, sequential dispensing, and aspiration of supernatants. When used with Combitips Plus* tips, both systems form an unbeatable and essential lab tool for all applications.

Applications

- Electronic dispensing with programmable memory functions
- Contamination-free dispensing using the positive-displacement principle
- Ideal for viscous solutions (e.g., glycerol, oil) or liquids with high vapor pressure (e.g., acetone, ethanol)
- Dispensing in a long series

Features

- Automatic dispensing
- Rapid and ergonomic dispensing with motorized piston
- Single-button tip ejector
- Li-ion battery
- Function selection wheel
- Automatic Combitips Plus tip recognition
- IVD conformity

05-401-041

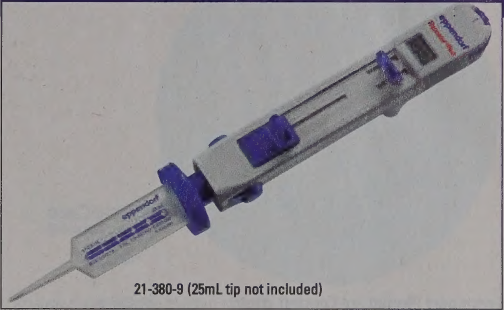
Repeater* Plus Pipetter

Offers expanded dispensing range and makes up to 100 repetitive deliveries.



21-380-9 (25mL tip not included)

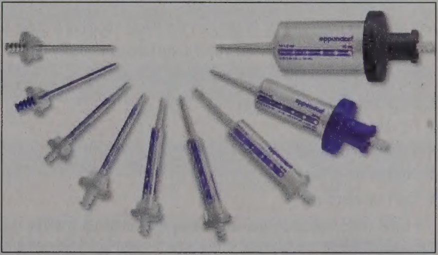
- Expanded dispensing range of 1.0µL to 10mL, including 12µL, 65µL, and 1.1mL
- Performs a greater number of successive deliveries (up to 100)† from a single aspiration of sample—further enhancing efficiency and reducing tedium
- Accuracy to ±0.3%; precision to ≤0.25%
- With 20 different volume settings for each of the nine Eppendorf Combitips* Plus tip sizes, fewer tips cover a given dispensing range
- Unit automatically recognizes the size tip in use and displays volume selection on the digital LCD, reducing dispensing errors
- Tip mounting is quick and easy; removal is hands-free, with a touch of the ejector button
- Choose from sterile and nonsterile Eppendorf Combitips Plus tips and Eppendorf Biopur* Combitips Plus tips

Description	Mfr. No.	Cat. No.	Each
Repeater Plus Pipetter	022260201	**21-380-9**	425.00
Carousel Stand Adapter	022261592	**21-380-2E**	9.75

† With dial setting of 0.5. In all, 20 volume selections (dial settings) can be made, from 0.5 to 10.

Eppendorf* Combitips Plus* Pipet Tips

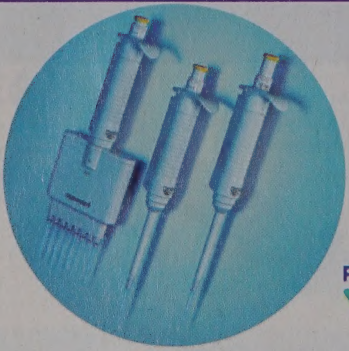
Tips function according to the positive-displacement principle, ensuring that the correct volume is dispensed with regard to the density and viscosity of the liquid used. The positive-displacement system provides safer dispensing of radioactive and toxic substances as well as solutions with high vapor pressure. No aerosols are formed.



- For use with Eppendorf Repeater* pipetters (original, Plus, Pro, stream and Xstream); and EDOS (automatic dispensing system)
- Available in nine volumes from 0.1 to 50mL
- Fine tip provides exact dispensing without additional pipet tip
- Polyethylene plunger and polypropylene cylinder make these tips ideal for use with aggressive reagents
- Choose from sterile and nonsterile Combitips Plus tips and Eppendorf Biopur* tips, which are certified sterile as well as pyrogen-, RNase-, DNA-, and ATP-free
- For the full selection of Combitips Plus tips, including pricing and ordering information, see p. 1444 of this catalog or visit our Web site.

PhysioCare Concept*

Eppendorf Research* pipetters, with their easy-to-use, two-button design, are a lab favorite all over the world. The volume display is magnified for better visibility, and the entire lower part can be easily removed for cleaning and autoclaving. Available in fixed-volume, adjustable-volume and multichannel models.



Eppendorf PhysioCare Concept criteria focuses on all relevant aspects of pipetting—the whole person and process, not just the hand or device. Eppendorf pipetters fulfill all of the following criteria:

- Integrated systems: Complete pipetter and tip program to fit any application
- Exceptional durability: Made of state-of-the-art materials
- Optimized form and function: Easy operation through all work steps
- Perfectly balanced: Fit comfortably in the hand, with models weighing up to 30% less than other brands
- Intuitive operation: Color-coded pipetter and tip matching system for easy identification
- Minimal user exertion: Minimize stress; manual models require up to 50% less pipetting force
- Simple maintenance: Easy to clean, autoclave and repair
- Total support: Certified and ready to use; calibration services also available

Saving precious energy

Our goal is to minimize strain on all affected muscle groups throughout the entire pipetting process. First, we strive to design lightweight pipetters. Our Eppendorf Research manual pipetters, for example, weigh up to 30% less than similar pipetters on the market. But total weight is only part of the equation. How weight is distributed is just as important. The weight of Eppendorf Research pipetters is optimally distributed to minimize stress to any one muscle area during the pipetting process.

Simplify your work: PhysioCare Concept

A lightweight pipetter that is easy on the human body is a great start; however, to achieve Eppendorf PhysioCare Concept quality it must address these tasks that are part of the pipetting process:

1. Selection of the pipetter
2. Tip attachment
3. Aspiration of liquid
4. Dispensing of liquid
5. Pipet tip ejection

The right combination of optimally designed elements ensures that features such as piston-stroke length, button location and pipet tip design and fit enable simple, yet highly effective and ergonomic pipetting.

Research* Multichannel Pipetters

13-688-501

Ideal for applications in immunology, cell culture, serology

Provide high performance and reliability in a multichannel format from 0.5 to 300µL. Innovative design features make everyday use more efficient, comfortable and strain-free.

Features

- Designed with reduced operating forces
- Larger, separate tip-ejector button
- Manifold can be rotated 360° to let user find the most comfortable pipetting position
- Rounded grip, reshaped operating button and longer hand rest for better, more ergonomic handling
- Lower portion of pipetter can easily be removed, cleaned and autoclaved

ORDERING INFORMATION:
Compatible with Eppendorf* pipet tips (epTIPS). Also compatible with all Fisherbrand* universal-fit tips, Extended Length, Gel Loading, Large Orifice and Low-Retention tips. Eppendorf pipetters are color coded (operating button and volume display) to easily recognize tip sizes in color-coded Eppendorf tip racks.

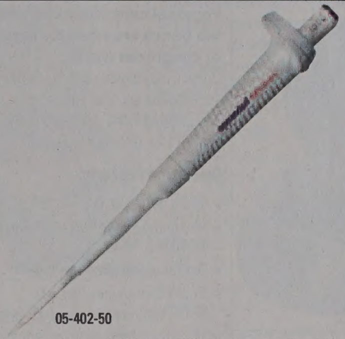
Reference Series 2000 Adjustable-Volume Pipetters



05-402-50

Compact design includes a single, multifunctional button that controls both pipetting and tip ejection

Designed for pipetting accuracy, a smooth stroke, and superior operating comfort.

- Eppendorf pipetter/tip system ensures outstanding accuracy and precision
- Ejection sleeve can be removed to fit into smaller vessels
- Smooth-running piston is corrosion-free and chemically resistant
- Lateral volume locking safeguards volume selected
- UV-resistant and completely autoclavable without any impairment of accuracy or precision
- Supplied with individual labels for identification
- User calibratable

CERTIFICATION:

Supplied with individual Certificate of Conformity

WARRANTY:

Three year

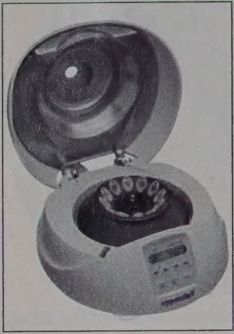
eppendorf North America

Microcentrifuges

Provide customers with choices from 12 to 30 tubes and speeds from 12,000×G up to 30,130×G. Refrigerated and 230V versions also available.

MiniSpin* and MiniSpin plus Microcentrifuges



Personal centrifuges for every lab bench are ideal for research or classroom work.
Quickly and easily perform routine separations such as pelleting precipitated DNA. Fit in just half a square foot of benchtop space.

Operating Features

- Capacity: 24mL (12 × 2.0mL)
- Maximum speed/force: 14,500rpm/14,100×G
- Digital speed/time display
- Timed, continuous-run, or SHORT-spin modes
- Memory retains most recent settings for repeatable runs

Safety Features

- Lid interlocking system prevents accidental opening during operation
- Natural rotor airflow minimizes heat buildup to protect samples
- Brushless motor runs quietly (<60dB)

Available Rotors

- Aluminum rotor for 12 × 1.5/2.0mL tubes with metal lid is suitable for spinning miniprep/spin columns (included)
- Accepts adapters (05-400-124, -125, -126; sold separately) for 0.2 to 0.5mL tubes
- PCR strip rotor for 2 × 8-strip PCR tubes

MiniSpin

- Maximum speed/force with supplied rotor: 13,400rpm/12,100×G
- 30-minute timer can be set in 15 sec. increments
- SHORT-spin mode fixed at maximum speed

MiniSpin plus

- Maximum speed/force with supplied rotor: 14,500rpm/14,100×G
- Automatic rpm/RCF conversion
- 99-minute timer (15 sec. increments) with continuous mode option and variable-speed SHORT-spin mode

Electrical Requirements	Mfr. No.	Cat. No.	Each
MiniSpin			
115V 60Hz	022 62 010 0	**05-401-09**	1199.00
MiniSpin plus			
115V 60Hz	022 62 020 7	**05-401-07**	1399.00

Model 5418 Microcentrifuge

05-403-90

Compact and economical microcentrifuge features a certified aerosol-tight rotor (included) and a unique, contoured rotor bowl designed for quiet operation.

- Capacity: 36mL (18 × 1.5/2.0mL)
- Maximum speed/RCF: 14,000rpm/16,873×G
- Full-digit speed display
- Timer: 30 sec. to 9 hr., 59 min., plus HOLD for continuous run
- Whisper-quiet—even when running without the rotor lid
- Innovative lid design with soft-touch, one-finger closure and automatic opening at end of run for quick sample removal
- Automatic 1-button rpm/RCF conversion
- Supplied with 18 × 1.5/2.0mL aerosol-tight rotor with "click-lock" lid for fast and secure closing

Electrical Reqts.	Mfr. No.	Cat. No.	Each
120V 60Hz	022 62 030 4	**05-403-90**	1875.00

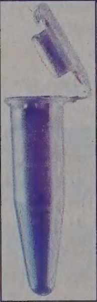
ACCESSORIES



05-402-25

Eppendorf* 1.5mL Safe-Lock Microcentrifuge Tubes

- Positive sealing cap snaps shut for sample incubation, storage, and transportation
- Flat-top cap provides an ideal writing surface for sample identification
- Volume graduation scale
- Rated to 30,000×G
- Choose from six colors, including amber for light-sensitive samples
- 0.5 and 2.0mL sizes available, see p. 1865.

Meet the new laboratory standard for Silence | Speed | Simplicity*—Eppendorf* Microcentrifuges.

Model 5424 Microcentrifuges

05-403-92

Compact 24-place microcentrifuges with advanced features provide silence, speed and simplicity

- Capacity: 48mL (24 × 1.5/2.0mL)
- Max. speed/RCF: 15,000rpm/21,130×G
- Full-digit speed display
- Variable speed control from 100 to 15,000rpm in 100rpm increments
- Timer: 30 sec. to 9 hr. 59 min. with HOLD for continuous run
- OptiBowl* design—whisper-quiet operation, even without rotor lid
- Innovative lid features soft-touch, one-finger closure and automatic opening at end of run for quick sample removal
- Convenience features include: Adjustable volume (including MUTE), "end-of-run" alarm, SOFT-brake for delicate samples, and programmable SHORT-spin set at desired speed
- "At set rpm" function to start timer when set speed is reached for better reproducibility
- Parameter lock prevents accidental changes
- Equipped with 24 × 1.5/2.0mL certified aerosol-tight rotor with lid

Choice of control systems

- Rotary knob version allows fast parameter settings
- Keypad version has a smooth, easy-to-clean surface

Rotor options (sold separately)

- 24 × 1.5/2.0mL tubes rotor (comes standard with "Models with Rotor" 05-400-005 and 05-403-92)
- Certified aerosol-tight rotor with lid for 24 × 1.5/2.0mL tubes with special PTFE coating for improved chemical resistance and easy cleaning (50-400-010)
- 18-place miniprep spin column rotor with lid (05-400-012)
- 4 × 8-tube PCR strip rotor with lid (05-400-014)

Model with Rotor	Keypad Control	Rotary Knob Control

Model 5430 Microcentrifuges

05-400-016

Top-of-the-line 30-place models achieve forces over 30,000xG and spin 0.2 to 50mL tubes as well as microplates

- Capacity: 300mL (6 × 50mL); 60mL (30 × 1.5/2.0mL); or 2 microplates
- Max. speed/RCF: 17,500rpm/30,130×G
- Variable speed control from 100 to 17,500rpm in 100rpm increments
- Timer: 30 sec. to 99 hr. 59 min. with HOLD for continuous run
- Compact footprint: 16½D × 13W × 10"H (42 × 33 × 25cm)
- Large backlit LCD with Windows*-like menus and pictogram symbols

Menu Options

- Save up to 50 programs, with five keys for routine programs
- Selectable menu language (English, Spanish, French or German)
- Advanced options include: Soft-touch one-finger lid closure, SOFT-brake and "at set rpm" functions, fully adjustable end-of-run alarm, adjustable SHORT-spin, parameter lock

Rotor Options (sold separately)

- For 30 × 1.5/2.0mL tubes, aerosol-tight rotor with lid spins to 20,817×G (05-400-021)
- For 30 × 1.5/2.0mL tubes, non-aerosol-tight rotor with lid spins to 20,817×G (05-400-019)
- For 24 × 1.5/2.0mL tubes, high-speed aerosol-tight rotor with lid spins to 30,130×G (05-400-023)
- For 24 × 1.5/2.0mL tubes, aerosol-tight rotor for miniprep spin columns with lid spins to 19,090×G (05-400-025)
- For 6 × 15/50mL (conical) tubes, rotor with lid and adapters spins to 7197×G
- For 18 × 17mm dia. cryogenic tubes, rotor with lid spins to 7970×G (05-400-027)
- 8 × 8-tube PCR strip rotor with lid spins to 13,543×G
- 2-place microplate rotor for plates up to 29mm H with lid spins to 2204×G (05-400-031)

Description	Electrical Reqts.	Mfr. No.	Cat. No.	Each

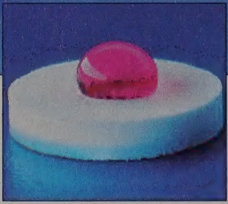
ep DualFilter TIPS

STOP AEROSOLS! New ep DualFilter TIPS with their unique two-phase filter protection provide the perfect shield against contamination. Their soft, hydrophobic filters consist of two visible phases with different pore sizes and fit perfectly into the pipette tip cone. This new system outmatches conventional filters with an absorption of aerosols and biomolecules. Rely on it!

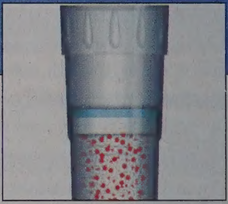
epTIPS
eppendorf Sterile Tips eppendorf Sterile Tips eppe

Contamination-free handling—thanks to the practical box system

Unique, two-phase filter protection



Hydrophobic filter surface provides maximum recovery



Only ep Dualfilter TIPS provide reliable protection against even the finest impurities

Convincing benefits of ep DualFilter TIPS:

- Double protection by two filter phases
- Maximum safety for pipette and sample
- Ultimate absorption of aerosols and biomolecules
- Free from PCR-inhibiting additives and filter material particles
- Soft, flexible tip cone provides a better seal to the pipette
- Patent-pending technology
- Sterile, pyrogen-free, and Eppendorf PCR clean
- IVD conformity

Reliable, reproducible, high-precision pipetting

- ep DualFilter TIPS provide contamination-free handling, thanks to the practical box system
- The hydrophobic filter surface provides maximum sample recovery

CERTIFICATION:

ep DualFilter TIPS are manufactured under strict quality standards in an ISO-9001-certified production process. Batch-related certificates are available upon request.

ORDERING INFORMATION:

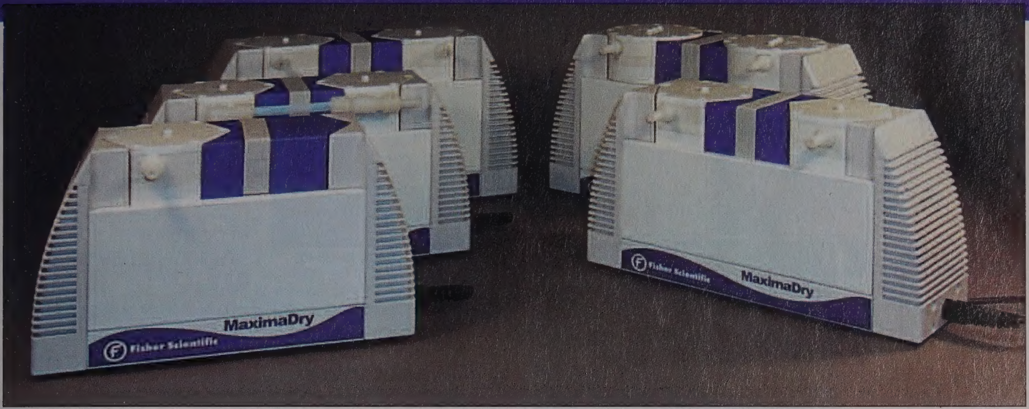
MaximaDry* Oil-Free Vacuum Pumps

Clean, reliable, oil-free vacuum pumps are ideal for use with any brand rotary evaporators, gel dryers, filtration flasks and manifolds, vacuum ovens and concentrators



13-880 Series

Quiet, reliable operation without the hazards of handling pump oil or contaminated water. Excellent replacement for rotary vane pumps and water aspirators, especially in applications where corrosive vapors are encountered.

Two-stage vacuum to 1.5 torr

- Withstand aggressive gases and vapors—can be used with aggressive solvents without the risk of damaging the pump
- Single-piece diaphragm and molded pumpheads are made from PTFE to provide corrosion resistance
- High-flow multiport valves are made from tough Kalrez* elastomers to withstand pumping heavy solvent vapors and liquid condensate without a loss in performance
- Fan-cooled (TEFC) motor is rated for continuous operation and never needs lubrication
- Compact design fits easily on a benchtop or in a fume hood
- Setup and disassembly are quick and easy and do not require any special tools
- Plug into standard electrical outlet; no hardwiring required
- ⅜" I.D. tubing required (sold separately)

Vortex Mixers

Durable, rugged vortexers offer exceptional versatility and value

Fisher Scientific
PULSING VORTEX MIXER

02-215-375

Fixed-speed Mixer

- One-touch unit for high-speed mixing at 3200rpm
- Activated by applying pressure to mixing head

Analog Mixer

- Variable analog speed control from 100 to 3200rpm

Digital Mixer

- Ideal for applications demanding repeatable results
- Variable speed control from 500 to 3000rpm
- Touch keypad controls and LED display for speed and time

Pulsing Mixer

- Powerful pulsing vortex provides excellent cell disruption in minutes
- Pulse feature reduces heat generation while delivering more effective mixing
- Variable speed control from 500 to 3000rpm

08-757-13

- Top and bottom edges are squared off (not rounded) to provide a firm, sure grip
- Bottom is flat so medium spreads evenly over the entire dish bottom
- Three venting ribs built into the underside of the lid prevent buildup of condensation that would drip onto the media
- Lid skirt is flared just enough so that it can be replaced quickly after streaking
- Lid fits loosely enough to provide air exchange, yet is tight enough to reduce risk of aerial contamination
- Place lid upside down on dish to close off dish from outside environment

Beveled Ridge Petri Dishes

- Ideal for automated filling systems
- Remove dishes easily from the center of a stack
- 150 × 15mm Kirby-Bauer dish has a larger capacity for antimicrobial susceptibility testing

Raised Ridge Petri Dishes

- Stack high and remain stacked
- Minimum of slipping, sliding, and resulting scratches

Outside Dia. × H	Cat. No.	Case of
Beveled Ridge		
100 × 15mm	**08-757-13**	500/147.10
150 × 15mm	**08-757-14**	100/149.40
Raised Ridge		
100 × 15mm	**08-757-12**	500/147.10

Fisherbrand® Media-Miser* Dishes

Space-saving, stackable, and sterilized

Clockwise from top: 08-757-14G, 08-757-11YZ, 08-757-13A

These disposable polystyrene dishes are smaller than standard Petri dishes so less media is used.

- Clear tops for distortion-free viewing
- Venting ribs prevent condensation
- Lids fit snugly when turned over, to reduce the risk of aerial contamination
- Packaged in cut-apart polyethylene sleeves, 20 per sleeve
- Radiation sterilized

35 × 10mm Dishes

- Raised, straight ridge around the top permits high stacking with little or no slipping, sliding, or scratching

60 × 15mm Dishes

- Raised, straight ridge for high stacking

95 × 15mm Dishes

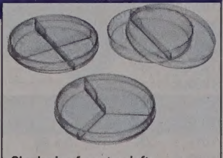
- Raised, beveled ridge around the top for easy removal from a stack

Dia. × H	Percent Media Saved[1]	Cat. No.	Case of 500
35 × 10mm	11	**08-757-11YZ**	174.04
60 × 15mm	N/A	**08-757-13A**	171.20
95 × 15mm	11	**08-757-14G**	170.90

Fisherbrand® Compartmentalized Dishes

Select from 2-, 3-, or 4-section plates with numbered sections

- Radiation sterilized
- Size: 100 × 15mm
- Supplied 25 per polyethylene sleeve

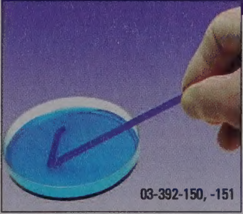


Clockwise from top left: 08-758-2, 08-757-150, 08-758-3

Description	Cat. No.	Case of 500
I Dish (2 sections)	**08-757-150**	260.25
Y Dish (3 sections)	**08-758-3**	274.75
X Dish (4 sections)	**08-758-2**	272.75

Fisherbrand® L-Shaped Cell Spreaders

Ideal for even spreading of bacterial cultures



03-392-150, -151

- Disposable
- Smooth L-shaped end reduces risk of damaging agar
- Pre-sterilized blue polypropylene

Cat. No.	Case of
03-392-151	100/34.98
03-392-150	500/93.48

Fisherbrand SureOne* Pipet Tips

New, improved Fisherbrand SureOne Reload system offers a full line of universal fit pipet tips in both filtered and nonfiltered configurations

Fisherbrand
SureOne

- All racked sterile tips are shrink wrapped and certified free of RNase, DNase, DNA, ATP
- Pyrogen, PCR inhibitor and bioburden free
- All nonsterile racked and bulk nonfiltered tips are certified free of RNase, DNase, DNA
- Reload packaging format reduces plastic waste by 52%
- Unique reload packaging design saves 58% bench space vs. racked packaging
- Lot traceable—all inserts contain the Fisherbrand part number, tip volume, lot number
- Multichannel design; all inserts are 96 well format
- Reversable lid acts as a hinged rack or a lift-off lid
- Inserts are easy to place into and remove from rack
- Insert clips into rack for a very secure fit, preventing spilling of tips

ORDERING INFORMATION:

Packaging options include bulk, rack, rack sterile and reload. Also available in convenient removable/stackable reload decks that snap into empty racks without the need for special tools or precision hole alignment (visit our Web site).

Aerosol Barrier Tips

- DNase-/RNase-free; sterile tips are also pyrogen-free
- Filter eliminates aerosol cross-contamination
- Tips allow for noncontaminated sample recovery

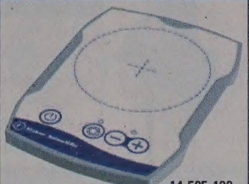
Fisher Scientific

Lab Disc Magnetic Stirrers

Ultra-flat and compact personal stirrer speeds to 1500rpm



14-505-122

Can reverse direction of rotation automatically every 30 seconds to ensure better mixing.

- General-purpose mixing up to 800mL
- Wear-free drive with no moving parts
- Chemically resistant polyester set-up plate and casing
- Slip-proof stand
- Accepts magnetic stir bars up to ⅛" (30mm) long
- Operates on 12V via plug-in transformer
- Requires stir bars and stirring vessel (sold separately)

No. of Stirring Positions	One
Stirring Capacity	800mL
Speed Range	15 to 1500rpm
Top Plate Dia.	3½" (9cm)
Overall L × W × H	6¼ × 4⅜ ×½" (16 × 11 × 1.2cm)
Electrical Requirements.	115V 60Hz
Cat. No.	**14-505-122**
Each	172.85

IKA®

Ultra Turrax* Tube Disperser Workstation

The first closed homogenizing system for stirring, milling and dispersing

14-259-600

Easy to operate for quick, one-time sample preparation with no cleanup. Disposable tubes lock into place and remove quickly with a simple twist.

- Speed range: 300 to 6000rpm
- Continuously variable speed control
- Digital display
- Accommodates sample volumes from 2 to 15mL
- Hygienic—Tubes contain samples securely
- Anti-locking function ensures consistent results
- Low-voltage (24V) for added safety

INCLUDES:

Tube drive unit, two DT-20 stirring tubes, two ST-20 dispersing tubes, two BMT-20G/S grinding/milling tubes, ceramic and stainless-steel grinding balls, power supply, carrying case

Electrical Requirements	Cat. No.	Each
115V 50/60Hz, 0.8A	**14-259-600**	524.00
230V 50Hz, 0.8A	**14-259-601**	524.00

IKA®

Calorimeters

Choose the C2000 for a high level of automation and simple handling or the C200 for teaching and training applications

C2000 Analytical Calorimeter

14-505-2000

Determine gross calorific values of liquid and solid samples using isoperibolic (static jacket) or dynamic (reduced-time) working methods.

- Water handling system automatically tempers, fills, and empties inner vessel
- Automatic oxygen filling of decomposition vessel
- Automatic sample ignition
- C 2000 measuring cell with control unit
- KV 600 Digital Cooling Water Supply to provide cooling water to the calorimeter
- Basic Version 1 Package has C5010 Decomposition Vessel
- Basic Version 2 Package has C5012 Halogen-resistant Decomposition Vessel

Description	Electrical Requirements	Mfr. No.	Cat. No.	Each
C 2000 Calorimeter Basic Version 1 Package	115V 50/60Hz	8801891	**14-505-131**	19,465.80
	230V 50/60Hz	8801890	**14-505-132**	19,465.80
C 2000 Calorimeter Basic Version 2 Package	115V 50/60Hz	8801991	**14-505-133**	21,317.00
	230V 50/60Hz	8801990	**14-505-134**	21,317.00

C 200 Calorimeter System

14-505-200

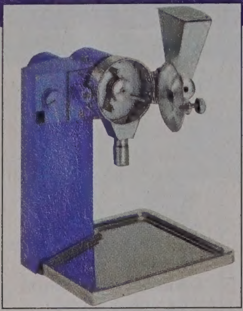
Space-saving and economical combustion calorimeter for determining gross calorific values of liquid and solid samples

- Semi-automated water handling and manual oxygen filling
- Four different working methods—isoperibolic, dynamic, manual and time controlled—for ideal adjustment of different operating tasks
- Ignition and calculation of gross calorific done automatically in modes other than manual
- Manual operating mode features user-activated ignition and end of measurement with calculations performed by user

Description	Mfr. No.	Cat. No.	Each
C 200 Calorimeter System, 115V	8802501	**14-505-200**	9840.00
C 200 Calorimeter System, 230V	8802500	**14-505-201**	9840.00

IKA® MF10 Micro Mill

Universal grinder is designed for continuous operation and inline processing



Cutting/grinding head suitable for fibrous substances, impact grinding head for brittle materials.

- Grinds samples at a maximum rate of 11 lb./hr. (5kg/hr.)
- Maximum feed particle size: 10mm
- Powerful drive (3000–6500rpm)
- Easy-to-clean stainless-steel work surface
- Stainless-steel cutter
- Overload protection
- Door-contact safety device
- Requires at least one head and one sieve for operation (order separately), call your Fisher Scientific Customer Service Representative

ORDERING INFORMATION:

Dimensions: $12\frac{3}{16}$L × 14⅝W × 22⅜"H (31 × 37.1 × 56.8cm); for 115V. Available accessories: Cutting Grinding Head for fibrous substances (14-259-143), Impact Grinding Head for brittle substances (14-259-144), Stainless-steel sieves in hole sizes from 0.25 to 3mm (see 14-259-156); all sold separately.

Electrical Requirements	Cat. No.	Each
115V 50/60Hz	**14-259-139**	1693.65

IKA® RCT Basic IKAMAG* Safety Control Magnetic Stirrer

Offers medium-viscosity stirring power with advanced heating protection for unsupervised operation

14-261-100

- Integrated temperature control
- Precise temperature/speed setting via digital display—even when turned off
- Adjustable safety circuit for heating plate temperature
- Digital readout
- Hot-top indicator
- Highly polished aluminum alloy heating plate for optimal heat transfer
- DIN 12878 bushing for connecting a contact thermometer
- PT 1000 temperature sensor

Stirring Capacity	5 gal. (20L)
Speed Range	50 to 1200rpm
Heating Temperature Range	50 to 310°C
Heat Output	600w
Top Plate Dia.	5¾" (135mm)
Overall L × W × H	10¾ × 6½ × 3¼" (27.5 × 16.5 × 8.5cm)
Electrical Requirements	115V 50/60Hz
Cat. No.	**14-261-100**
Each	716.50

IKA® RW 20 Digital Stirrers

For stirring liquid volumes up to 20L and 10,000mPas

14-505-600

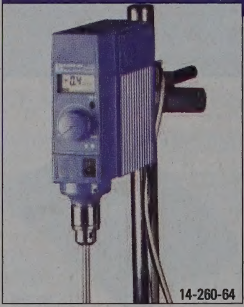
Sturdy, slimline, ergonomic design. Sold as kit with stirrer and stand.

- Stepless knob speed control and LED digital readout
- With constant power drive for continuous operation
- Two speed ranges for universal use (see table)
- Power Input/Output: 72w/35w
- Chuck dia. range: 0.5-10mm
- Hollow shaft inner dia.: 10.5mm
- Push-through agitator shafts
- Dimensions: 8⅜D × 34⅝W × 11⅝"H (21.2 × 88 × 29.4cm)
- Includes R 1342 propeller stirrer, R 182 Boss Head Clamp, and R 1826 Plate Stand

Electrical Requirements	Speed Range 1	Speed Range 2	Cat. No.	Each
115V 60Hz	72-600rpm	288-2400rpm	**14-505-600**	614.00
230V 50Hz	60-500rpm	240-2000rpm	**14-505-601**	614.00

IKA® Eurostar Power Control-Visc Stirrer

Medium- to high-viscosity stirrer with enhanced features



14-260-64

- Quiet 130w motor with push-through agitator shafts and electronic safety circuit
- Smooth-start design prevents splashing
- Analog interface for recording speed and torque, plus RS-232-C interface
- Labworldsoft* software to control and document speed and torque parameters via PC
- Overall dimensions: 7½D × 3⅛W × 6⅞"H (19 × 7.9 × 17.5cm)
- Electrical Requirements: 115V, 50/60Hz
- Digital torque display
- Variable speed control from 50 to 2000rpm/Viscosity to 50,000mPas
- Stirring capacity: 10⅝ gal. (40L)
- Maximum torque at chuck: 60Ncm
- With PC-based control/recording software

INCLUDES:

Stirrer unit, stainless-steel chuck and key, cord and plug, instruction manual, tool kit. Kits add Plate Stand, Boss Head (14-259-83), and Strap Clamp (14-259-166).

Description	Cat. No.	Each
Stirrer	**14-260-64**	1659.50
Stirrer Kit	**14-259-212**	2289.90

*Trademark. See Trademark Reference.

Prices subject to change.

IKA® Big Squid Magnetic Stirrers

Colorful single-position stirrers, for volumes up to 1.5L

- Variable electronic speed control from 0 to 1500rpm
- Chemical-resistant glass top surface measures 6¼" dia. (16cm)
- Available in assorted colorful designs

Style	Cat. No.	Each
Chameleon	**14-259-267**	215.30
Fish	**14-259-266**	215.30
Froggy	**14-259-265**	215.30
Kiwi	**14-259-682**	217.22
Orange	**14-259-681**	217.22
Pineapple	**14-259-679**	217.22
Star	**14-259-264**	215.30
Strawberry	**14-259-680**	217.22

LOOKING FOR MORE IKA* COLOR SQUID STIRRERS?

Snazzy compact stirrers handle volumes up to 800mL! With four new styles. You'll find them on p. 1741.

IKA® IKAMAG* RET Control-Visc Magnetic Stirrer

Safety magnetic stirrer with heat, for stirring up to 5 gal. (20L) at speeds up to 1100rpm.

Features fuzzy logic control and microprocessor technology for maximum accuracy.

14-259-206 Stirrer Kit

Operating Features

- Digital display shows all functions
- RS-232-C and analog interfaces
- Temperature of contents controlled by sensor (Cat. No. 14-260-27, order separately [included in kit version])
- Maximum load: 55 lb. (24.9kg)

Operating Modes

- Variable control—allows user to change setpoints during operation
- Memory control—automatically returns stirrer to last selected setpoint
- Safety mode—locks in setpoints to prevent accidental changes

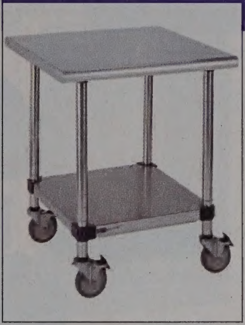
INCLUDES:

Stirrer and Labworldsoft* 2.6 Windows*-based software (Allows user to control, regulate and document temperature, speed and viscosity trend parameters); kits add sensor and mounting hardware

Description	Cat. No.	Each
Stirrer	**14-260-29**	1418.60
Stirrer Kit	**14-259-206**	1859.40

InterMetro Stainless Steel Mobile Tables

Tables are designed specifically for long life in laboratory environments



- Stainless steel construction throughout provides corrosion-proof performance
- Tables feature smooth surfaces that are easy to clean; mobile units can be easily moved to clean behind table area
- Casters must be ordered separately, based on customer requirements and application
- Visit our Web site for additional accessories including shelves, keyboard trays, and drawers

Fisher Scientific

Isotemp* Digital-Control Water Baths

Programmable, digital, dual-temperature control

15-462 Series

Ideal for industrial, clinical, pharmaceutical, or biomedical procedures.

- Temperature range from ambient to 100°C
- Microprocessor PID control
- Multiple built-in safety features
- Low-profile design for easy access

Controller Features

- PID control for ±0.24°C uniformity, ±0.5°C accuracy/stability at 37°C
- Display shows °C or °F; easy to read from across the room

Safety Features

- Low profile and front-panel controls for easier access, safer operation
- Dual thermostats guard against thermal runaway
- Covers have fins that keep hands away from hot vapors
- Covers stay open at 90° or lift off completely for large glassware
- Heating elements will not burn out if bath accidentally runs dry

Design Features

- Corrosion-resistant exterior; tough, easy-to-clean acrylic enamel coating
- Temperature-resistant plastic rim insulates, resists leaks, keeps its shape and won't dry out or crack like caulked seals
- Exterior stays cool even after hours of operation
- Deep-drawn, stainless-steel reservoirs and perforated sample trays prevent leaks, guard against rust and contamination
- Rounded reservoir corners and sample trays with finger holes allow for easy removal, make cleaning easier

Model Selection

- **Shallow-form Model 202S** is perfect for heating samples in microcentrifuge tubes and for other molecular-biology procedures
- **Model 215** features two chambers with separate controls
- **Models 220 and 228** have movable control panel that mounts on long or short side of bath
- **Models 210, 215, 220 and 228** include drain pump to empty reservoir

All models listed operate on 120V 50/60Hz.

Thermo SCIENTIFIC

AquaTec Water Preservation Cell

Prevents microbe contamination in CO_2 incubators and water baths for up to six months

Thermo
SCIENTIFIC

- Protects your valuable samples from waterborne contaminants, without harsh chemicals
- Simply place cell into water reservoir of any CO_2 incubator or water bath
- Proven effective up to six months against bacteria, viruses, molds and fungi
- Safe to handle—requires no gloves and no special disposal protocol
- Self-regulates to maintain effectiveness regardless of water level
- Easy-to-use in equipment from any manufacturer
- Comes with suction cup for easy mounting on reservoir wall at your option
- Replacement reminder assures uninterrupted water protection
- Come in pack of four cells.

Cat. No.	Pack of 4

Fisher Scientific

Isotemp* Plus Lab Refrigerators

Microprocessor-controlled temperatures in a choice of capacities and styles

Fisher Scientific* Isotemp Plus laboratory refrigerators are designed for economical sample preservation at temperatures from 1° to 12°C (33.8° to 53.6°F). Sizes range from 23.1 to 74 cu. ft. for maximum storage flexibility.

- Microprocessor controlled temperature in °C or °F using interior control with ±3° average temperature stability
- Exterior-mounted ½" (1.3cm) LED display with 0.1° temperature resolution
- White enamel-coated steel cabinets, stainless-steel interiors for durability and functionality, easy cleanup and disinfection, and corrosion resistance
- Choice of one, two or three solid or glass doors—all with key locks
- Solid doors are hinged, white enamel-coated steel
- Thermopane* glass doors (hinged or sliding) provide easy access and visual inventory control
- Sliding doors require no swing-out space—a valuable benefit in high traffic or narrow areas
- Interior fluorescent lighting with exterior light switch
- Keyed ON/OFF power switch
- CFC-free R134A refrigerant and polyurethane insulation
- Automatic defrost

Fisher Scientific

Isotemp* Ultralow-Temperature Undercounter Freezer

No need to store your valuable samples down the hall. Get the convenience and security of Fisher Scientific's new upright, personal-sized Isotemp ultralow-temperature freezer, for on or under your lab bench, or stacked two high.

Fisher Scientific
isotemp

14-278-36

- Temperature range: -86° to -50°C, with control in 1° increments
- Capacity: 3.6 cu. ft. (101L)
- Maximum box capacity: 60 × 2", 36 × 3", 24 × 4"
- User-programmable temperature and alarm settings
- Visual/audible high/low temperature alarms adjustable in 1° increments
- Battery backup with indicator for monitoring in event of power loss
- Control system S.M.A.R.T software allows service to diagnose freezer issues
- Remote contacts provide connection to external, user-supplied alarm monitoring system

Refrigeration System

- Two-stage sealed hermetic cascade system provides years of worry-free operation
- Environmentally friendly CFC/HCFC-free refrigerant
- Two commercially available low-noise, heavy-duty compressors for quiet in-lab operation

Construction

- Powder-coated steel exterior and stainless-steel interior for easy cleaning and increased durability
- Space-saving vacuum insulation panel technology maximizes storage capacity while minimizing footprint
- Two internal compartments with inner doors and high-efficiency seals prevent cold air loss, reduce energy consumption
- Heated vent with plunger to clear icing prevents vacuum formation, allowing the door to be easily opened repeatedly
- Lock and key on outer door for added security
- Two access ports for external probes or optional CO_2/LN_2 backup system

ORDERING INFORMATION:

Dimensions: 32⅚H × 35½W × 22¼"D (83 × 90 × 56.6cm). Shipping weight: 256 lb. (235kg). 115V 60Hz single phase. Optional inventory boxes and racks, backup systems and voltage stabilizer available. Contact your Fisher Scientific Customer Service Representative for more information.

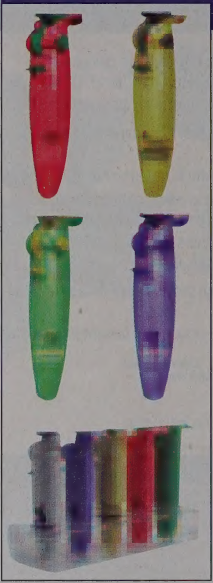
JENCONS

Smoothie* Pipet Fillers

Exceptionally smooth, controllable thumb action



03-692-200

Unique range selector allows you to select from two dispense resolutions for maximum accuracy. One range setting delivers fast filling with optimal accuracy when used with 10 to 25mL pipets; the other setting is for use with pipets from 1 to 10mL where accuracy of fill can sometimes be difficult to control.

- Comfortable and simple to use
- Precise and accurate pipetting
- Compatible with blow-out, TD (to deliver) or gravity-dispense pipets
- Eliminate the need to use a range of different sized pipet fillers for a variety of volumes dispensed
- Fit pipets from 1–25mL
- Removable and autoclavable silicone pipet holder
- Acrylic stand available to hold up to five Smoothies
- Choose from five colors, each with its own subtle fragrance

Description	Color	Mfr. No.	Cat. No.	Each
Vanilla Smoothie	White and blue	475-360	**03-692-200**	30.00

Polystyrene Disposable Serological Pipets

Sterile, nonwettable pipets offer a tolerance of ±2% at full volume and have plug-in mouth end

- Two pipet styles are available: one with magnifier stripe and one without
- Each pipet lot is tested for sterility, accuracy and endotoxin level
- Calibrated "To Deliver/Blow Out"
- Certified nonpyrogenic with an endotoxin level less than 0.5EU/mL following USP XXII Bacterial Endotoxins Test (85).

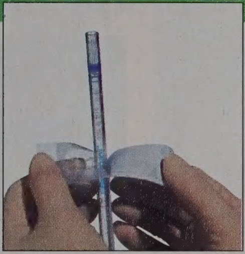
Serological Pipets with Magnifier Stripe

Ideal for tissue culture work

- Black magnifier stripe runs lengthwise along pipet making meniscus obvious at arm's length—reducing reading errors
- Pipets have improved optical clarity—high-contrast black markings make volumes easier to read
- 5, 10, 25, and 50mL pipets have ascending and descending graduations; plus, improved tip design on 25 and 50mL pipets increases the effect of surface tension to minimize dripping
- Color coding on each pipet and on inner bags for multipack pipets makes it easy to spot the size you need

ORDERING INFORMATION:

Inner bags are recyclable LDPE; outer boxes also are recyclable. **Individually wrapped pipets** are ideal for small-volume use requiring sterility and are available in either a clear, durable all-plastic wrap, or a color-coded paper/plastic wrap for reduced static cling. **Multipack** for larger-volume use permits easy access to several pipets at a time without contaminating unused pipets.



13-678-11 Series pipets have color-coded, transparent paper/plastic wrappers for easy identification and tear-through.

Standard Serological Pipets

Color-coded pipets and packaging permit easy identification by size using ISO standard colors

- Negative graduations on all sizes
- Ascending and descending graduations on all but the 1 and 2mL sizes
- Recyclable outer packaging

COMPLIANCE:

Designed from ASTM* E 934; conform to ASTM E 1380 for color coding.

ORDERING INFORMATION:

Available in multipacks, which permit easy access to several pipets at a time without contaminating unused pipets. Outer packaging is recyclable.

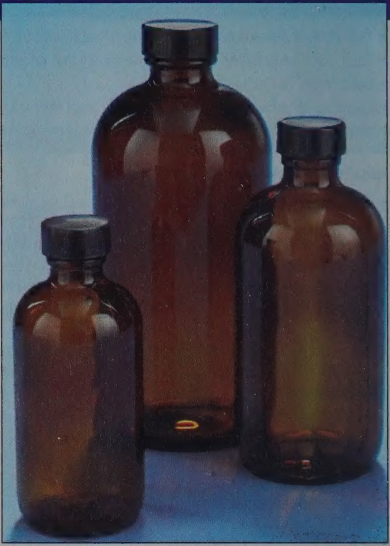
Type III Glass Boston Rounds

Soda lime storage containers combine quality and economy. Choose from Convenience Packs, Bulk Packs, or Pallet Packs in a variety of sizes and cap/liner combinations.

Kimble* storage containers come in a wide range of configurations to handle your workflow. The broad product portfolio includes glass containers and closures in many different shapes and cap/liner combinations. The selection of cap liners includes: Pulp/Vinyl, Tinfoil, Solid PE, PTFE-Faced LDPE Foam, 14B White Rubber, and Taperseal LDPE. Bottle sizes include 30mL, 60mL, 125mL, 250mL, 500mL, 1000mL. For unsurpassed selection, performance and value, choose Kimble.



Kimble Amber Boston Rounds

PACKAGING OPTIONS:

Convenience Packs

- Caps assembled
- Corrugated dividers
- Quantities of 12 to 48 per pack
- Variety of cap liners

Bulk Packs

- Caps bagged separately
- Shrink wrapped glassware
- Quantities of 12 to 432 per pack
- Variety of cap liners
- Bottles also sold without caps

Pallet Packs

- Shrink wrapped on pallets
- Cardboard dividers
- Larger quantities
- Caps not included

Kimble Phenolic Caps are:

- Temperature tolerant
- Compatible with wide range of chemicals
- Dimensionally stable

FISHER SCIENTIFIC EXCLUSIVE OFFER: Buy $250 in Kimble* Type III Boston Rounds or Wide Mouth Packers and Get a FREE Case of Fisherbrand* Borosilicate Glass Disposable Culture Tubes with Plain End (Fisher Scientific Cat. Nos. 14-961-25 through -34 Series).

To redeem, simply fax your proof of purchase to Marketing Dept. at **1-(865) 354-3823**. Offer valid until December 31, 2009.

Transcription Factor Assays

Transcription Factors play a vital role in gene regulation. Marligen offers a wide variety of research products to facilitate the understanding of these essential proteins in cellular function.

Multiplex Transcription Factor Profiling Kit (20-plex)

Simultaneously measures binding of 20 transcription factors to their regulatory DNA elements

MA11954096

- Fast, easy protocol with quantitative results superior to EMSAs
- Provides excellent sensitivity, specificity, reproducibility and dynamic range compared to ELISAs
- Multiple binding sites in assay are similar to in vivo binding conditions
- Obtain data within three hours, requiring only a small amount of sample

INCLUDES:
Pre-mixed 20-plex Binding Mix 2 which includes AP-1, AP2, AR, CRE-ATF, CREB, E2F1-5, E2F6, EGR, GATA, HNF1, HNF4, ISRE, Myc-Max, NF-1, NFκB, p53, PPAR, SMAD 2/3, SP1, YY1 Binding Site Probes; Sample Diluent; Binding Mix 1; Digestion Reagent B; Digestion Buffer; Hybridization Accelerator; Hybridization Buffer; Bead Mix (20-plex); 10X Wash Buffer; Detection Reagent; Filter Plate; Aluminum Plate Sealers; PCR Plate

Description	No. of Samples	Cat. No.	Each
20-plex kit	96 reactions	**MA11954096**	2899.00

Microplate Assay Kits

Quantify transcription factor binding to regulatory DNA elements using a microplate format

- Provides 100-fold greater sensitivity than gelshift assays
- Chemiluminescent detection
- Obtain results within four hours, requiring only a small amount of sample
- Allows direct quantitation of transcription factor binding activity without the use of antibodies

INCLUDES:
Sample Diluent; Binding Mix 1; Binding Mix 2; Digestion Buffer; Digestion Reagent; Capture Microplate; Hybridization Accelerator; Hybridization Buffer; 10 X Wash Buffer; Conjugate Diluent; Streptavidin-Alkaline Phosphatase Conjugate (SA-AP); Chemiluminescent Substrate; PCR Plate; Plate Sealers; Microplate Cover

Multiplex Buffer Panel

For use with Site Specific Reagent Sets

Provides buffers and common reagents to complete 96 reactions when combined with one or more Site Specific Reagent Sets.

- Create customized panel using any combination of 20 binding sites (available separately, above)
- Designed and optimized for use with nuclear extracts prepared from Marligen Nuclear Extraction Kit (MA11906100)

INCLUDES:
Sample Diluent, Binding Mix 1, Digestion Reagent, Digestion Buffer, Hybridization Accelerator, Hybridization Buffer, 10X Wash Buffer, Detection Reagent, Filter Plate, Aluminum Plate Sealers, PCR Plate

Description	No. of Samples	Cat. No.	Each
Buffer panel w/common reagents	96 reactions	**MA11955096**	240.34

Low Retention Pipet Tips

Specifically designed for eliminating sample retention within the pipet tip

- Inner surface is extremely hydrophobic; increasing sample reproducibility and sample accuracy
- Crystal clear tips allow you to easily see transparent samples
- Pure tips are racked, presterilized and certified RNase-, DNase-, DNA- and pyrogen-free
- Other MBP racked and bulk tips are nonsterile and autoclavable

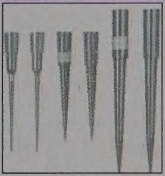
SoftFit-L* Design for Rainin* LTS* LiteTouch* Pipetter



- SoftFit-L tips have thinner walls than conventional tips so they conform more easily to the pipetter barrel, which ensures a better seal and allows the tip to eject with less force
- MBP* tips are nonsterile; ART* and Pure are sterile
- ART tips have a self-sealing barrier that prevents carryover contamination
- Racked

Pipetter Compatibility
Rainin LTS LiteTouch Pipetter; universal fit also accommodates most other research-grade pipetters.

Excellence Plus/Excellence Analytical Balances

Excellence Plus and Excellence balances offer world-leading weighing performance, unprecedented ergonomics and advanced solutions for data management. They enable full compliance in regulated areas and increase productivity and user safety.

- SmartGrid* Weighing Pan: Minimizes effects of turbulence in the weighing chamber; ensures more accurate results and shorter stabilization times
- ErgoClips* (order separately): Facilitate secure placement and efficient handling of tare containers

Excellence Plus XP Models

- SmartSens* Sensors: Enable user to tare, open and close draft shield or print without touching the balance; promote safe handling of samples, prevention of spills, minimized contamination risk
- SmartScreen* Display: Color-guided touchscreen for safe operation; individual, color-coded profiles can be configured and documented for up to eight users or jobs
- LevelControl* warns if balance is not correctly leveled
- MinWeigh: Signals when sample has not reached minimum weight defined by regulations
- Temperature Drift: 1×10^{-6}/°C[1]
- Long-term Stability: 1×10^{-6}/a[3]
- Pan Size: 3 × 2⅞" (7.8 × 7.3cm)
- L × W × H: 19 × 10¼ × 12½" (48.7 × 26.3 × 32.2cm)
- Net Weight: 22 lb. (10kg)
- Electrical Requirements: 100-240V 50/60Hz, 0.8A
- Come with automatic and detachable draftshield, proFACT automatic calibration technology, RS232-C interface, optional slot for second interface (choice of seven different interfaces), inner draftshield plate (adjustable), protective cover, detachable and adjustable terminal

Excellence XS Models

- Fully Automatic Calibration Technology (FACT) ensures precision and accuracy
- Comply with GLP and other quality management systems
- Temperature Drift: 0.00015%/°C[1]
- Long-term Stability: 0.002%/a[2]
- Pan Size: 2¾ × 3" (7 × 8cm)
- L × W × H: 17⅝ × 10¼ × 12½" (45.3 × 26.3 × 32.2cm)
- Net Weight: 23¼ lb. (10.5kg)
- Electrical Requirements: 115V 50/60Hz

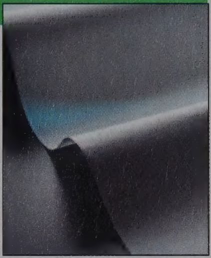
Immunodetection Products

When developing new immunodetection protocols, all product components and their interactions must be considered. Millipore provides a full line of immunodetection tools to yield the superior results you require.

Immobilon* PVDF Transfer Membranes

Superior Handling

Immobilon membranes are not like traditional blotting membranes that crack and curl. They have exceptional handling characteristics and can be cut without fracturing. They are also compatible with a variety of detection chemistries including radioactive, fluorescent, chromogenic, chemiluminescent and chemifluorescent techniques.



IPVH 000 10

Superior Protein Binding and Signal

Immobilon membranes have high protein adsorption that provides excellent binding and prevents protein loss during reprobing. The open pore structure of the membrane makes it easy to access bound proteins yet remove unbound probes that can increase background.

Immobilon-P (0.45µm)

- Sandwich format available: Immobilon-P membrane interleaved with blotting paper >20kDa
- Recommended for Western, dot, slot and other blotting applications for proteins

Immobilon-P^{SQ} (0.22µm)

- Recommended for blotting and sequencing of proteins <20kDa
- Features a large internal surface area that results in higher sequencing yields and less blow-through than other membranes

Immobilon-FL (0.45µm)

- Low fluorescence PVDF membrane for Western blotting applications
- Compatible with common stains and blocking reagents

Immobilon* Western Chemiluminescent Substrates

WBKLS0500

Provides high sensitivity over a broad detection range at an economical price

- High signal intensity and low background allow detection to the mid femtogram level without enhancers or special buffers
- Lowers antibody consumption by two to five fold compared to less sensitive chemiluminescent substrates
- Compatible with PVDF and nitrocellulose membranes, as well as all commonly used buffers and blocking reagents

Description	Quantity	Cat. No.	Each
Chemiluminescent HRP Substrate	50mL	**WBKL S0 050**	44.00
	100mL	**WBKL S0 100**	66.00

Neuroscience Antibodies and Proteins

Millipore's Chemicon line of neuroscience antibodies and proteins comprise a broad line of well-characterized tools for the study of developmental, synaptic, and degenerative mechanisms in the nervous system. Millipore's immunodetection products provide invaluable assistance in the identification, cellular and subcellular localization and measurement of defining structures in most cell types comprising the developing and differentiated nervous system. Vertebrate neuron-specific nuclear protein or NeuN (Neuronal Nuclei) Cat. No. MAB377MI reacts with NeuN, which is found in most neuronal cell types throughout the nervous system of mice.

Antigen	Clone	Quantity	Cat. No.	Each
Neuron-Specific Nuclear Protein (NeuN)	A60	500µg	**MAB377MI**	240.90
Tyrosine Hydroxylase Ab-3	----	100µL	**AB152MI**	230.86
Alzheimer Precursor Protein A4, aa 66-81, N-terminus	22C11	50µg	**MAB348MI**	330.41

Filtration and Cell Culture Devices

Millipore's innovative filtration and culture devices provide an optimal environment for maintaining and growing cells. Designed for maximum flexibility, all have optimized filters and come with your choice of membrane. Growing cells on membranes is an approach to culturing that expands your ability to create in vivo like epithelial and endothelial cultures. Millipore's family of cell culture inserts and plates not only improve cell differentiation over plastic plates, but also offer improved handling for other cell types and cell based assays.

Millicell* Culture Plates Inserts

Millicell-HATF and Millicell-PCF Inserts

PIHA 012 50

- Don't require an extracellular matrix for attachment-dependent cells
- Polystyrene housing; supplied sterile and individually blister packed
- Millicell-HATF Inserts utilize a mixed cellulose esters membrane; Triton*-free
- Millicell-PCF Inserts utilize tissue culture-treated polycarbonate membranes for use in co-culturing applications as well as tumor cell invasion and metastasis studies

Millicell-CM Inserts

- Incorporate transparent hydrophilic PTFE Biopore* membranes for neural growth and embryo development work
- Inert and allow repeated viewing of living cells through the membrane

Pore Size	Diameter	Cat. No.	Pack of 50

0.22µm	PES	**SCGP U11 RE**	190.00

Millicell* Culture Inserts with Hanging Geometry

Uniquely designed flanges suspend the insert within culture plate well for superior growth, ease of pipetting

- Compatible with automated cell seeding, feeding, and washing systems
- General-purpose for growth and differentiation of various cell types

PIRP Series

Insert Pore Size	Description	Cat. No.	Pack of 48

Steritop* Sterile Vacuum Bottle-Top Filters

SCGV-T10-RE, SCGP-S01-RE, SCGP-S02-RE

With large 73mm diameter filter for faster filtration

- Recessed funnel threads maintain sterility
- Gamma radiation sterilized
- Without receiver bottles
- Millipore Express* Plus polyethersulfone (PES) membrane for fast flow and low protein binding (0.1µm PES membrane is also useful for removing mycoplasma)

NALGENE* Bottles and Carboys

Provide the ultimate leakproof storage solution for laboratory water, reagents, chemicals and samples. Choose from over 300 containers designed to meet the most demanding lab storage requirements.

HDPE Boston Round Bottles

- Durable, uniform walls are resistant to splitting or puncturing
- Ideal for storing, shipping and packaging liquids for long periods
- Can be used with most corrosives
- Good for freezer use to -100°C
- Leakproof†, linerless closures
- Manufactured in compliance with ISO 13485:2003 quality requirements

Nalgene* Autoclavable Carboys

02-960-20A

Polypropylene for temperature resistance and rigidity

- Molded-in graduations in 1 gal. and 5L increments; graduated "To Contain"
- Ideal for use with culture media, distilled water
- Integral shoulder handles for easy lifting
- Neck will accept No. 13½ rubber stopper
- White polypropylene screw closures
- Leakproof†

Alert: Completely disengage threads or remove closure before autoclaving. Not recommended for hazardous materials.

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of
2½ gal. (10L)	83B	2250-0020	**02-960-20C**	89.06	6/356.25
5¼ gal. (20L)	83B	2250-0050	**02-960-20A**	127.12	4/339.00
13 gal. (50L)	83B	2250-0130	**02-960-20B**	----	6/356.25

† Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. ***Note:*** *these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.*

NALGENE® Cryoware

Provides everything you need to safely store and organize cryogenic samples

Cryogenic Vials

03-337-7N, 03-337-7P

- For cryogenic storage of cell and microbiological cultures, sperm and serum/blood or other biologicals in vapor phase of nitrogen
- Two-turn deep-skirted screw closure system minimizes contamination
- Conical bottoms allow full retrieval of sample
- Polypropylene vials are self-standing and may be used without a holder
- Do not autoclave
- All vials with high-density polyethylene closures, except 03-337-7X and -7Y, which have polypropylene closures
- System-100 vials 03-337-7X and -7Y also have gasket seals for excellent seals during shipping
- Preassembled, radiation-sterilized vials are noncytotoxic, nonpyrogenic, and have a large white marking area, graduations, and fill line printed on the side
- Nonsterile vials without printing or graduations; packed separately from closures

"Mr. Frosty" Freezing Container

15-350-50 (Vials not included.)

Low-cost, freezing container provides repeatable -1°C/min. cooling rate for successful cryopreservation and recovery

- Rigid vial holder isolates vials from alcohol, preventing contamination of samples by wicking
- Requires only 100% isopropyl alcohol and a -70°C mechanical freezer
- Labeled with graphic step-by-step instructions
- Holds up to 18 vials

Accepts	O.D. × H	Mfr. No.	Cat. No.	Each
18 Nalgene* 1.0, 1.2, 1.5, 1.8 and 2.0mL cryogenic vials or equivalent	4⅝ × 3⁷⁄₁₆" (117 × 86mm)	5100 0001	**15-350-50**	61.25

NALGENE® Centrifuge Bottles

Two new Nalgene* Centrifuge Bottles— 1L Super-Speed and 2L Low-Speed Bio Bottles

Nalgene 1L Centrifuge Bottle

Boost productivity and pellet recovery in high-speed, large-volume gross separation applications. These graduated, wide-mouth bottles simplify decanting, re-suspensions and pellet removal. Their smooth inner walls are less likely to shear delicate cells. Ergonomic design facilitates loading, recovery and storage of samples.

SUPER SPEED

- Process a full liter in each bottle at speeds up to 15,810×G
- Ideal for bacterial, yeast and tissue isolations
- Improve viral harvesting in vaccine production
- Reduce shearing in mammalian culture separations
- Clear large-volume cell debris of homogenates
- Purify viruses and polysaccharides for vaccine production
- Choose polycarbonate for clarity and mechanical strength
- Choose polypropylene for chemical resistance
- Leakproof
- USP Class VI, noncytotoxic
- Designed to fit FiberLite* F6S 6×1000Y, F8S 6×1000Y, and F9S 4×1000Y carbon fiber rotors
- Recommended operating temperature range is from 4°C to 22°C
- Autoclavable
- With sealing cap assembly, polycarbonate bottle, polypropylene plug, modified PPE closure, and silicone gasket.

Description	Material	Mfr. No.	Cat. No.	Case of 6
1L Centrifuge Bottle	Polycarbonate	3140-1006	**05-564-25**	594.00
1L Centrifuge Bottle	Polypropylene	3141-1006	**05-564-26**	594.00

NEW! Nalgene* Centrifuge 2L Bio Bottle

Nalgene 2L Bio Bottle

Improved quality and performance for centrifugation of biologics. Process a 12L harvest in a single run. For large-volume gross separation applications at speeds up to 7333xG. Graduated, wide-mouth bottle simplifies decanting, re-suspensions and pellet removal. Ergonomic design facilitates loading, recovery and storage of samples.

- Leakproof up to 7333xG
- USP Class VI, noncytotoxic and nonhemolytic
- Ideal for bacterial, yeast and tissue isolations
- Designed for use in Thermo Scientific* Sorvall* RC12BP Centrifuge and H12000 Swing Bucket Rotor
- Smooth inner walls are less likely to shear cells
- Centrifugation operating temperature range is from 4°C to 22°C, storage to 0°C
- Autoclavable

Description	Material	Mfr. No.	Cat. No.	Case of 6

Unassembled Certified* Vial Kits

High quality chromatography kits provide the best assurance of consistent performance standards.

- Fully lot tested including HPLC and GC analysis
- Certificate of Conformance included with each pack
- Include choice of vials and closures, conveniently packaged in benchtop storage compartments
- Vials of clear or amber borosilicate glass, with or without an I-D* patch
- Closures with pre-inserted septa for GC, HPLC and headspace analysis

Optima* Solvents in Safe-Cote* Bottles

New FisherChemical* Optima grade high purity solvents deliver outstanding performance with safety and convenience. The solvents are protected by Safe-Cote PVC bottles that provide the purity of glass and most of the benefits of plastic for storing and dispensing of solvents. If they break, glass fragments and liquids are more likely to remain trapped. Optima grade high purity solvents are used when contaminant-free performance is essential—LC/MS, HPLC, GC, plasma/ICP, spectrophotometry, environmental testing and other analytical applications.

- Innovative safety bottle with FisherLOCK* tamper evident cap
- Convenient storing and dispensing
- Packaged in new 100% recyclable Styrofoam*-free EcoSafPak

NEW BRUNSWICK SCIENTIFIC

Excella* Shakers

Innovative, dependable and affordable, Excella Incubator Shakers with refrigeration option provide reproducible growth for a variety of cell types. Offered in benchtop and large-capacity console models. A Fisher Scientific exclusive!

Excella* E24/E24R Benchtop Shakers

Accepts vessels up to 2.8L

14-285-732

Features

- Flask capacity: 10mL to 2.8L
- Shaking speed range: 50 to 400rpm
- Shaking orbit: ¾" dia. (19mm)
- Digital keypad control and LED display for speed, run time, alarms and temperature
- Timer: 0.1 to 99.9 hours
- LED indicates temperature settings in 0.1°C increments
- Powerful UniCentric drive is counterbalanced for continuous-duty shaking over a wide range of speed
- Microprocessor feedback-control maintains precise shaking speed
- Large-capacity circulating fan distributes air evenly throughout chamber to ensure accurate temperature control and rapid thermal recovery

Safety Features

- Automatic shutoff when lid is opened
- Automatic restart with settings stored in memory
- Maintains speed even with unbalanced loads
- Visual and audible warning signals when speed deviates more than 5rpm, or temperature more than 1°C, from setpoint

Incubator Shaker Model E24

- Temperature Range: 7°C above ambient to 60°C
- Net weight: 135 lb. (61.2kg)

Incubated and Refrigerated Shaker Model E24R

- Temperature Range: 15°C below ambient to 60°C
- Net weight: 180 lb. (81.6kg)

DIMENSIONS:

- Platform: 18L × 18"W (46 × 46cm)
- Chamber: 20¼L × 21½W × 14"H (51.4 × 54.6 × 35.8cm)
- Overall: 22L × 30W × 24"H (56 × 76.2 × 61cm)
- For 120V 60Hz

REQUIRED ACCESSORIES:

Platform or tray (sold separately)

WARRANTY:

Two years on parts and labor

CERTIFICATIONS:

cETLus listed (Meets UL, CSA and CE standards)

Model	Orbit	Mfr. No.	Cat. No.	Each
E24, Incubated	¾"	M1352 0000	**14-285-732**	5325.00
E24R, Refrigerated	¾"	M1352-0004	**14-285-733**	7260.00

Excella* E25/E25R Console Shakers

Large-capacity shakers for flasks up to 6L

14-285-734

Features

- Flask Capacity: up to 6L
- Shaking speed range: 50 to 400rpm, ±2rpm
- Shaking orbit: 1" dia. (2.54cm)
- UniCentric drive delivers consistent performance for reproducible results
- Display: LED for temperature, speed, alarm conditions and running time
- Timer: 0.1 to 99.9 hours
- Speed, timer and temperature alarms
- High-velocity air circulation system accurately maintains temperature within ±0.25°C
- Adjustable feet absorb vibrations to stabilize workload and prevent creeping
- Accommodates glassware on Dedicated or Universal Platforms
- Shake test tubes from 8 to 30mm diameter in adjustable-angle racks, (sold separately)

Incubator Shaker Model E25

- Temperature Range: 7° above ambient to 60°C
- Net weight: 420 lb. (190kg)

Incubated and Refrigerated Shaker Model E25R

- Temperature Range: 15°C below ambient to 60°C
- CFC-free refrigeration
- Net weight: 450 lb. (204kg)

DIMENSIONS:

- Platform: 30W × 18"H (76 × 46cm)
- Chamber: 33½D × 23W × 19"H (85 × 58 × 48cm)
- Overall: 50L × 30½W × 41¾"H (127 × 77 × 85cm)
- For 120V 60Hz;

REQUIRED ACCESSORIES:

Platform or tray (sold separately)

WARRANTY:

Two years on parts and labor

CERTIFICATIONS:

cETLus listed (Meets UL, CSA and CE standards)

Model	Orbit	Mfr. No.	Cat. No.	Each
E25, Incubating	1"	M1353 0000	**14-285-734**	9125.00

NEW BRUNSWICK SCIENTIFIC

CO_2 Incubators

NBS direct-heat CO_2 incubators with fanless design optimize culture conditions, minimize contamination risk, and simplify cleaning. Choose Innova* models with advanced controls or economical Excella* models.

Advanced features for exceptional performance

- Six-sided direct heating ensures stable temperature control, excellent uniformity (±0.2°C) and rapid recovery with no overshoot
- Unique fanless design minimizes vibration, increases usable chamber space and simplifies cleaning
- Compared to air- or water-jacketed designs, direct heat decreases overall incubator size and weight, increases chamber capacity, and simplifies setup, maintenance and relocation
- Infrared (IR) CO_2 sensor provides superior accuracy
- Seamless, deep-drawn chamber and bracket-free shelving minimize contamination risk and simplify cleaning
- User-programmable CO_2 auto-zero function automatically adjusts sensor baseline for optimum accuracy
- Programmable alarms provided for CO_2 and temperature, delays, duration, and more
- HEPA filter on CO_2 inlet protects against contamination
- Non-volatile memory guarantees data integrity in case of power outage
- CE marked

Innova models provide superior convenience and control

- Extra-large display features real-time data graphing, programmable alarms, and diagnostics
- Automated 72-hour datalogging of CO_2 concentration, temperature, alarms and door openings, with on-screen display
- On-screen help guides operator through setup, programming and diagnostics
- Unique, micro-sized Model CO-14 meets specialized needs of IVF and stem cell research

Economical Excella models for less sophisticated needs

- Excella ECO-17 series (and Innova Model CO-14) offer the same advantage as the Innova line, but with a simple temperature display and easy-to-use four-button keypad for programming CO_2, temperature and audio/visual alarm settings

Three sizes suit a variety of needs

- Innova CO-14, 0.5 cu. ft. (14L) capacity
- Innova CO-48, 1.7 cu. ft. (48L) capacity
- Innova CO-170, 6 cu. ft. (170L) capacity
- Excella ECO-170, 6 cu. ft. (170L) capacity

Multiple options enhance versatility and performance

- High temperature (HT) decontamination for absolute peace of mind
- O_2, control (1 to 19%) for IVF, hypoxic stress, aging studies and anaerobic work
- Communications package for use with facility monitoring system and/or PC download
- Copper interior for optimum contamination control
- Stacking stands, CO_2 bottle changeover controller, and other accessories are sold separately (For details, contact your Fisher Scientific Customer Service Representative.)

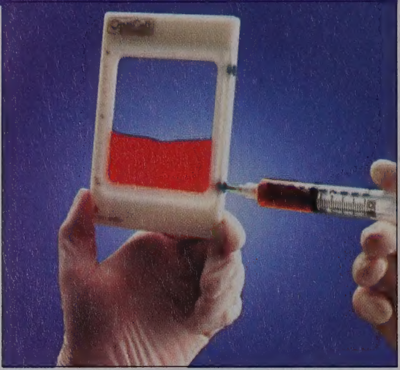
OptiCell* Cell Culture System

Unique format for growing, monitoring, and transporting cells



- Sterile system is created from two parallel, gas-permeable, cell culture-treated polystyrene membranes
- Each OptiCell 1100 membrane has a growth area of 50cm², total area: 100cm²
- Recommended media/cell fill volume of only 10mL for adherent cell cultures (OptiCell) and 30mL for OptiCell MAX for suspension cells
- Two resealing access ports provide a closed growth environment with sterile fluid path, reducing the risk of contamination
- Unique freezing capabilities allow for prolonged live cell storage
- Designed with approved shipping system to transfer cell lines
- Ideal for production of monoclonal antibodies, cytokines, and other secreted molecules

INCLUDES:

OptiCell 1100 Starter Kit: 20 ea. of OptiCell 1100, rack, knife, 50 tips, manual

OptiCell MAX 2100 Starter Kit: 5 ea. of OptiCell MAX, rack, 50 tips, Hybridoma production protocol, manual

OptiMag Cell Separation Kit: 20 ea. of OptiCell 1100, rack, 50 tips, magnet, Cell Separation protocol, manual

OptiCell Mailer: 5 ea. OptiCell 1100, five mailers, 50 tips, manual, shipping protocol

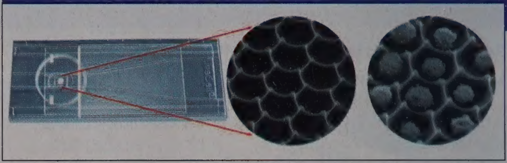
LiveCell* Array Microscope Slides

Provide real-time study of individual, living cells within heterogeneous populations



- Suitable for both adhering and nonadhering cells
- Disposable and sterile, with an embedded transparent array of picowells
- Enable multiple functional assays on living cells followed by postfixation studies on the same cells
- Staining, rinsing, and perfusion do not displace cells
- Compatible with standard microscopes
- Image Analysis Software designates an address to each cell

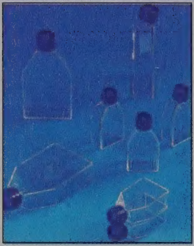
Sterile EasYFlask*

Nunclon* Δ treated surface ensures optimal cell attachment and growth



12-565 Series Flasks

- Polystyrene flat-sided cell culture flasks
- Choice of filter or vent/close caps
- Large opening and angled neck allow for easy access to growth surface with pipets and cell scrapers
- Low profile maximizes incubator space and allows viewing of entire growth surface with standard microscope
- Volume graduations printed and molded on both sides
- Frosted writing surfaces on neck
- Certified nonpyrogenic
- Extra caps in every case

Aluminum Weighing Dishes

08-732-100 through -104

With fluted sides

- Inexpensive aluminum dishes, ideal for weighing and dispensing
- Also can serve as evaporating dishes or dust covers
- Lightweight, yet sturdy
- Convenient finger-grip handle can be etched prior to weighing for identification

With smooth sides

- Lightweight dishes with flanged rims
- Slightly sloping sides facilitate stacking
- Especially useful for materials that cannot easily be cleaned from dish surface

Omni Prep* Multisample Homogenizer

Homogenize six samples per cycle—up to 250 samples per hour

15-340-120 (tubes sold separately)

Two rack system allows one group of samples to be prepared while another group is being processed. Processes up to six samples at a time rapidly and efficiently in 1.5/2, 15, and 50mL conical tubes.

- Working volume 0.25 to 30mL
- Speed range 500 to 30,000rpm
- Digital display with 10-min. timer and 3-program memory
- Works exclusively with reusable/disposable Omni Tip* plastic probes or specially designed 10mm stainless steel probes
- Most samples processed in under one minute
- Movable rack is ideal for processing samples that require probe mobility within the sample

INCLUDES:

Omni Prep processing unit, 2 six-place processing racks, nine tube holders (three each of 1.5/2, 15, and 50mL sizes), 50 Omni Tip soft tissue probes, and 50 Omni Tip hard tissue probes

r²mini Pocket Refractometer

Big features and performance in a small package!

13-975-411

- High-contrast five-digit LCD readout switches between Refractive Index and % Brix
- Wide measurement ranges of 1.3330 to 1.4465 RI and 0.0 to 62.0% Brix
- Automatic readings in seconds at the push of a button
- Electronic Automatic Temperature Compensation from 10° to 40°C
- Automatic power-off mode extends battery life beyond 10,000 measurements
- Rugged housing has International Protection Class rating of IP65, making it water resistant and dustproof

ORDERING INFORMATION:

Measures 3⅞L × 2⅛W × 1⅛"H (100 × 54 × 27mm). Net weight, ¼ lb. (100g). With storage case and detachable neck lanyard. Operates on 2 × "AAA" batteries included. Optional holster case available.

RM 200 Laboratory Mortar Grinder

A standard in every laboratory, now with enhanced features for better results and greater ease of use

08-418-506

Delivers reproducible and contamination-free sample.

- For wet and dry grinding to <10µm
- Closed, dust-tight grinding chamber without windows
- High-performance drive with electronic control and load display
- Built-in automatic switch-off and rapid deceleration
- Mortar and pestle can be changed easily without tools
- Safe, CE-conforming design
- Seven different grinding set materials
- Limited warranty

Thermo SCIENTIFIC

Haake* DynaMax* Refrigerating-Heating Circulators

Precision temperature control of high-end laboratory and pilot applications: combines rapid temperature changes with incredible stability

13-875-500

- Dissipate heat from exothermic chemical reactions faster than other products in their class
- Dynamic Heat Load Suppression (DHLS) technology offers faster reactions to temperature changes, maintains precise temperature stability
- Adapt precisely to your application needs, allowing you to perform more experiments in less time

Easy to Operate

- Easy to use, with intuitive menu programming
- Controller is programmable in seven languages, stores 10 ramping programs with 30 segments, saving you valuable programming time
- Systems are self-degassing and completely self-draining for greater ease of operation

Adaptable to Meet Application Needs

- Cover a wide temperature range, suitable for a variety of applications
- Nine preset PID settings allow you to select the best balance between temperature overswing and time-to-temperature for your application

Enhanced Safety Features

- Closed-system architecture prevents hot fluids from contacting the atmosphere, eliminating fumes and icing at low temperatures
- DHLS technology protects system and application from potential damage
- If set limits are exceeded, system rapidly injects fluids from cold storage tank to bring system back within safety limits
- User can define upper and lower system temperature and pressure limits for improved application control and greater safety

ORDERING INFORMATION:

Fluid Connections, M30x1.5. Refrigerant, R404A. RS-232 port standard; optional RS-485 connection.

Models listed have air-cooled condenser.

Neslab* ThermoFlex* Recirculating Chillers

Reliable, easy-to-use chillers optimized for the most demanding applications

13-266-130

High reliability plus superior performance

- Robust refrigeration system is designed for continuous use in a variety of installations
- Temperature setpoint range of 5° to 40°C (41° to 104°F) with ±0.1°C stability
- Recirculation system incorporates highly reliable plumbing connections to eliminate leaks
- Integrated air and fluid filters to minimize wear to mechanical parts, for lower maintenance costs and improved system reliability
- Up to 10% greater cooling capacity than comparable units
- Lower noise, ensuring a pleasant work environment
- Deliver continuous cooling capacity up to 900 or 1400 watts
- Additional models available, contact your Fisher Scientific Customer Service Representative

Easy to Use

- Quick-start guide enables trouble-free system start-up
- Snap in-and-out air and fluid filters promote quick and simple maintenance
- Innovative recirculation system includes integrated funnel and visual indicator for operator convenience
- Intuitive controller allows customer-defined alarms to be set for various parameters, ensuring that your process is always under control
- Easy-to-read LCD
- Integrated pressure relief ensures application pressure limits are kept within range

HyperSep* Hypercarb* SPE Columns, Plates and Wells

HyperSep SPE products offer reproducible and reliable sample preparation in a range of formats and materials, including the unique Hypercarb for the retention of extremely polar compounds.

03-250-4 Series

- Unique flat, 100% porous graphitic carbon (PGC) with selectivity for structurally similar compounds
- Stable across the 0 to 14pH range
- High batch-to-batch reproducibility
- Strong retention properties allow use of low bed weights for concentrated extracts
- Unique interaction mechanism with polar molecules
- 30µm mean particle size
- 250Å mean pore size

FOCUS* GC (Gas Chromatograph)

Designed for routine QA/QC and high productivity laboratories

03-950-106

The single channel workhorse GC

- Affordable full-sized GC performance in a compact footprint
- Reliable and easy to use, requiring minimal operator training
- Ideal for high quality routine analysis
- Proven ruggedness and reliability
- Fast GC oven
- Wide front opening allows easy access and quick installation of conventional column racks

Optional Accessories

- Eight-position AI 3000 Autosampler (03-950-102) or 105-position AS 3000 Autosampler (03-950-103) available separately or as part of product bundles
- ChromQuest data system (03-950-104)
- Start-Up Kit: (03-950-105) SS tubes and fittings, nuts and ferrules (unions and Tee) to perform instrument connection w/gas lines and standard 10µL syringe for instrument SOP start-up
- Installation (03-950-109)
- Computer System (03-950-110)

INCLUDES:

Basic Bundle: FOCUS GC SSL-FID, Start-up kit, ChromQuest DS; **Automated Bundle:** Basic Bundle plus AI 3000 Autosampler (8 vial positions); **High Productivity Bundle:** Basic Bundle plus AS 3000 Autosampler (105 vial positions)

Description	Mfr. No.	Cat. No.	Each

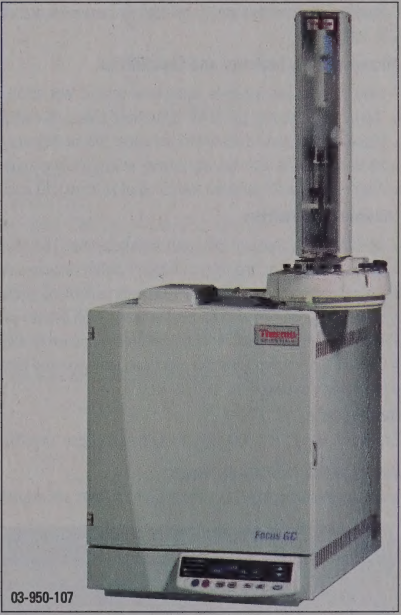
SPECIFICATIONS

D × W × H	20 × 13¾ × 17" (350 × 510 × 430mm)
Weight	66 lb. (30kg)
Typical heat-up time:	50 to 350°C in 270 sec.
Typical cool-down time:	350 to 50°C in 270 sec.
Injectors available:	Split-Splitless, Purged-Packed
Detectors available:	FID, TCD
Interface	Local keyboard or Data system control
Gas Sampling/Switching valve accessory	Available for petrochemical and industrial applications



03-950-107

Forma* CryoPlus* Series LN_2 Storage Systems

Combine liquid nitrogen storage flexibility with microprocessor control technology. Capacities range from 90 to 552L and offer sample storage capabilities up to 40,000 vials.

TF7400
TF7406
TF7404
TF7402

- Standard temperature sleeve for cold temperatures and efficient vapor phase operation
- Autofill

Microprocessor Features and Capabilities

- Easy, precise, and accurate liquid level control over all 16 parameters
- Top-mounted control panel for convenient access to microprocessor control and easy programming via touchpad
- Digital temperature display located under the lid indicates highest temperature reading inside tank
- 24 tri-color LEDs continuously display actual liquid nitrogen level and high level/low level setpoints
- Alarm contacts for remote monitoring of storage tank conditions

Durable Construction

- Double-walled, vacuum-insulated, stainless-steel LN_2 storage tanks
- Liquid level sensor and fill port located within vacuum space, ensuring maximum storage area and protecting sensor
- Exterior cabinet constructed of 18 gauge, cold-rolled steel with powder-coated paint
- Counterbalanced lid with foamed-in-place, high density polyurethane insulation; patented, dedicated vent; 100% clearance
- Two independent, flexible lid gaskets reduce moisture migration into the chamber
- Convenient, front-mounted key lock and rear-mounted recessed power switch provide product security; control panel can also be locked
- Heavy-duty casters

INCLUDES:

CryoPlus 1 has ½" 45° flare, 4' (1.2m) flexible hose. CryoPlus 2, 3, and 4 come with ½" 45° flare, 6' (1.8m) flexible hose.

REQUIRED ACCESSORIES:

Inventory systems of racks, canisters, and frames are available separately.

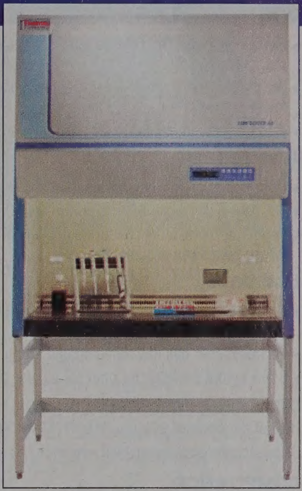
Thermo SCIENTIFIC

1300 Series Class II, Type A2 Biological Safety Cabinets

Ideal for working with biological agents at Biosafety Levels 1–3



13-261-303

Less energy consumption and heat output deliver unparalleled cost savings: energy-efficient DC motor technology provides savings in excess of 65% over competitive units.

- Exhaust volumes from 328 to 541cfm, depending on model
- Patented, laminated safety glass front window has 10° slope for less glare and ergonomically comfortable working posture; lowers easily for interior cleaning
- Easy-to-reach control panel with LED displays hours of use, inflow/downflow velocities, services in use, filter usage status
- Sash opens to 10" (25cm); 21" (54cm) maximum opening
- Large, single-piece work surface provides ample space for optimizing productivity
- HEPA filter, 99.995% at 0.3µm
- Independent DC motors simultaneously control both inflow and downflow; reduce energy consumption, heat output, and vibration inside cabinet
- Motor operates at reduced speed when front window is closed—keeps interior cleaner and reduces lab noise
- No internal damper needed—continuous airflow adjustment maintains proper inflow

Safety Features

- Meet NSF Standard 49
- Real-time airflow adjustments ensure inflow and downflow velocities remain steady
- Pressure sensor filter monitoring measures total airflow across the working area
- Patented front window design simplifies cleaning for a safer working environment

Construction Features

- Work surface height ranges from 28 to 36" (71 to 91cm), with adjustable stand
- Armrest (included with package) supports ergonomic posture; prevents accidental blockage of front air grill
- Thimble exhaust connection has a zero leak damper; joins cabinet to standard 8" (20cm) dia. exhaust duct
- Two service connections (noncombustible gas, combustible gas, vacuum, water) can be ordered separately and installed on each side
- UV light (included with package) is programmable for different decontamination cycle lengths; timed UV light option preserves bulb life
- White interior walls reduce glare to improve ergonomics

ORDERING INFORMATION:

Overall D × H (including stand set at 30" [76.2cm]): 31⅜ × 85⅝" (79.5 × 220cm).

INCLUDES:

Packages come with standard 30" (76.2cm) high stand, UV light and armrest. Accessories also available separately; contact your Fisher Scientific Customer Service Representative for more information.

WARRANTY:

3 years, parts and labor on equipment

Hamilton ProVent* Laboratory Fume Hoods

The comprehensive offering of Thermo Scientific* Hamilton fume hood product lines includes ProVent, SafeAire* II, Concept*, Pioneer*, Horizon* and special ventilated enclosures. Each line is designed to lead the market in its respective applications.

- Exhaust volumes from 485 to 1570cfm, depending on hood size and sash opening
- Collar design reduces noise and conserves energy by maintaining lower static pressure
- Fluorescent lighting optimizes visibility and safety

Safety Features

- Unframed sash for greater impact resistance
- 18" (46cm) sash lock/release with manual override
- Perimeter baffle slots contain fumes and eliminate dead spaces where fumes can accumulate

Construction

- Unique rectangular exhaust collar for more vertical space defines the operating position
- Polyresin liner has low flame spread rating, meets NFPA 45 standards
- Blank cutout provided for optional blower switch or safety monitors

ORDERING INFORMATION:

Overall dimensions: 57½H × 31¼"D (146 × 79cm). Order base separately. Shipped assembled; installation required.

COMPLIANCE:

UL 1805 classified and labeled; adheres to ASHRAE* 110 tracer gas test parameters.

Hamilton Perspective* Steel Casework

No matter how you view this steel casework, there is no denying the incredible value offered by the Thermo Scientific* Hamilton Perspective* line. This casework features understated elegance in its flush overlay styling and linear reveals. With the option of several designer colors and the choice of wire or flush propylene pulls, your lab can achieve a discerning appearance.

- Wraparound cabinet body construction eliminates the need for applied finished back
- Sides, back, and outside corner posts are formed from single sheet of 20-gauge steel
- Durable drawer boxes hold heavy loads and withstand repeated impact of opening and closing without joint failure; drawer stops contact welded drawer body rather than drawer head to provide longer, trouble-free service

Features

- Welded steel construction with corner posts at all four corners to ensure high load-bearing capacity
- Chemical- and abrasion-resistant urethane powder coat finish
- Durable, corrosion-resistant stainless-steel hinges
- Four corner levelers for height adjustment
- Self-centering, self-closing, rise-up drawer suspension
- Coved horizontal corners within drawer bodies to facilitate cleaning
- Strong, formed-steel shelves that won't sag under long-term loading
- Shelf height adjustable over the full height of the cabinet for maximum flexibility

Standing-Height Combination Base Cabinets

- With one adjustable shelf
- Drawers on all models measure 7⅜" (18.9cm) high

Sorvall* Legend* Micro 17 and 21 Microcentrifuge Series

Powerful units deliver exceptional capacity, performance and safety in a compact, user-friendly design

75-002-446, -431

Support fast, efficient microvolume processes. Wide selection of high-capacity rotors and two speed options make these centrifuges ideal for complex as well as simple protocols.

- Capacity: 24 × 1.5/2.0mL
- Choice of two RCF options (17,000×G or 21,100×G) in ventilated or refrigerated styles
- Intuitive controls with bright digital display
- Fast acceleration and braking for faster throughput
- Sleek, space-saving design
- Refrigerated models (17R, 21R) offer temperature control from -9° to +40°C
- Rotor and ClickSeal* biocontainment lid included; rotor lid clicks shut to ensure secure sample containment

INCLUDES:

Sorvall* Legend* T Plus/ RT Plus Centrifuges

Versatile, 3L-capacity centrifuges deliver high RCF for tissue culture, virological tests, DNA/protein precipitations and other applications

75-004-377

Available in refrigerated or ventilated models, with a wide range of rotors and adapters for unmatched versatility.

- 120V: Operate on standard benchtop electric outlets (no special service required)
- Capacity: 3L (4 × 750mL) with optional swinging bucket rotor 75-006-445 and round buckets 75-006-441 (order separately)
- Maximum speed/RCF: 15,000rpm/24,400×G
- Microprocessor-soft-touch keypad control with large digital LED display for speed, RCF and run time
- 4-program memory plus pre-temp program
- Refrigerated model provides uniform temperature control from +4°C to ambient room temperature

Safety and Convenience Features

- Short deck height for easy sample loading/unloading
- Automatic rotor recognition and electronic imbalance detection
- Dual lid-locking mechanism (soft-touch closure with lid interlock)

REQUIRED ACCESSORIES:

Swinging bucket rotors, carbon fiber high-performance rotors, buckets and tube adapters (sold separately)

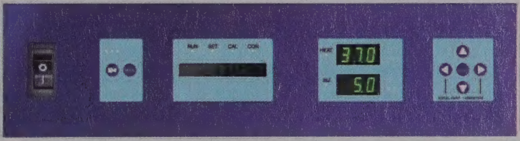
Napco* 8000 Series CO_2 Incubators

Water-Jacketed (WJ) and Direct-Heat (DH) Models to match your specific needs, each with advanced contamination control technology to simplify use. Choose Thermo Scientific Napco 8000 for superior sample protection!

These models give you the flexibility you can depend on for growing cells, and a selection of sensors and features to meet your lab's needs. Maintain precise temperature control and stability of all culture parameters.

15-497-009, -001



Panel detail.

Complete Contamination Control

- Rapid HEPA filtration produces Class 100 air quality in under five minutes
- Coved corners throughout make for easy cleaning
- Shelves, supports and HEPA filter are easily removed without tools
- Intuitive Message Center user interface for quick and easy access to all functions
- Choice of TC (thermal conductivity) or IR CO_2 sensors to match your requirements

Peace of mind

- Made to the highest standards of workmanship, thanks to many years of experience in manufacturing CO_2 incubators
- Unsurpassed service and technical support

Water-Jacketed (WJ) Models provide extra security

- Triple-wall construction and large volume of water mean unsurpassed temperature stability and heat-loss protection
- Water-jacketed technology holds temperature for extended periods, critical during power failures, to ensure the safety of your cultures
- Fast temperature recovery keeps culture conditions very stable
- Heated, dual-pane glass inner door reduces heat loss and condensation

Direct-Heat (DH) Models let you culture with confidence

- Safe, proven sterilization system ensures elimination of all microbial life inside chamber
- Automatic high-temperature decontamination cycle provides overnight sterilization and consistent sterilization time after time
- Light weight makes them easy to move where you need them
- Advanced airflow and heating provide temperature uniformity and stability

ORDERING INFORMATION:

Models listed have 6.5 cu. ft. (184L) chamber volume, measure 25L × 26W × 39½"H (63.5 × 66 × 100cm), operate on 115VAC.

HyClone* AdvanceSTEM* Cell Culture Media

Optimized for robust growth of embryonic cell cultures

Murine Embryonic stem cells grow quickly and require daily maintenance. When co-cultured in ES cell media with a mouse embryonic fibroblast (MEF) feeder layer, these stem cell cultures are suitable for electroporation, expansion, or further experimentation.

- AdvanceSTEM IMDM4SC contains no L-glutamine and supports excellent growth of B6 ES cells
- AdvanceSTEM DMEM4SC is formulated without L-glutamine or sodium pyruvate and is ideal for use with 129 ES cells
- AdvanceSTEM Serum Replacement developed for growth of undifferentiated embryonic cells in culture; minimal or no requirement for fetal bovine serum
- AdvanceSTEM Low Osmo DMEM is basal medium developed to support growth and maintenance of ES cells in an undifferentiated state

Embryonic Stem (ES) Cell Screened Fetal Bovine Serum

Eliminates the need for prescreening serum prior to using it with embryonic stem cells

Collected and processed with strict adherence to current Good Manufacturing Practices (cGMP) and ISO 9001:2000 guidelines. Tightly controlled processing from blood collection to filtration to packaging, all to assure quality, uniformity, origin, complete traceability and purity. Meet high standards required for quality cell culture. Production, from collection through processing, is vertically integrated.

- Screening process, which is performed by experienced ES cell culturists, includes plating efficiency, colony morphology and toxicity tests
- Filtered through sequential 40nm (0.04µm) pore-size rated filters

ORDERING INFORMATION:

Orders requesting a specific lot of Thermo Scientific* HyClone serum must reference the lot number; please place lot specific orders with a Fisher Scientific Customer Service Representative.

Pierce* Enhanced Chemiluminescent (ECL) Western Blotting Substrate

An entry-level Western blotting substrate at an economical price

Thermo Scientific* Pierce ECL Western Blotting Substrate is a highly sensitive nonradioactive, enhanced luminol-based chemiluminescent substrate for the detection of horseradish peroxidase (HRP) on immunoblots. ECL Western Blotting Substrate enables the detection of picogram amounts of antigen and allows for easy detection of HRP using photographic or other imaging methods. Blots can be repeatedly exposed to X-ray film to obtain optimal results or stripped of the immunodetection reagents and re-probed.

- No optimization required—switch from other entry-level ECL substrates without the need for optimization or protocol changes

INCLUDES:

Detection Reagent 1 & 2

STORAGE CONDITIONS:

Store from 2° to 8°C

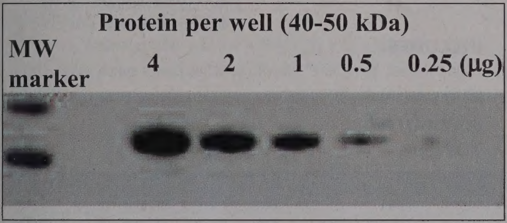

Figure 1. Thermo Scientific Pierce ECL Substrate Western blot detection of Actin (Beta) from HeLa cell lysate. Dilutions of HeLa cell lysate were prepared and separated by electrophoresis. The proteins were transferred to a nitrocellulose membrane (PI-88025) and the membrane was blocked with 5% skim milk. After blocking, the membrane was incubated with Mouse Anti-Human Actin β (US Biological, Swampscott, MA) at 1µg/mL. The membrane was washed and then incubated with 0.2µg/mL of HRP-conjugated Goat anti-Mouse IgG (PI-31430) and then washed again. Working solutions of the substrate were prepared according to the manufacturers' instructions and added to the membrane for 1 min. The membrane was removed from the substrate and placed in plastic sheet protectors and exposed to CL-XPosure Film for 90 sec.

Quantity	Cat. No.	Each
50mL (Sufficient for 400cm² of membrane)	**PI-32109**	40.00
250mL (Sufficient for 2000cm² of membrane)	**PI-32209**	101.00
500mL (Sufficient for 4000cm² of membrane)	**PI-32106**	139.00

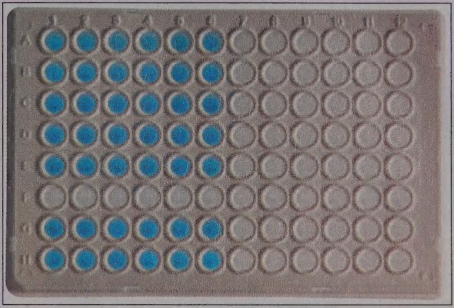
ABsolute* Blue QPCR Mixes

A colored high performance QPCR master mix to spot dispensing errors in the plate, not in your results



AB-4000 series QPCR master mixes, Easy-to-See, Easy-to-Use

- Easier to see in the white opaque plastics recommended for QPCR than traditional colorless reagents
- Contain Thermo-Start* hot-start enzyme for increased sensitivity
- Utilize dTTP in the dNTP mix for increased reaction efficiency and reduced time per reaction (low Ct)
- Compatible with all QPCR platforms

STORAGE CONDITIONS:

Store at -20°C. The ROX* dye is light sensitive; exposure to light should be minimized for vials containing ROX dye.

Description	Quantity	Cat. No.	Pack of

Orion* 4-Star pH/ISE Benchtop Meter

Reliable measurement of pH and ionic concentrations for quality control and general analysis applications

- Accepts Ion Selective Field Effect Transistor electrodes
- Auto or manual pH calibration, at 1 to 5 points
- Recognizes NIST*, US and manual buffers
- Manual ISE calibration with 1 to 5 calibration points
- Full complement of GLP-related features
- Stores up to 10 password-protected methods; downloads updates
- 200-point datalogger, downloadable to printer or computer via optional RS-232 or USB interface accessory
- IP-54 dustproof and splashproof

Meter Only option includes meter, instructions.

Meter Kit option includes meter; ROSS* Ultra* pH electrode; Epoxy ATC probe; 475mL each of pH 4.01, 7.00 and 10.01 buffers and pH Electrode Storage Solution; benchtop electrode stand.

Model	Orion 4-Star pH/ISE Benchtop Meter
pH Mode	
Range	-2.000 to +19.999pH or 0 to 14pH in aqueous solutions
Resolution	0.1/0.01/0.001pH
Relative Accuracy	±0.002pH
ISE mode	
Range	0 to 19,900
Units	M, mg/L, %, ppb, or no units
Relative Accuracy	±0.2mV or 0.05%, whichever is greater
Resolution	1, 2, or 3 significant digits
mV/RmV	±1999.9mV
Temperature Mode	
Range	-5° to +105°C
Compensation Range	-5° to +105°C
Meter Only	
Mfr. No.	1115000
Cat. No.	**13-642-055**
Each	1080.00
Meter Kit	
Mfr. No.	1115001
Cat. No.	**13-645-107**

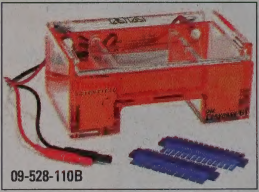
Owl* Horizontal and Vertical Electrophoresis Products

Durability, flexibility, and support

- Cast and run all-in-one
- Exceptional convenience
- Ideal for every lab

Thermo Scientific* Owl EasyCast* Horizontal Minigel



09-528-110B

Designed for ease-of-use with high-performance results

- Features leakproof casting that allows a gel to be cast and run in the same chamber with no tape or additional parts required
- Supplied with a UV-transmissible gel tray with a silk-screened ruler that fluoresces under UV light
- Randomly available in yellow, orange, and green

INCLUDES:

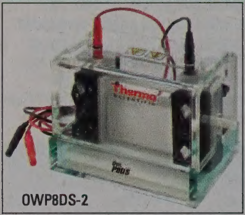
Main chamber, SuperSafe* lid with attached power supply leads, UVT gel tray, two double-sided combs

WARRANTY:

Three years

Gel Size	Combs Included	Buffer Volume	Cat. No.	Each
7 × 8cm	6 and 10 wells	400mL	**09-528-110**	348.15
9 × 11cm	10 and 14 wells	600mL	**09-528-178**	380.00
12 × 14cm	12 and 20 wells	800mL	**09-528-110B**	441.53

Thermo Scientific* Owl Vertical Electrophoresis Systems



OWP8DS-2

Eliminate the mess and inconvenience of conventional polyacrylamide gel casting

- Easy-to-use system utilizes an agarose plug technique to permit slab gels to be cast and run in one unit
- Central cooling core provides even cooling across the gel surface for outstanding resolution and clear banding
- Cooling is achieved by circulating fluid through the core with an external circulator or cool tap water

WARRANTY:

Three years

Gel Size	Buffer Volume	L × W × H	Cat. No.	Each
10 × 8–10cm	300mL	5⅛ × 6¾ × 5½" (13 × 17 × 14cm)	**OWP8DS-2**	620.00
16 × 14–16cm	600mL	5⅛ × 9⅞ × 7⅝" (13 × 25 × 19.5cm)	**OWP9DS-2**	1021.00

Thermo SCIENTIFIC

Barnant Compulab* 3 Microprocessor Programmable Dispensing System

Ideal for all your fluid transfer, dispensing and diluting requirements—delivering performance when it counts

System dispenses, dilutes/dispenses, or functions as metering pump, with direct connection and control from a PC to several popular brand balances.

- Eighty-character LCD guides setup and calibration, displays flowrate, cumulative volume and complete program parameters—including setup and running functions.
- Intuitive 20-key control pad with user prompts for parameter settings: volumes, flowrates, speed, up/down ramp time, tube size, direction, units of measure, delay time (speed and volume can be changed during operation)
- Memory stores up to 30 programs which can run manually (with supplied dispensing handle or optional footswitch); semi-automatically (in cycles); automatically (by specifying cycle count from 1 to 999); or by direct control from a PC. (Software is included; compatible with Windows* 95 and Windows NT*.)
- Manual or automatic timed delay cycling from 0.1 sec. to 2.780 hr., with anti-drip feature
- Audible end-of-cycle alarm

ORDERING INFORMATION:

Finnpipette* Focus Single-Channel and Multichannel Pipetters

Combine comfortable design with superior accuracy and precision

- Unique ergonomic design reduces user stress and optimizes pipetting performance so that you can set the volume you need quickly and focus on your work
- Fully autoclavable
- Industry-leading five-year warranty with Web registration

Thermo Scientific* Finnpipette Focus Single-Channel, Adjustable-Volume Pipetters

- Fast-dial system with 0.01µL adjustment on micro volumes
- Improved grippy finger rest
- Easy to calibrate using tool (provided)
- Standard tip cone

Finntip* Flex Tips

The Finntip Flex system consists of a new generation of easy-to-use 300, 1000 and 1200µL tips

Finntip Flex 300 Rack

The latest breakthrough in pipet tip technology, the Finntip Flex system offers flexible, soft and sophisticated high-end tips for discerning users. All elements in the system have been designed to fulfill the most demanding requirements for ergonomics and flexibility in pipetting tasks at today's fast-paced laboratories.

Benefits

- Excellent for single and multichannel pipetting
- Available in three volume ranges: 5-300, 50-1000, and 50-1200µL
- Sterile tips are supplied in vacuum sealed, sterilized, 10 x 96 rack
- Save space with refills

Softer Tip

- The soft tip reduces the amount of force needed to attach and eject tips, significantly lowering the risk of repetitive stress injury (RSI)
- It also ensures a better seal with the pipetter module, ensuring higher accuracy and precision

Slip-free rack

- New nonslip operating rack has been designed as a result of direct feedback from laboratory personnel around the world
- The see-through cover is easy to open with one hand, leaving the other hand free to perform other tasks
- Thanks to the new sturdy base and slip-proof feet, the rack stays put, allowing you to easily yet firmly attach the tip
- The rack's attractive new design is fresh and compact—a welcome addition to any lab

Finntip* Flex Filter Tips

Finntip Flex filters effectively eliminate the risk of cross-contamination

Finntip Flex 1000 Rack

Combine the ergonomics of a standard Finntip Flex pipet tip and the safety of a filter tip. Free from DNA, DNase and RNase, these sterile tips are essential where cross contamination is a major concern.

- Ideal for use in research applications such as biomolecular assays
- Full sample recovery after accidental ingress, without any loss of integrity
- Certified to be free from DNA, DNase, RNA and endotoxins
- Available in 30, 100, 300, 1000 and 1200µL volumes
- Ideal for PCR and pipetting of radioactive and infectious samples
- Filters, made of an inert nonsealing polyethylene matrix, are effective at eliminating carry-over contamination from liquids and aerosols between pipet and tip
- Supplied in vacuum sealed sterilized tip racks

Volume	Packaging	Mfr. No.	Cat. No.	Pack of

Revco* Ultima* PLUS -86°C Upright Freezers

Advanced control platform for labs requiring sophisticated monitoring, alarm and communication functions

Offers maximum sample protection and peace of mind. Upright capacities range from 17 to 25 cu. ft. for storage flexibility. Plus, these units offer 20% more heat removal capacity, 15% less power consumption, 15% less heat emission, and 40% less noise than other ultralow-temperature freezers.

- Precise temperature control from -86° to -50°C, adjustable in 1°C increments
- Easy-to-read LED door-mounted at eye level, with touchpad data entry

Monitoring System

- On-Board Diagnostics continuously monitor sensors to ensure proper performance
- Life-Guard Alert monitors compressor performance, automatically adjusts to internal and external conditions
- Clean Filter, Alarm Battery Low and Voltage indicators

Alarm System

- Key-operated main power and alarm switch lock temperature and alarm setpoints
- Control Setpoint sets cabinet temperature, Cabinet Temperature displays the temperature
- Audible/visual power and temperature failure alarms automatically activate during a temperature deviation
- Automatic Incident Monitor (AIM) identifies temperature deviation due to power or temperature failure
- Time Delay feature delays restart after power failure
- Extreme Ambient Alert warns if room temperature may affect performance condition
- Alarm Test simulates temperature alarm
- Alarm Reset mutes audible alarm and resets AIM
- Battery backup supplies control panel in case of power failure

Patented Refrigeration System

- CFC-free DuPont* low-stage refrigerants
- 1hp industrial-grade compressors
- Downfeed evaporator
- Washable condenser filter

Construction

- Voltage Buck/Boost corrects line voltage into the unit
- Low Voltage Surge Protection minimizes voltage spikes
- Remote alarm contacts for external alarm/monitoring system

13-989-719 with optional built-in Temperature Chart Recorder.

- Two 1" (2.5cm) dia. access ports
- RS-232 data port
- High-strength steel cabinet with corrosion-resistant coating
- Minimum 5" (127mm) CFC-free, foamed-in-place urethane insulation (outer door: minimum 3½" [89mm])
- Integrated Cryolatch* door handle for one-handed operation
- Built-in key lock (padlock compatible)
- Outer door gasket seals with five points of sealing contact
- Inner doors are high-impact ABS plastic with recessed handles
- Stainless-steel interior shelves
- Heavy-duty 2" (5cm) locking, tandem wheel casters

ORDERING INFORMATION:

Optional built-in Temperature Chart Recorder (7-day, 6 dia.) and/or LN_2/CO_2 Backup System must be specified at time of order. Freestanding LN_2/CO_2 Backup System also available. Contact your Fisher Scientific Customer Service Representative for more information.

Thermo
SCIENTIFIC

Revco* General-Purpose Lab Refrigerators

With cabinet sizes to fit your varying space and storage requirements, Thermo Scientific Revco laboratory refrigerators are available in capacities from 4.9 to 78.8 cu. ft.

- Adjustable temperatures between 1° and 8°C (factory preset at 4°C)
- Automatic defrost and condensate removal

IntrLogic* Microprocessor Control

- Digital electronic technology designed to simplify operation and deliver greater accuracy
- Icon-based controls
- Large, easy-to-read digital display of temperature within 0.1°C
- Graphic thermometer is steady green when temperature is normal, flashes top bar for overtemperature, flashes bulb for undertemperature
- Sensor automatically initiates defrost cycle on demand, eliminating need for a defrost timer, minimizing frost buildup, and optimizing coil efficiency

Alarm System

- Audible/visual warnings for temperature deviations or power failure
- Key-operated ON/OFF/ALARM ON master switch for setpoint security
- Push-button alarm test and remote alarm contacts
- Alarm silence, ringback and auto reset
- Controller battery backup system
- Alarm setpoints are preset to warn of temperature deviation at 5.5°C overtemperature and 1.5°C undertemperature

Construction

- Positive forced-air circulation systems
- Industrial-grade cabinet construction and compressors
- High-density CFC-free urethane foam insulation
- Self-closing, key-locked doors
- Zinc-plated, open-wire shelves adjustable in 1" (2.5cm) increments
- Cold-rolled steel interior and exterior finished with high-impact powder paint coating
- Interior lights with door-activated ON/OFF switch, independent switch on control panel, adjustable leveling feet (except 4.9 cu. ft. undercounter model)

Thermo
REVCO

- 45.8 cu. ft. (1297L) units have double sliding glass doors, base-mounted controls and refrigeration systems, independent switch-activated lights, and dual-wheel 2" (5cm) casters instead of leveling feet
- Undercounter model has a 1" (2.5cm) dia. access port with plug

ORDERING INFORMATION:

Alarm systems, temperature chart recorders and power monitors are available separately. Other voltages are available; contact your Fisher Scientific Customer Service Representative for more information.

WARRANTY:

Two years parts and labor, U.S. and Canada only

COMPLIANCE:

UL and cUL listed. TUV approved. CE marked.

Thermo SCIENTIFIC

Evolution* UV-Visible Spectrophotometers

High performance optical design for reliable results

Thermo Scientifc* Evolution* 300 UV-Vis Spectrophotometer

14-386-404

A true double-beam design and long lifetime xenon lamp ensure the most reliable analysis of samples

- Large sample compartment easily accommodates over 30 accessories
- Long lifetime, quiet xenon lamp is guaranteed for three years of maintenance-free performance
- Smart Accessories* can be installed and removed without restarting the instrument. Accessories are instantly detected and Local Control or PC software is configured automatically
- Unique serial number of the accessory is recorded for comprehensive event logs and audit trail capabilities
- Optional mercury lamp accessory provides primary standard for wavelength accuracy recommended by the USP, EP, and the ASTM
- All common applications such as scanning, fixed wavelength analysis, and kinetics, controlled directly from Local Control software
- Available with Thermo Scientific VISION*pro** software for general research and QC laboratories series or Thermo Scientific VISION*security** for laboratories requiring 21 CFR Part 11 compliance
- PC Control analyzer packages available for enzymatic food analysis, color, and materials calculations

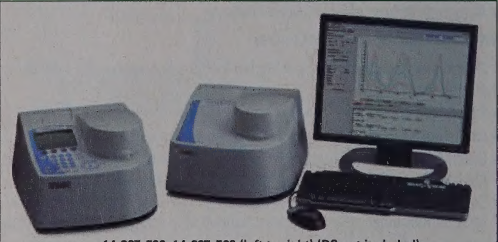
Thermo Scientific* Evolution* 60 UV-Vis Spectrophotometer



14-387-500, 14-387-502 (left to right) (PC not included)

Flexible, cost-efficient system designed for a wide range of laboratory applications—from routine to research

- Highly accurate instrument with fixed 1.0nm bandpass assures full compliance with regulatory requirements.
- Automatic cell changer controlled by built-in Local Control or PC Control software.
- Cell changer easily removed to accommodate optional accessories††
- Compact design saves valuable space for additional laboratory equipment
- Maintenance-free operation including xenon lamp with 3-year guarantee

Versatile system choices

- Easy-to-use Local Control embedded software or Thermo Scientific VISION*lite** PC software offers intuitive method setup, analysis, reporting, and calculation capabilities
- Biochemical tests for DNA, RNA and protein are included in the Local Control embedded software
- PC Control analyzer packages for enzymatic food analysis, color, and materials calculations

Thermo Scientific* Evolution* 600 UV-Vis Spectrophotometer

Designed for laboratories demanding sensitivity and high performance

A total analysis solution for applications in materials science, spectroscopy research, optics, color analysis, and remote measurements with fiber optics.

- Red-sensitive photomultiplier tube (PMT) detector
- True double-beam design
- Comprehensive calibration routine
- Superior wavelength accuracy over entire spectral range
- Large sample compartment
- Wide beam separation
- Wide selection of accessories for demanding samples
- PC Control analyzer packages available for enzymatic food analysis, color, and materials calculations

Fisherbrand Disposable Cuvets

Select polystyrene cuvets for assays in visible spectral range (340 to 750nm). For accuracy throughout UV/Vis range (285 to 750nm), choose cuvets made from a superior grade of methacrylate.

14-955-125

14-955-129

14-955-127

- Disposable 10mm pathlength cuvets designed for visible and UV/Vis assays
- Clear four-sided cuvets are ideal for fluorimetry and nephelometry, as well as spectrophotometry
- Scale down assay volumes and save on reagents by using semimicro cuvets with capacity to 1.5mL
- Molded-in arrow indicates direction of transmission on standard and semimicro cuvets—helping assure uniformity
- Each case contains cuvets with same mold impression number—assuring precision between samples—standard deviation is <±0.005 extinction units between cuvets

ORDERING INFORMATION:

Packaged 100 cuvets per stackable tray; five trays to a case. Outside dimensions: 12L × 12W × 45mmH.

UVP BioDoc-It* Imaging Workstations

Stand-alone gel documentation workstations for fluorescent and colorimetric imaging

UVP97-0178-01

Ideal for routine acquisition of DNA and protein gels and for multiple-user laboratories with large volume image capture requirements. No computer required! Network connectivity is available for image transfer.

CCD Camera

- On-chip interline transfer CCD sensor
- Composite monochrome output with 752 × 582 PAL
- 8-48 zoom lens
- UV and IR bandpass locking filters
- Sensitivity to 0.1ng of Ethidium Bromide-stained DNA

Integrated processor and LCD monitor

- Six-button, touch-control keypad controls camera integration
- Display live preview of images on the integrated 6.4" flat panel LCD
- Autosave images in TIFF and JPEG formats to either memory card or network retrievable storage
- Unique gel window opens for quick sample viewing without opening the door
- Side access doors allow moving or cutting gels without opening the front door

INCLUDES:

8-bit monochrome CCD camera; LCD viewing screen; CompactFlash* memory card (64mb) and card reader to save and transfer images; compact 3-door darkroom with overhead white light access door and unique UV-blocking gel viewer; choice of single- or multiple-wavelength UV transilluminators or FirstLight* Uniform UV illuminator; easily accessible filter tray for quick exchange of Ethidium Bromide filters

Whatman

Protran* Blotting Membrane Products

Whatman offers an extensive line of blotting products for all of your application requirements. Our selection includes premium blotting membranes and blotting devices for screening many samples on one membrane. We also offer circular membranes in a variety of membrane types, which are ideal for colony hybridization and plaque lift applications.

- Universal membrane suitable for Western, Southern, and Northern blotting
- Hydrophilic, so no prewetting with methanol is required
- High binding capacity and very low background for superior signal-to-noise ratios without stringent washing conditions
- Compatible with all common detection methods, including radioactive, colorimetric, fluorescent, and chemiluminescent
- Provide excellent shelf-life for proteins—proteins maintain molecular recognition activity for up to five years

Protran* Blotting Sandwiches

Available in sizes that match the most commonly used precast gels

- Consist of Protran transfer membrane between 3MM CHR blotting paper
- Precut for speed and convenience

Whatman® 3MM CHR Chromatography Paper

Relatively thick with a high alpha cellulose content

CHROMATOGRAPHY PAPER
3MM CHR
Whatman®

05-716 Series

0.34mm, grade 3MM chromatography paper is manufactured entirely from cotton linters that have an alpha cellulose content of at least 98%.

- Smooth surface
- No "paper making" additives—the final organic purity of these chromatography grade papers represents the highest level that can be achieved without oxidation and degradation of the cellulose fibers
- Medium flowrate: 130mm/30 min. (water)
- Widely used for electrophoresis, general chromatography, and blotting applications

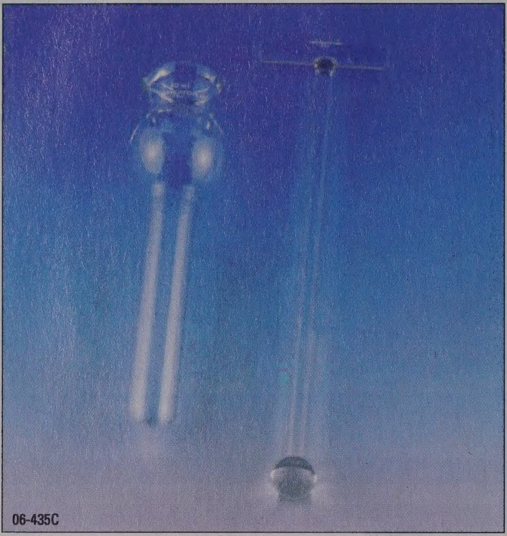
WHEATON Science Products

Wheaton Tissue Grinders

All Wheaton Tissue Grinders are made from 33 low extractable borosilicate glass, which meets ASTM* Type I, Class A and USP Type I standards.

Dounce Tissue Grinders



06-435C

Designed to retain a high percentage of cell nuclei, mitochondria, and proteins in soft tissues or cell suspensions

- Ideal for enzyme studies
- Sample covers the pestle ball, preventing heat buildup by reducing friction against the mortar
- Mortar features large reservoir and pouring lip
- Supplied with "loose" and "tight" pestles
- Tight pestle clearance: 0.0020 ±0.001" (0.05 ±0.025mm)
- Loose pestle clearance: 0.114 ±0.001" (0.114 ±0.025mm)

Potter-Elvehjem Tissue Grinders

08-414-10 Series

Choose grinders with or without plastic safety coating

- Interchangeable parts
- Stainless-steel rod can be inserted in an electric overhead stirrer
- PTFE pestle bottom conforms exactly to tube bottom; clearance of approximately 0.1 to 0.15mm
- Transparent plastic coating on Safe-Grind* tissue grinders protects mortar from becoming scratched, improves grip, and contains homogenate in the case of tube breakage
- Autoclavable
- Rod dimensions, 1/4" diameter (6mm)

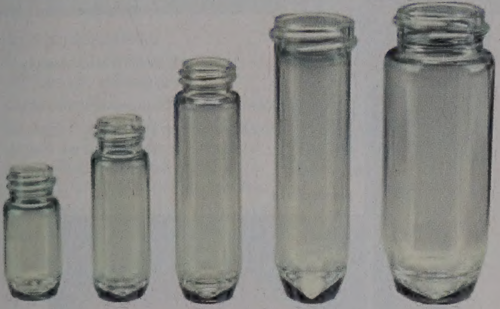
WHEATON Science Products

E-Z Ex-Traction* Vials

E-Z Ex-Traction Vials from Wheaton combine the best attributes of high recovery vials with a specially designed bottom to provide the optimum benefits to users of automated or manual sample storage and sample handling systems in compound or biological sample applications. Precision manufactured from low extractable borosilicate glass, E-Z Ex-Traction Vials meet ASTM* Type I, Class A and USP Type I standards.



For collection, automated handling, storage and maximum retrieval of samples

- Large, smooth, flat bottom surface provides greater stability and optional 2D bar code placement
- Conical well design ensures maximum recovery of high value samples
- Manufactured for fail-safe operation in automated sample handling and storage systems
- Type I Class A grade borosilicate glass prevents changes in pH and maintains purity of contents
- Closures available separately

Capacity	Dia. × H	Cap Size (mm)	Mfr. No.	Cat. No.	Case of
2mL	15 × 32mm	13-425	W224601	**02-927-123**	250/458.00
4mL	15 × 45mm	13-425	W224613	**02-927-125**	250/468.00
8mL	16.75 × 60mm	15-425	W224618	**02-927-127**	250/485.00
10mL†	19 × 70mm	22-400	W224630	**02-927-129**	100/212.00
20mL	26.5 × 67mm	22-400	W224634	**02-927-131**	100/245.00

† 10mL shoulderless vial provides wider opening for sample retrieval and dispensing.

LOOKING TO BAR CODE YOUR VIALS?

SciLutions* Value Added Services include bar coding, surface treatment, critical cleaning and custom packaging. Ask your Wheaton or Fisher Scientific Customer Service Representative for more information.

Sample Vials in Lab Files*

All Wheaton sample vials are made from 33 low-extractable borosilicate glass, which meets ASTM* Type I, Class A and USP Type I standards. Choice of Shorty Vials* or standard vials, packed in convenient file trays.

Shorty Vials

- Vials in partitioned corrugated trays
- Standard vials available in clear or amber glass
- Shorty Vials* feature low profile for greater stability
- Black phenolic screw caps are pre-attached with choice of liner

Screw Cap liner options:

- **14B rubber lined caps** are autoclavable and have substantial resistance to chemicals, acids and bases without the added cost of PTFE.
- **PTFE faced caps** are 14B rubber lined and provide an extremely inert and chemically resistant environment for harsh, sensitive and reactive samples.

WHEATON Science Products

Serum Bottles, Vials and Seals

Wheaton Serum Bottles

06-406A, 06-406D, 06-406C

- High chemical durability
- Manufactured with clear and amber USP Type I borosilicate glass
- Molded bottles have excellent wall strength
- Blowback feature in the neck of the tubular vial and the specially designed bottom radius provide added strength which is important for lyophilization applications
- Shrink-wrapped packaging and partitioned modules reduce breakage
- A variety of stoppers, aluminum seals and septa are available to seal the bottles and vials
- Use the ergonomically friendly Wheaton E-Z Crimper* (see below) to crimp the aluminum seals to the bottles and vials

APPLICATIONS:

- **Lyophilization (Freeze-Drying)** — Strength and thermal conductivity make these ideal containers for this process.
- **Long- to Short-Term Storage System** — Borosilicate glass and crimp seal closures allow for optimum sterility and sample integrity, making these containers suitable for various storage and sampling needs.
- **Vaccine/Medicine Containers** — Specified by the FDA for use with injectable drugs and medicines.

Wheaton Serum Bottles and Vials conform to the requirements for Class A of the United States Pharmacopeia for Type I glass.

Wheaton Serum Tubing Vials

Left to right: 06-406-37, 06-446C, 06-446J, 06-446H, 06-446G

- Clear vials made from 33 expansion low extractable borosilicate glass to ensure uniform wall thickness
- Amber vials made from 55 expansion borosilicate glass
- Meet ASTM* Type 1, Class A and USP Type I standards
- Withstands extreme temperature variations
- Necks finished for aluminum crimp seals
- Blowback feature of neck and specially designed bottom radius for lyophilization applications

Fisher Scientific

Traceable* Conductivity Standards

From an accredited ISO 17025 A2LA Calibration Laboratory, with NIST* Traceable Certificate

09-328-1 09-328-6

Traceable Conductivity Standards are the most accurate available. Accuracy at 25°C is ±0.25 micromhos for 1, 5, and 10 micromho solutions and ±0.25% for other solutions or the uncertainty shown on the certificate, whichever is greater.

- Traceable Certificate comes with Bottle and One-Shots*
- Units on label are: micromhos/microsiemens, ohms, parts per million/total dissolved solids
- Individual temperature compensation chart supplied with each item
- Individually tested bottles are available from an ISO 17025 calibration laboratory accredited to A2LA
- Probes placed directly into One-Shots eliminate concern about external container contamination

AIR

*Fisherbrand** Dust'it* Air Duster

Powerful bulb duster forcibly blows away dust, lint, and dirt

Ideal for optical lenses, slides, circuit boards, and cuvets.

- Provides high-pressure, pinpoint jets of air exactly where desired; vary the squeeze to control delivery
- One-way inlet valve at top stops air from being drawn through tip
- Nonconductive plastic sleeve-tip prevents scratches
- Dimensions: (Dia. × H) 2¼ × 5" (5.7 × 12.7cm)
- Weight: 2 oz. (56.7g)

14-649-59

Cat. No.	Pack of 3
14-649-59	26.88

*Fisherbrand** Super Friendly Air'It* Aerosol Duster

Blows lint, dust, and loose dirt away instantly

Ideal for delicate, difficult-to-clean, and inaccessible equipment.

- Provides high-pressure, pinpointed jets of air exactly where needed—up to 3000 jets of cleaning power
- Trigger-actuated valve provides controlled delivery at 71psi
- Triple-filtered (to 0.3µm) gas is noncorrosive, nonflammable, dry, and odorless
- 5" (13cm) snorkel constructed of nonconductive polyethylene
- Size: 11 oz. (312g)

CERTIFICATIONS:
EPA designated as ozone-safe

AIR MONITORS

Millipore* 25mm Aerosol Analysis Monitors

Preloaded filter monitors

Come with plain white membranes of mixed cellulose esters, a cellulose support pad, and a three-piece housing. Average Background Count (ABC) for particles is printed on each package.

- Effective filtration area, 3.7cm^2
- Monitors come nonsterile; for vacuum only

MAWP 025 AC and AO

Type A

- For monitoring airborne particles, trace metals, and particulate fluoride
- Polystyrene housing has a 16mm center ring to distribute sample flow
- Female Luer slip vacuum connection
- Height with top section removed is 1¼" (3.2cm); with top in place, 1¾" (4.4cm)

Type B

- For asbestos and trace metals, lead, and copper
- Carbon-filled, conductive, polypropylene housing with 50mm extension cowl
- Barbed hose vacuum connection eliminates the need for a tubing adapter
- Height without top section, 3" (7.6cm); with top in place, 3⅛" (7.9cm)

COMPLIANCE:
Type B meets NIOSH specifications for airborne asbestos fiber monitoring.

ORDERING INFORMATION:
Type A is also available without membrane (M000 025 A0).

REQUIRED ACCESSORIES:
Type A requires tubing adapter with male Luer connection, XX62 000 05.

Housing	Pore Size	Membrane Surface	Cat. No.	Pack of 50
Type A	0.8µm	White, plain	MAWP 025 A0	162.00
Type B	0.8µm	White, plain	MAWP 025 AC	152.00

ACCESSORIES

Empty Monitor Cassette

For Millipore* 25mm Aerosol Analysis Monitors

Includes endcaps.

ORDERING INFORMATION:
Bulk pack.

Description	Cat. No.	Pack of 50
Monitor Case only, Type A	M000 025 A0	10.00

Millipore* 37mm Aerosol Analysis Monitors

For particulate analysis of aerosols

- Available with matched-weight membranes
- Transparent, disposable filter holders come preassembled, with MF-Millipore* mixed cellulose ester filters
- Thin cellulose support ring seals the filter between monitor sections to distribute sample flow evenly over the filter surface
- Three-part SAN (styrene acrylonitrile) nonsterile plastic housing
- Center section holds filter in place when top section is removed for open aerosol sampling
- Female Luer slip inlet and outlet
- Housing measures $1\frac{7}{16}$ dia. × $1\frac{1}{8}$"H (3.7 × 2.9cm) with top section removed; $1\frac{7}{16}$"H (3.7cm) with top in place
- Average Background Count (ABC) value is marked on each preassembled monitor package
- Effective filtration area: 9.0cm^2
- For vacuum only
- Matched-weight monitors contain two filters matched in weight to within 0.1mg, eliminating test filter preweighing in gravimetric analysis

MAWP 037 A0

ORDERING INFORMATION:

Monitor case is also available separately for use with membrane of your choice; comes with or without support ring.

LOOKING FOR FILTERS?

See our Filtration section for a complete selection of Millipore* Membrane Filters.

Millipore* M Air T* Tester

Preset sampling volumes from 25 to 1000L

Lightweight sieve-impaction sampler tests microbial quality of air in accordance with USP 24 reference method for cleanrooms, barrier environments and critical filling areas.

- Samples up to 1000L in less than seven minutes
- Programmable electronics with delay timer saves airflow parameters to be reused for subsequent runs
- Timer can be set in increments of five minutes to one hour
- Low turbulence will not disrupt air currents in laminar hoods and confined spaces
- Stainless-steel, autoclavable sieve with nearly 1000 micro-perforations evenly distributes air over agar surface to minimize colony overlapping

ATAS05060 with ATSMTTD60 (sold separately)

ORDERING INFORMATION:

Dimensions (L × W × H): 4 × 5 × 10" (10.2 × 12.7 × 25.4cm).
Net weight: 4 lb. (1.8kg).

INCLUDES:

Tester, spare sieve with cover, Allen key, tripod, battery charger (110-240V 50/60Hz), carrying case and instructions. Eight rechargeable NiCd batteries permit seven hours of use on a single charge.

REQUIRED ACCESSORIES:

Millipore M Air T Agar Cassettes (sold separately)

WARRANTY:

One year

CERTIFICATIONS:

CE marked; Certificate of Calibration provided.

The small size and unique design of the M Air T Tester will not disrupt the air currents inside a laminar hood.

Description	Cat. No.	Each
M Air T Kit	**ATAS05060**	4302.00

ACCESSORIES

Millipore* M Air T* Agar Cassettes

Prefilled cassettes with SAN (styrene acrylonitrile) body

- Simple colony counting through integrated grid
- Consistent filling level and flat agar surface maintain constant surface-to-sieve ratio for reproducible results
- 20g of agar with a minimum depth of 7mm minimize water evaporation
- Cassettes are preprinted with lot number for recording and traceability
- Gamma-irradiated, disposable cassettes with edge wings position easily in tester head

COMPLIANCE:

USP and EPA compliant.

ORDERING INFORMATION:

Cassette diameter: 73mm. Package of 60 includes six bags of ten cassettes each. Double sleeve packaging for barrier environments.

INCLUDES:

Resin lids and polypropylene bottom covers

Description	Cat. No.	Pack of
Tryptic Soy Cassettes	**ATSMTTD60**	60/173.00
Empty Cassettes, EtO Sterilized	**ATSMC0114**	114/173.00

Millipore* M Air T* Tester Accessories and Replacement Parts

Description	Cat. No.	Each

Battery Pack	**ATASBAT01**	217.81
Calibration Kit	**ATACAL001**	1844.00

Whatman* EPM 2000 High-Volume Air Sampling Filters

Developed for high-volume air sampling in collection of atmospheric particulates and aerosols

09-874-69

- Selected by U.S. EPA as standard filter used in nationwide Hi-Vol air sampler network
- Pure borosilicate glass—enable detailed chemical analysis of trace pollutants with minimal interference and background
- Heat treated to remove organic traces; 99.99% efficiency for DOP 0.3µm-size particles
- Thickness: 0.45mm (18mil); weight: 85g/m^2
- Autoclavable; maximum temperature, 500°C (932°F)
- Easily handle typical commercial high-volume sampling technique (2200m^3 over 24 hours; average flowrate, 1.7m^3/min.; through exposed filter area of approximately 400cm^2)

ORDERING INFORMATION:

Come in 4.7cm diameter circles or individually numbered 8 × 10" (20.3 × 25cm) sheets.

Description	Mfr. No.	Cat. No.	Pack of 100
4.7cm circles	1882-047	**09-874-69**	36.29
8 × 10" sheets	1882-866	**09-874-67**	363.89

Millipore* Filter Forceps

Handle membrane filters without damage

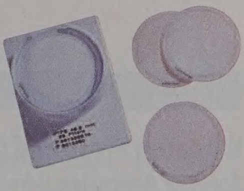
- Made from highly polished stainless steel with beveled, unserrated tips
- Sterilize by autoclaving or flaming

XX62 000 06

Cat. No.	Each
XX62 000 06	12.07

Whatman* PM 2.5 Air Monitoring Filters

Low-chemical-background filters permit sensitive, interference-free determinations



05-717-5

- For U.S. EPA PM 2.5 ambient air monitoring
- With high-purity, thin PTFE membranes
- Chemical-resistant, sequentially numbered polypropylene support rings
- Low tare mass provides for accurate gravimetric determinations
- Thermally stable design eliminates curling, keeping the membrane flat
- Filter thickness: 40µm
- Pore size: 2µm
- Manufactured under cleanroom conditions without any glues or adhesives
- Individually numbered for easy sample tracking

ORDERING INFORMATION:

Each box of 50 filters is sequentially labeled for easy control.

Diameter	Mfr. No.	Cat. No.	Pack of 50
46.2mm	7592-104	**05-717-5**	264.88

Whatman* QM-A Quartz Air-Sampling Filters

Microfiber filters for air sampling in acidic gases, stacks, flues and aerosols at temperatures to 500°C (932°F)

- High airflow, excellent retention—ideal for PM-10 high-volume air sampling method
- Ultrahigh-purity quartz (SiO_2)
- Low in alkaline earth metals, heavy metals
- Virtually eliminate sulfate and nitrate artifacts
- Choose from discs or sequentially numbered sheets

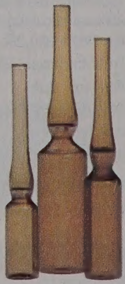
AMPULES

Wheaton Prescored Gold-Band* Amber Ampules

Protect light-sensitive samples

- Wheaton "320" amber borosilicate glass
- Prescored to eliminate filing
- Gold-Band feature indicates prescoring
- Stems can be pull sealed or tip sealed

COMPLIANCE:
Meet USP Type 1 and ASTM* Type I, Class B standards



01-215N, -215Q, and -215P

Capacity	O.D. × H	Mfr. No.	Cat. No.	Case of 144
1mL	10.5 × 67mm	176792	**01-215N**	37.54

*Fisherbrand** SafeSnap* Disposable Ampule Openers

Ideal safety measure for ampule usage—especially in respiratory and blood-gas laboratories

Polyethylene ampule collars protect fingers while breaking open the scored neck of glass ampules.

To use:

- Slip the collar onto the ampule until collar rests on the widest part
- Grip the collar with thumb and forefinger while holding the upright ampule at bottom
- Break the ampule with a quick snap
- Dispose of the collar and ampule top together

01-216 Series

5 to 10mL	**01-216-2**	123.44

ANEMOMETERS

Fisher Scientific* Traceable* Hot Wire Anemometer/Thermometer

Ideal for cleanrooms and environmental tests

- Miniature glass-bead thermistor provides greater precision at low air velocities; eliminates friction errors caused by rotating vanes in traditional anemometers
- Measures air velocity in five ranges: 0.2 to 20mps with a resolution of 0.1mps; 0.7 to 72kph with a resolution of 0.1kph; 40 to 3940fpm with a resolution of 1fpm; 0.5 to 44.7mph with a resolution of 0.1mph; and 0.4 to 38.8 knots with a resolution of 0.1 knots
- Accuracy is ±1% full scale plus 1 digit
- Displays temperature in user-selectable °C or °F; temperature range from 0° to 50°C (32° to 122°F) with a resolution of 0.1°C or F and accuracy of ±0.8°C (1.5°F)
- Serial RS-232 output allows the meter to be connected to any IBM*-compatible computer or datalogger
- Information can be imported to an existing database and, with the accessory Data Acquisition System, captured, displayed on monitor, and stored†
- Memory function recalls the highest and lowest readings and HOLD button freezes display for later reading

2.0
HOT WIRE ANEMOMETER

06-662-73

ORDERING INFORMATION:

Unit measures 7L × 3W × 1¼"H (17.8 × 7.6 × 3.2cm); weighs 9½ oz. (269g). Available accessories include DAS-4 Data Logger System (06-662-72) and DAS-3 Data Acquisition System (11-661-22).

INCLUDES:

Dual thermistors probe, 40" (101.6cm) cable, and six "AAA" batteries.

CERTIFICATIONS:

Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA. It indicates traceability to standards provided by NIST* (National Institute of Standards and Technology).

Cat. No.	Each
06-662-73†	420.56

† Unit is equipped with a sample program that allows you to store 100 readings; the complete DAS-3 Data Acquisition System or DAS-4* Data Logger System is required to transfer these readings to a computer file*

LOOKING FOR MORE ANEMOMETERS?

Fisher Scientific has many more anemometers available online for a variety of airflow measurement applications.

ANIMAL CARE

CAGES

Tecniplast* Deluxe Reusable Animal Cages

Safe, sanitary environments for mice, rats, hamsters, guinea pigs, gerbils

- Sturdy cages feature rounded corners for easy cleaning
- Corner lugs or side arms allow stacking without scratching or jamming
- Filter covers (sold separately) maintain environment for optimum animal health; lock in place to assure containment
- Durable wire lids available for several cage sizes

Polycarbonate cage 01-288-1 Series with wire lid 01-288-5 Series

- Tecniplast water bottles available for most cage sizes; fit securely beneath filter cover

Reusable Polycarbonate Cages

- Withstand temperatures to 121°C (250°F)
- Glass-like clarity with excellent impact strength
- Autoclavable

Reusable High-Temperature Polysulfone Cages

- Withstand repeated autoclaving at 134°C (273°F)
- Molded of clear, special-grade PSF to withstand higher temperatures and provide better chemical resistance

COMPLIANCE:

Meet NIH size guideline

Accessories for Tecniplast* Deluxe Reusable Animal Cages

Filter Covers

- For an isolated environment
- Minimize temperature variations, humidity, harsh drafts, CO_2 buildup
- Promote animal health, encourage breeding
- Economical polyvinyl chloride (PVC) covers are disposable
- Sturdy, molded polycarbonate (PC) covers are reusable
- Use with disposable polyester fibers

Wire Lids

- Extra strong
- Crosswires prevent bending
- 01-288-5H wires spaced 19mm apart; all others 7mm
- Folding divider allows lid to be nested for storage
- Autoclavable
- Include protective stopper guard

Tecniplast* Metabolic Cage Systems for Rodents

Unique funnel and cone design completely separates urine and feces

Distinctive two-chamber design provides a safe, sanitary environment for animals and permits acquisition of untainted urine and feces for study. Upper and lower chambers constructed of smooth, transparent polycarbonate to prevent gnawing and noise.

01-287-6 Series with 01-287-6E stand (order separately)

Upper Chamber Features

- Large cover keeps animals securely in cage; removes to allow easy access to interior
- Stainless-steel support grid separates chambers and allows waste products to pass through bars
- Handles on grid allow for easy cage transportation without stand
- Feeder chamber on outside of upper chamber is large enough for animals to access food, yet small enough to prevent sleeping or nesting
- Polycarbonate feed drawer underneath feeder chamber slides out for easy filling
- Rear chamber of feed drawer catches spilled slurry, liquid, or powder food—excess food will not contaminate excreta
- Calibrated polycarbonate water bottle with stainless-steel cap and sipper tube assembly, combined with water spillage collection tube, facilitates accurate collection of fluid intake data
- All parts are autoclavable

Lower Chamber Features

- Nonwetting polymethylpentene (PMP) funnel and separating cone allow waste products to collect in separate PMP feces and urine collection tubes
- Fecal matter rolls down the sides of funnel to collect in feces collection tube
- Urine collection tube is graduated in cubic centimeters and can be cooled in an ice bath
- Tubes unlock from outside of cage with a single twist so as not to disturb animals
- All parts are autoclavable

ACCESSORIES:

System requires accessory stand to support cage (01-287-6E, next page) and provide access to all cage components.

NOTE:

Feed drawer not designed for use with pellet food.

Accommodates	Domicile Portion I.D. × H	Overall L × W × H	Mfr. No.	Cat. No.	Each

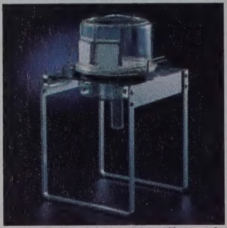
Tecniplast* Diuresis Metabolic Cage for Mice

Channels and collects liquid waste products into graduated urine collection tube



01-288-2D with 01-287-6E stand (sold separately)

Similar to Cat. No. 01-287-6C. Smaller polymethylpentene separating cone and collection funnel specifically designed to channel and collect liquid waste products into graduated urine collection tube.

- Helps minimize urine evaporation
- Features stainless-steel screen for collecting feces
- All cage parts autoclavable

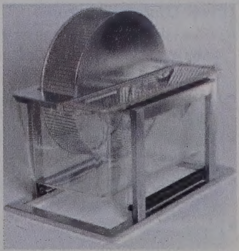
INCLUDES:
14L × 11W × 19"H (36 × 28 × 48cm) polycarbonate upper chamber with easy-access cover and stainless-steel mouse support grid; 100mL water bottle and cap with support assembly; water spillage collection tube; feeder chamber with feed drawer.

REQUIRED ACCESSORIES:
Requires cage stand (01-287-6E, at right), available separately

Accommodates	Mfr. No.	Cat. No.	Each
Single mouse	3700D001	**01-288-2D**	709.44

Tecniplast* Activity Wheel for Rodents

Ideal for research involving circadian rhythms, ingestion, and drug or pharmaceutical testing



01-286-12C wheel assembly with 01-288-1F cage and 01-281-12B cage support

Allows easy, convenient measurement of lab rodents' voluntary physical activity in response to chemical or environmental stimuli.

- Constructed with low-friction bushing for long life and quiet, smooth action
- All metal parts are stainless steel
- All nonelectrical cage parts are autoclavable
- Compatible with cages with dimensions of 19 × 10½ × 8" (48 × 27 × 20cm) (01-288-1F and 01-286-13F for rats; not included)

ORDERING INFORMATION:
Accessory cage support (01-281-12B) and magnetic switch counter with LCD counter (01-286-12E) sold separately. Wheel assembly dimensions: (Dia. × W): 13½ × 3⅞" (34.5 × 9.7cm).

INCLUDES:
Activity wheel, wheel hub and support, sheet lid that encloses wheel and covers cage for secure containment, activity wire lid with water bottle support and food hopper

ACCESSORIES

Support Racks for Tecniplast* Metabolic Cages

Stainless-steel racks hold up to 12 Tecniplast Metabolic Cages

01-287-6F

- Accommodate cages for small rats and mice (01-287-6A, 01-287-6C, and 01-288-2D)
- Mounted on swivel casters—one pair locks for safety

Vertical Style

- Hold three rows of four cages each
- Can be adjusted to hold eight metabolic cages (01-287-6G)

Horizontal Style

- Hold two rows of six cages each, situated at a convenient working height

Description	L × W × H	Mfr. No.	Cat. No.	Each
Vertical Style	49½ × 19½ × 73½" (126 × 50 × 187cm)	1264C00SU	**01-287-6F**	2627.50

Stand for Tecniplast* Metabolic Cages

Stainless-steel cradle assembly with nylon supports

01-287-6E

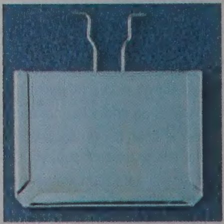
- Holds one metabolic rodent cage
- Autoclavable

ORDERING INFORMATION:
Overall dimensions (L × W × H): 12¼ × 12¼ ×13⅜" (31 × 31 × 34cm).

Accommodates	Mfr. No.	Cat. No.	Each
One rodent metabolic cage	1290D00SU	**01-287-6E**	173.29

Tecniplast* Data Card Holders

For use with Tecniplast Deluxe Reusable Animal Cages



01-288-4A

- Hold standard 3 × 5" index cards
- Vertical swivel style allows card to be written on without removing from holder

Description	Mfr. No.	Cat. No.	Case of
Horizontal	1284L420	**01-288-4A**	100/783.29
Vertical	3700M922	**01-288-4B**	10/84.94

*Trademark. See Trademark Reference.

Tecniplast* Water Bottles with Sipper Caps

Exceptionally clear and remarkably durable

- Large-diameter, high-capacity water bottles
- Molded-in graduations for easy measurement
- Shatter-proof polycarbonate
- Fit securely beneath filter covers

INCLUDES:
Stainless-steel sipper tubes and caps.

01-288-10 Series

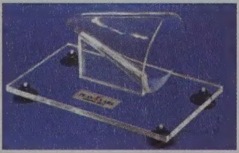
RESTRAINTS

Plas-Labs* Rodent Injection Cone

Ideal for large quantity sampling where high speed and efficiency are required

- Completely transparent, durable, and easy to clean
- Utilizes suction cup feet to secure device



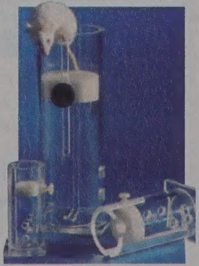
01-288-32

Animal Size Range	L × H × Dia.	Cat. No.	Each
15 to 30g (mice), 500 to 600g (rats)	5¾ × 5 × 4" (14.6 × 12.7 × 10.2cm)	**01-288-32**	278.32

Plas-Labs* Broome-Style Rodent Restrainers

Ideal for injections or blood sampling

- Offer easy access to rodent
- Prevent rodent from turning
- Provide safety to the animal handler
- Manufactured from clear materials to provide complete visual awareness of the state of the animal



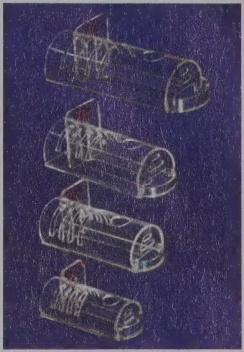
Left to right: 01-288-32A, 01-288-32D, 01-288-32B

Animal Size Range	L × Dia.	Cat. No.	Each
15 to 30g	3¾ × 1" (9.5 × 2.5cm)	**01-288-32A**	150.00
30 to 125g	5½ × 1½" (14 × 3.8cm)	**01-288-32B**	118.28
125 to 250g	8 × 2" (20.3 × 5.1cm)	**01-288-32C**	129.48
250 to 500g	8½ × 2½" (21.6 × 6.4cm)	**01-288-32D**	138.08
550g+	9 × 3½" (22.9 × 8.9cm)	**11-389-4**	224.30

Plas-Labs* Flat-Bottom Rodent Restrainers

Apertures in the top and bottom provide easy access for injections or sampling

- Pocket and holes in the front make it easy to anesthetize or feed the animal
- Clear material provides a visual check of rodent's condition
- Adjustable tail stock can be inserted into any one of four positions



Top to bottom:
01-288-31D, 01-288-31C,
01-288-31B, 01-288-31A

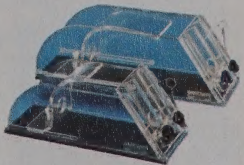
250 to 500g	8 × 3¼" (20.3 × 8.3cm)	**01-288-31D**	138.08

Plas-Labs* Rabbit Restrainers

Designed to minimize trauma

- Highly polished edges prevent chafing, especially at the neck
- Non-slip surface provides better footing and helps to calm animal
- Unique curved back butt plate minimizes the risk of back injury
- Rear access hole for pyrogen testing
- Unit can be sanitized in a cage washer up to 180°F or sterilized chemically
- Clear acrylic aids in retaining body warmth
- Vertical head bars (adjustable) are easily removable if not needed
- Stainless-steel pin permits several fine adjustment points for neck plate
- Nonslip base pads ensure unit stability
- Additional sizes available; contact your Fisher Scientific Customer Service Representative



Top to bottom: 11-389-5, 11-389-9

Animal Size Range	L × W × H	Cat. No.	Each
Up to 4kg	18 × 6 × 6" (45.7 × 15.2 × 15.2cm)	**11-389-5**	473.53

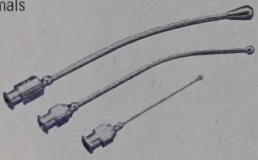
SURGICAL DEVICES

Popper* Animal Feeding Needles

Precision-assembled stainless-steel feeding needles ideal for feeding and dosing

- For the intubation of laboratory animals
- Straight, curved or malleable tubing styles
- In standard sizes to accommodate animals from newborn mice to primates
- Autoclavable



01-290 Series

Newborn Needles

- For newborn mice and rats
- For animals up to 0.7 oz. (20g)

Small Animal Needles

- For animals 0.7 oz. to 1 lb., 5 oz. (20 to 600g)

Malleable Needles

Feeding needles have bendable tubing to shape as needed

*Fisherbrand** Animal Tags

Small aluminum tags in set numbered 1 to 100 with 100 washers

- Insert tag through hole; place washer in back of hole
- Bend ends of tag back in rivet fashion, leaving space for ear growth

13-812-200

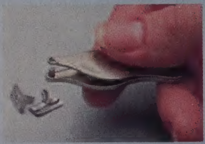
REQUIRED ACCESSORIES:

Punch (13-812-201, not included) to make hole in animal's ear

Cat. No.	Pack of 100
13-812-200	21.70

Animal Ear-Tag Punch

For punching holes into thin part of animal's ear



13-812-201, shown with tag, purchased separately

Cat. No.	Each	Pack of 12
13-812-201	12.23	125.45

Animal Clippers

For preparing mice, rats, hamsters, or other animals for surgery without irritating or frightening them

Oster
GOLDEN A5

- Cutting blades snap on and off, permitting instant change with no tools required
- Universal motor uses high rpm and gear-down design to produce outstanding power for unit's size
- Automatic armature take-up ensures long life and quiet operation

INCLUDES:
Size 10 blade set for general clipping

COMPLIANCE:
Double insulated to meet OSHA specifications

NOTE:
For surgical shaving, see Size 40 Blade Set (01-305-10B) below

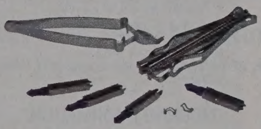
BD* Autoclip* Wound Closing System

Ideal for use on lab animals or in veterinary surgery



Clockwise from top left: 01-804-15, 01-804, 01-804-5

Consists of applier (01-804), nonsterile wound clips (01-804-5), and remover (01-804-15). Insert clips into applier; locate edges of wound; use applier as you would a staple gun to rapidly close wound.

- Provides maximum holding force with minimal trauma
- May be used without assistance
- Easily remove clips with clip remover when wound is healed

Applier

- Stainless-steel applying forceps hold one rack of 20 clips
- Clips fed by rustless beryllium-copper springs
- Dimensions: 4½L × 1⅜W ×⅜"H (114 × 35 × 9.5mm)
- Net weight: 1½ oz. (45g)

Wound Clips

- 9mm nonsterile Autoclip wound clips
- 20 stainless-steel double clips per rack
- 100 clips (5 racks) per box, 10 boxes per case

Remover

- Easily removes clips from healed wound
- Stainless steel
- Length: 4" (100mm)

17-987-128F

17-987-130B (17-987-126D sleeves available separately)

DuPont* Tyvek* Bib Apron and Sleeves

Protect against many hazardous powders

Made of nonwoven Tyvek fabric that helps resist penetration by particles and other contaminants. The inherent barrier stops submicron particles even after abrasion.

Aprons

- Provide coverage of front and sides
- With bound neck and ties
- Available in 36 or 44" (91 or 112cm lengths)
- White

Sleeves

- Offer wrist-to-elbow protection
- Elasticized seams at both ends
- Length: 18" (46cm)
- White

ORDERING INFORMATION:
Aprons, 100 per case; sleeves, 100 pairs per case.

DuPont* NexGen* Protective Coveralls

Affordable high barrier protection

Lightweight coveralls (1.8 oz. per sq. yd.) provide excellent barrier protection against nontoxic particle, liquid, and spray hazards. True aerosol- and liquid-proof microporous barrier demonstrates >99% holdout of particles down to 0.35µm.

- Breathable, cloth-like material treated to provide antistatic properties for use in controlled environments
- Proprietary bilaminate composite fabric provides superior liquid penetration[1]
- Compared favorably to leading fabric in physical property tests covering resistance to ripping and tearing[2]
- Low linting for use in critical applications
- Disposable coveralls can be easily discarded via landfill burial or proper incineration[3]
- Long torso with polyester front zipper measures 26" long (66cm)
- White

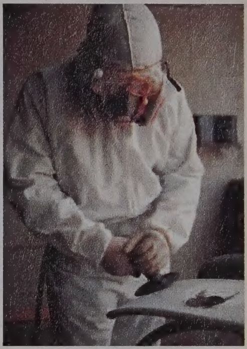
Kimberly-Clark* KleenGuard* A30 Coveralls

Combine durability and breathability to provide comfortable splash and particle protection

Microforce* Barrier SMS fabric incorporates a web of microfibers that filter particulates and water-based liquids. Strong and abrasion-resistant.

- Excellent protection from non-hazardous particles and liquids
- Suitable for multiple wearings
- Zipper front with 1" flap
- White



19-170-388B

APPLICATIONS:

- Manufacturing
- Fiberglass and asbestos handling
- Lead abatement
- Food processing
- Electronics and more

COMPLIANCE:

Passes NFPA 99 for antistatic materials.

Kimberly-Clark* KleenGuard* A20 Disposable Apparel

17-987-236A, 19-999-976, 01-349C, 19-150-1613

Patented, nonwoven, General-Protection MicroForce* barrier SMS(GP) fabric consists of three layers of polypropylene: two outer layers of tough, spunbonded filaments that resist abrasion and tearing; inner matrix of meltblown polypropylene microfibers that filters out liquid and particulates.

- Resist penetration by potentially infectious blood
- Air and moisture vapor can pass through to aid wearer comfort
- Weight, 1.6 oz. per square yard
- Triple-stitched serged seams
- Can withstand multiple wearings

COMPLIANCE:

Blood Strikethrough Tests

Test swatches were placed over blotters of known weight. A 1.4g sample of bovine blood was pipetted in a random dot pattern. Pressure was applied to the fabric and blotter, then immediately released. Blotters were weighed to determine how much blood had penetrated test fabrics.

Note: KleenGuard fabrics are not impervious; determine suitability of fabric and garments for the exposure and quantity of blood expected to be encountered.

KleenGuard* A20 Lab Coats

Tailored Style

- Made of breathable patented Microforce* Barrier SMS fabric
- Features long sleeves, notched-lapel collar, one chest and one hip pocket
- Plastic snap front closure
- White

PolyWear* Disposable Gown

Lightweight, single-layer low-density polyethylene gown for clinical and laboratory settings

Heat-sealed seam is behind sleeves—minimizes chance of contamination passing through.

- Full-length wraparound with open back tailored to eliminate excess material
- Tear-away collar for quick and easy removal
- Thumb loop on sleeve keeps cuffs under gloves, enhancing leak protection
- Gowns are folded for quick shake-out and easy donning
- Powder blue with smooth matte finish

18-567

ORDERING INFORMATION:
Individually packed in flip-top polybag and then placed in dispenser pack.

Regular: For users under 6'; 42" long (107cm) from neck to bottom, 39" wide (99cm); 34" long (86cm) sleeves.

Large: For users over 6'; 49" long (125cm), 42" wide (108cm); 38" long (97cm) sleeves.

COMPLIANCE:
Complies with FDA regulations. Successfully tested for liquid and aerosol blood resistance under ASTM* F 1670 Synthetic Blood Penetration Resistance and ASTM 1671 Bacteriophage Penetration Resistance.

ARRAY ANALYSIS

LIVE CELL ARRAY—KITS

Nunc* LiveCell* Array Apoptosis Kits

Use microarray slides for real-time study of individual cell viability within heterogeneous populations

NEW

Sterile, disposable LiveCell Array slides contain an embedded transparent array of picowells. Enable multiple functional assays on living cells followed by postfixation studies on the same cells.

- Use of both Annexin V-FITC and Propidium Iodide distinguishes between necrotic and apoptotic cells
- Suitable for both adhering and nonadhering cells
- Cells will not be displaced by staining, rinsing, or perfusion
- Compatible with standard fluorescent microscopes

12-566 Series

INCLUDES:
Annexin V-Fluorescein Isothiocyanate (FITC), 10µg/mL (10X solution); Propidium Iodide (PI), 40µg/mL (10X Solution); Binding Buffer (1X Solution); Five Nunc LiveCell Array slides

REQUIRED ACCESSORIES:
Ca^{2+}- and Mg^{2+}-free PBS for washes, fluorescence microscope equipped to measure FITC and rhodamine fluorescence, hemacytometer or other device for cell counting.

STORAGE CONDITIONS:
Store reagents at 4°C in the dark. Stable for one year from date on label. Slides can be stored at room temperature for up to two years from date of purchase.

Slide Well Size	Mfr. No.	Cat. No.	Each
15µm	130512	**12-566-108**	800.00
20µm	130513	**12-566-109**	600.00
100µm	130514	**12-566-111**	600.00
250µm	130515	**12-566-114**	800.00

Particular types of arrays, as well as methods of making or using arrays, may be covered by one or more patents held by others. Use of Nunc microarray products is recommended only for applications which do not violate proprietary rights of others or for which the user has a license or other permission under such proprietary rights.

LOOKING FOR THERMO SCIENTIFIC* PIERCE* EXCELARRAY* FLUORESCENT ARRAY KITS?

ExcelArray antibody sandwich microarrays are multiplexed fluorescent immunoassays for the simultaneous quantitation of up to 12 protein targets. For complete details, see the Cell Biology section.

*Trademark. See Trademark Reference.

Prices subject to change.

Nunc* LiveCell* Array Cell Surface Markers Kits

Determine CD4/CD8 ratios by dual staining lymphocytes with fluorescently labeled anti-CD4 and anti-CD8 in conjunction with anti-CD3

- Detect CD3 for the quantification of a T-lymphocyte immune response
- Quantify CD4 and CD8 for the determination of immune activation and suppression
- Use Hoechst dye to penetrate all cells, allowing for the quantification of total T-lymphocytes from the remaining B-lymphocytes, monocytes, natural killer lymphocytes, and remaining mononuclear cells
- Utilize monoclonal antibodies raised in mouse, which react with human CD markers; other species have not been tested

12-566-115

INCLUDES:

anti-Human CD3-FITC antibody, 70µL; anti-human CD4-PE antibody, 70µL; anti-human CD8-Cy*-Q antibody, 70µL; Hoechst 33342, 70µL; Nunc LiveCell Array slides, 5 each.

REQUIRED ACCESSORIES:

Ca^{2+}- and Mg^{2+}-free PBS for washes; Fluorescence microscope equipped to measure FITC, PE, Cy-Q, and Hoechst; Hemacytometer or other device for cell counting; Paraformaldehyde, if fixation is required.

STORAGE CONDITIONS:

Store reagents at 2° to 8°C in the dark. Stable for one year from date on label. Slides may be stored at room temperature for up to two years from date on label.

Fluorescence-based assays are compatible with a wide range of cell types and provide sensitive quantitative and qualitative results without radioactivity. For more information, see the Cell Biology section.

LIVE CELL ARRAY—SLIDES

Nunc* LiveCell* Array Microscope Slides

Provide real-time study of individual, living cells within heterogeneous populations

- Suitable for both adhering and nonadhering cells
- Disposable and sterile, with an embedded transparent array of picowells
- Enable multiple functional assays on living cells followed by postfixation studies on the same cells
- Staining, rinsing, and perfusion do not displace cells
- Compatible with standard microscopes
- Image Analysis Software designates an address to each cell

NUCLEIC ACID ARRAY—KITS

Corning* Pronto!* Universal Microarray Reagent System

Increases sensitivity and specificity by removing autofluorescent background due to oxidation

INCLUDES:

Borohydride solution (10mL), Presoak solution (1L)

Description	Mfr. No.	Cat. No.	Each
Background Reduction Kit for up to 50 arrays	40029	**07-201-622**	140.00

LOOKING FOR CORNING* MICROARRAY ACCESSORIES?

For the Corning Hybridization Chamber, Microarray Slide Holders, and Microarray Storage Pouches, please see p. 36.

Corning* Pronto!* Universal Microarray Reagent System

Includes all components necessary for an enhanced microarray protocol

Universal spotting solution is designed and optimized for printing both long oligonucleotides and cDNA on UltraGAPS* slides, with less than 10% evaporation over extended print runs. Univeral hybridization reagents include accelerants and volume excluders to enhance sensitivity.

- Detects differential expression from as little as 5μg of total RNA
- Interslide CV is less than 10%
- Presoak step reduces background

Storage Conditions:

Store at room temperature.

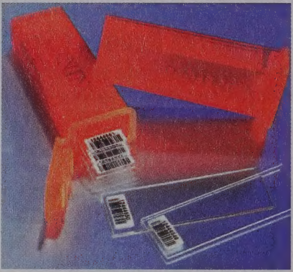
NUCLEIC ACID ARRAY—SLIDES

Corning* UltraGAPS* Coated Slides

Ideal for printing both long (>50-mer) oligonucleotide and cDNA arrays



07-200-256

- Uniform, covalently bound coating of pure Gamma Amino Propyl Silane (GAPS) yields a high-quality DNA-binding surface with stable surface properties and low autofluorescence
- Hydrophobic and stable surface yields smaller spots and increased slide-to-slide reproducibility
- Low background, high signal-to-noise ratio, and consistent spot morphology enhance the ability to detect the expression of low abundance transcripts
- Cleaned and individually examined for mechanical defects and the presence of glass and dust particles
- Shipped with a lot-specific Quality Certificate, detailing the results of nine quality parameters, including DNA retention and spot morphology

Bar Code	Packaging	Mfr. No.	Cat. No.	Case of 25

No	Pack of 25	40018	**07-200-138**	341.45

Corning* GAPS II* Coated Slides

Unique surface chemistry enables the even immobilization of DNA and uniform spot morphology

07-200-008

Each slide is manufactured with quality materials, then visually inspected and subjected to a rigorous cleaning process. A proprietary coating process causes the Gamma Amino Propyl Silane (GAPS) molecules to bond covalently to the glass surface, leaving positively charged primary amine groups free to attract the negatively charged sugar phosphate backbone of cDNA.

- Ultralow fluorescent background lends superior sensitivity
- High DNA retention provides maximum signal strength
- To facilitate data tracking, slides are available with small bar codes traceable to manufacturing lots
- Every lot of slides is tested to ensure superior performance
- Dimensions: 25 × 75mm
- Each slide is precisely packaged in a container that protects its surface during shipment

Bar Code	Packaging	Mfr. No.	Cat. No.	Case of 25
Yes	In pouches of 5	40003	**07-200-008**	304.62

Thermo Scientific* Erie SuperChip* Precoated Microarray Slides

Four surface chemistries available

Aminopropylsilane-coated slides are ideal for microarrays fabricated with PCR products as probes; Poly-L-Lysine-coated slides offer an economical alternative to aminopropylsilane; Aldehyde-silane-coated slides provide a uniform coating of aldehydes for the attachment of amine-modified DNA; Epoxysilane-coated slides utilize a coating of epoxide groups for the attachment of amine-modified DNA with an amine end.

- Manufactured from high-quality low-fluorescence glass
- Consistent surface coating to provide a uniform DNA immobilizing surface
- Bind an optimal amount of probe while minimizing nonspecific binding of labeled targets
- Available with an enhanced surface (ES) treatment that produces a smaller, more uniform spot size without changing surface chemistry
- Compatible with standard microarray spotting and detection systems
- Ready for immediate use or may be stored at room temperature for up to a year (six months for Poly-L- Lysine)
- Overall dimensions: 25 × 75mm
- Printable area: 20 × 70mm
- Packaged in a secure no-contact mBox* and vacuum sealed in a foil barrier bag

PROTEIN ARRAY—KITS

Thermo Scientific* Pierce* SearchLight* Arrays

NEW

Quick, easy-to-use multiplexed sandwich ELISAs enable quantitative measurement of multiple analytes in a single well

- Utilize a 2 × 2 or 3 × 3 array of capture antibodies prespotted in each well of a 96-well plate
- Generate a chemiluminescent signal that is imaged using a commercially available 12-bit cooled CCD camera
- Quantify the proteins in the sample through comparison to standard curves
- Produce results in approximately two hours

INCLUDES:

Sufficient reagents for one 96-well ELISA assay

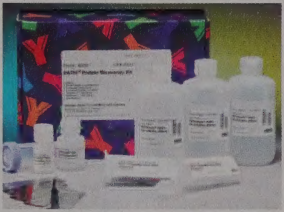
Thermo Scientific* Pierce* PATH* Protein Microarray Kit

Utilize slides with a proprietary ultra-thin (<500nm) nitrocellulose coating for noncovalent, yet irreversible capture of active proteins



EN-82000

- Nitrocellulose coating offers low background and increased dynamic range
- Standard slide dimensions provide compatibility with all commonly available slide-format microarray readers
- Individual etched barcode and accompanying numbers on slides allow easy identification for reliable tracking and documentation
- Complete kit provides a ready-to-use, optimized system for superior results
- Slide dimensions: 75 × 25 × 1mm
- Printable area: 58 × 21mm

Applications:

- Quantitative multiplex immunoassays
- Multiplex serological assays
- Single-capture antibody microarrays
- Protein microarrays for all stages of drug development

INCLUDES:

PATH Protein Microarray Slide, 10 each; PATH Print (5X) Buffer, 10 mL; PATH Block (5X) Buffer, 30 mL; PATH Wash (10X) Buffer, 2 × 250 mL; PATH Rinse (10X) Buffer, 250 mL

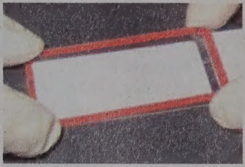
STORAGE CONDITIONS:

Store PATH Block (5X) Buffer at 4°C. Store all other components at room temperature. Store PATH Protein Microarray Slides in the original packaging.

Cat. No.	Each
EN-82000	499.62

Thermo Scientific* Lab Vision* Antibody Microarray Complete Kit

Easy-to-use kit screens hundreds of proteins simultaneously



TAA-001

This convenient research tool enables high-throughput protein profiling with the potential to generate a large number of datapoints. 722 antibodies are spotted in triplicate per slide, including internal controls, for a total of over 2100 spots. In addition, formulations of most antibodies may be purchased separately for further evaluation.

- Utilizes antibodies that have been performance tested for Western blotting, immunohistochemistry, or immunoprecipitation
- Eliminates handling of hazardous materials
- Extremely sensitive—10 to 100µg of total protein is sufficient to generate a strong signal
- Ready-to-use; does not need rehydration
- Compatible with most commercially available microarray scanners
- Spotted with antibodies relevant to a variety of cellular processes, including angiogenesis, cell cycle, signal transduction, neuroscience, apoptosis, cancer research, and transcriptional regulation

INCLUDES:

Two microarrayed slides; Extraction buffer, 2mL; Labeling buffer, 1mL; Biotinylation reagent, 1 to 2mg; Hybridization buffer, 1mL; Streptavidin, 2mL; Detection antibody, 2mL; Two micro spin columns and collection tubes; Four hybridization chambers; Four cover slips

STORAGE CONDITIONS:

Store slides and all reagents except the biotinylation reagent at 2° to 8°C for up to one year. Biotinylation reagent should be stored at -20°C upon arrival.

NOTE:

The antibody microarray may be used to determine relative protein expression levels of two related samples, but may not be used to quantify protein expression.

Description	Cat. No.	Each
Antibody Microarray Kit	TAA-001	1214.63

Whatman* FAST* Macro Membrane-based Antibody Array Kits

Used to simultaneously evaluate the relative abundance of 20 different cytokines

09-301-210

Each array consists of 20 anti-cytokine antibodies arrayed on Whatman Protran*-BA83 nitrocellulose (0.2µm), a surface which is well known for high protein binding capacity and excellent signal-to-noise ratios. Cytokines are arrayed in triplicate with nine positive and three negative control spots per membrane.

- Require as little as 400µL of sample
- Provide array-to-array reproducibility
- Tested for cytokine specificity—virtually no cross reactivity
- Sensitivity as low as 15pg/mL
- Arrays are visualized using streptavidin/HRP-based chemiluminescent detection and x-ray film or a phosphor imager
- Membrane is notched in one corner for orientation
- Cytokine spots are visible on the unprocessed membrane—inert dye disappears during membrane wet-out

INCLUDES:

Arrayed membranes, FAST Macro Wash and Blocking Buffers, a biotinylated antibody cocktail, processing tray

NOTE:

650µL samples may be processed with the processing tray provided with the kit. For samples as small as 400 to 500µL, it is suggested that macroarrays be processed in the Chip Clip* (holds one to two arrays [Cat. No. 09-301-213]) or FAST Frame (holds up to eight arrays [Cat. No. 09-301-214]) in conjunction with dual well incubation chambers and standard 1 × 3" glass microscope slides.

Whatman* FAST* PAK Protein Array Kits

Ideal for multiplex experiments, side-by-side comparisons, and control experiments all on the same slide

09-301-205

- Kits are available with 1-, 2-, 8-, and 16-pad formats of FAST slides and include the necessary components to conveniently build and process protein microarrays
- Each pad can be processed separately to increase the number of arrays on each slide and reduce sample volume
- FAST PAK Array Buffer provides increased protein stability and enhanced signal intensity
- Proprietary blocking buffer ensures optimum signal-to-noise ratios and promotes specific binding
- Kits are compatible with fluorescent, chemiluminescent, colorimetric, and radiographic detection methods

APPLICATIONS:

ELISA-format experiments using antibody arrays; reverse-phase (micro-Western) arrays using cell or tissue lysates; purified protein arrays; carbohydrate arrays; arrays of lipids and other materials compatible with nitrocellulose

INCLUDES:

Slides, 10; Incubation chambers, 10; Chamber covers, 40; Protein arraying buffer (2X), 10mL; Blocking buffer (1X), 15mL; Wash buffer (10X), 125mL

REQUIRED ACCESSORIES:

FAST Frame Slide Holder (Cat. No. 09-301-214) holds up to four slides and the corresponding incubation chambers

Description	Mfr. No.	Cat. No.	Each
With one-pad slides	10 485 262	**09-301-205**	642.20
With two-pad slides	10 485 319	**09-301-206**	721.30
With eight-pad slides	10 485 322	**09-301-207**	780.60
With sixteen-pad slides	10 485 325	**09-301-208**	820.10

Whatman* Protein Array Reagents

Optimized for use on FAST* Slides

09-301-227, 09-301-226, 09-301-228

Protein Arraying Buffer

- Increases long-term protein stability and molecular recognition activity
- Enhances fluorescent signal from arrayed sample

Protein Array Blocking Buffer

- Demonstrates highly efficient blocking of protein microarrays
- Exhibits strong reduction of non-specific antibody-antibody interactions
- Shows minimal effects on specific antibody-antigen interactions
- Results in superior signal-to-noise ratios in protein microarray applications

Protein Array Wash Buffer

- Optimized for efficient washing of protein microarrays to ensure optimum results

Description	Quantity	Mfr. No.	Cat. No.	Each
Protein Arraying Buffer (2X)	4 × 10mL	10 485 331	**09-301-227**	191.66
Protein Arraying Buffer (1X)	1 × 100mL	10 485 356	**09-301-226**	193.30
Protein Array Wash Buffer (10X)	4 × 125mL	10 485 330	**09-301-228**	191.66

PROTEIN ARRAY—SLIDES

Thermo Scientific* Pierce* PATH* Protein Microarray Slides

Utilize a proprietary ultra-thin (<500nm) nitrocellulose coating for noncovalent, yet irreversible capture of active proteins to the surface

EN-82001

- Nitrocellulose coating offers low background and increased dynamic range
- Standard slide dimensions provide compatibility with all commonly available slide-format microarray readers
- Individual etched barcode and accompanying numbers allow easy identification for reliable tracking and documentation
- Slide dimensions (W × L × Thickness): 25 × 75 × 1mm
- Printable area: 58 × 21mm

Applications:

- Quantitative multiplex immunoassays
- Multiplex serological assays
- Single-capture antibody microarrays
- Protein microarrays for all stages of drug development

STORAGE CONDITIONS:

Store at room temperature in the original packaging.

Cat. No.	Pack of 25
EN-82001	759.00

Nunc* MaxiSorp* Polymer Microarray Slides

Polymer slides for protein microarrays

12-566-222

- Low background fluorescence
- Improved signal-to-noise ratio versus glass slides
- Shelf life: 5 years
- Dimensions (W × L × Thickness): 25 × 76 × 1mm

APPLICATIONS:

Ideal for quantification of low protein concentrations

Color	Cat. No.	Case of 25
Black	**12-566-222**	330.25

Particular types of arrays, as well as methods of making or using arrays, may be covered by one or more patents held by others. Use of Nunc mircoarray products is recommended only for applications which do not violate proprietary rights of others or for which the user has a license or other permission under such proprietary rights.

Whatman* FAST* Protein Microarray Slides

Three-dimensional surface maintains protein reactivity and provides reproducible results

09-301-201, 09-301-203, 09-301-202, 09-301-204

- Glass slides coated with a proprietary nitrocellulose polymer
- Polymer binds proteins in a noncovalent, irreversible manner and can be probed using the same methods as traditional blots
- FAST Slides may be used with all detection methodologies including fluorescent, chemiluminescent, colorimetric, and radiographic detection systems
- Matrix retains proteins in near-quantitative fashion, producing antibody arrays with sensitivity down to antigen concentrations of 1pg/mL
- Coating provides excellent long-term stability of printed proteins
- Standard 25 × 76mm size is compatible with microarray scanners and robots

Applications:

Slides are suitable for many types of protein microarrays, including antibody arrays and microarray Westerns.

No. of Pads	Pad L × W	No. of Spots/Pad†	Bar Code	Mfr. No.	Cat. No.	Pack of

† 150μm spot size, 300 μm pitch.

Thermo Scientific* Pierce* Microarray Slides

An economical alternative to nitrocellulose-coated slides

- Slides are available in a choice of three coatings
  - Aminopropylsilane is used for noncovalent adsorption of protein
  - Aldehyde is reactive with lysine and arginine where pH 7 to 10 drives Schiff's base reaction
  - Epoxysilane is reactive with lysine, arginine, cysteine, and hydroxyls at pH 5 to 9
- Optional enhanced-surface (ES) format has an extensively microetched surface that produces a smaller, more uniform spot size
- Overall dimensions: 1 × 3"
- Printable area: 1 × 3"

STORAGE CONDITIONS:

Store at 4°C.

GENERAL ACCESSORIES

Corning* Hybridization Chamber

Holds 25 × 75mm microarray slides at a constant temperature and humidity during hybridization incubations

- O-ring and metal retaining clips ensure that the chamber remains watertight and completely submerged in the water bath
- Humidity wells in the base hold 10μL of water to maintain chamber humidity and probe hydration around the edges of the cover slip
- Watertight seal eliminates the risk of water bath contamination
- Can be used with either constant temperature water baths or hybridization ovens
- Base and cover are polycarbonate

07-200-271 (shown with slide, sold separately)

Hybridization Chamber II

- Has an increased interior depth which not only allows for single slide hybridizations, but also allows the user to place two arrays face-to-face and hybridize using a single labeled target
- Can also be used with raised-edge coverslips that are thicker or taller than standard thin coverglass

Description	Mfr. No.	Cat. No.	Case of 5
Chamber I, Standard Depth	2551	**07-200-271**	296.74
Chamber II, Increased Depth	40080	**07-201-628**	342.40

Corning* Microarray Slide Holders

Use to ship Corning UltraGAPS* and epoxide-coated slides or to store microarrays

- Hold 5 × 75mm glass or microarray slides
- Orange-colored plastic has low 500 to 700nm transmittance that helps to protect Cy*3 and Cy5 dyes from photobleaching
- Plastic does not shed particles or out-gas volatile chemicals that may contaminate microarray slides
- Hinged lid on five-slide holder snaps tightly closed
- Lift-off lid on twenty-five-slide holder is easy to open and close

07-202-525, 07-201-629

Description	Mfr. No.	Cat. No.	Case of
Five-slide Holder	40082	**07-202-525**	50/79.19
Twenty-five-slide Holder	40081	**07-201-629**	20/103.35

Corning* Microarray Storage Pouches

Protect printed microarrays from light, humidity, and environmental contaminants

- Foil laminated
- Heat-sealable
- Tear-resistant
- With white marking label

07-202-528, 07-202-527

Thermo Scientific* Erie mBox* Microarray Slide Handling Tray

Provides secure, convenient, and efficient handling of 20 microarray slides

- Separates slides to prevent damage during shipping and processing; enables easy slide removal
- Fits standard 96-well microplate format for centrifuging
- Withstands continuous use at temperatures up to 104°C (220°F); melting point: 168°C (334°F)
- Polypropylene
- Removable stainless-steel handle available separately

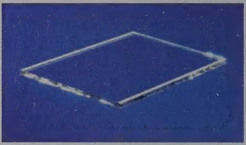
22-037-218 with -219 (slides sold separately)

Description	Cat. No.	Price
mBox Slide Handling Tray	**22-037-218**	Pack of 10/517.40
Stainless-steel Handle	**22-037-219**	Ea./58.90

Thermo Scientific* Erie mSeries LifterSlip* Cover Slips for Microarray Slides

Flatness and superior surface quality reduce the variation in hybridization fluid volume across the microarray surface

- Feature precise ink-printed raised edges to provide consistent dispersal and easy injection of hybridization solution
- Manufactured without adhesives to prevent leaching at high temperatures or extended hybridization times
- 1mm thick glass



22-037-220

Prices subject to change.

Whatman* MicroCaster* Arrayer

An economical, entry-level, manual microarraying system for principle and pilot studies

- Eight-pin hand tool allows samples to be loaded from 96- or 384-well microplates
- Slide holder accepts two slides and has a built-in indexing system that enables precise printing of up to 768 spots in an array of 32 × 24 spots
- Easy-to-use system is designed for one-pad FAST* Slides with 20 × 51mm pad size and is compatible with other slide surfaces

09-301-216

- Processing time: 5 to 25 minutes per slide

SYSTEM INCLUDES:

MicroCaster 8-Pin system hand tool, MicroCaster 8-Pin system slide holder, MicroCaster pin conditioner, Spare replicator pins

SPECIFICATIONS

No. of Spots	Up to 768
Horizontal Pitch (x-axis)	1250µm
Vertical Pitch (y-axis)	750µm
Spot Size	500 to 1000µm
Print Volume	20-70nL[†]

[†] Varies with buffer and viscosity.

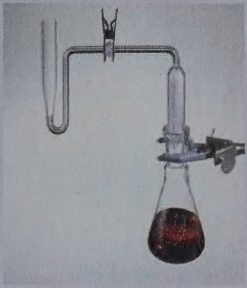
ARSENIC TESTING

Fisherbrand* Arsine Generator

Used for determination of total inorganic arsenic

Place sample in generator flask for conversion to arsine gas. In scrubber, hydrogen sulfide is removed from gas, permitting silver diethyldithiocarbamate reagent in absorber to form red complex with evolved arsine gas.



- Absorbance of complex is proportional to arsenic concentration and easily measured with colorimeter or spectrophotometer
- Samples can be prepared in interchangeable flasks and put, one after another, onto scrubber/absorber units
- Ball-and-socket joint makes it easy to clean or recharge scrubber
- Joints need no grease, eliminating a contamination source
- Made of Wheaton 33* low-extractable borosilicate glass

ORDERING INFORMATION:

Order clamp separately. Packed in foam case.

INCLUDES:

125mL flask, scrubber, absorber

COMPLIANCE:

Meets APHA 104A, ACS/USP, and EPA specifications

BAGS

*Fisherbrand** Biohazard Autoclave Bags

Strong, pliable, leak- and puncture-resistant

- Polypropylene bags and clear polyethylene bags come printed or unprinted
- Printed bags feature English and Spanish text
- Clearly visible biohazard symbol and sterilization indicator
- Pass the Dart Impact Resistance Test of 165g, using ASTM D1709-85

COMPLIANCE:
Graphics on printed styles conform to OSHA standard 29CFR1910.1030

Polypropylene Bags

Supplied with autoclavable elastic steam-venting closures

- Maximum temperature, 140°C (285°F); for use at 134°C (274°F)
- 2mil thick

ACCESSORIES

***Fisher**brand** Autoclave Bag Elastic Closures

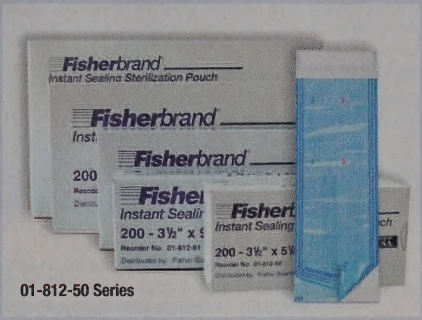
An alternative to wire tie closures

- High-tensile-strength elastic bands
- Compatible with most autoclave bags
- Remain intact at autoclaving temperatures

Cat. No.	Pack of 200
01-815-8	5.89

***Fisher**brand** Instant Sealing Sterilization Pouches

No tape or heat sealing needed



01-812-50 Series

Integral sealing strip eliminates the need to tape or heat seal pouches. Simply peel off protective strip, fold along perforation, and press firmly to seal pouch.

- Triple heat-processed seams provide excellent tear and puncture resistance
- Suitable for steam or EtO gas sterilization
- Indicator arrows change color when sterilization cycle is complete
- Made of paper/plastic; medical-grade paper side guards against puncture
- 2mil-thick blue transparent polyester/polypropylene laminate film side allows contents to be identified quickly and shows any compromise in the film
- Corner tack seals prevent contamination in the seal area
- Thumb notch makes opening pouch easy

Ampac* Flexibles Heat-Sealable Multipurpose Pouches

Transparent pouches with polyethylene lining

01-812 Series

- Ideal for histology and pathology specimens and for safe biological waste disposal in medical, institutional and industrial facilities
- Withstand infrared and gamma rays
- Can be frozen, microwaved, or boiled without harm
- Use **regular** (2.5mil) pouches to store and dispense medicines and to dispose of wastes; **heavy-duty** (4.5mil) pouches are ideal for long-term storage and mailing of specimens and equipment
- Use with Ampac Flexibles pouch sealer (Cat. Nos. 01-812-15 or 01-812-15B) and handy pouch cutter (01-812-21)
- Easily resealed

Pouch Cutter

Handheld cutter opens sealed pouches with ease

- Provides a straight cut that facilitates effective resealing
- Made of white plastic with replaceable double-edged razor blade
- Designed for maximum user safety

01-812-21

L × W × H	Cat. No.	Each
3¾L × 2½W × ⅜"H (9.5 × 6.4 × 1cm)	**01-812-21**	10.63

Heat-Sealable Tubular Roll Stock

Create custom-size pouches

- For continuous roll feeding
- Transparent polyester with polyethylene lining
- Can be cut to desired length and sealed at both ends

INCLUDES:

Pouch cutter (01-812-21) supplied with every roll.

W x L	Cat. No.	Each
Regular Roll Stock (2.5mil thick)		
9½" × 250' (24cm × 76m)	**01-812-26E**	448.85

16" × 125' (41cm × 38m)	**01-812-26A**	639.02

Pouch Sealer

For airtight, leak-resistant seals

- Maintains constant sealing temperature
- Seals pouches up to 11" (28cm)
- Aluminum/polypropylene housing stays cool
- Can be mounted on wall or countertop, or used lying flat

01-812-13 (top), 01-812-15 (bottom)

ORDERING INFORMATION:

Not for use with plastic/polyethylene bags.

INCLUDES:

Two detachable sealer legs, leg pads, sealer bar cleaner tool, and instructions

*Fisherbrand** Sterile Sampling Bags with Protected Ends

A convenient and cost-effective way to collect, transport, and test a variety of materials

- Made from heavy-gauge, virgin polyethylene that meets FDA specifications
- Can accommodate solid, semi-solid and liquid materials
- To use, simply tear off top and open bag using pull tabs
- Insert sample and seal by twirling the bag away from you four times and bending wire ends inward
- Tape-on bag closure extends past the ends of internal support wires, covering them completely to reduce the risk of a protruding wire damaging surrounding bags
- Choice of round- or flat-wire closures; flat wire closures provide extra strength to seal larger and heavier samples
- Available in several sizes and wall thicknesses, clear or with printed, write-on label

14-955 Series

Whirl-Pak* "Speci-Sponge" Bag

Convenient sterile absorbent sponge sampler in a sterile Whirl-Pak bag

- Designed for testing work surfaces and equipment for *Salmonella*, *Listeria*, and other foodborne pathogens
- Dry "Speci-Sponge" measures 1½W × 3L × ⅝" thick (3.8 × 7.6 × 1.6 cm); not pretreated with bactericide
- Simply add diluent, wipe test surface, and return sponge to its 18 oz. (532mL) bag
- Self-contained sample can then be shipped for analysis
- Sponge will wipe a large area; bag's puncture-proof tabs reduce damage to sample
- White write-on area allows easy labeling and identification

† U.S. Patent 5,564,829.

Two-Chamber Filter Bag

For processing samples containing solids

- Integrated filter separates bag into two chambers
- After processing, solids remain in one chamber; filtrate collects in the other
- Clear with 4mm edge seams
- Sterilized by gamma radiation

01-002-57

W × L	Capacity	Fits Stomacher Model	Cat. No.	Pack of 100	Case of 4 Pk.
3mil thick					
7 × 12" (18 × 30cm)	55 oz. (1650mL)	400	**01-002-57**	111.27	380.42

Whirl-Pak* Sterile Bag for Stomacher* Lab Blenders

Write-on label makes identification quick and easy

- Round bottom minimizes sample fragments from getting caught in corners of the bag during blending
- Polyethylene
- Contains layer of finely perforated PE to filter out solids

COMPLIANCE:

Meets FDA and USDA food-sampling specifications.

01-812

W x L	Capacity	Fits Stomacher Model	Mfr. No.	Cat. No.	Pack of 500
3mil thick					
7 × 13" (18.5 × 33cm)	52 oz. (1538mL)	400	B01239WA	**01-812**	173.80

Whirl-Pak* Sterile Filter Bags for Stomacher* Lab Blenders

Designed to filter out solids in samples

- Excellent for liquid, semi-solid, or solid samples
- Filter layer separates liquid and solids, allowing for easy pipetting
- White write-on area
- Suitable for use with most homogenizer blenders
- Polyethylene

01-812-69

ORDERING INFORMATION:

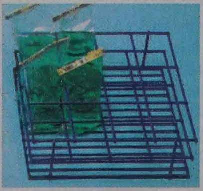
Not for use at temperatures above 82°C (180°F)

W x L	Capacity	Mfr. No.	Cat. No.	Pack of 250	Case of
3mil thick					
3 × 7 in. (9.5 × 18cm)	7 oz. (207mL)	B01385WA	**01-812-94**	129.10	20 Pk./2206.80
4mil thick					
6 × 9 in. (15 × 23cm)	24 oz. (710mL)	B01348WA	**01-812-69**	169.75	6 Pk./870.50
7½ × 12 in. (19 × 30cm)	55 oz. (1627mL)	B01318WA	**01-812-5**	225.14	2 Pk./384.85

Whirl-Pak* Carrying Racks

For transporting and using sample-filled bags in laboratories

- Coated wire racks stand up to many lab materials
- Double grid rack with second horizontal bar below top bar prevents bags from slipping sideways
- 01-812-5G can be used for plate incubation by turning it on one side
- Autoclavable



01-812-5E

1 to 7 oz. (30 to 207mL)	15 bags	B00678WA	**01-812-5D**	29.05
13 to 24 oz. (385 to 710mL)	12 bags	B00751WA	**01-812-5E**	33.45
27 oz. and larger (800mL)	6 bags	B01048WA	**01-812-5G**	47.35

BEFORE YOU BUY ANALYTICAL BALANCES

Analytical balances, also known as high resolution balances, are used for weighing at readabilities between 0.1 and 0.01 mg, with maximum capacities ranging from 50 to 500g.

IMPORTANT TERMS TO KNOW

Readability—The smallest displayed digit, or weight, on any balance

Accuracy—A measure of the balance's ability to hit, or repeat, a result

Stabilization time—The time a balance requires to come to rest from the moment a load is placed on the pan to the moment the result is displayed

Repeatability—The closeness of repeated results carried out in assumed identical conditions

Linearity—A measure of how well the balance is capable of following the linear relationsh between the loaded weight and the displayed value

FEATURES TO LOOK FOR

Support—Unparalleled support from sales representatives, nationwide service organization and technical support will provide the help you need to prevent service interruptions.

Internal Calibration—Calibration can be programmed to occur at specific times throughout the day, ensuring your balance is performing at its best. METTLER TOLEDO's proFACT feature provides fully automatic internal calibration and linearization with two internal weights.

Grid-style weighing pan—Minimizes the effects of air turbulence, therefore improving stabilization times. METTLER TOLEDO's SmartGrid p can be found on the Excellence and Excellence Plus balances.

Quality Management Tools—Include features such as overload protection, instant parameter reset and level control warnings to ensur safe, accurate weighing. For example, METTLER TOLEDO's MinWeigh feature warns if the minimum weight requirement is violated.

From simple to sophisticated, METTLER TOLEDO's full line of balance solutions offers a variety of features to meet your needs.

MODEL	APPLICATION
Excellence Plus (XP)	Regulatory compliance, high productivity, and data/sample security
Excellence (XS)	Durable and efficient for routine operations
Classic Plus (AB-S/FACT)	Reliable and robust for simple weighing in a demanding environment
Classic Light (AL)	For easy weighing on a low budget

0.00000 g
METTLER TOLEDO

XP Analytical Balance

sponsored by:

METTLER TOLEDO

Factors that influence reliable weighing results:

Check that the balance is level.
Leave the balance connected to power supply and turned on to establish thermal equilibrium.
Use the smallest possible weighing vessel.
Place sample in middle of weigh pan to avoid corner load errors.
Check that the balance displays exactly zero before weighing.
Calibrate regularly.
Keep weighing chamber and pan cleaned.

For a full selection of METTLER TOLEDO Analytical Balances, see pp. 47-53.

Mettler Toledo* Balance Features

01-910-002

01-911-351

01-910-364

Mettler Toledo's uncompromising focus on innovation has led to numerous technological advancements in the field of laboratory weighing and a wide range of balances to accommodate a wide range of applications. Following are unique features found throughout the Mettler Toledo balance lines.

Connectivity

- Complete flexibility through six different interface options including wireless Bluetooth* and Ethernet

DeltaRange*

- Balances with ten times more readability
- Can be recalled at any time throughout the entire weighing range simply by taring

DeltaTrac

- Analog display indicates how much of the weighing range has been used during a normal weighing mode even if the balance has been tared
- Eliminates common overloading problems
- Becomes a graphical ± indicator using two pointers and two tolerance markers

ErgoClips*

- Facilitate secure placement and efficient handling of tare containers
- Farraday effect eliminates negative effects of statically charged tare containers

FACT (Fully Automatic Calibration Technology)

- Automatically calibrates balances 24 hours a day using internal calibration weights
- When sensors detect ambient fluctuations of ±1.5°C (±2.7°F), balance immediately calibrates itself

IP54 InUse

- Protection against dust and water

LevelControl

- For full regulatory compliance
- LevelControl warns if balance is not correctly leveled

MinWeigh

- Signals when sample has not reached minimum weight defined by regulations

MonoBloc

- Latest-generation, rugged high-performance weigh cell for peak weighing performance

proFACT (Pro Fully Automatic Calibration Technology)

- Utilizes temperature control with linearization
- Assures balance is correctly adjusted at all times, regardless of factors that may influence the measuring environment

QM Toolbox

- Maximum security in regulated environments, including password protection, full traceability, management of users with administrator profile, and seamless documentation with four IDs

ReproCheck

- Menu function instructs balance to perform an internal test for determination of repeatability

ReproSet*

- Menu function to set the internal balance repeatability

SmartBar

- Activates a function with a touch of the keyword on the display

SmartGrid* Weighing Pan

- Minimizes effects of turbulence in the weighing chamber
- Ensures more accurate results and dramatically shorter stabilization times
- Smallest sample sizes can be weighed-in according to regulations
- Increases the yield of expensive substances

SmartScreen Display

- Color-guided touchscreen for safe operation
- Individual, color-coded profiles can be configured and documented for up to eight users or jobs
- Protects users, data and processes and guarantees seamless traceability

SmartSens*

- Intelligent sensors allow user to weigh without touching the balance
- Ideal for working with sensitive substances

VariCal

- Calibrates balance at various points throughout the weighing range using external calibration weights

Weighing Process Adapter

- Enables display adjustment to specific weighing applications
- Use lower settings for fine filling and balance weighs slowly, continually displaying the last digit
- Use higher settings and balance weighs faster, shutting off the last digit until the weight is stable

LOOKING FOR MORE INFORMATION ON THE METTLER TOLEDO* WARRANTY?

Mettler Toledo offers an extended onsite warranty. You can find more details online.

Visit www.fishersci.com and search for Mettler Toledo Warranty

Mettler Toledo* MX and UMX Series Professional Level Analytical Micro and Ultramicro Balances

Fully automatic calibration, hands-free operation

Mettler Toledo's proFACT automates calibration: as soon as built-in sensors detect a change in ambient conditions, the units recalibrate automatically using two integral weights. Balances can also be calibrated manually using weights of your choice. Plus, with the SmartSens sensors on each side of the weighing chamber, you can weigh without ever touching the balance—weighing, opening and closing the doors, and taring are done automatically.

Standard Features

- Multiple weighing units: grams, milligrams, ounces, troy ounces, grains, pennyweight, mommes or carats
- SmartTrac feature graphically shows certain options, including available weighing range
- Separate weighing cell protects measurements against thermal and vibration effects
- Vibration adapter neutralizes any remaining adverse conditions
- Weighing process adapter controls the last digit of the display, suppressing it until the readout is stable
- Grounded weighing pan with overload protection dissipates electrostatic charges
- Backlit touchscreen display is easy to read from any angle
- Circular draft shield offers a minimal exposure area for thermal radiation emanating from the user
- Chamber temperature increases by a maximum of only 0.1°C, so no sample acclimation is necessary
- Chamber design permits viewing from all sides and access from right or left

Advanced Features

- Built-in RS-232-C bidirectional interface allows direct connection with computers, printers, and other peripherals (additional RS-232-C or LocalCAN interface option available)
- Download software versions, updates and modules from the Internet to a PC, then transfer to your balance
- Automatic stability detector slows down stabilization rate for better reproducibility
- Can be configured with up to eight different user settings
- Built-in data security feature protects settings from changes

INCLUDES:

Tweezers, cleaning brush, feedthrough for below-balance weighing, in-use cover, operating instructions, and self-sensing AC/DC adapter that operates in 100–240V 50/60Hz AC or 12V DC ranges.

WARRANTY:

One year extendable to three years with return of warranty card.

Mettler Toledo* Excellence Plus XP Analytical Balances

Hands-free operation and unmatched weighing performance

NEW

Analytical balances offer high speed, high performance and security features for measurements, users and data.

SmartGrid* Weighing Pan

- Minimizes effects of turbulence in the weighing chamber
- Ensures more accurate results and shorter stabilization times
- Smallest sample sizes can be weighed-in according to regulations
- Increases the yield of expensive substances

SmartSens* Sensors

- For hands-free operation and personnel security
- Enable user to tare, open and close draft shield or print without touching the balance
- Promotes safe handling of samples, prevention of spills, minimized contamination risk

SmartScreen* Display

- Color-guided touchscreen for safe operation
- Individual, color-coded profiles can be configured and documented for up to eight users or jobs
- Protects users, data and processes, and guarantees seamless traceability

ErgoClips*

- Facilitate secure placement and efficient handling of tare containers
- Faraday effect eliminates negative effects of statically charged tare containers

LevelControl* and MinWeigh

- For full regulatory compliance
- LevelControl warns if balance is not correctly leveled
- MinWeigh signals when sample has not reached minimum weight defined by regulations

Standard Features

- Prepared for weighing below the balance
- User administration and password protection
- Target weighing
- Statistical evaluation
- Formulation with security check
- Density determination
- Percent weighing
- Piece counting with reference optimization
- Alphanumeric data entry of four IDs

01-911-351

INCLUDES:

Automatic and detachable draftshield, ProFACT* automatic calibration technology, RS-232-C interface, option slot for second interface (choice of seven different interfaces), inner draftshield plate (adjustable), protective cover, detachable and adjustable terminal.

WARRANTY:

One year extendable to three years with return of warranty card.

Mettler Toledo* Excellence XS Series Analytical Balances

Flexible weighing surface, slotted weigh pan, grounding system for static reduction

- Unique, slotted SmartGrid* weigh pan is suspended inside weighing chamber, providing flexible weighing surface for speed and accuracy
- Pan lifts out for easy cleaning, minimizes chance of contamination
- Spills fall into sealed base plate, won't interfere with weighing
- SmartGrid pan and ErgoClip* accessory (order separately) act as a grounding system to remove static from weighing samples
- Fully Automatic Calibration Technology (FACT) ensures precision and accuracy

Mettler Toledo* AB-S/FACT Classic Plus Series Analytical Balances

Analytical precision in a basic balance

For less complex tasks where the primary concern is fast, reliable weighing results. These balances provide an optimum price-performance ratio, weighing range up to 320g, and readability to 0.01mg.

- Single-button piece counting, taring, simple weighing and calibration
- Toggle between two weigh units
- Units include: gram, milligram, ounce, troy ounce, pennyweight, carat, momme, Mesghal, Singapore tael, Hong Kong tael, Taiwan tael
- MonoBlock technology delivers fast and accurate weighing with outstanding overload protection
- Stability detector indicates stable reading
- FACT (Fully Automatic Calibration Technology)
- Automatically calibrates balances 24 hours a day using internal calibration weights
- When sensors detect ambient fluctuations of ±1.5°C (±2.7°F), balance immediately calibrates itself
- "rESEt" instantly resets parameters to factory settings and returns to simple weighing mode
- Built-in RS-232-C interface operates bidirectionally at all standard transfer rates from 110 to 9600bps; connects to a variety of computers, printers and other peripherals
- Easy-to-read liquid crystal display
- Sealed keypad
- Sturdy all-metal upper and lower housing

01-916-250 Series

INCLUDES:
Protective cover, calibration weight, draft shield, 115V AC adapter, feedthrough for weighing below the balance and operating instructions.

Mettler Toledo* AL Classic Light Series Analytical Balances

Ideal for simple weighing tasks; compact, economical

- Simple operation with logical menu guidance and only a few keys
- Automatic adjustment with external weight, piece counting, percent weighing, calculation with a custom "free factor," selectable character size in display, dynamic weighing, +/- weighing, and automatic shutoff
- Units include g, kg, mg, ct, lb, oz, ozt, GN, dwt, momme, mesghal, tael, tical, tola, and baht
- Large weighing pan for maximum working efficiency
- Glass draft shield opens to sides and top
- Large, bright, seven-segment LCD readout
- Built-in overload protection
- AC adapter to appropriate national standard
- Built-in below-balance weighing capability

ORDERING INFORMATION:
Use with line cord (included) or four "AA" batteries

WARRANTY: One year extendable to three years with return of warranty card

Denver Instrument* Pinnacle* Series Analytical Balances

Weighing capacities to 310g

Simple, menu-driven operation allows quick access to powerful functions: multiple weighing units, parts counting, percent weighing, and animal weighing. Built-in bidirectional RS-232C interface and USB ports enable a network of analytical laboratory instruments centered on your P-Series balance. View your balance anywhere on the network via Ethernet.

Key Features

- Weighing units: grams, milligrams, ounces, troy ounces, pounds, grains, carats, drams, pennyweight, mommes, three taels (Hong Kong, Singapore and Taiwan), Tolas, Bahts
- Extremely accurate parts counting—display constantly updates number and collective weight value
- Percent calculation; displays values as percentage of control weight
- Display totals, averages, calculates standard deviation (or population deviation), minimum and maximum weights, and range of stored values
- Store statistical summary of weight values for display or printing
- Provide GLP/ISO documentation: operator identification, balance identification, date, time, lot and sample numbers

Design

- Rugged diecast aluminum base supports durable stainless-steel weighing pan
- Glass draft shield surrounds weighing chamber
- Built-in overload; leveling bubble; chemical-resistant sealed keypad; weigh-below port

Operation

- User-friendly interface for programming, setting standard serial output, operating remotely
- Permit digital input of tare weights
- Large LCD with easy-to-use menus and stability indicator
- Electronic filling guide; bar graph indicates how much of weight range is still available

REQUIRED ACCESSORIES:

Weigh-below port requires optional 01-960-6 weigh-below hanger; contact your Fisher Scientific Customer Service Representative.

WARRANTY:

Three years

CERTIFICATIONS:

UL listed, CSA approved

01-913-81

User-friendly interface features large numeric display with print, calibrate, tare, and directional keys. Bar-graph capacity indicator, date, timer, user name, current weigh mode and equivalent weigh modes are prominently displayed.

Denver Instrument* PI Series Analytical Balances with Internal Calibration

Automatic internal calibration with the press of a key

Balances can be set to automatically calibrate when too much time has passed since the last calibration or if the temperature has changed significantly; or set a number of days for the calibration to be performed. Use internal weights to calibrate the balance or add a certified weight for external calibration.

Key Features

- 16 weigh units including grams, milligrams, kilograms, ounces, troy ounces, pound, grain, pennyweight and carat
- Store up to 250 points
- Sample averaging and standard deviation
- Meet ISO/GLP requirements: Bidirectional RS-232, or USB port prints data to computer or printer, sends commands remotely. Ethernet enables viewing balance anywhere on network
- Adjustable serial settings
- Extra-large, back-lit display has ¾" high numerals
- Display two weigh units simultaneously, plus time, date and current status

Operation

- Programmable environmental settings
- Add alphanumeric batch identification and sample number
- Store up to nine user names

Design

- Rugged, die-cast aluminum base
- Durable stainless-steel weighing pan
- Easy-to-see leveling bubble
- Chemically resistant keypad sealed for protection against spills
- Weigh-below port (requires optional weigh-below device 01-960-6)

WARRANTY:
Three years

COMPLIANCE:
Meet ISO/GLP requirements

Denver Instrument* Summit Series Analytical Balances

Simplicity, accuracy, reliability—plus advanced weighing features

No calibration weights needed—single key completes calibration automatically, saving time and increasing the accuracy and reliability of readings. (Standard models without internal calibration are also available.)

Key Features

- Choice of 19 measuring units including grams, ounces, troy ounces, carats, or pounds
- Built-in functions include parts counting, percent weighing, net total, animal weighing, and formulation—with user-defined settings allowed
- Bidirectional RS-232 port for transmitting data to computers, printers for ISO/GLP program requirements
- Security settings block access to menu structure or inactivate all keys
- Built-in overload protection prevents damage to the weigh cell
- Standby mode conserves power
- Toggle between four weigh units
- Automatic time and date stamps

01-915-13

Design

- Below-balance weighing port
- Stainless-steel pans and drip rings make cleaning a snap
- Glass draft shield has easy-sliding doors
- Leveling feet and level indicator assure stability

WARRANTY: Three years

Denver Instrument* Timberline Analytical Balances

NEW

Ideal for laboratory and educational environments

Easy operation, fast readouts, and reliability. Priced for those who need precision on a tight budget. Compact size takes up less space on the benchtop.

- Readability of 0.1mg
- Clear display and a keypad with large function keys
- Built-in analytical draft shield opens on both sides and the top for easy sample entry
- Quick readouts, using the latest weighing technology
- Toggle between two weigh units including grams, milligrams and ounces
- Automatic external calibration using a precision calibration weight (sold separately)
- Counting, percent weighing, formulation, average weighing
- RS-232 port standard for data transfer to printer or computer

LOOKING FOR WEIGHTS?

Analytical and precision weights for Denver Instrument* balances can be found on pp. 100-101.

LOOKING FOR MORE BALANCE ACCESSORIES?

We carry a full range of Fisherbrand* weighing paper, funnels, weighing dishes, brushes and forceps. For more information and to order,

Visit www.fishersci.com and search for Fisherbrand Balance Accessories

Ohaus* Discovery* Semi-Micro and Analytical Balances

High-precision balance provides exceptional weighing performance and reproducibility with 0.01mg readability

With its affordable price, innovative design, and convenient, SmarText* user interface, the Discovery provides everything you need in a high-precision balance. Its advanced features and wide range of built-in applications take the manual work out of specimen analysis.

Features

- Discovery's 10µg repeatability and linearity is 2X better than most balances in its class
- SmarText user interface with bright, dual-line, backlit LCD, utilizes text prompts to guide users through setup and operation
- Advanced AutoCal* dual-weight internal calibration system automatically calibrates the balance when it senses a temperature change sufficient enough to affect weighing accuracy; also performs a 3-point linear calibration every time scale is internally calibrated
- Cal Adjust and Cal Test allow traceability and validation
- Stability filters, stability indicator range, and auto-zero tracking enable use in difficult environments
- Ideal for university research, pharmaceutical research/drug discovery, and general lab applications
- Weighing units include g, mg, dwt, ct, oz, ozt, GN, taels (3), mommes, custom

Design

- Full glass and steel construction resists effects of static and corrosion
- Draftshield and housing design provide optimum draft protection and maximum static resistance for superior stability and reproducibility in challenging environments such as high traffic areas
- Ergonomic leveling system; menu and calibration lock-out switch; factory reset option; spill gutter and in-use protective keypad cover
- User selectable GLP outputs via RS-232 to meet traceability requirements
- Right and left-hand tare buttons
- Integral weigh-below hook

Standard Application Modes

- Weighing
- Percent Weighing: displays the weight of a sample as a percentage of a reference weight useful in sieving applications, reagent weighing, moisture determination, and other types of ingredient mixing
- Parts Counting: for counting pills, or parts that have a consistent, but low nominal mass; allows user to count based on a calculated piece weight
- Check Weighing: checks the weight of a sample against preset target limits
- Animal/Dynamic Weighing: for weighing in a rough environment (such as on a ship), or in a location with less than ideal conditions; also for weighing moving objects such as animals, insects or other moving specimens
- Totalization: to sum a series of sample weights that can be greater than the capacity of the balance
- High Point: can be used when analyzing batches or lots, or for quality checking of random samples

01-920-051

Advanced Application Modes

- Statistics: for comparing a number of samples and examining the relative deviation of the samples along with other statistical data
- Density: With four methods of density determination to choose from, provides rapid and accurate density results, with no manual calculations needed
- Pipette Calibration: checks the accuracy and precision values of pipettes by weight analysis

Optional Accessories

Density determination kit, calibration masses, SF42 impact printer, RS-232 interface cables, and Ohaus Collect Data Acquisition and Control software.

WARRANTY:

Two years (US and Canada)

CERTIFICATIONS:

CSA certified to CSA 1010-1, UL 3101-1 and IEC 1010-1. FCC approved.

Ohaus* Voyager* Pro Series Analytical Balances

Advanced application modes, innovative software, simple user interface

- Six advanced applications to automate weighing and help reduce errors
- AutoCal* automatic internal calibration
- Backlit, high-resolution dot-matrix display
- Applications library to store and recall past procedures
- Integral weigh-below hook
- Large, three-door draftshield provides optimum draft protection
- Manufactured using ISO 9001:2000-certified processes
- Ideal for university research, teaching laboratories and general lab applications.

Operation

- Simple user interface with two-button operation and three application specific soft keys
- Easy-to-use navigation windows and scroll-down menus to guide user through balance functions
- User-selectable GLP/GMP data output via RS-232 communications port
- User-selectable filter, stability indicator, and auto-zero tracking for use in difficult environments
- Five operating languages

Weighing Modes/Units

- Standard modes: percent weighing, animal weighing, check weighing, filling, parts counting and gross/net/tare weighing
- Advanced modes: statistics, formulation, differential weighing, statistical QC, density determination and pipet calibration
- Weighing units: milligrams, carats, mommes, grams, troy ounces, taels (three), kilograms, newtons, ticals, pounds, grains, pennyweight, ounces, and custom units

Voyager Pro

02-114-18

ORDERING INFORMATION:

A wide range of accessories are available, including auxiliary display kit, remote display kit, security device, density determination kit, calibration masses, impact printer, RS-232 interface cables and TAL WinWedge* software. (Contact your Fisher Scientific Customer Service Representative.)

INCLUDES:

Protective in-use cover and security bracket

WARRANTY:

Two year warranty (US and Canada)

CERTIFICATIONS:

UL listed, CSA approved, FCC approved

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Ohaus* Explorer* Pro Series Analytical Balances

Advanced, user-friendly software allows the user to work in any of seven application modes with no training

Optional AutoCal feature automatically calibrates the balance when it senses a temperature change sufficient enough to affect weighing accuracy.

Advanced Display

- Simultaneous viewing of reference information
- High-resolution, dot matrix display for optimum viewing
- Displays additional results and reference information
- Capacity guide shows relationship between total platform load and full balance capacity
- Fill guide displays relationship between total platform load and user-defined target

Operation

- Three application-specific soft keys for calibration, units, new sample, sample size, new reference weight, reference weight, new target, and target
- Selectable operating languages
- Built-in RS-232 port, auxiliary display port, complete built-in GLP/GMP protocol, selectable language display text, selectable displayed information settings, selectable environmental settings, selectable auto-print settings, integral weigh-below hook, contrast and brightness control

Weighing Modes

- Built-in applications include animal weighing, parts counting, percent weighing, check weighing, filling, and gross/net/tare weighing
- Weighing units include gram, milligram, ounce, user-programmable custom unit, troy ounce, carat, pennyweight, Hong Kong tael, Singapore tael, Taiwan tael, mommes, grain, tical and newton
- View simple weighing results or piece count, average piece weight, sample size, tare weight, weight, and under- and over-indicators
- Choice of limited or multiple data fields

INCLUDES:

Integral security bracket that permits locking balance with cable and in-use cover.

02-112-111

Ohaus* Adventurer* Pro Analytical Balances

Rich in features, compact in size

Balances count, sum, hold and deliver traceable results. Three weighing capacities, with or without InCal* internal calibration system.

Design

- Frameless, flip-top draftshield permits easy access into the weighing chamber—helps eliminate spillage and reduce waste
- Doors and glass panels disassemble in seconds, so they're easy to clean
- QuadraStance* provides superior footprint stability on any surface
- Large stainless steel weighing platform
- 2-line alphanumeric LCD, 4 × 1" (10 × 2.5cm) with brilliant backlight
- Replaceable protective in-use cover
- Integrated security bracket for accessory anti-theft lock (01-950-6, order online at **www.fishersci.com**)

Performance

- SmarText* software guides users through application use and balance setup; displays weight and application-specific information simultaneously
- Digital calibration without external weight (models with InCal) or with external weight (models without InCal)
- Standard RS-232 interface, plus optional factory-installed USB or second RS-232, enable multiple connections for full GLP/GMP data output

Modes

- Three filter modes and adjustable zero tracking
  - **Animal Weighing** to weigh small animals; filters out animal movements for a stable weight indication
  - **Check Weighing** to check the weight of a sample against a preset target
  - **Totalization** sums a series of sample weights
- **Display Hold** keeps the highest stable weight on the display until cleared
- **Parts Counting with Optimization** counts based on a calculated piece weight
- **Percentage** displays sample weight as a percentage of reference weight

- Multiple weighing units: milligram, gram, kilogram, ounce, pound, carat, pennyweight, ounce troy, grain, Newton, Hong Kong tael, Singapore tael, Taiwan tael, momme, tical, Baht, mesghal, Tola, custom

Operation

- Four-button key pad with dedicated YES, NO, BACK, EXIT functions
- User-selectable span calibration points
- Weigh-below hook
- Mechanical and software overload/underload protection
- Upfront stability indicator
- Low battery indicator, auto shutoff
- Software reset menu

Ohaus* Pioneer* Analytical Balances

NEW

Excellent for routine weighing in lab, industrial and education applications

Selectable environmental settings, three filter modes, and adjustable zero tracking make the Pioneer ideal for working in slow filling applications where sensitivity is a must.

- Single-line LCD; no backlight
- Three-button panel with dedicated and number functions
- RS-232 bidirectional interface
- Up-front level indicator—no need to look in back of balance during leveling process
- Works well in harsh environments; settings can be adjusted to compensate for vibrations and other disturbances
- Calibration lockout
- Security loop in rear of balance
- Communications software, SW12W

INCLUDES:
AC adapter

REQUIRED ACCESSORIES:
Six alkaline "C" batteries

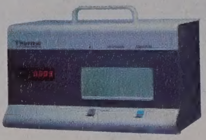
Thermo Scientific* Cahn* Analytical Microbalances

Push-button tare and calibration

Microbalances used in analytical, biomedical and industrial applications. Ideal for sample preparation, filter weighing, fire assay, elemental analysis, standards preparation. Calibration system can produce weighings traceable to national standards, and Model C-35 has an RS-232-C interface for data management capability.



20-063-40

20-065-25

Model C-33

- Rugged microbalance with a resolution of 1.0µg
- Big, bright LED
- Single-pan construction
- Push-button operation
- Unaffected by movement or temperature

Model C-35

- Ultramicrobalance with separate weighing chamber
- Resolution to 0.1µg
- Stability indicator
- Push-button operation and calibration
- Large chamber for broader field of view and easy access
- Rugged construction

ORDERING INFORMATION:
For 100 to 240V 50/60Hz

INCLUDES:
Platform stirrups, calibration weights, forceps, fuses, detachable 120V power cord, storage case and instruction manual. Model C-35 is supplied with pans and tare weights.

Precision balances, also known as toploading balances, are used for weighing at readabilities between 1 mg and 1 g, with maximum capacities ranging from 200 g to 64 kg.

IMPORTANT TERMS TO KNOW

Readability—The smallest displayed digit, or weight, on any balance.

Accuracy—A measure of the balance's ability to hit, or repeat, a result.

Stabilization Time—The time a balance requires to come to rest from the moment a load is placed on the pan to the moment the result is displayed.

Repeatability—The closeness of repeated results carried out in assumed identical conditions

Linearity—A measure of how well the balance is capable of following the linear relationship between the loaded weight and the displayed value.

FEATURES TO LOOK FOR

Support—Unparalleled support from sales representatives, nationwide service organization and technical support will provide the help you need to prevent service interruptions.

Durability—All-metal housing resists chemicals and withstands even the most demanding environments.

Quality Management Tools—Include features to ensure safe, accurate weighing.

Internal Calibration—Calibration can be programmed to occur at specific times throughout the day, ensuring your balance is performing at its best. METTLER TOLEDO's proFACT feature provides fully automatic internal calibration and linearization with two internal weights.

Pan Size—A larger pan size allows for proper placement of larger samples.

From simple to sophisticated, METTLER TOLEDO's full line of balance solutions offers a variety of features to meet your needs.

BEFORE YOU BUY PRECISION BALANCES

MODEL	APPLICATION
Excellence Plus (XP)	Regulatory compliance, high productivity, and data/sample security
Excellence (XS):	Durable and efficient for routine operations
Classic Plus (PB-S/FACT and SB)	Reliable and robust for simple weighing in a demanding environment
Classic Light (PL and PL-S)	For easy weighing on a low budget

XP Precision Balance

sponsored by:

METTLER TOLEDO

Factors that influence accuracy or reliability of results:

Stability of the weighing bench.
Room temperature should be as constant as posible (typically 1 – 2 ppm/°C).
Maintain atmospheric humidity.
Avoid direct light.
Avoid weighing near air conditioners, radiators, or powerful air currents.

For a full selection of METTLER TOLEDO® Precision Balances, see pgs. 62-68.

ELECTRONIC TOPLOADING

Mettler Toledo* Excellence Plus XP Series Electronic Toploading Balances

Precision balances with a unique combination of the highest capacities with the finest resolutions

01-910-370

01-910-364
(see next page)

Features

- User-friendly touchscreen with large, colored, SmartScreen* display
- Hands-free operation with SmartSens* and ErgoSens sensors
- Fully automatic temperature and time-controlled internal adjustment with proFACT*
- Warning feature (MinWeigh*) notifies user if weight is below the allowed minimum
- Weighing adapter for optimal adaptation to the environment
- Include MonoBloc$^{\text{High-Speed}}$—a rugged, high-performance weigh cell for peak weighing performance
- Download software via the Internet
- Display different weighing units; display statistics
- Adapt to the environment; adapt to weighing type
- Formula weighing, including security protection
- Factor calculation, alphanumeric identification, four IDs per sample, seven languages
- Safe operation in QM-regulated environments—include User Management, Password Protection, and Change History

Design

- Stainless-steel weighing pan with draft ring or draft shield
- Spring-loaded stabilizing feet for all 0.1 and 0.01g models
- Built-in RS-232 interface; slot for second freely selectable interface; and two switch contacts
- Protective cover for terminal and weighing platform; terminal can be mounted on special stand to save space
- Feedthrough for below-the-balance weighing

WARRANTY:
One year extendable to three years with return of warranty card.

LOOKING FOR MORE?

For more information about Mettler Toledo* balance features, see p. 54.

Mettler Toledo* Excellence XS Series Electronic Toploading Balances

Precision balances designed for outstanding efficiency, reliability and ease of use

Key Features

- Fast, precise weighing results
- Touch-screen display with graphical user guidance
- MonoBloc$^{\text{High-Speed}}$ weighing cell, accelerated via dedicated processor
- Fully Automatic Calibration Technology (FACT), for temperature-controlled internal adjustment
- Alphanumeric sample ID entry (up to three IDs per sample)
- GLP/GMP-compliant printouts
- Six interface options, including Bluetooth (wireless), Ethernet, PS/2, and USB
- Verified versions and stand-alone platforms available
- Applications include weighing, statistics, %-weighing, animal/dynamic weighing, piece counting, formulation and density determination

Design

- Large, square weighing pans with up to 30% more surface area
- Draft shield (1mg models) for direct access to weighing pan from any side
- Robust construction and IP54 in-use protection

WARRANTY:
One year extendable to three years with return of warranty card.

Mettler Toledo* XS Series Analytical Balance Accessories

Description	Mfr. No.	Cat. No.	Each
Weighing Pans, Aluminum (set of 10)	11106711	**01-916-226**	28.12
Weighing Kit with ErgoClips*†	11106707	**01-916-230**	265.00
Interface for printer, computer, or titrator; RS-232 option	11132500	**01-916-224**	137.00
Adapter, 230VAC	21900882	**01-916-225**	202.00
Adapter, 115V	11106930	**09-317-553**	148.39
Protective Cover for Terminal	11106870	**01-916-227**	28.12
Transport Case, with space for printer	11106867	**01-916-229**	481.00

† Kit contains various attachments for round-bottom flasks, test tubes, and weighing boats; also includes a set of weighing boats and disposable aluminum pans.

Mettler Toledo* Classic Plus PB-S/FACT and SB Series Basic Level Electronic Toploading Balances

Fast, reliable weighing results on less complex tasks

Provide an optimum price-performance ratio. Choose the PB-S/FACT Series with standard balance design, or the SB Series with separate, large weighing pan for heavy-duty applications.

Standard Features

- Basic weighing, taring, calibration and piece counting easily performed
- Two sets of weighing units: one set includes gram, pound, kilogram1, ounce, troy ounce, pennyweight, carat, momme, Mesghal, grains and tical; the second set includes Singapore tael, Hong Kong tael, and Taiwan tael
- Easy-to-read liquid crystal display
- Automatic shutdown

Advanced Features

- DeltaRange* models feature a movable fine range that gives you 10 times the readability of the balance's entire coarse weighing range
- "rESEt" command lets you instantly reset balance parameters to factory settings and return to simple weighing mode
- Built-in RS-232-C interface provides direct balance connection to a variety of computers, printers and other peripherals

Design

- Sealed keypad
- Sturdy all-metal housing
- Protective cover

PB-S/FACT Models

- Provide maximum weighing values between 151 and 8,100g, with readabilities from 0.001 to 1g
- Include software for counting parts with the touch of a single key
- Come with feedthrough for weighing below the balance

01-916-257
(See next page)

FACT (Fully Automatic Calibration Technology)

- Automatically calibrates balances 24 hours a day using internal calibration weights
- When sensors detect ambient fluctuations of ±1.5°C (±2.7°F), balance immediately calibrates itself

SB Models

- Perform automatic and manual dynamic weighing
- Provide maximum weighing values between 8100g and 32.1kg, with readabilities of 0.1g or 1g

ORDERING INFORMATION:

115/230V 50/60Hz.; 230V operation requires accessory power adapter (09-313-152V). For weigh-below devices and draft shield on 1mg models, call your Fisher Scientific Customer Service Representative.

Contd. on next page.

Mettler Toledo* Classic Plus Balances, contd.

INCLUDES:
Unit, 115VAC adapter, and operating instructions

NOTE:
Calibration weights from Mettler Toledo* are available on p. 99 or online at **www.fishersci.com**.

WARRANTY:
One year extendable to three years with return of warranty card.

OPTIONAL ACCESSORIES
The Mettler Toledo LC-P45 printer (01-911-152A) quickly and easily transforms your Basic-S balance into a QC system. Rechargeable external power source (01-951) provides up to 15 hours of field weighing.

Mettler Toledo* Classic Light Toploading Balances

Designed for essential weighing operations

For simple, easy weighing tasks that need to be done frequently, but with assured accuracy: piece counting, percent weighing, ±weighing, dynamic weighing, and calculation with a custom "free factor."

Key Features

- Logical menu guidance with only a few keys for full function
- Portable; battery operation for 25 to 30 hours
- Automatic shutoff saves battery life
- Built-in overload protection
- Specific gravity and density measurements with built-in below balance weighing mechanism
- Weighing modes: g, kg, mg, carats, lb., oz., ounces troy, grains, pennyweight, mommes, mesghals, taels (three variants), ticals, tolas and bahts

Operation

- Large, high-contrast, seven-segment LCD
- Automatic calibration with external weights
- Large weighing pan supports loading efficiency
- PL-S models offer the option of a built-in rechargeable storage battery

01-910-164

ORDERING INFORMATION:

Electrical Requirements: 115/120V 50/60Hz. Dimensions (W×D×H): 8⅞ × 7⅝ × 5⅜" (22.5 × 19.4 × 13.7cm); except PL303 and PL3002 which are 13¼ × 9⅜ × 11¼" (33.5 × 23.8 × 28.7cm). Net Weight: 3⅜ lb. (1.5kg); except PL83-S and PL303 which are 12⅛ lb. (5.5kg). A variety of accessories are available including optional carrying case, in-use covers, and power adapters.

INCLUDES:

AC adapter appropriate to national standard

WARRANTY:

One year

Denver Instrument* Pinnacle* Series Toploading Balances

Feature 11 models with capacities from 200 to 8000g—including three with Denver's Dynamic Fine Range

01-913-84
01-913-96

These ruggedly designed balances are the perfect solution for general and industrial laboratory weighing applications, offering high performance and precision at an affordable price.

Standard Features

- Capacities from 200 to 8000g
- Single- and dual-range models
- Each of these balances let you select two weighing units for even greater versatility
- Units include: grams, milligrams, ounces, troy ounces, pounds, grains, carats, drams, pennyweights, mommes, three taels (Hong Kong, Singapore and Taiwan), tolas and bahts
- RS-232-C bidirectional interface
- Multiple weighing units
- Built-in standard RS-232-C interface and a USB port allow you to connect balances to a wide variety of printers and computers for optimum communication
- Set user ID, alphanumeric batch label and sample number, and the balance will comply with ISO/GLP requirements

Advanced Features

- For more precise measurements—choose dual-range P-Series balances with Dynamic Fine Range
- With just a touch of the TARE key, you can easily access an additional fine weighing range at any point along the entire weighing spectrum
- For inventory and process control, P-Series toploaders can be set up to count parts up to the capacity of the balance
- LCD simultaneously indicates the number of parts and their collective weight value
- Perform percent calculations easily with any P-Series balance or determine percent-to-target by weight—ideal for filling stations
- For maximum accuracy, these toploaders can be customized to perform average readings over a set period of time—ideal for weighing nervous lab animals or for work in unstable environments
- Touch the keypad and the toploaders automatically adjust to an applied standard—ensuring that every reading is accurate. All models allow for printing of calibration point as well as date, time and operator identification

Operation

- Perform statistical evaluations of stored samples including total weight, average weight, standard deviation, minimum and maximum weights, and the range of stored weights—all of which can be printed (using optional printer). Printed records can include balance and operator identification, date, time and signature line.
- Oversized display shows weight measurement in large digits
- Electronic filling guide with highly visible bar graph indicates exactly how much of the weight range has been used and how much is still available
- For dual-range models with Dynamic Fine Range feature, the electronic filling guide indicates how much of each weight range is available for use

Design

- Solid construction is built to withstand the demands of everyday—even extreme—use
- Feature overload and shock protectors to guard against accidental blows to the weighing pan
- Chemical-resistant keypad
- Stainless-steel weighing pan, leveling bubble, and weigh-below port (requires optional 02-225-140 weigh-below hanger)

CERTIFICATIONS:
UL listed and CSA approved

WARRANTY: Three years

Denver Instrument* PI Series Electronic Toploading Balances

With DenverCal* internal calibration

DenverCal provides automatic calibration based on factory settings of change of time or temperature, or choose automatic based on user-defined time setting. Additionally the user can calibrate using the internal weights by pressing the calibration key or perform a calibration with external weights.

Key Features

- Built-in statistics; store up to 250 results in data log
- Sample averaging and standard deviation
- Programmable environmental settings
- Meet ISO/GLP requirements, with alphanumeric batch identification; sample ID number; date and time; user name
- Bidirectional RS-232 allows you to send readings to a printer or computer plus send commands remotely to the balance from your computer
- Ethernet and USB ports also standard; includes free software to download data into a text file or worksheet via USB
- Display two weigh units simultaneously, plus time, date and capacity indicator
- 16 weigh units including grams, milligrams, kilograms, ounces, troy ounces, pound, grain, pennyweight and carat

Design

- Rugged, die-cast aluminum base
- Durable stainless-steel weighing pan
- Easy-to-see leveling bubble
- Chemically resistant keypad sealed for protection against spills
- Extra-large, back-lit display has ¾" high numerals
- Weigh-below port

REQUIRED ACCESSORIES:
Use of weigh below port requires optional weigh-below hanger (01-960-6); order online at **www.fishersci.com**.

WARRANTY:
Three years

COMPLIANCE:
Meet ISO/GLP requirements

Denver Instrument* Summit* Series Electronic Toploading Balances

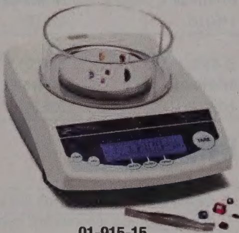
NEW

Simplicity, accuracy and reliability at an economical price

Ideal for laboratory, industrial and educational environments.

Key Features

- Easy, menu-driven operation
- Large TARE key provides quick zeroing of balance
- Toggle between four weigh units with the press of a single key
- RS-232 interface for connection to computer or printer for permanent record of results; easy to integrate into a GLP or ISO program
- Internal, automatic calibration
- Time and date stamp with each result



01-915-15

Weigh Modes/Units

- Percent weighing allows measurement of a percent proportional to a reference weight
- Animal weighing; takes multiple weight readings, then locks average reading on display
- Parts counting capability is ideal for inventory and process control
- 18 total weigh units including grams, ounces, grains, carats and pounds
- Single-block weighing technology for quicker response times and accurate, repeatable results

Design

- Solid construction; stainless-steel pans allow for easy cleanup
- Leveling feet and level indicator
- Below-balance weigh port for density measurements

Denver Instrument* Timberline Toploading Balances

NEW

Good for parts counting in inventory control and percent weighing in filling or batch processes

Compact and sturdy construction make this balance ideal for laboratory, educational and production environments.

Features

- Capacities up to 12kg
- Clear display and keypad with large function keys
- Stainless-steel weigh pan for easy cleanup
- Quick readouts, thanks to the latest weighing technology

01-913-148

- Toggle between two weigh units including grams, pounds and ounces
- Automatic external calibration using a precision calibration weight (sold separately)
- Counting, percent weighing, formulation, average weighing
- RS-232 port standard for data transfer to printer or computer
- Leveling feet and bubble to assure proper balance position
- Built to withstand the rigors of everyday use; includes overload protection

Denver Instrument* XP Series Portable Electronic Toploaders

Rugged, budget-minded balances are portable and ready to use

Ideal for general weighing applications, even when electricity is not readily available. Ruggedly built to take the abuse and rigors of the most challenging situations—especially those in an educational environment where multiple users can often play havoc with sensitive equipment.

Features

- Four models with capacities of 300, 600, 1500 or 3000g
- Fully charged internal battery provides up to eight hours of use
- Built-in sleep mode saves the battery's power between weighings
- Multiple weighing units: grams, ounces, troy ounces, pennyweight, carats, grains, Taiwan taels, and Hong Kong taels
- Available RS-232 interface allows sending balance results to a computer or printer for hard copy of data
- Automatic calibration using a precision external weight
- Full-range tare
- Easy-to-see LCD display

Design

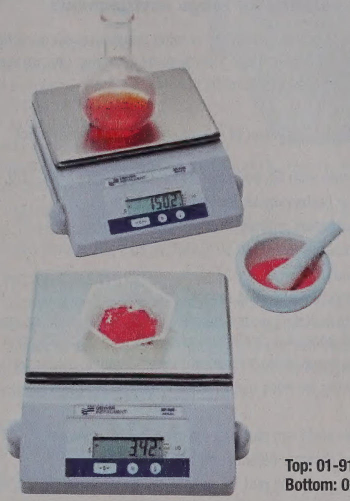
- Durable diecast aluminum housing
- Stainless-steel weighing pan
- Built-in drip edge beneath the pan protects internal components
- Keypad area features a drip gutter for protection against liquid spills

INCLUDES:

Internal rechargeable 9V/500mA battery and an AC adapter/charger

WARRANTY:

One year



Top: 01-913-57,
Bottom: 01-913-59

Denver Instrument* MAXX Toploading Balances

The perfect solution for tough environments

Lightweight design makes it ideal for moving around a production floor or for field use. Built-in applications include parts counting, percent weighing, display lock, formulation and specific gravity.

Key Features

- Simple to operate—a press of the large TARE key quickly zeros the balance
- Portable; operate with AC power or 9V battery (except MXX-123)
- Auto shutoff in battery mode; low-battery indicator
- Automatic calibration with external weight
- Operating temperature: 10° to 30°C (50° to 86°F)

Weigh Modes/Units

- Toggle between two weighing modes
- 13 weigh units including grams, carats, pounds, ounces, lb./oz. and grains—or set your own conversion using the USB or RS-232 port
- Parts counting mode is ideal for inventory or incoming inspection
- Percent weighing provides quick check of total weight

Design

- Stainless-steel weighing platform makes cleanup a breeze
- Sealed keypad protects balance from spills
- Below-balance weighing port for density measurements
- RS-232 or USB port can be added to any MXX balance to send results to computer or printer
- Small size and lightweight (less than 3 lb.) suits on-the-go needs

01-915-02

01-915-05

ORDERING INFORMATION:
Battery (not included): 9V Alkaline or MiMH rechargeable
Dimensions (L×W×H): 9¾ × 7⅛ × 3⅛" (24.9 × 18 × 7.9cm)

INCLUDES:
Operations manual and power supply; MXX-123, -212, -412 and -612 include calibration weight. MXX-123 also includes 1" high, 4.4" dia. draft ring.

WARRANTY: One year

Ohaus* Voyager* Pro Series Electronic Toploading Balances

Provide standard and advanced application modes, and the intelligence of innovative software

02-114-28

Perfect for university research, teaching laboratories and general lab applications.

Key Features

- Six advanced applications to automate weighing and help reduce errors
- AutoCal* automatic internal calibration
- Backlit, high-resolution dot-matrix display
- Applications library to store and recall past procedures
- Integral weigh-below hook
- Protective in-use cover and security bracket
- Large, three-door draftshield on all balances with 0.1/1mg readability for optimum draft protection
- Manufactured with ISO 9001:2000 certified processes

Operation

- Simple user interface with two-button operation and three application-specific soft keys
- Easy-to-use navigation windows and scroll-down menus to guide user through balance functions
- User-selectable GLP/GMP data output via RS-232 communications port
- User-selectable filter, stability indicator, and auto-zero tracking for use in difficult environments
- Five operating languages

Weighing Modes/Units

- Standard modes: percent weighing, animal weighing, check weighing, filling, parts counting and gross/net/tare weighing
- Advanced modes: statistics, formulation, differential weighing, statistical QC, density determination and pipet calibration
- Weighing units: milligrams, carats, mommes, grams, troy ounces, taels (three), kilograms, newtons, ticals, pounds, grains, pennyweight, ounces, and custom units

ORDERING INFORMATION:

A wide range of accessories are available, including auxiliary display kit, remote display kit, security device, density determination kit, calibration masses, impact printer, RS-232 interface cables and TAL WinWedge* software. Contact your Fisher Scientific Customer Service Representative or visit **www.fishersci.com**.

WARRANTY:

Two-year warranty (US and Canada)

Ohaus* Explorer* Pro Series Precision Electronic Toploading Balances

Innovative software design for quick, easy operation.

02-112-131
(See next page)

Standard Features

- Dot matrix display enhances viewing in any environment and simplifies menu navigation and balance setup
- Capacity guide provides a visual aid by displaying the relationship between total platform load and full balance capacity
- Fill guide displays the relationship between total platform load and user-defined target
- Dot matrix display provides a choice of limited or multiple data fields at each application
- RS-232 port
- Auxiliary display port
- Complete built-in GLP/GMP protocol
- Integral weigh-below hook for density/specific gravity determination

Weighing Modes/Units

- Seven application modes include animal weighing, parts counting, percent weighing, check weighing, filling, and gross/net/tare weighing
- Weighing units include gram, milligram, ounce, user-programmable custom unit, troy ounce, carat, pennyweight, Hong Kong tael, Singapore tael, Taiwan tael, mommes, grain, tical, and newton
- Display either simple weighing results or more advanced results including piece count, average piece weight, sample size, tare weight, weight, and under- and over-indicators

Operation

- AutoCal* feature (optional) automatically calibrates the balance when it senses a temperature change sufficient enough to affect weighing accuracy
- Three application-specific soft keys allow direct access to items such as calibration, units, new sample, sample size, new reference weight, reference weight, new target, and target
- Selectable operating languages include English, Spanish, French, German, and Italian
- Selectable settings—information, environmental, and auto-print
- Contrast and brightness control
- Innovative interface with user prompts make even advanced applications easy to follow

Design

- Ergonomic leveling system with up-front level
- Protective in-use cover

ORDERING INFORMATION:
All models except the EP613 are available in Legal-For-Trade versions; contact your Fisher Scientific Customer Service Representative.

WARRANTY:
Two-years (U.S. and Canada)

Ohaus* Adventurer* Pro Precision Electronic Balances

NEW

Simple operation for basic weighing, with the accuracy and range to support more advanced applications

QuadraStance* feature keeps balance stable on any surface. SmarText* software guides user through set and application.

Key Features

- Capacity ranges from 51 to 8100g
- Balances stabilize within 1½ to 3 seconds, depending on model
- Weigh-below hook enables determination of density and specific gravity
- In difficult working situations, filtering to compensate against vibration and disturbances can be preprogrammed
- Standard overload and underload indicators alert operator when load changes are necessary
- Programmable energy-saving auto shutoff; low-battery indicator
- GLP/GMP capabilities such as data storage and output options for properly documenting balance activities to meet good practice requirements; include date, time, balance I.D., user I.D., project I.D., and reference
- Bidirectional RS-232 serial interface enables data transfer to a computer
- Custom two-line backlit LCD enhances viewing and displays additional reference information—allows you to simultaneously view reference and actual weight

Operation

- Operate with included AC adapter or four "AA" batteries (not included)
- Available with or without InCal* internal calibration; InCal ensures weighing accuracy by allowing you to calibrate the balance prior to use without needing external weights
- Without InCal, calibration is digital with external weights
- Easy-to-use SmarText software utilizes text prompts to guide users through application use and balance setup

01-921-20

01-919-211

Weigh Modes/Units

- Weighing modes include basic weighing, animal weighing, parts counting, percent weighing, check weighing, totalizing, and display hold
- Measurements càn be read in custom units or in a variety of standard units: milligram, gram, kilogram, ounce, pound, carat, pennyweight, ounce troy, grain, Newton, Hong Kong tael, Singapore tael, Taiwan tael, momme, tical, bath, mesghal, and tola

Design

- QuadraStance design incorporates four feet to provide superior footprint stability on any surface
- Stainless-steel weighing platform resists corrosion; protective in-use cover
- Integral security bracket accommodates most security cables
- Simple three-button menu navigation promotes speedy setup
- Ergonomic leveling system with up-front level indicator
- Model AV53 comes with round draftshield for precise operation in drafty environments
- Models AV-213 and AV-313 include square, frameless draftshield with removable doors for unobstructed access to materials being weighed and for easy cleaning

Ohaus* Pioneer* Precision Balances

An excellent balance for routine weighing in lab, industrial and education applications

NEW

Selectable environmental settings, three filter modes and adjustable zero tracking make the Pioneer ideal for slow filling applications where sensitivity is a must.

- Single-line LCD; no backlight
- Three-button panel with dedicated and number functions
- RS-232 bidirectional interface
- Up-front level indicator—no need to look in back of balance during leveling process
- Works well in harsh environments; settings can be adjusted to compensate for vibrations and other disturbances
- Calibration lockout
- Security loop in rear of balance
- Communications software, SW12W

INCLUDES:
AC adapter

WARRANTY:
Two years (U.S. and Canada)

CERTIFICATIONS:
FCC, CE mark

Ohaus* Scout* Pro Series Electronic Toploading Balances

Economical, portable balance with a large, crisp display that allows users to clearly view results from any angle

Simple, two-button keypad provides for weighing with minimal instruction.

Standard Features

- Enhanced user interface
- Menu system is easy to use, with no cryptic code numbers to input
- Weighing units can be changed with a touch of a button; include grams, kilograms, ounces, pounds, combined pound:ounce display, troy ounces, and pennyweight

Advanced Features

- Enhanced parts counting with average piece weight recalculation
- Totalization for summing sample weights, allowing repeated summation to the limit of the display—not just the capacity of the balance
- Percent weighing allows the comparing of sample weights to a reference weight
- Display hold for weighing large packages
- Below-balance weighing with integral weigh-below hook for density determination
- Interfaces (choice of USB or RS-232) are easy-to-install accessories—balance can be upgraded any time after purchase

Design

- Large stainless-steel weighing platform
- High-contrast LCD readout
- Overload and underload indicators
- Low-battery indicator
- Sealed front panel and molded spill ring protect the balance during use
- Includes integral security bracket

01-921-13

- Integral shipping lock protects the weighing mechanism during transportation
- Physical lockswitch allows balance to be locked into a specific configuration, reducing operator error

INCLUDES:
AC adapter; span calibration mass included on 200, 400, and 600g models.

REQUIRED ACCESSORIES:
Four "AA" batteries

WARRANTY:
Two years (US and Canada)

MECHANICAL

Ohaus* Hanging Pan Balances

High precision and remarkable value

- Vernier dial and beam models
- Rugged construction features a serialized, stainless-steel pan and bow; covered agate bearings; precision ground pivots; and diecast aluminum beam for long life and precise performance
- Tiered and notched beams with center-indicating, windowed poises increase visibility, while parallax-free end-reading device permits use even in harsh light
- Other features include magnetic damping to slow oscillation; spring-loaded zero adjustment compensator; self-storing specific gravity platform; and a direct-reading vernier dial (only on Cat. No. 02-020-10)

Cat. No. 02-020-10: Front beam is graduated from 10 to 100g in 10g increments; rear beam, from 100 to 200g in 100g increments; vernier dial, from 0 to 10g in 0.01g increments.

Cat. No. 02-021: Front beam is graduated from 0 to 1g in 0.01g increments; second beam from 1 to 10g in 1g increments; third beam, from 10 to 100g in 10g increments; fourth beam, from 100 to 200g in 100g increments.

Type	Capacity	Readability	Pan Size (Dia. × H)	Mfr. No.	Cat. No.	Each
Vernier dial	310g	0.01g	3⅝ × ½" (9 × 1cm)	310 00	**02-020-10**	215.00
Beam	311g	0.01g	3⅝ × ½" (9 × 1cm)	311 00	**02-021**	179.00

Prices subject to change.

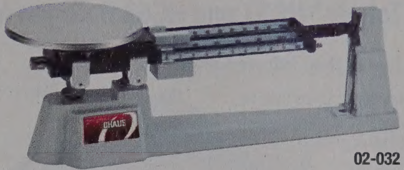
Ohaus* Triple-Beam Balances

Seven rugged models provide accurate and consistent readings to 0.1g

- With stainless-steel pan, scoop, 6" diameter (15cm) plate or aluminum animal container
- 610g capacity, expandable to 2610g via attachment of Auxiliary Weight Set, 02-034-8
- Precision ground pivots and patented self-aligning agate bearings to ensure reproducibility
- Easy zero adjustment remains firmly in place, while deep-notched, tiered beams with diecast, center-reading poise ensure correct positioning
- High-speed throughput allows for more weighings in less time
- Effective magnetic damping coupled with appropriate beam capacity reduces oscillation and speeds weighing process
- Beams are easy to read because of their high-contrast markings, while an end-reading device eliminates parallax
- Nonmagnetic stainless-steel bearing covers and rust-resistant weighing platforms
- Heavy zinc base for exceptional stability, a tamper-resistant poise removable from only one spot on the beam, and attachment weights with recessed pivots to keep them from slipping or falling

Standard Model: front beam is graduated from 0 to 10g in 0.1g divisions; center beam, from 100 to 500g in 100g divisions; rear beam, from 10 to 100g in 10g divisions.

Dial-O-Gram* Model: front beam is graduated from 100 to 500g in 100g increments; rear beam, from 10 to 100g in 10g increments; vernier dial from 0 to 10g in 0.1g increments.



02-032

Cat. No. 02-034-20 comes with a tare beam for taring out the weight of sample containers.

Cat. No. 02-034-25 features an aluminum animal container ideal for weighing small animals.

ORDERING INFORMATION:

Shipped fully assembled. Order polypropylene scoops (02-041-5) online.

[1] *Includes 225g tare beam.*

Ohaus* Harvard Trip Balances

Ideal for comparative weighing

Choice of single or double beam models provides many years of maintenance-free, comparative weighing using a known standard.

02-037SD

- With 2000g capacities, 0.1g readabilities, and either a stainless-steel 6" (15.2cm) diameter × ¾" deep (1.9cm) pan or 6" diameter (15.2cm) plate
- Angled beams with center-reading poises for excellent visibility of results; sliding, rotating poise for fine adjustment
- Magnetic damping to slow oscillations and speed weighings
- Zero-adjust compensator ensures precision and reproducibility
- Equipped for specific gravity weighing
- Precision-ground knives, covered self-aligning bearings, cross-braced aluminum-alloy box-end beam, and elliptical check pins
- Single-beam balances graduated in 0.1g increments; double-beams in 0.1 and 10g increments.

Type	Mfr. No.	Cat. No.	Each
Single beam with plates	1450-SD	**02-035SD**	195.73
Double beam with plates	1550-SD	**02-037SD**	216.81
Double beam with plates[1]	1560-SD	**02-037-10SD**	220.83

[1] *Includes 225g tare beam; calibrated in grams and ounces.*

MOISTURE

Mettler Toledo* HR83 and HG63 Halogen Moisture Analyzers

Up to 40% faster than infrared drying

Ideal for sampling applications used in food processing, pharmaceutical, or chemical industries.

- Suitable for ISO, GLP, and GMP protocols
- Adjustable two-point calibration of dryer and balance
- Drying time of 1 to 480 minutes

01-910-328

Models HR83 and HR83P

- Heats from 50° to 200°C in just 30 seconds
- Four selectable drying programs, choice of switch-off criteria, and built-in database to save 40 sampling procedures
    - **Standard program** heats to the set drying temperature and holds constant
    - **Rapid drying** speeds drying of samples from 3 to 15% moisture
    - **Gentle drying** reduces the formation of "skins" on samples
    - **Step drying** offers one to three temperature steps plus an overheating prevention feature that initiates a time limit for temperatures over 180°C (350°F)
- Models will stop heating based on a manual stop, one of five presettings, mean weight loss per unit of time or programmed drying time
- Built-in database holds up to 40 methods—drying program and temperature, switch-off criteria, drying time, display mode, print interval, and target weight for weighing-in aid, if used
- Results of each procedure are continuously recorded, statistically evaluated, and updated until cleared

Models HG63 and HG63P

- Designed for simpler, more routine procedures that don't require a built-in database for recording extensive instructions, parameters, or journal and statistics values; database stores up to 10 methods
- Simple, one-step process requires setting only drying temperature and time
- Time limit for temperatures over 180°C (350°F) protects analyzer from damaging heat
- Manual or automatic switch-offs
- LCD displays current temperature, elapsed drying time, and current drying value, with results in % moisture, % solids, or weight

ORDERING INFORMATION:

Models without printers are available; visit **www.fishersci.com**.

INCLUDES:

Both models come with 50 aluminum sample pans, sample pan holder, specimen sample, draft shield element, grounded 3-prong power cable, printer and operating instructions. Model HR83P also includes built-in LocalCAN interface for data exchange with a computer or control system (cables available separately).

REQUIRED ACCESSORIES:

Halogen drying unit requires Temperature Calibration Kit (01-909-385) for adjustment. Balance requires 50g ASTM* Class I calibration weight (01-913-501). Both can be ordered online at **www.fishersci.com**.

Mettler Toledo* HB43-S Compact Halogen Moisture Analyzer

NEW

Combines halogen heating technology with strong analytical power

Features

01-910-100

- Samples are heated uniformly using a predefined drying program for quick and highly reproducible results
- Switch between two active drying methods at the touch of a button
- Methods library includes ready-to-use methods for over 100 substances
- Compact unit is suitable for lab and production environments
- Easy to use—just open the cover and the instrument leads you step-by-step through the analysis
- Five automatic switch-off criteria and timer mode complete analysis once constant weight is achieved
- Alphanumeric method names and target-weight indication ensure precise results
- Customized method names to describe your substances
- Optional LabX* software (01-919-700) provides automatic transfer of data to Excel*

Design

- Rugged design for a long service life
- Flat surfaces and excellent access to sample chamber make cleaning easy
- Large, brilliant display allows easy operation

ORDERING INFORMATION:

Printer is optional; choose 01-911-152A or 01-910-121 (contact your Fisher Scientific Customer Service Representative for more details).

INCLUDES:

80 aluminum sample pans, sample holder, sample handler, moisture pads, power cable, and operating instructions.

Denver Instrument* IR-120 Moisture Analyzer

Versatile, reliable moisture analyzer is great choice for multiple users

01-913-440

- Quartz coil infrared heating element provides consistent heating along with fast analysis times
- Programmable one, two or three-step drying procedure allows rapid drying of the sample without scorching
- Fully adjustable endpoint criteria to maximize efficiency and accuracy
- Store up to 100 custom programs, each with their own alphanumeric identification for easy recall
- Wide working range enables testing of nearly any type of sample
- Built-in dot-matrix printer—customize the printout with pertinent information or set to meet ISO/GLP requirements
- Built-in RS-232 interface for connection to computers, printers, and other peripherals
- Store and perform statistical analysis on up to 250 test results
- Motorized heating hood for full access to sample
- Automatic weight capture for simple, reliable operation
- Security feature to prevent unauthorized changes

Model	IR-120
Working Range	0.1 to 99.9%
Temperature Range	30° to 210°C in 1°C increments
Temperature Steps	Programmable; one, two, or three
Weighing Range	0 to 120g
Taring Range	0 to 120g
Unit of Results	% moisture, % solid, % moisture/dry, mg of weight loss, grams of residue or g/kg
Readability (moisture)	0.01%
Dimensions	18 × 13 13/16 × 6" (45.72 × 35.05 × 15.24cm)
Net Weight	18 lb. (8kg)
Electrical Reqts.	115V 50/60Hz
Mfr. No.	IR-120.1
Cat. No.	**01-913-440**
Each	4995.00

Denver Instrument* IR-60 Moisture Analyzer

Rapid heating technology and easy setup combined in a rugged, straightforward instrument

01-914-270

- Quartz coil infrared heating element allows rapid heating, similar to halogen, while assuring even heating of the sample
- Flexible endpoint determination—choose the factory-defined automatic endpoint or timer mode for general applications, or tailor the endpoint specifically to your samples to get better repeatability or shorter analysis time
- Store up to five programs for analysis of different sample types
- Standby temperature keeps the instrument ready for the next test and reduces analysis time
- Password protection blocks unauthorized changes
- Back-lit liquid crystal display
- RS-232 serial port to send information to computer or optional printer

Model	IR-60
Working Range	0.1 to 99.9%
Temperature Range	40° to 210°C in 1°C increments
Temperature Steps	One
Timer Range	0 to 99 minutes
Weighing Range	0 to 60g
Taring Range	0 to 60g
Unit of Results	% moisture, % solid, % moisture dry, mg of weight loss or grams of residue
Readability (moisture)	0.01%
Dimensions	12⅝ × 8⅜ × 7⅛" (32.0 × 21.3 × 18.1cm)
Net Weight	12⅛ lb. (5.5kg)
Electrical Reqts.	115V or 230V, 50/60Hz
Mfr. No.	IR-60.1
Cat. No.	**01-914-270**
Each	3250.00

Denver Instrument* IR-35 Moisture Analyzer

Low-cost moisture analyzer is fast and easy to operate

01-915-00

- Simple control panel
- Provides fast check of moisture content, typically 5 to 15 minutes
- Simple endpoint determination—choose the automatic shutoff parameter for most samples, or the timer mode for samples that do not lose a significant amount of moisture over time
- Dark radiator infrared heater
- Compact size
- Designed to withstand the rigors of industrial use
- Liquid crystal display
- RS-232 serial port to send information to computer or optional printer

Model	IR-35
Working Range	0.1 - 99.9%
Temperature Range	40° to 160°C in 5°C increments
Temperature Steps	One
Timer Range	0 to 99 minutes
Weighing Range	0 to 35g
Taring Range	0 to 35g
Unit of Results	% moisture, % solid, % moisture dry, grams of weight loss
Readability (moisture)	0.01%
Dimensions	12⅝ × 8⅝ × 6½" (32.0 × 21.8 × 16.5mm)
Net Weight	12⅛ lb. (5.5kg)
Mfr. No.	IR-35.1
Electrical Reqts.	115V 50/60Hz
Cat. No.	**01-915-00**
Each	2675.00

ACCESSORIES

Disposable Foil Sample Dishes

For use with all Denver Instrument* Moisture Analyzers

- 3½" (90mm) diameter
- Box of 200 sample pans

Mfr. No.	Cat. No.	Pack of 50
900274.1	**01-913-356**	38.00

Glass Fiber Sample Pads

For use with all Denver Instrument* Moisture Analyzers

- Ideal for samples with a high moisture content
- Prevent crusting or splattering of samples while reducing analysis time
- 3½" dia. (90mm)

Mfr. No.	Cat. No.	Pack of 200
900298.1	**01-913-358**	36.95

Ohaus* MB Series Moisture Analyzers

Full-featured, compact analyzers heat up quickly and uniformly

Ideal for environmental, quality control, food and beverage, chemical and pharmaceutical testing. Two models available for basic or advanced operation.

- Fast halogen heat source for fast heatup—40% faster than traditional infrared
- Gold reflective housing for uniform heat distribution

Model MB45

- Advanced performance plus customizable, time-saving software
- Readability of 0.001g on samples up to 45g, over a 0.01% to 100% moisture range
- Built-in software expands capabilities for greater accuracy and ease of use, as well as data storage and management; allows temperatures to be controlled in 1°C increments from 50° to 200°C
- Integrated database stores/recalls up to 50 drying procedures and allows statistical analysis of data
- Display text in choice of five languages (English, Spanish, French, German, Italian)
- Results can be viewed as % moisture, % solids, time, temperature, weight, test ID and also as a real-time drying curve
- Perform timed tests or use four enhanced heating options:
    - "Fast" (quickest time to reach temperature)
    - "Standard" (minimal overshoot while quickly attaining temperature)
    - "Ramp" (controlled ramping to temperature)
    - "Step" (set three temperatures for difficult samples)
- Four switch-off criteria include manual, timed, auto (weight loss per unit of time), and auto free (user-defined weight loss per unit of time)

Model MB35

- Heats up to 160°C in less than one minute
- Readability of 0.005g (0.05% moisture) on samples up to 35g, over a 0.05% to 100% moisture range
- Temperature can be controlled in 5°C increments from 50° to 160°C
- Display text shows moisture, time, temperature and weight in a choice of three languages (English, Spanish, French)

WARRANTY:

Two years

01-920-115, 01-920-62

NOTE:

Both models offer a GLP-compliant format when printed results are required and have RS-232 port for connection to computer or optional printer (02-112-98; contact your Fisher Scientific Customer Service Representative for ordering information).

BEFORE YOU BUY SCALES

BASICS TO CONSIDER WHEN DECIDING WHICH SCALE TO PURCHASE

Where will it be used?

There are a variety of scales designed to handle the unique demands of Lab, Food Service, Food Processing, Shipping/Receiving and other industrial applications. Often scales are used in industrial applications that require high capacity. Furthermore, the industrial scale may only need to provide readings in 2 oz. increments while fine weighing applications may need readings in as little as 0.0001g increments.

What environment will it be in?

Will the scale be used in a clean, dry environment or one where it is exposed to moisture and/or corrosive chemicals? Will this exposure be minimal or excessive? Stainless-steel components provide the best resistance to chemicals and moisture.

How much capacity do I need?

If you are weighing small amounts of fine chemicals, a bench scale with 250 lb. capacity that reads in 2 oz. increments will not address your needs. Select a scale that has the capacity you need along with the appropriate functions and readability.

What about readability?

The readability is the finest increment registered by the scale. For example, the Ohaus ES30R Digital Bench Scale can weigh objects up to 30kg in 0.01kg increments. You may need a readout that is in 0.1g or even 0.0001g increments and while the latter will generally be more expensive, it may be the only solution for fine weighing applications.

Ease of use?

Is the scale easy to use and intuitive or cumbersome and confusing? Some products are advanced enough that you merely plug them in and start weighing. Using a scale shouldn't be rocket science.

Does the scale need to be portable?

Some scales can only run on AC power (plug into a wall socket) while others utilize battery power. Portability is an important feature for field work or for scales that need to be used in multiple locations. Sometimes, the features you need may only be found in a product that is clearly too large or heavy to be portable. Look for newer technology that provides powerful operation in a compact instrument. Ultimately, the decision is up to you.

Ohaus* Defender 5000 Bench Scales with Rectangular Base

Portable scale for shipping and inventory

Ideal for routine weighing, shipping and basic applications, including parts counting, checkweighing, % weighing, dynamic weighing and display hold for weighing large packages. Readability as precise as 0.005 lb. (0.002kg).

- Prewired and fully assembled
- Factory set and factory calibrated
- Adjustable, easy to read backlit LCD measures 1" (2.5cm) with three checkweighing LEDs
- Consists of stainless-steel platform with leveling feet and leveling bubble, indicator mounting column and T51P indicator with power supply and line cord
- Five user-selectable weighing units (g, kg, lb., oz., lb.:oz.) and user-defined custom unit
- Net/gross/tare function
- Auto-off timer eliminates battery drain
- RS-232-C bidirectional interface
- Operates on batteries or AC

INCLUDES:
Universal switching 100-240 VAC 50/60Hz power supply

REQUIRED ACCESSORIES:
Six alkaline "C" batteries (rechargeable NiMH batteries optional)

CERTIFICATIONS:
CE marked; UL listed; CSA listed

Ohaus* Defender 5000 Bench Scales with Square Base

Heavy-duty scale for industrial processing and distribution applications

Large pan provides ample room for large and unusually shaped samples or packages. Operates on batteries or with internal power supply; an optional NiMH internal rechargeable battery is available.

- Easy to clean
- Painted steel frame and stainless-steel platforms
- Impact-resistant plastic housing protects indicator
- Large, 1" (2.5cm) backlit LCD display and three checkweighing LEDs
- Five user-selectable weighing units (kg, g, lb., oz., lb.:oz), custom, and user-defined unit
- Simple four-button operation makes weighing effortless
- Overload protection
- Auto zero tracking to minimize drift
- Auto-off timer eliminates battery drain (when batteries are used)
- Adjustable averaging and stability levels
- RS-232-C bidirectional interface
- GMP output with time/data

INCLUDES:
Universal switching (100-240 VAC 50/60Hz) power supply

REQUIRED ACCESSORIES:
Six alkaline "C" batteries (rechargeable NiMH batteries optional)

Ohaus* Compact Electronic Scales

Lightweight, portable electronic scales, ideal for work outside of the lab

Suited for a wide range of applications, including quality control, formulations, small animal weighing, forensic testing and soil and water sampling.

- Easy to operate with simple two-button operation
- Three low-profile models with weighing capacities from 200 to 5000g
- Low-battery indicator, overload/underload indicators, tactile feedback keyboard and auto shutoff
- Quick, easy calibration allows user to adjust for changes in location and temperature
- Rugged construction provides overload protection up to 150% of capacity
- Powered by three "AA" batteries (included) or by optional AC adapter (order separately)
- Weighs in g or lb.:oz.
- Net weight: 1.0 lb. (0.5kg)
- Manufactured with ISO 9001:2000—certified process

Ohaus* Valor* 3000 Xtreme Portable Scale

NEW

Compact portioning scale offers high precision and extreme durability for the harshest environments

High Precision NSF certified and listed scale with USDA accepted housing features the accuracy of the Scout Pro with precision up to 20,000d. User-selectable filtering, auto-zero tracking and stability settings enable use in drafty, unstable environments.

- Full T304 stainless-steel housing, removable stainless-steel weighing pan
- Corrosion-resistant keyboard, great for areas where harsh chemicals are used
- SmarText user interface utilizes bright, backlit LCD plus simple text prompts
- Overload protection rated at 10x capacity
- Percentage weighing mode can automatically compute Baker's Percentages
- Specific Gravity Mode offers rapid, easy determination without need for manual calculations—great for checking density, aeration of mixes
- Durable, easy to clean
- Adjustable rubber feet
- Waterproof models (V31XW3, V31XW6) feature full NEMA 4X/IP65 protection and up-front level bubble
- Laboratory, industrial, food service, baking

Ohaus* FD Food Portioning Scales

Speed, durability and cleanliness; designed for food service use

Ideally suited for food preparation in restaurants, bakeries, food manufacturing and other areas requiring fast operation and flexibility. Also excellent for general weighing applications.

Standard Features

- Rugged stainless-steel construction
- Removable, diswasher-safe, stainless-steel weighing pan
- Simple 4-key operation and plain-text menu for fast setup
- ¾" high backlit LCD display with text annunciators
- Fast display update (under 2 seconds); large, dedicated tare key
- Auto tare for hands-free operation
- Optional foot tare switch for hands-free operation
- Checkweighing mode included with advanced features
- 3-LED indication of Over, Accept and Under with audible buzzer
- Positive mode for packaging, negative checkweighing mode for portioning, and "zero" checkweighing mode for sorting and grading operations
- Dedicated Target key for entry of setpoints for checkweighing mode

Advanced Features

- Selectable environmental averaging settings
- Backlight control with auto-off option
- Selectable weighing units
- Configurable checkweighing mode audible buzzer
- Configurable software lockout menu
- Span or linearity calibration in kg or lb. unit with optional external masses
- Selectable auto-zero tracking
- NTEP - Legal for Trade approved
- Low-battery detection system
- Adjustable feet with integrated level bubble

02-113-28

02-113-29

COMPLIANCE:

NSF listed/certified to NSF/ANSI 169-2005 (formerly NSF C-2)

USDA-AMS accepted to NSF/ANSI/3-A 14159-1-2002 (Hygiene Requirements for the Design of Meat and Poultry Processing Equipment)

Meets requirements for HACCP conformity

C-UL US listed, AS/NZS4251.1; Emission, AS/NZS4252.1; Immunity, tested for compliance to FCC Class B Part 15 operation

Ohaus quality management system registered to ISO 9001:2000 by BVQI Specifications

Approvals pending for NTEP Class III to NIST Handbook 44, Canada Weights and Measurement Class III, OIML R76 Class III and EC Type Approval

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

Ohaus* Checkweighing (CKW) Scales

Dedicated checkweighing scales built for applications requiring fast and accurate operation

Combining a food-safe design, durable stainless-steel construction, and industry-leading software, CKW scales are easy to operate, yet allow full configuration to match different checkweighing needs.

Standard Features

- Washdown Protection: all stainless-steel construction with IP66/NEMA 4X indicator and IP67 load cell
- Checkweighing Setpoint Configurability: set targets by range, variance by weight or percent
- Multiple checkweighing methods: positive into container, negative out of container, net for sorting and grading applications
- Programmable red/yellow/green LED graphical display bar with selectable LED over/under/accept display
- Dedicated target key and numeric keypad
- Software and hardware lockouts: CKW can be locked so that operators cannot accidentally change targets and settings
- Selectable weighing units: lb., oz., combined lb.:oz. display, % of target, kg, g
- 20-SKU library with SKU number, over, under, target, tare values
- Connectivity: configurable external input, RS-232 bidirectional port included with GMP/GLP data outputs for traceability requirements
- Manufactured with ISO 9001:2000-certified processes

Design Features

- Checkweighing indication by: 3-color, 24-segment bar graph, beeper and/or display alert within selected checkweigh conditions
- Dedicated checkweighing Target key with numeric keypad
- Selectable environmental averaging settings
- Adjustable span or linearity calibration in kg or lb. unit with optional external masses
- Semi-automatic or automatic tare
- Adjustable auto-zero tracking; adjustable zeroing range
- Operating temperature: 14°F to 104°F/-10°C to 40°C
- NTEP - Legal for trade approved

Ohaus* Defender 5000 Washdown Bench Scales

Rugged and versatile scales provide precision weighing during the most demanding applications

Modes for animal weighing, % weighing, check weighing and display hold for large containers. Readability to 0.002 lb. (0.001kg). Operates on internal AC power supply or "C"-cell batteries.

- All stainless-steel construction withstands use in wet environments and provides excellent chemical resistance
- Factory set and factory calibrated
- Large, remote stainless-steel platform
- Stainless-steel column and indicator unit with IP66 NEMA 4X washdown protection
- Large, 1" high, easy-to-read, backlit LCD with three checkweighing LEDs
- Six weighing units (kg, g, lb., oz., lb.:oz.) and user-defined custom unit
- Overload protection
- Auto-off timer eliminates battery drain (when batteries are used)
- Adjustable averaging levels
- Net/gross/tare function
- RS-232-C bidirectional interface
- GMP output with time/date

REQUIRED ACCESSORIES:
Six alkaline "C" batteries (NiMH batteries optional)

Ohaus* Defender 7000 Square Dry Bench Scales

Multifunctional scales offer superior precision for batching and filling

Advanced part counting, dynamic animal weighing, percent weighing, check weighing, totalization, formulation, batching, library function and display hold for large containers. Readability to 0.002 lb. (0.001kg).

- Large, remote, stainless-steel platform
- Painted column, indicator unit with high-impact plastic housing
- Sealed front display, numeric keypad, five function keys, and large, backlit LCD
- Three checkweighing LEDs
- Eight user-selectable weighing units: lb., kg, g, parts counting, animal weighing, % weighing, check weighing, and user-defined custom unit
- Factory set and factory calibrated
- Overload protection
- Momentary 10X readability display
- Autozero tracking for minimizing drift
- Adjustable averaging levels
- Net/gross/tare function
- RS-232-C bidirectional interface
- GMP output with date/time

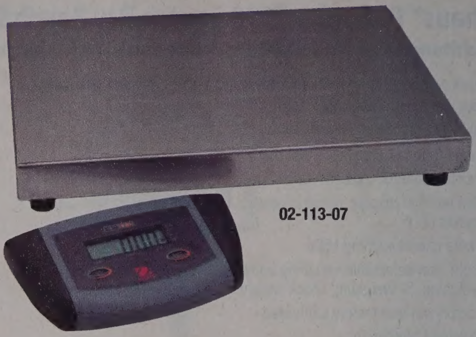
Ohaus* ES Series Digital Bench Scales

Portable digital scale with easy, two-button operation

- ON/OFF/ZERO key turns balance on and automatically sets it to zero
- CAL/UNITS key changes weighing unit and calibrates scale when used with an external weight (not supplied)
- Separate indicator with easy-to-read 1" (2.5cm) LCD
- Large platform easily accommodates weighing of oversized and awkwardly shaped packages
- Low-profile design makes balances completely portable
- Unique three-way mounting bracket mounts the indicator to the scale base, above the scale platform, or on any vertical surface
- Stainless-steel platforms provide excellent chemical resistance; painted steel frames
- Factory set and factory calibrated, with four user-selectable weighing units: kg, lb., oz., lb.:oz.
- Error indicator for over- and under-loads
- Low-battery indicator; stability indicator
- Auto shutoff (after five minutes of inactivity) prolongs battery life
- Models 02-113-09, -10 and -11 have leveling feet
- Model 02-113-11 has only kg, lb., and oz. units



02-113-07

INCLUDES:

Troemner Calibration Weights and Weight Sets

Alloy 8 material for Analytical Weights and Weight Sets

UltraClass—A "super" class of precision weights for the most demanding applications.

- Weight tolerances are 40 to 50% better than ANSI*/ASTM* E617 Class 1 and equal to or exceed OIML Class E2 tolerances
- Combine high precision with two-piece construction (1g and larger)
- Available in a full range of weight denominations and shapes

ANSI/ASTM Class 1 through 4 tolerances—for high-precision weighings

- Meet exacting tolerances for their classes as established in ANSI/ASTM E617
- Traceability and NIST*/NVLAP* Weight Certificates can be provided

STATEMENT OF ACCURACY

Weights and weight sets (excluding OIML Class M2 Weight Sets) are supplied with a Statement of Accuracy which verifies that the product has been manufactured and calibrated to meet all specifications for its weight class

CERTIFICATIONS:

Traceability and NIST/NVLAP Weight Certificates can be provided; NIST/NVLAP accredited density determination documentation is available.

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Electronic Balance Calibration Weights

Two-piece weights with adjusting cavities

- Manufactured from stainless steel; chosen for its uniform density, high resistance to wear and corrosion, and low magnetic properties
- UltraClass* and Class 1 weights are highly polished to a mirror-like finish
- Weights are constructed to be recalibrated and refinished

Precision-machined stainless steel in three styles

- Masses from 30 to 500g are standard cylinders
- Masses from 1 to 5kg are cylindrical with indentation near the top for easy gripping
- Masses from 5 to 30kg are sleek cylinders with recessed grip handles, perfectly flat on top, and easily stacked on center

Protective Cases

- Individual weights from 30g to 5kg come in an impact-resistant, self-hinged polypropylene case with foam interior compartment to protect weights when not in use
- Soft absorbent cotton glove is included to protect weights during use
- Optional cases are available for grip-handle weights

Troemner Precision Alloy 8 Analytical and Reference Weights

Manufactured from a specially developed austenitic stainless steel—Alloy 8—available exclusively from Troemner

Weights 1g and larger are manufactured using Alloy 8, which possesses closely controlled density, extremely low magnetic susceptibility, excellent stability and resistance to corrosion, ensuring a very stable mass over time. Other weights are stainless steel.

- Excellent for high-precision calibrations and reference standards
- Each fractional weight is embossed with its value
- Weights from 1 to 30mg are aluminum and flat, with one side turned up to form a handle for non-slip gripping with forceps
- Weights from 50 to 500mg are stainless steel and flat with one side turned up to form a handle
- Gram and kilogram weights are manufactured using Alloy 8 and come in cylindrical shapes with knobs on top for easy handling
- Weight sets come in a 5-2-2-1 series, with two weights of any included mg or g value beginning with "2" (2mg, 20mg, etc.) and one weight for all other inclusive values
- Each weight set (100g to 1mg) is packaged in a polypropylene case; forceps included

02-214 Series

- Weight sets 500g and above come packaged in a wood case
- All weights come with a statement of accuracy

CERTIFICATIONS:

A NIST/NVLAP* weight calibration certificate or traceable certificate may be purchased to meet all of your ISO*, GLP, GMP, FDA, or nuclear requirements.

[1] For information on certifying weights, see p. 98.
[2] Set includes two 200g weights.

OIML Class M_2 Weight Sets

For routine analytical weighings where absolute precision is not required

Choose from five sets:

- 1 to 100mg weights are aluminum; 200 and 500mg weights are stainless steel
- Weights over 1g in mass feature brass construction and are accurate to within OIML Class M_2 tolerances
- Mfr. Nos.: 318, 31110, 312, 313, 338F

INCLUDES:
Polypropylene box with cover; 1 to 500mg set includes forceps.

Traceability and NIST*/NVLAP* Weight Calibration Certificates

For an additional charge, all Troemner weights and weight sets can be supplied with a Traceablility or NIST/NVLAP Weight Calibration Certificate.

The Traceability Certificate assures that calibrated weights are within the tolerance for their class. It documents the owner's name, address and purchase order number; date of calibration; the individual weights or range of weights in the set; tolerance class; and weight construction details. It also certifies that the nominal values of the weights are within correct NIST, ASTM* or OIML tolerances and identifies the NIST test numbers of Troemner's master weights. **To order, add a "T" to the end of the catalog number (e.g., 02-215-17A becomes 02-215-17AT).**

The NIST/NVLAP Weight Calibration Certificate contains the most comprehensive data. It documents the owner's name and address; date of calibration; equipment and standards used in calibration; accuracy class; true mass value (mass in a vacuum); "as found" mass correction (for recalibration); "as left" mass corrections for each weight; uncertainty of measurement process for each weight; environmental conditions during test; weight construction and density; calibration procedures used; statement of traceability; and a helpful list of terms and definitions. The procedures and processes used to generate this certificate, as well as its format and content, are prescribed by the NIST-administered National Voluntary Laboratory Accreditation Program (NVLAP) and meet all ISO*, FDA, GMP, GLP, DOD, ANSI*/NCSL Z540-1 and nuclear requirements. **To order, add a "C" to the end of the catalog number.**

Calibration and certification services, as well as density determinations on existing weights, are available on request.

For ordering assistance, and for current pricing on weights with traceability and calibration certificates, call your Fisher Scientific Customer Service Representative.

Troemner UltraClass* Calibration and Certification Services

Troemner—an ISO 9001 registered and NIST/NVLAP[1] and UKAS accredited laboratory—offers UltraClass calibration and certification services to help you meet today's exacting requirements of ISO, FDA, GMP, GLP, DOD, and Nuclear regulations. All measurements are performed in Troemner's state-of-the-art laboratories. NIST/NVLAP and UKAS certification is available on new weights and sets or when you need recertification of existing weights and sets from any manufacturer. **Contact your Fisher Scientific Customer Service Representative for details.**

[1] *Accredited by the National Voluntary Laboratory Accreditation Program for the specific scope of accreditation under Lab Code 105013.*

[1] *As per ASTM E 617.*

[2] *As per Handbook 105-1. Class F tolerances are rounded to two significant figures.*

[3] *Also called International Recommendation R111.*

Mettler Toledo* Analytical Individual Weights, ASTM* Class 1

Low magnetic permeability and high corrosion resistance for reliable stable values

- Two-piece screw-knob construction
- 1 to 20mg weights are sheet weights made of aluminum
- 50 to 500mg weights are sheet weights made of steel
- 1g to 5kg weights are knob weights made of steel

Denver Instrument* Calibration Weights and Weight Sets

Precision analytical and reference weights come with Certificate of Traceability

From reference standards in the most exacting laboratory work to student-teaching applications, these weights provide the accuracy and permanence you need.

- Every weight and weight set comes with a Certificate of Traceability to NIST* standards
- Gram weights feature one-piece, knob-style construction of nonmagnetic stainless steel; come in 1 to 100g masses
- Fractional flat weights from 1 to 5mg are made from aluminum; those from 10 to 500mg are stainless steel
- Weights conform to exacting individual and group tolerances for their classes

UltiMass* Weights: for stringent requirements

- Designed for use as laboratory reference standards to meet stringent ISO or GLP requirements
- Equivalent to OIML E2 standards (see Metric Weight Tolerance chart (on p. 98) and exceeding U.S. requirements for NIST Class 1 tolerances

ASTM* Classes 1 through 4: for high-precision weighings

02-225 Series

- Manufactured to meet or exceed tolerances established for their class in ASTM E 617
- Class 1 through 4 weights let you choose the degree of accuracy you need
- Individual weights are available in 30g to 5kg denominations
- Certificate of Traceability documents material, density and type of construction for each weight
- For additional charge, a Certificate of Calibration can be supplied

ORDERING INFORMATION:

For an additional charge, all weight sets can be purchased with calibration certificate; to order, contact your Fisher Scientific Customer Service Representative.

WHICH CLASS IS RIGHT FOR MY APPLICATION?

As a general rule, a balance should be calibrated using a weight with a Class tolerance factor greater than the readability of the balance. Example: a toploading balance with a readability of 0.01g may be calibrated with a weight having a known tolerance of at least ±0.009g (see Metric Weight Tolerances chart on p. 98).

UltiMass* and UltraClass* Weights. Meet or exceed OIML Class E2 standards. See individual product pages for details.

ASTM Class 1. Provides the greatest precision. Can be used as a reference standard in calibrating other weights and is appropriate for calibrating high-precision analytical balances (from 0.01 to 0.1mg).

ASTM Class 2. Appropriate for calibrating high-precision toploading balances with readabilities ranging from 0.001 to 0.01g.

ASTM Class 3. Appropriate for calibrating balances with moderate precision, ranging from 0.01 to 0.1g.

ASTM Class 4. Appropriate for student use and semi-analytical weighing.

ACCESSORIES

*Fisherbrand** Polystyrene Antistatic Weighing Dishes

Disposable dishes are ideal for weighing, dispensing, or storing applications

- Contaminant-free, antistatic, biologically inert
- Resist dilute acids, aqueous solutions, alcohols, and bases
- Flat bottoms resist tipping
- Choose from standard style or pour boat weighing dishes
- Pour boats feature a molded spout for convenient pouring and dispensing and are made from 12mil thick polystyrene—20% thicker than most dishes on the market today—for better strength, stability, and handling ease
- Ideal for weighing static-affected materials

08-732-112 through -118

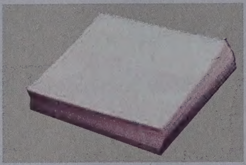
Fisherbrand* Low-Nitrogen Weighing Paper

For analytical balances

- Sufficient body to support sample
- Smooth textured to avoid trapping material
- Does not absorb moisture



09-898-12A

ORDERING INFORMATION:

500 sheets per pack

L × W	Cat. No.	Pack of 500	Case of 12 Pack

Fisherbrand* Hexagonal Polystyrene Weighing Dishes

Hexagonal polystyrene design provides greater balance, protection and safety

For handling solids or liquids during weighing.

- Bend easily into pouring spouts to enable nonspill transfer
- Flat bottoms and sloping sides with 3/16" (4.8mm) inside corner radius ensure complete transfer
- Won't react to most substances
- Disposable
- Stack compactly for convenient storage and accessibility

Fisherbrand* Disposable Aluminum Dishes with Fluted Sides

Useful as evaporating and general utility dishes

- Larger sizes are ideal for food processing applications
- Inexpensive enough for single use
- Made of lightweight aluminum
- Flat bottoms
- Fluted or slightly fluted sides
- Flanged rims

---

Fisherbrand* Aluminum Weighing Dishes

With fluted sides

- Inexpensive aluminum dishes, ideal for weighing and dispensing
- Can serve as evaporating dishes or dust covers
- Lightweight, yet sturdy
- Convenient finger-grip handle can be etched prior to weighing for identification

08-732-100 through -104

With smooth sides

- Lightweight dishes with flanged rims
- Slightly sloping sides facilitate stacking
- Especially useful for materials that cannot easily be cleaned from dish surface

Capacity	Bottom I.D. × Top I.D.	Depth	Cat. No.	Pack of	Case of

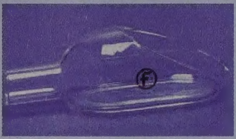
*Fisherbrand** Weighing Funnels

Weighing dish and sample transfer funnel in one

- Borosilicate glass funnels with tapered pouring necks aid micro-transfer of solids and liquids
- No rocking or moving while weighing—flat bottom keeps funnel steady while on balance
- Use in temperatures to 454°C (849°F)



14-353D

ORDERING INFORMATION:

Assortment pack of five includes one each of the following (Diameter × L): 10 × 35mm, 15 × 40mm, 20 × 45mm, 25 × 55mm and 32 × 68mm

Dia. × L	Cat. No.	Pack of 5
15 × 40mm	**14-353B**	60.33
25 × 55mm	**14-353D**	71.29
Assortment Pack	**14-353F**	79.04

*Fisherbrand** Weight Forceps

Plastic tips with small grooves near end for cradling knob of weight during transfer

- 33% glass-reinforced nylon
- Insoluble in ethanol
- Won't warp with use
- With removable locking device

114-742-09

Cat. No.	Pack of 12
11-474-209	37.80

Tradewinds Direct Weighing Funnels

Disposable polypropylene funnels in four different sizes

Serve as weighing dishes plus sample transfer funnels.

- Designed to lie flat on a weighing balance
- Place funnel directly on balance, weigh out needed solids or liquids, transfer sample into flask
- Pouring necks designed to easily fit in volumetric flasks and test tubes

ORDERING INFORMATION

Small funnels fit 5, 10, 25 and 50mL volumetric flasks. Medium funnels fit 100, 200 and 250mL flasks. Large funnels fit 500mL and 1L flasks. X-Large funnels fit 1 and 2L flasks.

Thermo Scientific* Hamilton* Epoxyn* Balance Table

Freestanding table diminishes effects of floor vibrations on sensitive balances

Does the job of conventional marble balance tables with the added advantages of high chemical resistance and easy cleanup. Made of 2½"-thick (6.4cm) cast slabs of white epoxy resin.

HM019945

ORDERING INFORMATION:

L × W × H (Overall): 24 × 35 × 31" (61 × 89 × 79cm). Net weight: 375 lb. (170kg). Delivery from stock.

NOTE:

Other colors available on special request. Contact your Fisher Scientific Customer Service Representative for details.

Description	Color	Cat. No.	Each
Full Table	White	**HM019945**	2360.73

Thermo Scientific* Hamilton* Epoxyn* Stabilizing Slab

Use where space limitations prevent use of balance table

For use on a benchtop. Just set slab on top of existing lab bench or desk. Substantially reduces vibrations that can affect performance of sensitive balances.

- White epoxy resin
- Chemical resistant
- Easy to clean

HM0199410 (balance not included)

ORDERING INFORMATION:

L × W × H (Overall): 20 × 13 × 2½" (51 × 33 × 6.4cm). Net weight: 46 lb. (21kg). Delivery from stock.

Mettler Toledo* Balance Accessories

Antistatic Systems

U-shaped and Point Ionizer antistatic systems for discharging electrostatically charged samples prior to weighing

01-910-021

Use a high voltage to generate positively and negatively charged ions. Ions are attracted by the electrostatically charged object and neutralize the disruptive charge on the surface of the weighing sample. As a result, the forces that distort the weighing result also disappear.

U-shaped Ionizer

- Can be used with nearly all balances and weighing substances
- Weighing sample or container is discharged by being passed through the U-shaped ionizer when the balance is loaded; sample is neutralized in seconds
- Weighing pan remains accessible
- No drafts in weighing chamber

Point Ionizer

- Ideal for use with powdery, toxic samples
- Discharges even the smallest objects
- Probe easily inserted into containers—flexible cable enables fastening in any position simply and easily

INCLUDES:

High-voltage power pack with both models.

LOOKING FOR METTLER TOLEDO* MOISTURE ANALYZERS?

Mettler Toledo* HR 83, HG 63, and HB 43-S Halogen Moisture Analyzers can be found on pp. 82-83.

LocalCAN Cables

Interface, extension, and junction cables

Use to connect balance to peripherals.

01-911-153C

Interface Cables†

- One end has 4-pin connector that connects to LocalCAN universal interface on balance
- Other end has connector shown in chart

Extension Cables

- Both ends have 4-pin LocalCAN connectors
- Connect one end to AG, PR, or SR series balance; connect other end to interface cable

T-Junction Cable

- Links peripherals in multi-peripheral LocalCAN network
- All three ends have 4-pin LocalCan connections

NOTE:

AB, AG, PR, and SR series balances and HR83P Moisture Analyzer must be equipped with accessory LC-B LocalCAN universal interface (01-911-153B, available online) to use the interface cables. PG-S, XS, XP, and AX series balances must be equipped with optional LocalCan interface. (PG-S requires LC-G interface 01-918-91; XS/XP requires 09-320-113; AX requires 09-320-114.)

Mettler Toledo* Balance Accessories, Contd.

Printers

01-911-152A

Avoid transcription errors and ensure complete data records with these dot-matrix printers

GLP/GMP Application Printer (LC-P45)

- Connects to all Mettler Toledo* balances
- Dot-matrix, uses plain paper
- Prints and records data on calibration, sample identification, date, time, balance settings, and measurement results
- Prints results in selected unit of measure with correct sign in front
- Permits printing by identification number
- Can perform totaling, multiplication, and statistical evaluation, including number of weighings, average, standard deviation, minimum and maximum values, and difference—extremely useful in production applications
- Built-in clock with battery backup provides date and time even during power outages
- Prints 24 characters per line, 1 line per second
- LocalCAN and RS-232-C interface
- Dimensions (L × W × H): 7½ × 5⅞ × 3⅛" (19 × 15 × 8cm)
- Net weight: 4 7/16 lb. (2kg)
- Comes with connection cables, two "AA" batteries, two rolls of paper, operating instructions

Bluetooth* Interface Printer

- For Excellence* XS and Excellence Plus XP balances
- Dot-matrix, uses normal and adhesive paper
- Prints weighing results, regular adjustments and—depending on the balance—individual configuration application results
- Wireless Bluetooth technology (maximum range 10m)
- Speed: 24 characters per line, 1 line per second
- Dimensions (L × W × H): 8¼ × 6⅛ × 3⅜" (21 × 15.7 × 8.5cm)
- Net weight: 3 3/16 lb. (1.5kg)
- For 115-230V 50/60Hz (switch-selectable on 01-911-152A)

LocalCAN Interface Printer (LC-P43)

- Records calibration data and prints weight values for AG, PG, HG, HR, PR, SG and SR Series balances
- Also prints out all available information from AX, XP or XS Series balances, including data on sample identification, balance identification number, date, time, balance settings, and statistical evaluations
- Dot-matrix, plain paper
- Speed: 24 characters per line, 1 line per second
- LocalCAN universal interface cable
- Comes with two rolls of paper
- Dimensions (L × W × H): 7½ × 5⅞ × 3⅛" (19 × 15 × 8cm)
- Net weight: 4 7/16 lb. (2kg)

Compact Printer (RS-P26)

- For Classic Plus and Classic Lite balances
- Dot matrix printer
- GMP compliant
- Speed: 2.3 lines per second
- RS-232-C interface, 9-pin male connector
- Net weight: 2 lb. (0.9kg)
- Dimensions (L × W × H): 8¼ × 5 × 3" (21 × 12 × 7.3cm)

COMPLIANCE:
Meet GLP/GMP/ISO requirements

Printer Interface	Mfr. No.	Cat. No.	Price
GLP/GMP Application Printer	LC-P45	**01-911-152A**	Ea./1029.00
Bluetooth* Interface Printer	BT-P42	**01-991-410**	Ea./770.00
LocalCAN Interface Printer	LC-P43	**01-911-152B**	Ea./706.00
Compact Printer	RS-P26	**01-913-515**	Ea./580.00
Supplies			
Paper	72456	**01-910-78**	5/28.00
Ribbon	21615	**09-317-5**	5/55.20

Note: PR and SR balances have most LC-P45 printer functions already built into them. A better printer choice for these models is the LC-P43 (01-911-152B), which prints all of the specifications available from the balances. Calibration documentation and printing of balance number not available for BD and LJ16 Series balances. Interface is standard with Series AG, PR, and SR; optional accessory 01-911-153B is required for Series AB (discontinued), PB (discontinued), SB, and College B (discontinued); 01-918-91 is needed for PG-S Series.

LabX* Light Balance Software

For AG, AT, AX, MT, MX, PG-S, PR, SG, SR, UMT, UMX, XP, and XS Series microbalances and analytical balances

Easy data collection, full user guidance, export to Microsoft* Excel*, calibration management.

Balances Supported

XP, XS, AX, MX, UMX, AG, PR, SR, PG-S, SG, AT, MT, UMT, AB-S, PB-S, PB-L

Job Management

- Collect data without touching the computer (RapidAccess: XP, AX only)
- User guidance on the balance display
- Online view
- Support of weighing, differential weighing, dynamic weighing, interval weighing, totalization applications
- Balance settings management

Instrument Management

- Test and adjustment scheduler
- Instrument release control
- Calibration history
- Weights library

Data Management

- Data stored in SQL database
- Search/filter function
- Statistical evaluation
- Calculations
- Report generator
- Manual or automatic export to Microsoft Excel, Word* or other software packages

System

- One balance supported, connected via Ethernet or RS-232 interface
- Integrated help system
- Database back-up tool
- Software and documentation available in English, German and French

RECOMMENDED SYSTEM

Industry standard PC, Pentium* III 400 MHz, 256 MB RAM, 4 GB free hard disk space, 1024 x 768 screen resolution, Windows* 2000 (SP1) or Windows X.

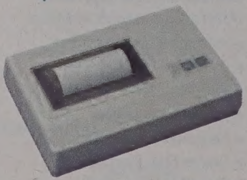
Denver Instrument* Balance Accessories

Dot-Matrix Printer

- Records on $2\frac{5}{16}$" (5.9cm) wide plain paper using an ink ribbon
- Prints up to 1.75 lines per second, 24 characters per line
- Adjustable serial settings, e.g. baud rate (from 150 to 19,200), parity and handshaking; standard 8 data bits and 1 stop bit
- Self-test makes printer easy to use



02-225-133

ORDERING INFORMATION:

Measures 4.2L × 6.3W × 1.6"H (10.6 × 16.0 × 4.0 cm). Net weight: 0.8 lb. (0.3kg).

INCLUDES:

AC Adapter (115V 50/60Hz), cable for connection with balance, one roll of paper, one ink cartridge, operations manual.

Description	Cat. No.	Each
Printer	**02-225-133**	342.60
Printer Paper	**01-913-52**	3.85
Printer Ribbon	**01-913-53**	13.15

BalanceTalk* XL Interface Software

Provides integration between balance and Microsoft* Excel*

Export data from the RS-232-C directly to an Excel* spreadsheet, saving data entry time and eliminating manual transcription errors.

- Preconfigured to interface with any Denver Instrument* balance (including moisture balances)
- Automatically interfaces with selected balance using factory defaults
- Allows addition of time and date to results to meet ISO/GLP requirements
- Prompts for name, product description or batch number for inclusion in spreadsheet
- Preconfigured for moisture analysis, density measurement and content uniformity applications

INCLUDES:

CD-ROM and operating instructions

Mfr. No.	Cat. No.	Each
902227.1	**02-225-136**	416.60

METTLER TOLEDO* ANTITHEFT DEVICE

For AB, PR, PB, SR, PG-S, SB, College B and BD Series Balances

Visit www.fishersci.com and search for 01-910-52 or 01-911-153L

Labconco* XPert* Easy-Order Balance Enclosure Systems

Low-profile enclosure systems provide user protection by containing powders, particulates, and fumes during weighing procedures

Containment Features

- Clean-Sweep* airfoil and upper containment sash keep contaminants from user
- Upper sash, upper dilution supply and side-entry airfoils dilute contaminant and enhance containment
- Perforated rear baffle promotes horizontal laminar flow

Operating Features

- 23D × 22¼"H (58 × 56.5cm) interior easily accommodates large toploading and analytical balances
- Made of static-dissipative tempered safety glass, steel, and aluminum
- Ergonomic 20° angled sash opens 8" (20.3cm)
- Hinged sash pivots up and locks at 20" (50.8cm) loading height

ORDERING INFORMATION:

Shipping weight: 2' models, 138 lb. (63kg); 3' models, 182 lb. (83kg); 4' models, 226 lb. (102.5kg). For 115V 60Hz.

INCLUDES:

XPert Balance Enclosure, FilterMate* Portable Exhauster with HEPA filter, black solid epoxy work surface, and either the Guardian* 1000 Digital or Guardian Jr. Airflow Monitor

REQUIRED ACCESSORIES:

Support base

COMPLIANCE:

ASHRAE* 110-1995

BAROMETERS

Fisher Scientific* Traceable* Precision Dial Barometer

Ideal for monitoring weather changes or environmental conditions in labs or plants

- Easy-to-read dial face is 4⅛" dia. (10.8cm) and is encased in a rugged, corrosion-proof nickel-chrome housing
- Manual pointer shows barometric change since last viewing
- Screw adjustment compensates for altitude

ORDERING INFORMATION:

Net weight: 1 lb. (0.45kg).

INCLUDES:

Notched desk stand and wall mount.

Fisher Scientific

14-648-51

CERTIFICATIONS:

Individually serial-numbered certificate from an ISO 17025 calibration lab to indicate instrument traceability to standards provided by NIST*.

Cat. No.	Each
14-648-51	89.13

Atmospheric Pressure	
Range	954 to 1073mbar, 715 to 805mmHg and 28.1 to 31.7"Hg
Resolution	0.5mbar, 0.05"Hg, and 0.5mmHg
Accuracy	±0.5% of the reading

Fisher Scientific* Traceable* Digital Barometer

Ideal for recording ambient conditions in the lab, monitoring differences that could affect sample analysis, and predicting weather changes

Combination unit simultaneously displays current barometric pressure, bar graph of barometric trends, humidity, temperature, and date or time. Switches permit setting in °F or °C, and "Hg or mbar. Use toggle switch to display the month and date.

- Electronic digital barometer has memory feature that automatically captures reading every hour—press HISTORY button to display the last 24 readings
- Bar graph shows current reading and the trend for the previous 1, 3, 6, 12, and 24 hours
- Visual indicator displays weather forecast of sunny, cloudy, or rainy

02-400

ORDERING INFORMATION:
Measures 1L × 5¼W × 7¼"H (2.5 × 13 × 18cm).
Net weight: 10 oz. (283.5g).

INCLUDES:
Lab-bench stand, wall mount, and four "AAA" batteries.

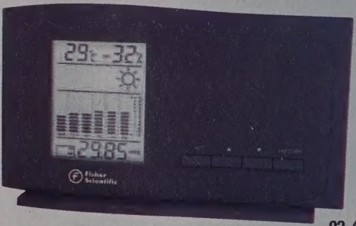
CERTIFICATIONS:
Traceable to standards provided by NIST*. Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
02-400	181.21

Atmospheric Pressure	
Range	23.45 to 31.01"Hg/794 to 1050mbar
Resolution	0.03"Hg (1mbar)
Accuracy	±0.1477"Hg/±5mbar
Altitude Compensation	0 to 2500m
Temperature	
Range	32° to 131°F/0° to +55°C
Resolution	0.90°F/0.50°C
Accuracy	±1°C/±1.8°F
Response	Updates every 9 seconds
Relative Humidity	
Range	10 to 98% RH
Resolution	1%
Accuracy	±5 RH
Response	Updates every 9 seconds
Time	A clock displays time to the minute in either AM/PM or military time

Fisher Scientific* Traceable* Compact Digital Barometer

Full-featured 4" high (10.2cm) barometer can sit on a counter or mount on wall—anywhere that's convenient and out of the way



02-401

- Measures atmospheric pressure every 15 minutes, temperature every 9 seconds and relative humidity every 9 seconds
- Stores hourly barometric readings and displays trends for previous 1, 3, 6, 12, and 24 hours in bar-chart format

ORDERING INFORMATION:
Measures 1L × 3¾W × 7"H (2.5 × 9.5 × 17.8cm).
Net weight: 7 oz. (198.4g).

INCLUDES:
Detachable base, wall-mounting bracket, and four "AAA" batteries.

CERTIFICATIONS:
Traceable to standards provided by NIST*. Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
02-401	142.24

Atmospheric Pressure	
Range	23.45 to 31.01"Hg/794 to 1050mbar
Resolution	0.03"Hg/1mbar
Accuracy	±0.1477"Hg/±5mbar
Adjustable Altitude Compensation	0 to 2500m
Temperature	
Range	23° to 131°F/-5° to +55°C
Resolution	1°
Accuracy	±2°F/±1°C
Response	Updates every 9 seconds
Relative Humidity	
Range	25 to 98% RH
Resolution	1%

Fisher Scientific* Traceable* Handheld Digital Barometer

Keep track of your environment and your time with this multifunctional handheld barometer

BARO
ALT.
TIME
Fisher Scientific

02-406

Measures and digitally displays atmospheric pressure, temperature, altitude, barometric pressure trends and the time of day—and it's a stopwatch, too. Clock displays time of day to the minute with date and month; also has 12/24-hour timing and alarm.

Barometer Features

- Barometric pressure readings are updated and displayed in either "Hg or mbar every 15 minutes
- Bar chart displays current reading and trend for 2, 4, 6, 8, 10 and 12 hours

Altimeter Features

- Minimum/maximum memory for altitudes reached during any time period
- Trends are presented and readings for previous 2, 4, 6, 8, 10 and 12 hours shown in bar-chart format

ORDERING INFORMATION:

Dimensions: ¾L × 2½W × 4"H (1.9 × 6.4 × 10.2cm)
Weight 3⅝ oz. (104g)

INCLUDES:

Supplied complete with lanyard and two button-cell batteries. Comes in rugged shock-resistant case.

CERTIFICATIONS:

Traceable to standards provided by NIST*. Individually serial-numbered Traceable Certificate is provided from an ISO 17025 calibration laboratory accredited by A2LA.

Cat. No.	Each
02-406	198.50

Atmospheric Pressure	
Range	15.90 to 31.01"Hg/400 to 1070mbar

Resolution	1 second
Accuracy	0.01%

Fisher Scientific* Wireless Weather System

Complete professional weather station is perfect for industrial plants, labs, and schools

NW
Fisher Scientific

02-402

Allows user to monitor conditions, forecast weather, and check environmental air parameters. Main unit receives radio signal from remote wireless sensors, eliminating need for cables. Place main unit anywhere.

- Displays temperature, humidity, dew point, barometric pressure/pressure trend, weather forecast, wind direction/speed, wind chill, rainfall amount, and clock/calendar
- Programmable alarms for all measurements signal out-of-range conditions
- Serial data output permits linking to a computer for storing all information, making a permanent weather database, generating analysis, and studying trends
- 12/24-hour clock, time-of-day alarm, and month/date calendar

ORDERING INFORMATION:

Unit dimensions: 8 × 7 × 5½ × 1" (20 × 17.8 × 14 × 2.5cm)
Display dimensions: 6¾ × 3¼" (17.1 × 8.3cm)

INCLUDES:

Instructions, all equipment, all sensors (additional external sensors area available), AC adapter, and four "AA" backup batteries (eliminating concerns about power outages).

CHOOSING A SYSTEM

Sample preparation (including thawing and viscosity studies)—Typically requires refrigerated/heated open baths with temperature ranges from -10 to +100°C and bath volumes up to 26L.

Immersion/submersion cooling/heating—Includes applications that require immersing or submersing beakers, test tubes, flasks or other glassware; enzyme assays; spectrophotometer cells; DNA curves; calibration; tissue baths; specific gravity testing and applications that require portable immersio heaters. Typically requires heated open baths with temperature ranges anywhere from ambient +5 to +200°C and bath volumes up to 46L.

Equipment cooling/heating—Required for refractometers, spectrophotometers, condensers, electrophoresis equipment, densitometers, and rotary evaporators. Depending on the application, can require refrigerated or heated bath circulators with temperature ranges anywhere from -50 to +280°C and up to 3kw cooling/2kw heating capacities.

External apparatus cooling/heating—Required for calibration, cloud point/pour point testing, and kinetics research: typically requires ultralow refrigerated o heated bath circulators with temperature ranges anywhere from -90 to +100°C and up to 3kw cooling/3kw heating capacities.

Highly demanding applications—Include jacketed reactors, large-scale evaporators, reaction calorimeters, and viscosity studies. Typically require precision temperature control with temperature ranges from ambient -80° to +200°C and up to 3kw cooling/2kw heating capacities.

DynaMax

Temperature control products— including baths, circulators, chillers, and cryostats— are used by thousan of chemists, researchers and technicians in labs worldwide.

There are several key technical considerations for specifying temperature control equipment for applications found in the

- The required temperature ranges must always be considered.
- When samples need to be immersed in a bath, the dimensions of the water bath must also be taken into account.
- Conversely, when equipment is required to cool external applications, it is important to be sure that the circulator has sufficient cooling capacity.

In addition to technical specifications, we understand how important such factors as flexibility, precision, ease of use, and budget are when making a purchase decision. Whether you need a simple, cost-effective unit for a single application or a more sophisticated system for flexible, robust applications, we offer you a choice to select the best combination for your needs.

BATHS

CIRCULATORS—SEALED SYSTEMS

Thermo Scientific* Haake* DynaMax* Refrigerating-Heating Circulators

Precision temperature control of high-end laboratory and pilot applications; combine rapid temperature changes with incredible stability

- Dissipate heat from exothermic chemical reactions faster than other products in their class
- Dynamic Heat Load Suppression (DHLS) technology offers faster reactions to temperature changes, maintains precise temperature stability
- Adapt precisely to your application needs, allowing you to perform more experiments in less time

Easy to Operate

- Easy to use, with intuitive menu programming
- Controller is programmable in seven languages, stores 10 ramping programs with 30 segments, saving you valuable programming time
- Systems are self-degassing and completely self-draining for greater ease of operation

Adaptable to Meet Application Needs

- Cover a wide temperature range, suitable for a variety of applications
- Modular design lets you configure system for a specific application and purchase only the options that you need

Enhanced Safety Features

- Closed-system architecture prevents hot fluids from contacting the atmosphere, eliminating fumes and icing at low temperatures
- DHLS technology protects system and application from potential damage
- If set limits are exceeded, system rapidly injects fluids from cold storage tank to bring system back within safety limits
- User can define upper and lower system temperature and pressure limits for improved application control and greater safety

Easy to Service

- Modular design promotes ease of service, lets you change out primary components quickly
- Self-test feature automatically runs through system parameters to ensure that the application performs as you expected, helps in diagnosis of system or application issues to keep you up and running

Model Selection

- DynaMax 1200 models have cooling capacity to 1200w; DynaMax 1700 models to 1700w
- 230V models have 2000w heating capacity; 208V models, 1600w capacity
- Temperature stability, ±0.01°K for all models
- Pump capacity of 20L/min. with oil, at 1.2 bar pressure; 25L/min. water, at 1.5 bar pressure
- Communicate via RS-232 or optional RS-485 connection
- 128 × 64 pixel LCD

Thermo
DynaMax

13-875-500

APPLICATIONS:

For use with, jacketed reactor vessels, large rotary evaporators, reaction calorimetry, fermentation, and analytical instrumentation cooling.

ORDERING INFORMATION:

Operating Temperature Range, 5° to 40°C/41° to 104°F. Fluid Connections, M30x1.5. Refrigerant, R404A. RS-232 port standard; optional RS-485 connection.

Models listed have air-cooled condenser. Additional models are available with air- or water-cooled condensers, standard or high-flowrate pumps, and capacities of 1200w, 1700w or 3000w. Consult your Fisher Scientific Customer Service Representative for details or visit our Web site.

CIRCULATORS—REFRIGERATING

Thermo Scientific* Haake* Phoenix II Refrigerating Circulators

Large digital display; efficient heat removal at high temperatures

Microprocessor-controlled circulators for wide application range. User-friendly, programmable within minutes in six languages. Feature wide temperature range, high cooling capacity, powerful pressure/suction pump and choice of bath capacities.

Large displays with flexible interface

- Big LCD monitors with easily visible plain text display; resolution of 0.01°C, direct value setting at the display via numeric input
- 10 control keys for function and menu selection
- Informative icons let you know when cooling and/or heating are active, ramp function is operative, and if timer is activated on P2 models
- Visual alarms notify of shutdown at the first sign of excessively high temperature, motor overload, low liquid level
- Fault Identification System (FIS) clearly shows reason for any alarm, shuts off all safety-related parts

Choice of temperature ranges and capacities

- Lows of -28°, -30°, -35°, -40° or -50°C; highs of 150° or 200°C
- Capacities from 4.5 to 15L (1¼ to $3\frac{15}{16}$ gal.)
- CFC-free refrigerant
- Efficient heat removal and control of external closed liquid circuits at temperatures well below 0°C

Temperature control options

- Fuzzy Logic control with neural adaptation adjusts to varying thermal load, for the most demanding temperature control requirements
- Real Temperature Adjustment (RTA) corrects displayed temperature against measured value, ensuring compliance with ISO 9000 standards
- External Temperature Control (ETC) with connection for an external Pt100 sensor (sold separately) to regulate temperature
- Manufactured with ISO 9001: 2000-certified processes

Powerful pumps with flexible control

- Pressure and suction pumps with automatic speed recognition
- Turbulence Reduction System (TRS) automatically adjusts pump performance to viscosity of bath fluid

P1 Controller features:

- 16-bit processor technology
- Full programmability with ramping capabilities
- Temperature selection in Celsius, Fahrenheit, or Kelvin
- Simultaneous SET/ACTUAL display
- RS-232-C interface for connection to computer

P2 Controller adds:

- Three-point calibration
- Storage of up to 10 ramp programs, maximum of 30 segments
- Timer control to start and/or stop application
- RS-485 and RS-232-C interfaces

13-874-495

ORDERING INFORMATION:

Suitable for water, oil, alcohol or other standard bath media. P2 models accept optional Profibus interface for networked process control. Also available: Phoenix II Cryostats, with cooling to -90°C; see p.114

INCLUDES:

All come with two fittings (for 8 and 12mm tubing), bath cover, and extensive operations manual.

COMPLIANCE:

CE mark

[1] *Also available as programmable model with supplied time-linear temperature programs—four temperature ramps with up to six segments each permanently stored in memory. Contact your Fisher Scientific Customer Service Representative for details.*

LOOKING FOR BATH ACCESSORIES?

General bath accessories, as well as accessories for the products shown in this section, can be found online.

Visit www.fishersci.com and search for Bath Accessories

Thermo Scientific* Haake* Phoenix II Cryostat Baths

Achieve temperatures as low as -90°C

Microprocessor-controlled circulators for low-temperature applications. User-friendly, programmable within minutes in six languages. Feature wide temperature range, high cooling capacity, powerful pressure/suction pump and choice of bath capacities.

13-874-568

Large displays with flexible interface

- Big LCD monitors with easily visible plain text display, resolution of 0.1 or 0.01°C, direct value setting at the display via numeric input
- 10 control keys for function and menu selection
- Informative icons let you know when cooling and/or heating are active, ramp function is operative; and if timer is activated on P2 models
- Visual alarms notify of shutdown at the first sign of excessively high temperature, motor overload, low liquid level
- Fault Identification System (FIS) clearly shows reason for any alarm, shuts off all safety-related parts

Choice of temperature ranges and capacities

- Lows of -50°, -80°, or -90° C; highs of 100°C
- Capacities from 12 to 24L (3 3/16 to 6⅜ gal.)
- CFC-free refrigerant
- Efficient heat removal and control of external closed liquid circuits at temperatures well below 0°C

Temperature control options

- Fuzzy Logic control with neural adaptation adjusts to varying thermal load, for the most demanding temperature control requirements
- Real Temperature Adjustment (RTA) corrects displayed temperature against measured value
- Manufactured with ISO 9001: 2000-certified processes
- External Temperature Control (ETC) with connection for an external Pt100 sensor (sold separately) to regulate temperature

Powerful pumps with flexible control

- Pressure and suction pumps with automatic speed recognition
- Turbulence Reduction System (TRS) automatically adjusts pump performance to viscosity of bath fluid

P2 Controller features:

- 16-bit processor technology
- Full programmability with ramping capabilities
- Temperature selection in Celsius, Fahrenheit, or Kelvin
- Simultaneous SET/ACTUAL display
- 3-point calibration
- Storage of up to 10 ramp programs, maximum of 30 segments
- Timer control to start and/or stop application
- 1 to 2kw heating capacity
- RS-485 and RS-232-C interfaces

ORDERING INFORMATION:

Suitable for water, oil, alcohol or other standard bath media. P2 models accept optional Profibus interface for networked process control.

INCLUDES:

All come with two fittings (for 8 and 12mm tubing), bath cover, reservoir drain and extensive operations manual.

COMPLIANCE:

Thermo Scientific* Haake* C and DC Refrigerating Circulators

Efficient heat removal at high temperatures—choice of water, oil, alcohol bath media

Easy-to-use controllers feature wide temperature range, high cooling capacity, powerful pressure/suction pump and choice of bath capacities.

13-874-372

Choice of temperature ranges and capacities

- Lows of -10°, -28° or -35°C; highs of 100°, 150° or 200°C
- Capacities from 3 to 8L (¾ to 2⅛ gal.)
- Come in space-saving vertical configuration or ergonomic flat version
- CFC-free refrigerant
- Efficient heat removal and control of external closed liquid circuits at temperatures well below 0°C

Temperature control options

- Analog or PID control
- Real Temperature Adjustment (RTA) corrects displayed temperature against measured value
- Manufactured with ISO 9001: 2000-certified processes
- DC50 models have External Temperature Control (ETC) with connection for an external Pt100 sensor (sold separately) to regulate temperature
- Visual alarms that notify of shutdown at the first sign of excessively high temperature, motor overload, low liquid level
- Fault Identification System (FIS) clearly shows reason for any alarm, shuts off all safety-related parts

Powerful pumps with flexible control

- Pressure pumps with 300mbar pressure, 12.5L/min. maximum flowrate
- Turbulence Reduction System (TRS); automatically adjusts pump performance to viscosity of bath fluid

C10 Controller features:

- Analog control via rotary knob and fine adjustment control
- LED indicators for POWER ON, HEAT/CONTROL ON, FAULT
- Real Temperature Adjustment (RTA): corrects displayed temperature against any measured value
- Manufactured with ISO 9001: 2000-certified processes
- Fault Identification System

DC Controllers add:

- Microprocessor with PID control
- Touchpad and dual LED displays; show menu options and actual or set temperature selections separately, HEAT/CONTROL ON
- Separate LED and switch select from three stored fixed temperatures
- Resolution to 0.1 or 0.01°C
- DC30 and DC50 models have RS-232 interface (optional software available)
- DC50 models offer External Temperature Control (ETC) with connection for an external Pt100 sensor (sold separately) to regulate temperature

ORDERING INFORMATION:

Suitable for water, oil, alcohol or other standard bath media as recommended by the manufacturer. DC50 models accept optional RS-485 interface.

INCLUDES:

All circulators come with two fittings (for 8 and 12mm tubing), bath cover and operations manual. C10 models come with 0° to 100°C checking thermometer with 0.5°C divisions.

COMPLIANCE:

[1] *Has built-in External Temperature Control with connection for external Pt100 sensor.*

Thermo Scientific* Haake* Open Circulating Baths

Stainless steel, 15 or 26L (4 or 6¾ gal.) capacities

Bath depth of 20cm (7⅞") accommodates large or long objects. Two-speed pump reduces turbulence. Compressor cooling unit eliminates need for tap-water source.

Model C10-V15/B features:

- Includes analog control
- Power ON/OFF switch

Models DC10-V15/B and DC-V26/B features:

- Digital PID control
- Three user-defined preset temperature settings
- RTA (Real Temperature Adjustment)
- FIS (Fault Identification System)

ORDERING INFORMATION:
All baths feature handles and built-in drain reservoir for easy handling and cleaning.

INCLUDES:
A bath bridge to fix the circulator onto the bath and a directable nozzle. C10-V15B has 0° to 100°C checking thermometer, with 0.5°C divisions.

Thermo Scientific* Neslab* Ultralow-Temperature Circulators

Circulating temperatures down to -80° or -90°C

Powerful cascaded refrigeration system achieves temperatures down to -80° or -90°C, maintains excellent temperature stability (±0.03° or ±0.2°C), and provides faster cooling rates and higher heat removal capacities at low temperatures. The ULT-95 model features a unique sealed reservoir that includes a dry nitrogen bleed port to prevent moisture buildup and keep bath fluid dry.

Thermo SCIENTIFIC
ULT-80

13-265-171

- Digital temperature controller with RS-232 and analog interface ports
- Remote sensory capability
- User-adjustable high/low-temperature safety

Thermo Scientific* Neslab* Refrigerated Circulators

13-873-302, -305, -310

- High cooling capacities (-25°/-40° to +150°/+200°C) make ultra-quick temperature changes possible
- Precise temperature stability (±0.01°C) provides repeatable results
- Compressor can operate over entire temperature range
- Lid design and nitrogen purge port minimize moisture buildup during low-temperature operation
- Units use CFC-free R-134A refrigerant
- State-of-the-art controller technology automatically ensures units perform at peak when necessary and save energy during lower demand
- Manufactured with ISO 9001: 2000-certified processes

Digital One Controller

- User-selectable resolution at 0.1° or 0.01°C
- User-adjustable low- and high-temperature alarm limits
- User-selectable fault conditions
- Automatic reservoir refill port
- Low reservoir fluid level shutoff

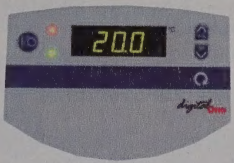
Digital Plus Controller

Same features as Digital One, plus:

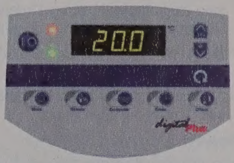
- Remote sensor port, RS-232 and RS-485 communication ports
- ON/OFF timer with clock
- Audible safety alarm with mute
- Temperature offset display

Pumps available in four capacities, all with small footprints to optimize bench space

- Strong pump circulates long distances or to open or closed containers
- Seamless stainless-steel tank resists corrosion and is easy to clean
- Reservoir drain permits quick and tidy fluid changes
- Drain allows tubing to be added after bath is filled
- Quick-release front grille makes condenser cleaning easy



Digital One Controller for 13-873-301, -305, -308, -312



Digital Plus Controller for 13-873-302, -306, -310, -315

ORDERING INFORMATION:

For 115V 50/60Hz. (Other voltages are available; contact your Fisher Scientific Customer Service Representative.)

Fisher Scientific* Isotemp* Refrigerating Circulators

Excellent temperature control; choice of programmable, digital or standard controllers

High quality and value

- Answer demanding temperature control requirements in a wide variety of applications
- Built with strong pumps, robust cooling, powerful heaters and a small footprint to maximize benchspace
- Excellent choice as open bath to immerse samples or to pump to an external application

Multiple sizes, three controllers, twelve models

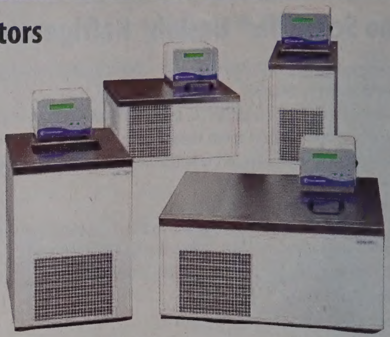
- Choose from 6L low profile, 6L upright, 13 and 28L baths, each available with one of three controllers
- Stainless-steel seamless deep-drawn reservoirs resist staining, are easy to clean; 13 and 28L reservoirs have built-in drain for easier cleaning

Choice of three easy-to-use controllers

- Programmable controller offers multistep programming: stores two 10-step programs with setpoint intervals from 0 to 999 hr., with stability and resolution of ±0.01° and wide temperature range
- Digital controller offers same precision, accuracy, and features without multistep ramping
- Standard controller offers temperature range, stability and resolution for less demanding applications

Powerful pump

- Industrial-grade pump delivers 10' (3m) of vertical pumphead for more efficient heat exchange; lets you locate circulator at a distance from application, or under lab bench
- Efficient reservoir agitation, better fluid uniformity even for heavy immersion loads
- For use with bath fluid that has viscosity of 50cS or less



From left to right: front, 13-874-11, 13-874-13, 13-874-7, 13-874-9, (see next page)

Built-in safety features

- Redundant user-adjustable thermostats plus overtemperature and low-liquid-level cutouts prevent temperature drift and thermal runaway
- Standard controller has visual alarm; digital and programmable controllers have audible/visual alarms
- Thermally protected pump: no burnout even if jammed

More cooling, faster heatup

- Oversized refrigeration system: excellent heat load removal
- Fine-tuned refrigeration metering for excellent stability under shifting heat loads
- Long-life high-wattage heaters for rapid fluid heatup; assure fluid compatibility, even when applications produce fluctuating temperatures
- Excellent temperature control for applications requiring refrigerated fluid work areas or pumping to an external application

---

[1] Low-profile model.

[2] Low-end temperatures and cooling capacities achieved using a fluid with a specific gravity of 0.5.

[3] Stability measured at fluid temperature of 20°C, ambient 20°C, with tap water as the fluid and not in maximum cooling mode.

Programmable Controller

- Multistep programming
- RS-232-C interface
- Remote temperature control of external systems (with optional probe)
- Adjustable PID control
- Two-line LCD
- Overtemperature/low-level cutouts with-audible/visual alarms
- Moisture-tight seamless keypad
- Temperature display in °C, °F, or °U (user defined); 0.1° or 0.01° resolution

Digital Controller

- Adjustable PID control
- Two-line LCD
- RS-232-C interface
- Overtemperature/low-level cutouts with audible/visual alarms
- Moisture-tight seamless keypad
- Temperature display in °C, °F, or °U (user defined); 0.1° or 0.01° resolution

Standard Controller

- Adjustable PID control
- Low-cost alternative for routine temperature control
- Single-line easy-read LED display
- Overtemperature/low level cutouts with visual alarms
- Temperature display in °C or °F; 0.1° resolution

ORDERING INFORMATION:

Stainless-steel reservoir; other wetted parts are corrosion-resistant 300 Series stainless steel or Ryton* polymer. Circulators include stainless-steel ¼ NPT inlet and outlet fittings, serrated adapter for ⅜" I.D. tubing.

NOTE:

Other voltages are available. Contact your Fisher Scientific Customer Service Representative for information.

WARRANTY:

Two-year warranty on parts and labor

CERTIFICATIONS:

CSA, CE marked

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

[4] *20°C heat load data taken in maximum cooling mode.*

[5] *Operating at fluid temperature of 20°C, ambient 21°C, with tap water as the fluid.*

Fisher Scientific* Isotemp* 2150 Nano Refrigerated Circulator

Compact circulator uses laboratory tap water; perfect for cooling lab glassware

Small but capable

- Wide temperature range of -10° to +80°C
- 3L (0.8 gal.) bath capacity
- Cooling capacity of 220w at 20°C
- Maximum pump pressure of 4.6psi, flowrate of 12L/min.
- Compact footprint allows installation in most any location
- Economical and environmental solution to using laboratory tap water
- Resolves seasonal temperature instabilities in your process water

Easy operation, essential data at a glance

- Dual LED displays
- Primary display at top shows actual temperature, setpoint, visible alarms for low liquid level, high or low fluid temperature
- Secondary display indicates mode in use: S for setpoint, F1 to F4 to select stored preset temperature, H or L to indicate high or low temperature setpoint
- Controls include arrow keys for setpoints, scroll button for menu options, power switch, overtemperature cutoff selector, RESET and ENTER buttons

Safe and thorough temperature control

- Real Temperature Adjustment (RTA) for integration in QS systems
- Stores up to four preset temperatures
- High-limit and low-limit adjustable temperature alarms
- Variable overtemperature and pump overload protection
- Fault identification system distinguishes between high and low temperature alarms, low fluid level, and motor overload alarms
- Optical alarm flashes on upper LED display to alert you to problems
- Non Flammable Liquids (NFL) safety: safe to run with water and water-glycol mixtures

Cooling Applications

- Laboratory glassware
- Condensers
- Rotary evaporators
- Distillation apparatus
- Jacketed Beakers.

13-874-401

ORDERING INFORMATION:
Available for 115V or 230V operation.

INCLUDES:
Reservoir drain, hose barb for ½" tubing, operation manual.

COMPLIANCE:
CE compliant

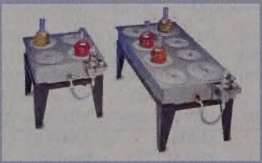
LOOKING FOR MORE BATHS?

Fisher Scientific offers a wide variety of baths for many applications. For general purpose baths, see p. 135. If you need water bath shakers, turn to p. 139. Specialty baths, including steaming baths, can be found on pp. 143-145.



Visit www.fishersci.com and search for Baths

CIRCULATORS-HEATING

Thermo Scientific* Haake* Phoenix II Heating Circulators

Efficient heating for open and closed systems

Microprocessor-controlled heating circulators for wide application range. User-friendly, programmable within minutes in six languages. Feature wide temperature range, powerful pressure/suction pump and choice of bath capacities.

HAAKE Phoenix
Thermo
HAAKE B7

13-874-485

Large digital display with flexible interface

- Big LCD monitors with easily visible plain text display, resolution of 0.01°C, direct value setting at the display via numeric input
- 10 control keys for function and menu selection
- Informative icons let you know when heating is active, ramp function is operative; and if timer is activated on P2 models
- Visual alarms notify of shutdown at the first sign of excessively high temperature, motor overload, low liquid level
- Fault Identification System (FIS) clearly shows reason for any alarm, shuts off all safety-related parts

Choice of temperature ranges and capacities

- Lows of 28°, 30°, or 32°C; highs of 250° or 280°C
- Lows can be extended to 20°C with tap water cooling
- Capacities from 4.5 to 12L (1¼ to 3⅛ gal.)
- Efficient control of external closed liquid circuits
- Manufactured with ISO 9001:2000-certified processes

Temperature Control Options

- Fuzzy Logic control with neural adaptation adjusts to varying thermal load, for the most demanding temperature control requirements
- Real Temperature Adjustment (RTA) corrects displayed temperature against measured value, ensuring compliance with ISO 9000 standards
- External Temperature Control (ETC) with connection for external Pt100 sensor (sold separately) to regulate temperature

Powerful pumps with flexible control

- Pressure and suction pumps with automatic speed recognition
- Turbulence reduction system (TRS) automatically adjusts pump performance to viscosity of bath fluid

P1 Controller features:

- 16-bit processor technology
- Full programmability with ramping capabilities
- Temperature selection in Celsius, Fahrenheit, or Kelvin
- Simultaneous SET/ACTUAL display
- RS-232-C interface for connection to computer

P2 controller adds:

- Three-point calibration
- Storage of up to 10 ramp programs, maximum of 30 segments
- Timer control to start and/or stop application
- RS-485 and RS-232-C interfaces

ORDERING INFORMATION:

Suitable for water, oil, alcohol or other standard bath media. P2 models accept optional Profibus interface for networked process control.

INCLUDES:

All come with two fittings for 8 and 12mm tubing, bath cover, tap-water cooling coil, and extensive operations manual.

Thermo Scientific* Haake* C and DC Heating Circulators

Analog or digital controls—choice of water, oil, alcohol bath media

Space-saving heating circulators with choice of controllers feature wide temperature range, powerful pressure pump and choice of bath capacities.

13-874-363

Choice of temperature ranges and capacities:

- Lows of 25°, 32°C; or 35°C; highs of 100°C
- Capacities of 3 or 5L (¾ to 1⁵⁄₁₆ gal.)
- CFC-free refrigerant

Temperature control options

- Analog or PID control
- Store and select up to three fixed temperatrures
- Real Temperature Adjustment (RTA) corrects displayed temperature against measured value, ensuring compliance with ISO 9000 standards
- Visual alarms that notify of shutdown at the first sign of excessively high temperature, motor overload, low liquid level
- Fault Identification System (FIS) clearly shows reason for any alarm, shuts off all safety-related parts

Powerful pumps with flexible control

- Pressure pumps with 300mbar pressure, 12.5L/min. maximum flowrate
- Turbulence Reduction System (TRS) automatically adjusts pump performance to viscosity of bath fluid

C10 Controller

- Analog control via rotary knob and fine adjustment control
- LED indicators for POWER ON, HEAT/CONTROL ON, FAULT
- Real Temperature Adjustment (RTA) corrects displayed temperature against any measured value, ensuring that circulator can be used in accordance with ISO 9000 standards
- Fault Identification System
- Manufactured with ISO 9001: 2000-certified processes

DC Controllers add:

- Microprocessor with PID control
- Touchpad and dual LED displays; show menu options and actual or set temperature selections separately, HEAT/CONTROL ON
- Separate LED and switch select from three stored fixed temperatures
- Resolution to 0.1 or 0.01°C
- DC30 model has RS-232 interface (optional software available)

APPLICATIONS:

Ideal for controlling temperatures on external systems such as density meters, viscometers, photometers, refractometers, autoclaves, and reaction vessels.

ORDERING INFORMATION:

Suitable for water, oil, alcohol or other standard bath media as recommended by the manufacturer.

INCLUDES:

All circulators come with two fittings (for 8 and 12mm tubing), tap water cooling coil, bath cover and operations manual. C10 models come with mercury-free 0° to 100°C checking thermometer with 0.5°C divisions

Thermo Scientific* Haake* Open-Bath Circulators

Clear polyacrylic or stainless steel

Get the construction, controller, temperature range, and features that best meet your needs in one unit.

- Two-speed pumps reduce bath turbulence
- 5⅞ or 7⅞" (15 or 20cm) deep baths accommodate large objects
- Stainless-steel baths have handles and drain reservoir for easy handling and cleaning

Analog Control (C10 models)

- Set bath temperatures with ±0.04°C stability
- Come with a checking thermometer, 0° to 100°C with divisions at 0.5°C

Digital/PID Control (DC10 and DC30 models)

- Temperature stability to ±0.01° or ±0.02°C
- Three user-defined preset temperature settings, Real Temperature Adjustment (RTA), and Fault Identification System (FIS)
- DC30 also has an RS-232-C port for computer interface applications

13-874-575

13-874-353

ORDERING INFORMATION:

Both water and oil can be used in the DC30 models.

INCLUDES:

Each unit comes with a directable nozzle and bath bridge to fix the circulator onto the bath. Models C10-W5P and DC10-W5P come with an external circulation set and tap-water cooling coil.

Thermo Scientific* Neslab* Heating Circulators

13-873-316, 13-873-322, 13-873-324, 13-873-330

Ultraquick heatup

- High heating capacity (ambient +12° to +200°C) make ultraquick heatup possible
- Precise temperature stability (±0.01°C) provides repeatable results
- Tap-water cooling coil maintains temperatures near ambient and provides rapid cool-down from elevated temperatures
- Hydroseal lid design minimizes moisture
- State-of-the-art controller technology automatically ensures units perform at peak when necessary and save energy during lower demand
- Four capacities
- Small footprints optimize bench space
- Strong pump circulates long distances or to open or closed containers
- Seamless stainless-steel tank resists corrosion and is easy to clean
- Reservoir drain permits quick and tidy fluid changes
- Drain also allows tubing to be added after bath is filled

Digital One Controller

- User-selectable resolution at 0.1° or 0.01°C
- User-adjustable low- and high-temperature alarm limits
- User-selectable fault conditions
- Automatic reservoir refill port
- Low reservoir fluid level shutoff

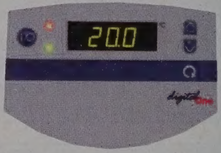
Digital Plus Controller

Same features as Digital One Controller plus:

- Remote sensor port, RS-232 and RS-485 communication ports
- ON/OFF timer with clock
- Audible safety alarm with mute
- Temperature offset display

20.0
digital Plus

Digital Plus Controller for 13-873-318, -322, -326, -330



Digital One Controller for 13-873-316, -320, -324, -328

ACCESSORIES

Thermo Scientific* Neslab* RPC Programmable Controller

Easy to learn and use

For use with any Thermo Scientific Neslab heating or refrigerating circulator that has a Digital Plus controller. RPC Touchscreen Controller can control, monitor and change temperature setpoint, remote sensor temperature, ON/OFF timer, temperature offset, temperature alarm limits, and readout resolution of 0.1° or 0.02°C.

- Large (120 x 90mm) touchscreen LCD is easy to read and menu driven
- Displays large icons for quick function selection
- Features multistep programming, 16 programs in memory, spreadsheet formatting, and graphical display of current ramp step
- RS-232 port for computer connection

INCLUDES:
Wall-mounting bracket, 10' (3m) serial communications connector cable, and power supply with cord (60Hz only)

Bath Fluids for Thermo Scientific* Neslab* Baths

Use ethylene glycol for low-temperature applications to -30°C, silicone oil for high temperature applications to +150°C.

Description	Mfr. No.	Cat. No.	Each
Silicone Oil	610000000000	**13-265-154**	686.16
Ethylene Glycol	610000000001	**13-265-155**	233.15

LOOKING FOR MORE?

Fisher Scientific carries a wide range of bath accesories from bath fluids to bath covers and clamps. In addition to those in this catalog, you can find accessories online.

Visit www.fishersci.com and search for Bath Accessories

Fisher Scientific* Isotemp* Heating Circulators

High performance, excellent value

- Temperature control from ambient +15°C to 150° or 200°C
- Answer demanding temperature control requirements in a wide variety of applications
- Built with strong pumps, powerful heaters and a small footprint to maximize bench space
- Excellent choice as open bath to immerse samples or to pump to an external application

Multiple sizes, three controllers, nine models

- Choose from 6L low profile, 13 and 28L baths, each available with one of three controllers
- Stainless-steel seamless deep-drawn reservoirs resist staining, are easy to clean; 28L reservoirs have built-in drain for easier cleaning

Choice of three easy-to-use controllers

- Programmable controller offers multistep programming: store two 10-step programs with setpoint intervals from 0 to 999 hr., with stability and resolution of ±0.01°C and wide temperature range
- Digital controller offers same precision, accuracy, and features without multistep ramping
- Standard controller offers temperature range, stability and resolution for less-demanding applications

Powerful pump

- Industrial-grade pump delivers 10' (3m) of vertical pumphead for more efficient heat exchange; lets you locate circulator at a distance from application, or under lab bench
- Efficient reservoir agitation, better fluid uniformity even for heavy immersion loads
- For use with bath fluid that has viscosity of 50cS or less

From left to right: 13-874-3 (see next page), 13-874-1, 13-874-5 (see next page)

Built-in safety features

- Redundant user-adjustable thermostats plus overtemperature and low-liquid-level cutouts prevent temperature drift and thermal runaway
- Standard controller has visual alarm; digital and programmable controllers have audible/visual alarms
- Thermally protected pump: no burnout even if jammed

Faster heatup

- Long-life high-wattage heaters for rapid fluid heatup
- Assure fluid compatibility, even when applications produce fluctuating temperatures
- Excellent temperature control for applications requiring heated fluid work areas or pumping to an external application

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

ORDERING INFORMATION:

Stainless-steel reservoir; other wetted parts are corrosion-resistant 300 Series stainless steel or Ryton* polymer. Circulators include stainless-steel ¼ NPT inlet and outlet fittings, serrated adapter for ⅜" I.D. tubing.

NOTE:

Other voltages are available. Contact your Fisher Scientific Customer Service Representative for information.

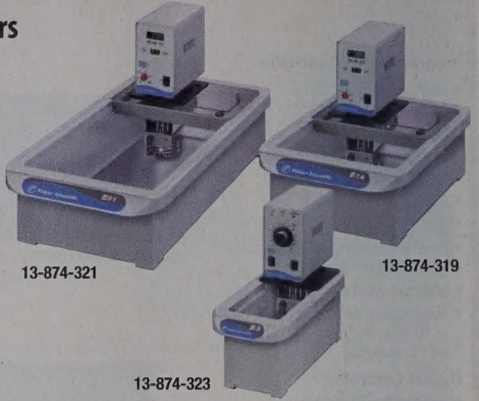
Fisher Scientific* Isotemp* Open-Bath Circulators

Economical alternative to stainless-steel baths; thermally resistant up to 60° or 100°C



13-874-321

13-874-319

13-874-323

Feature integral water baths made of clear acrylic or rigid modified polyphenyleneoxide (PPO) for high durability at a cost lower than stainless steel. Baths maintain working temperatures from 22° or 25° to 60° or 100°C for capacities ranging from 5 to 21L. Use of optional bath covers helps to maintain temperature; see 13-641-736, -737, -738, on page p.129.

- Handles and supports enhance usability
- Fitted bridge plate holds temperature control unit in place
- With integrated overload protection; adjustable, user-resettable, overtemperature cutoff; and low-liquid-level protection
- Available in analog or digital models, both of which feature zero switching that eliminates RF interference

Analog Models

- Dial indication with fine adjustment
- ON/OFF control with IC sensor
- Mercury-free checking thermometer

Digital Models

- Electronic PID temperature control
- Four navigation keys for easy operation
- User-defined fixed temperatures with separate Real Temperature Adjustment (RTA) for each
- Fault Identification System (FIS) alarm indication
- LED readout
- User-adjustable correction factor to meet ISO 9004 standards

Thermo Scientific* Precision* Digital Circulating Water Baths

High-performance digital baths

Uniformity obtained by combining digital solid-state controller with sensitive platinum temperature probe and thorough bath circulation. Well-suited for research, quality control, and legal or referee tests.

- Metal-protected heating element allows use of oil or water as bath medium and provides long, dependable service
- Digital/LED temperature display is independent of controller
- Set temperature in 0.1°C increments
- Manual high-limit safety thermostat prevents thermal runaway
- Circulating pump has stainless-steel impeller and fan-cooled motor
- All stainless-steel construction
- Outer body finished with baked epoxy-polyester

INCLUDES:

Stainless-steel gable cover, diffuser shelf, 3-wire cord and plug

COMPLIANCE:

Uniformity of ±0.05°C at 37°C with bath covered meets Class IIA rating by ASTM* Test Method E 715. UL listed.

Thermo Scientific* Lindberg/Blue M* General-Purpose Circulating Water Baths

Advanced microprocessor control

Set and maintain temperatures ranging from 5°C above ambient to 100°C with ±0.1°C uniformity. Maximum temperature depends on altitude and load. An accessory gable cover is recommended for the most efficient operation above 60°C, and the stainless-steel gable cover is recommended for temperatures above 75°C.

- Microprocessor control with resistance temperature detector probe (included) provides simple, accurate and repeatable temperature control
- Microprocessor control also ptimizes parameters during operation
- Digital display simultaneously reads setpoint and water temperature
- Recessed control module is protected from debris and moisture
- Unit features dual independent overtemperature safety systems
- Adjustable high-limit control prevents overtemperature conditions at any point over bath operating range
- Unit automatically interrupts heat, flashes visual warning and resets when temperature returns to normal
- Fixed overtemperature safety function shuts off bath power, which is reset manually by pushbutton
- Powerful single-stage centrifugal pump with independent supply/return ports supplies maximum circulation and maintains precise temperature uniformity throughout the liquid medium

15-453-1D

- Built to withstand the most critical applications in demanding laboratory environments
- Cabinets and tanks are Type 304 stainless steel to resist chemicals and simplify cleaning
- Moisture-proof blanketed fiber glass insulation surrounds the tank, improving temperature stability and energy efficiency
- Rounded corners provide better water circulation, improved uniformity and easier cleaning
- Built-in drain with ON/OFF valve is standard
- Nonskid rubber feet protect lab bench

INCLUDES:
Reversible stainless-steel rack that allows for optional reduction of working depth by 2" (5cm), temperature probe, 10' (3m) power cord with plug, and mounting clip for immersion glass thermometer (thermometer sold separately).

CIRCULATORS—IMMERSION

Thermo Scientific* Haake* Immersion Circulators

No low-liquid-level cutout

Maintain temperatures from 25° to 200°C in tanks, aquaria, jar baths, or other vessels with capacities up to 50L (13¼ gal.) and up to 5¾" deep (14.5cm). Circulators have a Turbulence Reduction System that reduces turbulence development in open baths and automatically adjusts pump performance to the application. Temperature control options include simple ON/OFF (analog model) or PID (digital models).

- Digital circulators feature a touchpad front panel display that shows menu options and temperature selections separately
- Select and save up to three different fixed temperatures simultaneously
- Real Temperature Adjustment (RTA) corrects the displayed temperature against any measured value, ensuring that the circulator can be used in accordance with ISO 9000 standards
- Controllers on all models shut down at first sign of excessively high temperature (user-set), low liquid level or motor overload
- Models C10 and DC10 have visual alarms
- Models DC30 and DL30 have visual and audible alarms; also feature RS-232-C interface
- DL30 model has an extra-long immersion depth that can accommodate deeper containers or vessels
- Units clip to side of vessel or lab stand and comes with mounting bracket

INCLUDES:

Analog model comes with a 0° to 100°C thermometer

CERTIFICATIONS:

All models are certified under the IEC 1010 Electrical and Mechanical Safety Code.

Fisher Scientific* Isotemp* Immersion Circulators

Analog or digital models with microprocessor control

Clamp an Isotemp immersion circulator to open baths, jar-style baths, or ring stands to make a constant temperature bath for your specific application.

- Quiet pressure pump provides 14L/min. flow
- Long-life motor won't burn out even if jammed
- Secure to bath or stand with built-in clamp
- If application requires external circulation, just connect ½"-I.D. (1.3cm) tubing to pump nozzle
- Adjust nozzle to change direction of flow
- Microprocessor PID (Proportional Integral Derivative) temperature control anticipates the approach to selected temperature setpoint and prevents overshoot
- Large heaters provide quick heatup and recovery
- Low-watt-density heater won't scorch bath fluids
- Low-liquid-level cutoff with visual alarm
- Zero switching that eliminates RF interference
- Corrosion-resistant, stainless-steel wetted parts

Digital Model 2150

- Easy-to-read LED shows setpoint or actual temperature at the touch of a button
- Resolution 0.1°C
- Set temperature from 25° to 200°C and maintain stability of ±0.02°C
- Big, bright green display lets you monitor temperatures from across the lab

Analog Model 2100

- With thermometer readout (thermometer not supplied) sets temperature from 25° to 100°C
- Stability of ±0.1°C

WARRANTY:

Two-years on parts and labor.

NOTE:

Model 2150 can be used with bath fluids that have a maximum viscosity of 30cS at working temperature range. Model 2100 should not be used with fluids that exceed 5cS at room temperature. Strongly recommended that only water be used as the heat transfer medium with the Model 2100.

Fisher Scientific* Isotemp* Open Baths

Team with immersion circulator for simple, constant-temperature bath

- Stainless-steel refrigerated and unrefrigerated models, or clear acrylic unrefrigerated models
- Reservoir capacities: 13 or 28L (stainless steel); 8, 16, or 21L (acrylic)

Stainless-Steel Models

- Use with water or other bath fluids, such as silicone fluids
- In rugged housing with scratch-resistant exterior coating
- For work down to 0°C (32°F), choose refrigerated bath with CFC-free refrigerant; operates on 115V 50/60Hz

Acrylic Models

- Optically clear sides let you easily monitor samples
- Maximum operating temperature of 70°C (158°F)
- To ensure sample visibility, use acrylic baths with water
- Combine acrylic bath, immersion circulator and magnetic stirrer for controlled heating and stirring of samples in containers
- Low-profile stirrer will fit in 2¼"-high (5.7cm) space under acrylic tank

WARRANTY:

Two-years on parts and labor

Thermo Scientific* Haake* EK Series Immersion Coolers

Use with open-bath circulators for cooling of smaller volumes, removing reaction heat or replacing tap water, dry ice, or liquid nitrogen cooling

EK20 and EK30 Immersion Coolers

- Equipped with an air-cooled cooling circuit
- EK20 is designed for baths with a 15cm depth, reaches -25°C in 5L Dewar vessel
- EK30 is designed for baths with a depth of at least 20cm; reaches -30°C in 5L Dewar vessel
- Vessels of other sizes can also be cooled

EK45 Immersion Cooler

- Equipped with an air-cooled cooling circuit
- Multipurpose cooler with integrated controller
- Digital temperature display
- Achieves temperatures down to -45°C in a 5L Dewar vessel
- Temperature accuracy of approx. 1° to 2°C; improved accuracy is possible using a stirrer

13-875-706

13-875-708

ORDERING INFORMATION:
Optional wall-mounting holder available; contact your Fisher Scientific Customer Service Representative for details. Manufactured with ISO 9001: 2000-certified processes.

INCLUDES:
Cooler with immersion cooling coil, operations manual. EK45 Electronic controller comes with Pt100 sensor; sensor is approximately $\frac{1}{4}$" dia. (6mm) × $1\frac{15}{16}$"L (50mmL) with $98\frac{3}{8}$"L (2.5m) cable.

CHILLERS

Thermo Scientific* Neslab* ThermoFlex* Recirculating Chillers

Reliable, easy-to-use chillers optimized for the most demanding applications

Use for analytical instrumentation; laser equipment; medical equipment; packaging; research and university labs.

High reliability plus superior perfromance

- Robust refrigeration system is designed for continuous use in a variety of installations
- Temperature setpoint range of 5° to 40°C (41° to 104°F) with ±0.1°C stability
- Recirculation system incorporates highly reliable plumbing connections to eliminate leaks
- Integrated air and fluid filters to minimize wear to mechanical parts, for lower maintenance costs and improved system reliability
- Up to 10% greater cooling capacity than comparable units: 900w or 1400w cooling capacity at 60Hz
- Lower noise, ensuring a pleasant work environment
- Deliver continuous cooling capacity up to 900 or 1400 watts

Easy to Use

- Quick-start guide enables trouble-free system start-up
- Snap in-and-out air and fluid filters promote quick and simple maintenance
- Innovative recirculation system includes integrated funnel and visual indicator for operator convenience
- Intuitive controller allows customer-defined alarms to be set for various parameters, ensuring that your process is always under control
- Easy-to-read LCD
- Integrated pressure relief ensures application pressure limits are kept within range

13-266-130

ORDERING INFORMATION:
Dimensions, 24.7L × 14.2W × 27.4"H (62.7 × 36 × 68.6cm). Net weight, 126 lb. (57.2kg). Operating temperature: 10° to 40°C (50° to 104°F).

Additional models available with up to 5000w capacity; for details, consult your Fisher Scientific Customer Service Representative or visit Web site.

COMPLIANCE:
NRTL Certified to CSA and UL Standards; CE-Marked

Model	Electrical Requirements	Pump Type	Pumping Speed	Cat. No.	Each
900 PD1	115V 60Hz, 15A circuit	Positive Displacement (PD1)	2.1 gal./min. (7.8L/min.) at 60psi	**13-266-130**	3451.00

GENERAL PURPOSE

Fisher Scientific* Isotemp* Digital-Control Water Baths

Programmable, digital, dual-temperature control

Ideal for industrial, clinical, pharmaceutical, or biomedical procedures.

- Microprocessor PID temperature control from ambient to 100°C; multiple built-in safety features
- Low-profile design for easy access; acrylic or stainless-steel covers

Controller Features

- PID control for ±0.24°C uniformity, ±0.5°C accuracy/stability at 37°C
- Display shows °C or °F; easy to read from across the room

Safety Features

- Low-profile and front-panel controls for easier access, safer operation
- Dual thermostats guard against thermal runaway
- Hinged acrylic or stainless-steel gable covers have fins that keep hands away from hot vapors
- Covers stay open at 90° or, with quick-release hinge, lift off completely for use with large glassware
- Heating elements will not burn out if bath accidentally runs dry

Design Features

- Corrosion-resistant exterior; easy-to-clean acrylic enamel coating
- Temperature-resistant plastic rim insulates, resists leaks, keeps its shape and won't dry out or crack like caulked seals
- Exterior stays cool even after hours of operation
- Deep-drawn, stainless-steel reservoirs and perforated sample trays
- Rounded reservoir corners and sample trays with finger holes

Model Selection

- **Shallow-form Model 202S** is perfect for heating samples in microcentrifuge tubes and for other molecular-biology procedures
- **Model 215** features two chambers with separate controls
- **Models 220 and 228** have movable control panel
- **Models 210, 215, 220 and 228** include drain pump to empty reservoir

15-462 Series

ORDERING INFORMATION:

Accessory concentric ring covers available: see 15-462-30, 15-462-31, p. 137. Accessory stainless-steel gable covers available: see 15-462-32 through 15-462-35 on p. 137. Additional voltages and models with analog controllers available; for analog-control models, see next page.

WARRANTY:

One year

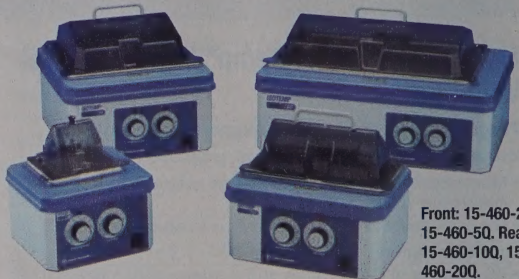
Fisher Scientific* Isotemp* Economy Analog-Control Water Baths

Easy-to-use, front-mounted controls

Economical, general-purpose water baths are ideal for industrial, clinical, pharmaceutical, and biomedical procedures. Seven models, including shallow-form and dual-chamber, with capacities from 2 to 28L. Shallow-form Model 102S is perfect for heating samples in microcentrifuge tubes and for other molecular biology procedures. Model 115 has two chambers, each with its own temperature control panel.

- Precise temperature control up to 100°C (212°F)
- Capacities from 2 to 28L
- Easy-to-use controls on front panel for full access and safe operation
- Dual thermostats guard against thermal runaway; elements won't burn out even if bath runs dry
- Choice of acrylic or stainless-steel covers
- Hinged stainless-steel or see-through acrylic gable covers have unique fins that keep hands away from hot vapors; stay open at 90° position or lift off to accommodate large glassware
- Corrosion-resistant exterior with acrylic enamel finish; temperature-resistant plastic rim fits snugly to insulate and prevent leaks
- Outside of the bath stays cool to the touch even after hours of operation
- Low-profile design makes access convenient
- Deep-drawn stainless-steel reservoirs are seamless to prevent leaks; rounded corners make cleaning easy



Front: 15-460-2Q, 15-460-5Q. Rear: 15-460-10Q, 15-460-20Q.

ORDERING INFORMATION:

Concentric ring covers and stainless-steel gable covers are available separately; see p. 137.

INCLUDES:

120V models come with line cord and grounded NEMA 5-15P plug. Sample tray, thermometer clip, and nonhazardous-liquid, partial immersion (76mm) thermometer (-10° to +110°C) come with each bath.

WARRANTY:

One year on parts, labor and travel

CERTIFICATIONS:

All models are CSA approved.

ACCESSORIES

15-462-31Q

Concentric Ring Covers

Fit Fisher Scientific* Isotemp* Models 110/210, 120/220, and 128/228 water baths

- Evaporate liquids or melt solids such as agar
- Cover for 10L bath has four holes; cover for 20 and 28L baths has six holes
- Each hole has removable center lid and concentric stainless-steel rings
- Rings can be removed from inner ring outward, producing diameters to accommodate various sizes of lab containers

WARRANTY:
One year

For Model	No. of Holes	Cat. No.	Each
110, 210	4	**15-462-30Q**	307.88

Fisher Scientific* HiTemp* Bath

Ideal for applications requiring temperatures above 100°C (212°F)

11-481Q

Just place appropriate heating media—water, oil, bath wax, or sand—in bath reservoir. Attach sample container to accessory support rod at top rear of bath, flip on power switch, and select temperature with front control knob.

- Operates from ambient temperature to 275°C (527°F)
- Factory-calibrated temperature controller with back-up safety relay ensures quick response and minimal overshoot
- Controls the 1250w heater and maintains bath constancy to ±2°C
- Cabinet is packed with insulation to minimize heat loss
- Cast-aluminum reservoir holds round- or flat-bottom container with up to 1 gal. (4L) capacity
- Top rim controls spills and overflows
- Rugged, cold-rolled steel cabinet is finished with baked acrylic enamel for easy maintenance

ORDERING INFORMATION:
Bath is 13½L × 13½W × 12"H (34 × 34 × 30cm). Bowl is 8" square (20 × 15cm) × 6" deep (15cm). Reservoir capacity is 1¼ gal. (5L). Unit has ½ × 27 threaded hole for mounting accessory support rod 14-667R; order separately. Bath oil also available separately; order 02-20.

INCLUDES:
Three-wire cord and plug

WARRANTY:
One year

CERTIFICATIONS:
CSA approved

Thermo Scientific* Precision* General-Purpose Water Baths

Eight models, including dual-chamber and shallow-form, with analog or digital control

- Rugged, high-performance baths maintain water temperature from ambient to 99.9°C with ±0.2°C uniformity (at 37°C)
- Hydraulic thermostat sensitive to ±0.1°C is located in the chamber for accurate temperature control, and a second thermostat is included for safety
- Direct-contact tubular heating elements provide fast, uniform heat transfer
- Dual-chamber models have independent controls for operating at different temperatures
- 180 Series analog baths are ideal for applications in which temperature setpoints seldom change—feature variable analog temperature control, backup high-limit safety thermostat, and illuminated power switch
- 280 Series microprocessor-controlled baths allow temperature setpoint with 0.1°C precision at just the push of a button—features include bright three-digit LED temperature readout, built-in calibration capability, and automatic overtemperature protection
- All models feature seamless, deep-drawn stainless-steel bath chambers
- Stainless-steel adjustable diffuser shelf and shelf legs, fiberglass insulation, and switch with amber indicator light are standard on all baths
- Models 181 and 281 have polypropylene covers; others have stainless-steel gable covers

Thermo Scientific* Precision* Reciprocating Shaker Baths

Accurate temperature control and quiet reciprocal shaking action

15-455

- Set temperature (in increments of 0.1°C) and oscillation speed via control-panel touchpad
- Shaking frequency: 30 to 200 strokes/min.
- Stroke length adjustable at ½, 1, or 1½" (13, 25, or 38mm)
- Microprocessor-controlled proportional integral temperature control and solid-state sensing probe provide excellent temperature sensitivity
- With adjustable high-limit thermostat and indicator light
- Low-watt-density nickel alloy immersion-type heaters
- Epoxy-polyester coated, stainless-steel exterior

ORDERING INFORMATION:
Replacement gable covers available; order online.

INCLUDES:
Stainless-steel chamber and gable cover

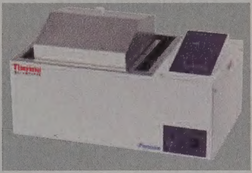
Thermo Scientific* Precision* Shallow-Form Shaking Bath and Dubnoff Incubator/Bath

Provide gentle, uniform reciprocal shaking motion at constant temperature

15-453-205



15-453-200

- Tray depth of only 3½" (8.9cm) is perfect for small samples with optional Microcentrifuge Tube Racks (15-453-201J); also accommodate optional flask glassware clamps
- With gable cover, temperature range is ambient +5° to 99.9°C; uniformity and sensitivity at 37°C, ±0.05°C
- Strokes per minute: 30 to 200
- Stroke length: ½, 1, and 1½" (13, 25, and 38mm)
- Corrosion-resistant, stainless-steel interior and exterior
- Chamber volume with bath filled to 3½" (89mm) from top: 14.5L (3⅞ gal.)
- Usable chamber: 11½L × 11W × 3½"D (29 × 28 × 9cm)
- Overall, 14L × 24½W × 9½"H (36 × 62 × 24cm)

ORDERING INFORMATION:
Flowmeter is optional accessory. Tube racks and replacement gable covers and gassing hoods available online.

INCLUDES:
Gable cover, built-in dial-type thermometer, and water-level regulator. Dubnoff Bath also includes one large and two small gassing hoods, specifically designed for biochemical and biological reactions that require gas-conditioned atmosphere.

Thermo Scientific* Haake* Shaking Water Bath SWB25

High safety level for constant operation, plus accurate PID temperature control

Shaking water bath features:

- Horizontal shaking motion
- Stainless-steel bath reservoir
- LED digital display; PID control
- Temperature Range: 25.0° to 90°C
- Shaking frequency and temperature are adjusted via keypad and digital display
- Heater and control sensor are underneath bath for easy cleaning
- Fluid level can vary from 50 to 180mm to accommodate sample vessels of differing heights
- Optional transparent plastic gable-shaped bath cover (13-872-130) prevents water spillage caused by turbulence; recommended for temperatures above 70°C

ORDERING INFORMATION:

Optional accessories include swivelling Transparent Gable Cover (13-872-130); second shaking carriage for rapid interchange; tap water cooling coil. Contact your Fisher Scientific Customer Service Representative for details.

INCLUDES:

One Shaking Carriage Plate (without clamps; order clamps separately below).

Thermo Scientific* Lab-Line* Reciprocating Shaking Baths

Precise analog or digital control of temperature, speed and time

Digital model is ideal for applications such as tissue, metabolic, enzymatic and cell studies. Analog model is ideal for cell culture studies, bacterial studies, electrophoresis gel destaining, blood plasma thawing, microbiological studies, tissue flotations and hybridization.

- 15 to 250 oscillations/min.
- Adjustable stroke length from ½" (1.3cm) to 1½" (3.8cm) in ¼" (0.64cm) increments
- Temperature control from above ambient to 65°C (98°C with optional gable cover)
- Control and uniformity of ±0.1°C at 37°C
- Stainless-steel universal trays have handles and adjustable springs to hold racks and other objects during shaking; ensure uniform temperature throughout bath
- Platform insert (14-280-47) secures flasks using standard flask clamps that fit predrilled holes in platform
- Overtemperature safety feature with independent thermostat provides additional backup by controlling heat if main temperature controller fails

Digital Reciprocating Shaker Model 4682

- View speed, time and temperature on three individual displays
- Built-in memory retains setpoints if power fails; shaking automatically resumes once power is restored
- Visual/audible alarms indicate low water level or deviation in speed over setpoint
- Locked rotor protection stops shaking if blockage occurs, preventing motor damage
- Seamless stainless-steel chamber prevents leakage
- Low level-water alarm protects samples

Analog Reciprocating Shaker Model 3582

- Shaker mechanism has independent power switch, allowing unit to be used as a constant temperature water bath
- Adjustable temperature, stroke and speed provide versatility
- Excellent ±0.1°C uniform water temperature
- Optional gassing hood allows for nonambient atmosphere applications
- Easy-to-read LED temperature display

ORDERING INFORMATION:

Chamber dimensions, 19½D × 11½W × 8"H (49 × 29 × 20cm). Exteriors measure 31½L × 16½W × 11¼"H (80 × 42 × 29cm). Shipping weight, 46 lb. (21kg). For use with standard flasks, require platform insert (14-280-47) and flask clamps, sold separately.

INCLUDES:

Stainless-steel tray, handles and springs to hold racks and other objects.

New Brunswick Scientific* Model C76 Water Bath Shaker

Built to run continuously—all day, every day

- Designed for continuous-duty orbital shaking
- Broad 50 to 300rpm speed range permits gentle as well as vigorous agitation and aeration
- Features push-button setpoints, self-diagnostic status lights and alarms that warn of any deviation from control tolerances
- LED digital display shows temperature in 0.1°C increments and speed in 1rpm increments
- Visible warning signal indicates when temperature deviates more than 1°C and speed more than 5rpm from setpoints
- Front and rear snap-in baffles minimize splashing
- Bath accommodates flasks, tubes and dishes for staining, destaining and hybridization

14-278-180 Water Bath Shaker with optional gable cover and accessory platform

Model	C76
Shaking Motion	Orbital, ½“ dia. (1.3cm)

ACCESSORIES

Subplatform for New Brunswick Scientific* Model C76 Water Bath Shaker

Use as mounting base for two half-size platforms or four test-tube racks.

Mfr. No.	Cat. No.	Each
M12319939	**14-284-46**	190.71

Universal Platform

- Holds different combinations of flask clamps
- Maximum number of flasks: 82 (10mL), 16 (25mL), 14 (50 or 125mL), 8 (250mL), 6 (500mL), 4 (1L), or 2 (2L)
- Measures 16½W × 12"L (42 × 30cm)

Mfr. No.	Cat. No.	Each
M1231 9930	**14-284-45**	439.55

Stovall* Three-in-One Shaking Water Bath

Use as a shaking water bath, constant temperature bath or shaker

15-453-213

- Portable, versatile workhorse comprised of a lightweight, quick-heating water bath and The Belly Dancer Shaker
- Bath can be removed from shaker and used separately
- Microprocessor-controlled PID system
- Displays setpoint and actual water temperature

Shaker Features

- Gentle undulating motion
- Speed adjustable from 0 to 100rpm
- Orbital action with 1" (2.5cm) throw
- Platform pitch adjustable from flat to 8°
- 7 × 7" (18 × 18cm) acrylic, open-sided platform
- 5 lb. (2.25kg) load capacity
- Measures 8L × 8W × 4¾"H (20 × 20 × 12cm)

Water Bath Features

- Temperature range of 30° to 75°C
- Temperature ramp-up: approx. 3°C/min.
- Stability: ±0.2°C at setpoint
- PID microprocessor control maintains water temperature within ±0.1°C between 35° and 72°C
- Easily mobile: weighs just 7½ lb. with lid
- Exterior measures 12¼L × 12¼W × 4"H (31 × 31 × 10.2cm)
- Stainless-steel chamber measures 10⅜L × 10⅜W × 3¼"D (26.4 × 26.4 × 8.3cm)
- Shaker and Water Bath together are perfect for Northern/Southern filter blot hybridizations, filter washes, in-situ washes and hybridizations, electrophoretic gel manipulation, acceleration of protein gel staining, hot staining protocols and recombinate DNA technology.
- Constant Temperature Bath used alone is ideal for protocols not requiring agitation such as heat inactivation of serums, restriction enzyme digests, and protein assays.
- Shaker is useful alone for non-temperature-sensitive stainings, washings, and probes involved in gel and blotting techniques.

INCLUDES:

Shaker/Bath combination comes with The Belly Dancer Shaker modified to include temperature control plus Stovall Hybridization Water Bath.

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz, 6.26A	CMBAA115S	**15-453-213**	2515.00

SPECIALTY

Thermo Scientific* Precision* Electrically Heated Concentric Ring Steaming Baths

15-496 15-491

Evaporate liquids, solvents, or melt solids such as agar

- Concentric rings can be removed from inner cover outward to accommodate containers of all sizes
- Constructed of stainless-steel with epoxy polyester-coated steel support stand
- Rings are flanged-formed stainless steel
- Center ring cover is 1" diameter (25mm)
- Rings progress out from cover in 1" (2.5cm) increments
- Copper-clad immersion heater is controlled with four-position heater switch
- Maximum temperature, 100°C (212°F)

ORDERING INFORMATION:

Baths may also be flush-mounted in benchtop. Wiring of switch must be completed onsite.

INCLUDES:

Constant water level device (with ¼" inlet for water supply), adjustable drain tube, and welded angle-iron support frame with hot-rolled steel legs, fasteners and lockwashers

Thermo Scientific* Precision* Coliform Incubator Baths

Push-button controls for easy use

Ideal for testing fecal coliforms in water or sewage at 35°, 41°, 44.5°, or 45.5°C (95°, 106°, 112°, or 114°F) ±0.2°C (±0.4°F) as required by APHA, U.S. EPA, AWWA and WPCF. Designed to test *E. coli* in food at 45.5°C (114°F) ±0.05°C (±0.1°F) as required by U.S. FDA and AOAC regulations.

- Centrifugal pump circulates water throughout chamber
- Microprocessor controller maintains precise control even with a full load or without cover
- Control to factory-preset temperatures of 35°, 41.5°, 44.5°, or 45.5°C (95°, 106°, 112°, or 114°F)

Large-capacity Unit

- Holds up to 288 fecal coliform or 150 *E. coli* cultures
- Accepts three (15-459-2) Petri dish racks
- Stainless-steel bath chamber
- Chamber volume: 9.1 gal. (34.5L)
- Solid-state controls
- Bath chamber dimensions: 12L × 27W × 7½"D (31 × 69 × 19cm)
- Shipping weight: 60 lb. (27.2kg)

Small-capacity Unit

- Holds up to ninety-six 50mm Petri dishes or 50 test tubes up to 20 × 150mm
- Accepts one (15-459-2) Petri dish rack
- ON/OFF switch activates both heater and pump
- Stainless-steel bath chamber
- Chamber volume: 4.8 gal. (17.5L)
- Bath chamber dimensions: 12L × 14W × 8"D (30 × 36 × 20cm)
- Shipping weight: 35 lb. (15.9kg)

REQUIRED ACCESSORIES:
ASTM* 91C Thermometer (15-173-24C)

15-459-12

ACCESSORIES

Dish Rack for Coliform Incubator Bath

Holds up to eighty 50mm Petri dishes

- Stainless steel
- With two rack-retaining clips
- 15-459-15 Bath holds three racks; 15-459-12 and 15-459-13 each hold one

Mfr. No.	Cat. No.	Each
51200804	**15-459-2**	196.56

Boekel* Unheated Shallow Concentric Ring Bath

Ideal for gentle flask, bottle, and test tube heating

- Minimizes water loss through evaporation
- Stainless steel, with flat bottom, reinforced edge, steam escape outlet, welded handles
- Seven concentric rings

15-518B

ORDERING INFORMATION:
8 dia. × 2¾"D (20 × 7cm)

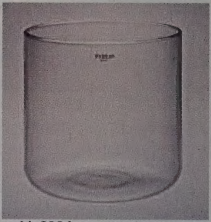
Mfr. No.	Cat. No.	Each
1445 8	**15-518B**	278.00

Pyrex* Cylindrical Jars

Can also be used as animal jars

General-purpose cylindrical jars are suitable for use as instrument covers and solution containers.

- Mold-blown to ensure uniformity
- Uniform wall thickness provides mechanical strength
- Without handle
- No flange at open end
- Ground open end



11-823J

ALERT:
Do not use with heat, pressure or vacuum applications.

Boekel* Microcooler II Benchtop Refrigerated Bath

Convenient alternative to refrigerated water baths

05-450-5

Ideal for sample storage or incubation at temperatures from ambient to 4°C. "Press to set" temperature selection makes it simple to maintain difficult subambient temperatures in applications such as ligation reactions or oocytes storage.

- LCD makes temperature monitoring easy
- Microprocessor controller ensures convenient and accurate temperature setting
- Peltier thermoelectric cooling device provides years of reliable service
- Seamless aluminum well and supplied rack accommodate 24 microcentrifuge tubes (1.5mL size)

ORDERING INFORMATION:

- Dimensions, 11¾L × 9¾W × 7¼"H (29.8 × 24.8 × 18.4cm)
- Weight, 10 lb. (4.5kg)
- For 115V 60Hz, 0.8A, 100w

INCLUDES:

Smoked acrylic plastic lid

Mfr. No.	Cat. No.	Each
260010	**05-450-5**	1165.15

Nalgene* Multipurpose Jar Baths with Covers

Can also be used as aquaria, terraria, bell jars and freeze-drying chambers

11-823-14

- Transparent polycarbonate jars with ⅛" thick (3mm) walls
- Lightweight, economical, autoclavable, resist breakage
- Drill, tap, or apply clamps to jars to attach heating or cooling equipment

INCLUDES:

Covers

ALERT:

Larger jars 11-823-18 and 11-823-16 not suitable for vacuum applications. Do not autoclave 11-823-14, 11-823-15 and 11-823-17 if used for vacuum applications.

‡ ⅜" (1cm) narrower at bottom than at top.

Cannon* CT-500 Constant-Temperature Bath

Maintains temperatures ±0.01°C between 20° and 100°C, meeting ASTM* D 445 precision specification for kinematic viscosity measurements using glass capillary viscometers

22-315-629

- Two electric heating elements rapidly heat bath medium to any desired temperature within the operating range
- Built-in cooling coil, when connected to tap water or cooling system (not included), permits operation at or near ambient temperature†
- Selector switch on the front panel facilitates rapid setting of 10 temperatures for kinematic viscosity determinations: 20°, 25°, 30°, 40°, 50°, 60°, 70°, 80°, 90°, and 100°C
- After setting, the bath will equilibrate to within a fraction of 1° of the desired temperature
- Separate fine-tuning control allows temperature adjustment to within ±0.01°C
- VARIABLE setting on the front panel sets any temperature within the operating range
- Cylindrical 17L (4½ gal.) clear glass bath chamber vessel measures 12H × 12" dia. (30.5 × 30.5cm)
- Stainless-steel baffle in the center provides a plain reflective background for viewing instruments
- Top cover has seven 2" (5.1cm) holes for viscometer holders
- Two additional ⅜" (1cm) holes accommodate thermometers
- Safety features include a bath thermistor that senses any over-temperature fault condition
- If such a condition occurs, all power is removed from the bath until an operator resets the overtemperature limit circuit
- A liquid-level sensor prevents the control circuit from heating the bath until a safe operating level is obtained
- Power is also removed from bath heaters if the control thermistor is disconnected

COMPLIANCE:

† Cooling medium should be circulated at 10° to 15°C below the desired temperature when operating near ambient.

Thermo Scientific* AquaTec Water Preservation Cell

Prevents microbe contamination in CO_2 incubators and water baths for up to 6 months

15-453-271

A revolutionary way to protect your valuable samples from waterborne contaminants, without harsh chemicals. Simply place the 3"L cell into the water reservoir of any CO_2 incubator or water bath. AquaTec prevents contamination up to six months, and from more than 600 types of bacteria, viruses, molds and fungi. Developed specifically for laboratory applications across a broad range of biological research temperature environments, AquaTec delivers virtually maintenance-free microbe protection.

- Safe to handle—requires no gloves and no special disposal protocol
- Self-regulates to maintain effectiveness regardless of water level
- Easy to use in equipment from any manufacturer
- Comes with suction cup for easy mounting on reservoir wall at your option
- Replacement reminder assures uninterrupted water protection

Description	Mfr. No.	Cat. No.	Pack of 4
AquaTec Water Preservation Cell	50109579	**15-453-271**	199.11

*Fisherbrand** Silicone Bath Fluids

Provide thermal stability over a variety of temperature ranges

- Suitable for use in stainless-steel reservoirs
- Supplied in 1 gal. (3.8L) container

Fluid	Temperature Range	Freeze Point	Viscosity at 25°C	Mfr. No.	Cat. No.	Each

Techne* Hollow Plastic Balls

Reduce heat loss up to 75%; can also reduce evaporation loss by 87%

14-220-30

- Polypropylene balls are usable at temperatures to 100°C (212°F)
- Reduce fumes, odors and splashing
- Available in a variety of sizes for different size baths

Kimax* Griffin Beaker Starter Pack

Ideal for start-up requirements, when variety is preferred or when space or glassware needs are limited

- With pouring spout
- Matte-finish enameled marking spot
- Accurate to ±5%
- Uniform, sturdy walls

02-555-2

ORDERING INFORMATION:
One each per case: 50, 100, 250, 600 and 1000mL

COMPLIANCE:
Designed from ASTM* E 960 Type I requirements.

Mfr. No.	Cat. No.	Case
14080-01	**02-555-2**	25.54

Kimax* Griffin Beakers

Thick, beaded, slightly flared top

- With pouring spout
- Matte-finish enameled marking spot
- 20 to 4000mL sizes have white scales for approximate volume
- Accurate to ±5%
- Uniform, sturdy walls

COMPLIANCE:

Designed from ASTM* E 960 Type I requirements.

Kimax* Heavy-Duty Beakers

Heavy construction prolongs life

- With pouring spout
- With marking spot
- Have white scale for approximate volume
- Thick, uniform walls with extra wall thickness in tooled top rim
- Accurate to ±5%

COMPLIANCE:

Designed from ASTM* E 960 Type II requirements.

NOTE:

Not recommended for use on hotplates with thermal gradients or without agitation.

Kimax* Tall-Form Beakers

With or without pouring spout

- Matte-finish area for marking
- Graduated to indicate approximate volumes
- Berzelius style with flared top, reinforcing bead

COMPLIANCE:

Designed from ASTM* E 960 Type III (with spout) and Type IV (without spout) requirements.

Nalgene* Low-Form Polypropylene Griffin Beakers

Provide excellent chemical resistance and convenient stacking

- No-drip, single-spout design
- Easy-to-read silk-screened graduations, size code, resin code, catalog number, maximum temperature and "No Flame" symbol
- Autoclavable
- Manufactured with ISO 90001:2000-certified process

COMPLIANCE:

Meet ISO/DIS 7056 International Standards for Laboratory Plasticware Accuracy.

*Fisherbrand** Low-Form Polypropylene Beakers

Smooth, tapered design facilitates easy handling and pouring

- Resistant to most acids, bases, and many commonly used solvents
- Shatter resistant
- Easy-to-read, blue printed graduations
- "No Flame" symbol and SPI recycling code
- Antilock feature prevents beakers from sticking together when stacked
- Autoclavable
- Withstand temperatures up to 121°C (250°F)

Nalgene* PFA Griffin Beakers

Stand up to the toughest lab use

- With pour spout
- Translucent PTFE polyfluoroalkoxy resin construction
- Highly resistant to most chemicals including the strongest sulfuric, nitric, chromic, and phosphoric acids
- Withstand extreme temperatures from -270° to +250°C (-454° to +482°F)
- Autoclavable

NOTE:
Not for use on hotplates.

Chemware* PTFE Griffin Beakers

Noncontaminating and inert to highly corrosive reagents such as hydrofluoric acid

- Broad spout for easy pouring
- Nonwettable, unbreakable and heat resistant
- Ideal for digestion
- Can be heated on hotplate up to 288°C (550°F) when proper care is exercised
- Specially molded bottom allows rapid heat transfer
- Unlike most PTFE beakers, these will boil water when covered
- Easy to clean

02-586-1 Series

APPLICATIONS:

Ideal for digestion.

Nalgene* Polymethylpentene Beakers with Handles

Transparent, autoclavable, and break resistant

- Excellent resistance to acids, bases, aliphatic alcohols
- Good resistance to aldehydes and esters
- Transparent to microwaves
- Rectangular handle
- Withstand continuous exposure to temperatures as high as 150°C (302°F) and intermittent temperatures to 175°C (347°F)
- Molded-in graduations in oz. and mL
- Meet ISO/DIN 7056 standards

02-591-9A

NOTE:

Not for use on hotplates.

Capacity	Mfr. No.	Cat. No.	Each	Case of 6
1000mL	1223-1000	**02-591-9A**	59.47	237.89
3000mL	1223-3000	**02-591-9C**	69.21	276.85

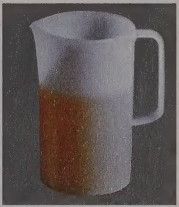
Nalgene* HDPE Beakers with Handles

Extra-heavy wall for safe handling of acids, alkalis, hot solutions

Graduated in mL and oz.

NOTE:

Not for use on hotplates.



02-543-20B

Capacity/Scale	Mfr. No.	Cat. No.	Each	Case of 6
1000mL/32 oz.	1220-1250	**02-543-20A**	51.63	206.52
3000mL/96 oz.	1220-2500	**02-543-20B**	60.29	241.15

DISPOSABLE

*Fisherbrand** Polypropylene Disposable Beakers

Unbreakable; can be thrown away after use or steam-autoclaved for reuse

- Highly resistant to strong acids, organic solvents and other common laboratory reagents
- Special "dripless" lip
- Rib construction permits stacking without binding
- Base allows beaker to sit flat during use
- Graduated in mL and oz.

01-291-11

*Fisherbrand** Tri-Cornered Polypropylene Beakers

Unaffected by commonly used acids, alkalis and solvents

- Tri-cornered lip for dripless pouring
- Sturdy enough for autoclaving and reuse, yet inexpensive enough to be disposable
- Easy-to-read graduations in L and mL
- Accurate to ±5.0%

14-955-111A

8 11/16 × 16 11/16" (22 × 42cm)	6885-222	**02-626C**	1367.95

WARNING

Do not use in heat or pressure applications.

Pyrex* Bell Jars with Beaded Opening

Made from specially selected mold-blown blanks

- Finely ground finish on bottom flange assures tight sealing with ground glass plates
- Flame-cut opening is beaded for greater strength
- Bearing surface increases when No. 5½ rubber stopper is used
- Rated at 1-atmosphere vacuum

11-850-37

WARNING

Do not use in heat or pressure applications.

Nalgene* Polyetherimide Vacuum Chamber

Complete vacuum unit connects to any vacuum source or mechanical pump

- Withstands full vacuum without risk of implosion or shattering
- Useful as a controlled environment chamber for degassing operations and freeze drying

Specifications:

- Rim connector accepts ¼" I.D. (6mm) tubing
- Neoprene gaskets
- Gasket O.D., 12⅝" (32cm)

INCLUDES:

Amber bell jar; gasketed white polycarbonate vacuum plate

01-060B

Capacity	O.D. × H	Mfr. No.	Cat. No.	Each
2⅛ gal. (8.3L)	8¾ × 10" (22 × 25cm)	5305-0910	**01-060B**	237.75

Nalgene* Polycarbonate Vacuum Chamber

Especially useful for demonstrations of vacuum procedures

Intended for applications using nonaggressive chemicals.

Specifications:

- Rim connector accepts ¼" I.D. (6mm) tubing
- Gasket O.D., 7½" (19cm)
- Capacity, 1¼ gallon (4.7L)

INCLUDES:

Clear bell jar; white polypropylene plate

01-060A

O.D. × H	Mfr. No.	Cat. No.	Each	Case of 2
6⅝ × 9⅜" (17 × 24cm)	5305-0609	**01-060A**	174.46	232.62

WARNING

Do not expose jar to partially halogenated hydrocarbons or their vapors. Avoid direct exposure of all chemicals to the polycarbonate plate. Do not autoclave when used for vacuum service.

BENCH PROTECTORS

*Fisherbrand** Absorbent Surface Protector

Disposable sheets of absorbent paper with polyethylene backing

- Ideal for preventing glass breakage, protecting benches, absorbing liquids, and lining humidity chambers and fume cupboards
- Paper side quickly absorbs liquids and keeps spills from spreading
- Polyethylene side prevents liquids from reaching work area and is useful for sample recovery

12-007-187

W × L	Cat. No.	Pack of 50	Case of 8 Pack
18 × 22½" (46 × 57cm)	**12-007-187**	89.17	631.31

*Fisherbrand** Absorbent Underpads

Quickly absorb liquids and keep spills from spreading

- Made with high-absorbency fibers
- Cushioned surface minimizes breakage of delicate labware
- Polyethylene backing is chemical resistant, and the spunbond top layer provides durability even when wet
- Lie flat, hugging the benchtop to prevent sliding
- Absorb up to 750mL/m²

*Fisherbrand** Lab Matting

Easy to clean, easy to cut

- Clear polyethylene ribbed matting cushions instruments, reduces glassware breakage
- Protects drawers, shelves, and benches from chemicals, spills, and dirt
- Five times thicker (0.036" [9mm]) than normal shelf liner, but won't ripple; lies flat

14-203A

W x L	Cat. No.	Each
30" × 15' (76cm × 4.4m)	**14-203A**	24.49
30" × 100' (76cm × 30m)	**14-203B**	146.93

*Fisherbrand** Absorbent Surface Liners

Economical protection for benchtops, floors, and carts

- Soft, durable, and highly absorbent multilayer liner cushions surfaces and absorbs and retains spills
- Waterproof polypropylene backing resists most chemicals
- Easily cut to desired size
- White

14-127-47, 14-127-46

W × L	Cat. No.	Case of
Dispenser Box

*Fisherbrand** Polyethylene Foam Surface Liners

Help to prevent breakage on benchtops

- Cushion sensitive instruments and valuable glassware against vibration and breakage
- Provide surface protection from chemicals, heat, dirt, and broken glass
- Tape, staple, or tack in place
- Easily cut to desired size
- Easy to clean
- No chlorofluorocarbon blowing agents used
- White

VersiDry* Super-Absorbent Fume Hood/Floor Mats

Feature durable cloth-like top layer that won't fall apart even when wet

14-206-60

- Polyethylene backing resists even the harshest of chemicals
- Mats lie flat, are skid resistant
- Absorb up to 1050mL/m^2
- 14-206-59 fits most standard hoods; 14-206-60 sized for floor matting

ORDERING INFORMATION:
Cat. No. 14-206-59 contains two packs of 50; 14-206-60 contains two packs of 25.

W x L	Mfr. No.	Cat. No.	Case of

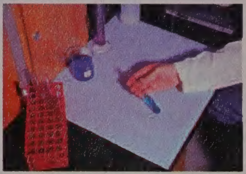
LOOKING FOR MORE?

Fisher Scientific carries many more bench protectors than are shown here. For a complete selection, look to our web site.

Visit www.fishersci.com and search for Bench Protectors

VersiDry* Super-Absorbent Underpads

Absorb spills and cushion breakable items



14-206-38

- Feature durable cloth-like top layer that won't fall apart even when wet
- Polyethylene backing resists even the harshest of chemicals
- Underpads lie flat and are skid resistant—use as bench protector, tray liner, floor mat, cage liner or surgical mat
- Ideal replacement for the blue diaper
- Absorb up to 1050mL/m^2

Chemware* PTFE Laboratory Matting

Chemically inert—resists adhesion of practically any material

- Corrosion- and break-resistant lining for benches, shelves, sinks, and drain boards helps to reduce glassware breakage
- Useful as mesh bag for dipping parts in corrosive chemicals and solvents
- Easy to clean
- Diamond-shaped PTFE mesh sheeting is 1/16" thick (1.6mm) with 1/4" (6mm) openings

14-206-40

W × L	Mfr. No.	Cat. No.	Each
12" × 10' (31cm × 3m)	D1069328	**14-206-40**	270.16

Bytac* Surface Protectors

Put the protection of FEP fluoropolymer on any surface

14-206-53

- Made of an overlay of FEP film bonded to a support backing of vinyl or aluminum (backing is coated with pressure-sensitive acrylic adhesive)
- Protect benchtops, fume hoods, temporary tables, walls/ceilings, splash screens, walls of spray booths, and other lab surfaces
- Help protect surfaces against absorption of toxic or radioactive chemicals
- Corrosive chemicals, paint, oil, grease, and sticky substances wipe off easily with damp sponge
- Cut easily with scissors
- Install easily—simply peel off protective paper from adhesive backing and apply to surface

ORDERING INFORMATION:

Bytac protector with vinyl backing recommended for temperatures up to 93°C (200°F); with aluminum foil backing, can be used up to 182°C (360°F).

Benchkote* Surface Protectors

Suitable for saturation with disinfectant

12-007-180

- High-quality absorbent paper coated on one side with an impermeable layer of polyethylene that prevents liquids from reaching benchtops
- Paper side absorbs solvents, toxic liquids, pathogens and radiochemicals and can be written on with ink or pencil
- Help reduce exposure to bloodborne pathogens for meeting OSHA regulations

Benchkote Plus

- Sheets and rolls have a thicker absorbent layer than standard Benchkote protectors and can absorb more than 0.75L/m^2

COMPLIANCE:

Comply with OSHA Regulation 29CFR 1910.1030

BEFORE YOU BUY A STOMACHER®

When your protocol requires a Stomacher, use the real thing: Seward® has been bringing safe and efficient sample blending to labs everywhere for over 30 years.

3 STEPS TO CHOOSING THE RIGHT STOMACHER

Step 1. Consider your sample sizes

Wide range—From as small as 250µL to as large as 80mL

Small to mid-range—From 5mL to 80mL

Mid- to large-sized—From 80mL to 400mL

X-large—From 1000mL to 3500mL

Step 2. Consider application needs and special features, including

Preprogrammed cycle times—Save time and improve reproducibility of results.

Continuous cycle feature—Super-convenient for long cycle times.

Temperature control up to 60°C—Certain organisms require heat for extraction, such as Trichinella.

Push-button control and acoustic "end of run" signal—For added convenience.

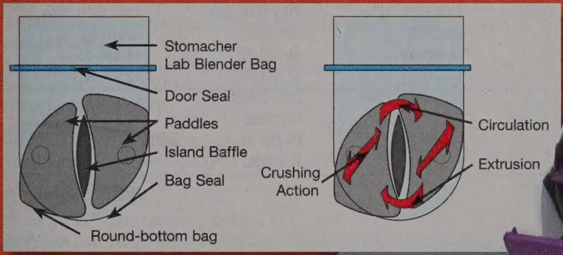
Ability to process large, bulky cartridge filters or fibers—Perfect for large-scale samples as well as environmental applications.

Step 3. Select the appropriate blender bag

Strainer bags—Excellent for processing gritty samples that could cause pipet blockage.

Closure bags—Ideal for sample collection or to prevent sample loss; double-walled bags are perfect for working with high-risk, biohazardous samples.

Heavy-duty bags—Withstand extended heating times.



400C Stomacher

sponsored by:

brinkmann

SEWARD STOMACHER BAGS ARE

Sterile—Irradiated at 25–50 kGy.

Super-strong—Extruded virgin LDPE manufactured to be ≥65 µm thick.

Split-resistant—Bottom welding prevents splitting at the seam, a common drawback of other brands.

Burst-tested—Ensures bags do not rupture, even during the toughest sample processing applications.

Seward bags are thicker and stronger than any other bag on the market, and they will not burst, split or leak. They keep your blender clean, your work fast, and you safe from harm.

For a full selection of Seward Stomacher blenders and bags available through Brinkmann, see p. 158.

BLENDERS

Brinkmann*/Seward* Stomacher* Lab Blenders

Blend materials that cannot be handled by conventional blenders

Fast, reliable paddle action applies pressure to contained samples, forcing out organisms and homogenizing the sample.

- Samples contained in sterile, disposable bags miminize risk of cross-contamination during transportation, processing, and disposal; eliminates the need to sterilize blender between procedures
- Time settings adjustable to 30, 60, or 120 sec., or continuous processing on all models except those with enhanced temperature control

Model 80 MicroBiomaster

- Processes sample volumes as small as 250µL

Model 80

- Compact size conserves bench space

Model 400C

- Homogenizes using a combination of crushing and stirring
- Programmable memory stores three paddle speeds and times (1 sec. to 99 min. 59 sec.)

Model 3500

- Gentle paddle action for blending powders and reliably washing organisms and chemical residues from filters standard on all 3500 Models

Model 3500W

- Perfect to extract *Cryptosporidium* and *Giardia* parasites from water filters
- Accommodates bulky filters and large volumes of washing solutions
- Remove viruses and bacteria from tissues and organs
- Remove organisms from swabs, filters, tissue biopsies and fecal samples
- Test sterility of creams, ointments and dry powders

WARRANTY:
Three years on all models

ACCESSORIES

Stomacher* Lab Blenders Bags

To ensure optimum sample blending

- Sterile (gamma-irradiated) polyethylene bags
- 65µm thick for high-impact strength (9.2MPa tensile, 27.1MPa ultimate) even at low temperatures
- Permeability (g/m²/24 hr.): 1.2 water vapor, 12,000 oxygen, 2000 carbon dioxide
- Closure bags feature wire closure strip across bag top and rounded corners
- Strainer bags have inner plastic mesh to protect from punctures

For Stomacher Model	Type	Mfr. No.	Cat. No.	Case of

Waring* Laboratory Blenders

Choice of seven blender styles with a variety of speed selections to meet the requirements of the most demanding mixing and blending applications.

- Single-, Two-, Three- and Variable-Speed Models
- Cloverleaf design
- Available from mini to extra-large capacity and heavy-duty 3hp motor
- Explosion-Resistant and Hazardous-Location Models
- Choice of glass and/or stainless-steel containers
- Sturdy, diecast metal bases and stainless-steel blades
- All durably constructed for years of dependable service
- Epoxy-coated bases with chrome top pieces on all models, except for the aluminum and steel base (Hazardous-Location Model)
- Heat-resistant borosilicate glass (integral handle) or stainless-steel (attached handles)
- Two-piece vinyl and styrene lids on all models except for Three-Speed Extra-Large-Capacity Model (two-piece stainless-steel lid, gasket, and two clampdown latches)

ORDERING INFORMATION:

Electrical requirements for all models: 115/120V 50/60Hz

INCLUDES:

Base, container, 3-wire grounded cord and plug.

CERTIFICATIONS:

Select models UL-listed; see ordering chart.

ACCESSORIES

Mini-Sample Containers

Stainless-steel blending assemblies are for use with 1L (34 oz.) capacity blenders (nominal capacity; actual capacity depends on container used).

- Snap-fit cover
- Cloverleaf design

14-509-18A

Capacity	Cat. No.	Each
12 to 37mL	14-509-18A	240.00
37 to 110mL	14-509-18B	245.00
50 to 250mL	14-509-18C	270.00

ACCESSORIES

Waring* Laboratories Stainless-steel Dry Blending Container

Fits 1L (34 oz.) capacity blenders (nominal capacity; actual capacity depends on container used).

- One-piece stainless-steel lid with knob
- Stainless-steel handle
- Special blade for dry homogenizing and pulverizing
- 500mL approximate working capacity

08-413-16

REQUIRED ACCESSORIES:
Some applications such as soil processing require Adapter (14-509-16) and larger motor units.

Cat. No.	Each
08-413-16	515.00

Glass Container

Fits 34 oz. (1L) capacity blenders (nominal capacity; actual capacity depends on container used). Without cover or blending assembly.

Cat. No.	Each
14-509-11A	42.00

Stainless-Steel Blade Assembly

Two-piece construction fits 14-509-11A container.

Cat. No.	Each
14-509-12	25.00

Specifications and Ordering Information for Waring* Blenders

Capacity (Nominal)	Container	Base	Overall H (max)	RPM	Features	Amps/Watts/hp	Cat. No.	Each
Single Speed								
34 oz. (1L)	40 oz. (1.2L) glass	Epoxy coated; chrome top; 7" dia. (18cm)	16" (41cm)	22,000	Processes up to 1.2L (34 oz.) of material with high liquid content. Water load, 20 oz. (590mL). Motor is mounted on rubber cushions.	3.6/432/0.4	**14-509-10†**	250.00
Two Speed, with Timer								
34 oz. (1L)	40 oz. (1.2L) glass	Epoxy coated; chrome top; 8½L × 7¼"W (22 × 18cm)	16" (41cm)	18,000/22,000	Processes up to 1.2L (34 oz.) of material with high liquid content. Water load, 20 oz. (590mL). Mechanical timer for 1- to 180-second timing cycle, positive push-button solid-state speed control, timer light.	3.6/432/0.4	**14-509-7M†**	360.00
34 oz. (1L)	1 qt. (946mL) stainless steel	Epoxy coated; chrome top; 8½L × 7¼"W (22 × 18cm)	15" (38cm)	18,000/22,000	(Same as 14-509-7M, above.)	3.6/432/0.4	**14-509-7P†**	420.00
Two Speed, Commercial								
34 oz. (1L)	40 oz. (1.2L) glass	Epoxy coated; chrome top; 8½L × 7¼"W (22 × 18cm)	16" (41cm)	18,000/22,000	Processes up to 1.2L (34 oz.) of material with high liquid content. Water load, 20 oz. (590mL). High torque motor, push-button solid-state speed control.	3.6/432/0.4	**14-509-19†**	312.00
34 oz. (1L)	1 qt. (946mL) stainless steel	Epoxy coated; chrome top; 8½L × 7¼"W (22 × 18cm)	15" (38cm)	18,000/22,000	(Same as 14-509-19, above.)	3.6/432/0.4	**14-509-17†**	365.00
Two Speed, Explosion Resistant								
34 oz. (1L)	40 oz. (1.2L) glass	Epoxy coated; 7" dia. (18cm)	16" (41cm)	18,000/22,000	For use with volatile substances; has completely sealed base unit. Requires external compressed air to cool and purge motor, with minimum delivery of 10 SCFM (283L/min.) discharging at 10psig (69kPag).	3.6/432/0.7	**14-509-7A**	1195.00
Three Speed, Extra-Large-Capacity								
128 oz. (3.8L)	Two-handle stainless-steel container	Epoxy coated; 8L × 8¼"W (20 × 21cm)	26" (66cm)	16,000/18,000/ 20,000-20,000 (pulse)	Processes up to 1 gal. (3.8L) of free-flowing material with high liquid content. Use with 14-509-16 Adapter and accessory containers to process smaller quantities of heavier materials. Heavy-duty 3.75hp motor. Base available without container (see next model).	15.0/1800/3.0	**14-509-66**	1780.00
Base only	None. Accepts 128 oz. (3.8L) stainless-steel container	Epoxy coated; 8L × 8¼"W (20 × 21cm)	26" (66cm)		(Same as 14-509-66, above.)	15.0/1800/3.75	**14-509-65**	1252.00
Variable Speed								
34 oz. (1L)	40 oz. (1.2L) glass	Epoxy coated; chrome top; 7¼W × 8½"L (18 × 22cm)	16" (41cm)	1000-22,000	Variable speed adjustments for mixing, stirring, blending, or homogenizing. ON/OFF switch allows for preadjusted speeds for reproducible results.	3.0/360/0.4	**14-509-60**	675.00
34 oz. (1L)	34 oz. (1L) stainless steel	Epoxy coated; chrome top; 7¼W × 8½"L (18 × 22cm)	15" (38cm)	1000-22,000	(Same as 14-509-60, above.)	3.0/360/0.4	**14-509-38**	717.00
Hazardous Location								
Base only	None. Accepts 34 oz. (1L) container	Aluminum and steel; 10" dia. (25cm)	15" (38cm)	18,500	Processes highly volatile materials. Prevents electrical arcing and heat generated within the motor housing from igniting ambient atmospheres in hazardous locations. With totally enclosed, single-phase, one-speed universal motor, required for explosion prevention. UL listed for use in Class 1, Group D Hazardous locations when used with 14-509-37 Stainless-steel Container and 14-509-32 Switch (purchased separately).	8.0/920/0.7	**14-509-31†, ‡**	6181.00

---

† UL listed.

‡ UL listed for use in Class 1, Group D Hazardous locations when 14-509-31 base unit is used with 14-509-37 container and 14-509-32 switch (both available through your Fisher Scientific Customer Service Representative).

BOILING AIDS

Boiling Aids

Control the roll. These chips minimize bumping and spread the boiling area. Most resist most chemicals, are noncontaminating, and won't scratch glassware.

*Fisherbrand** Coated and Cleaned Clear Boston Rounds

Safety-Coated Clear Boston Rounds

Ideal for field sampling applications

- Shatter-resistant coating reduces chance of breakage
- If broken, safety coating will contain contents long enough for disposal
- Non-slip coating also allows greater ease of stability, wet or dry
- Narrow mouth
- Not autoclavable

Kimax* Glass Sampling Bottle

Square cross section

- Particularly useful for water sampling, milk dilutions, and tissue culture work.
- Autoclavable, black phenolic, rubber-lined caps included

02-945-10

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of 48
6⅘ oz. (200mL)	28mm-400	14250 200	**02-945-10**	153.69

Wheaton Second Skin* Plastic-Coated Glass Safety Bottles

PVC coated

- Retain contents and most glass fragments for safe, easy disposal
- Coating is inert and highly resistant to strong acids, alkalis, and most solvents
- Coating reduces risk of personal injury or contamination
- Black foil-lined caps included
- Screw cap size: 38mm-430
- Not autoclavable

COMPLIANCE:
Helps meet OSHA requirements for safe handling and disposal of toxic or noxious substances.

*Fisherbrand** Coated and Cleaned Amber Wide-Mouth Packers

Safety-Coated Amber Wide-Mouth Packers

Ideal for field sampling applications

02-911-829, -906, 02-912-317

- Shatter-resistant coating reduces chance of breakage
- If broken, safety coating contains contents long enough for disposal
- Nonslip coating also allows greater ease of stability when wet or dry
- Not autoclavable

Pyrex* Round Wide-Mouth Media Storage Bottles

NEW

Designed for heavy-duty storage as well as mixing and sampling

13-700-404, -405, -403

- Extra wide mouth (69mm inner diameter) gives easier access for pouring and removing pastes, powders and larger items
- Neck opening is five times larger than on GL45 threaded bottles—easier to add or remove powders and easier to clean
- High thermal shock resistance; usable up to 500°C and in microwave ovens
- Pyrex bottles can be sterilized by autoclaving or dry heat; polypropylene caps can be autoclaved
- Permanent white enamel graduations and marking spot
- Traceability Code for easier documentation

INCLUDES:
Linerless, one-piece, autoclavable, orange polypropylene plug-seal. GLS80 threaded cap with drip-free pouring rim.

ALERT:
Do not tighten caps immediately after autoclaving, as the vacuum resulting from cooling can cause breakage.

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of 10

Wheaton Glass Wide-Mouth Bottles with Second Skin* Safety Coating

Coating protects bottles from damage

- Clear bottles of Type III soda-lime glass with PVC coating
- Retain contents and most glass fragments for safer, simpler disposal
- Inert coating is highly resistant to strong acids, alkalis, and most solvents
- Help meet OSHA requirements for safe handling and disposal of toxic or noxious substances

Nalgene* HDPE Boston Round Bottles

Designed for demanding lab use

- With polypropylene caps
- Durable, uniform walls are resistant to splitting or puncturing
- Ideal for storing, shipping and packaging liquids for long periods
- Rigid and translucent, with excellent chemical resistance
- Can be used with most corrosives
- Good for freezer use to -100°C
- Manufactured in compliance with ISO 13485:2003 quality requirements.

02-923 Series

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* Amber HDPE Boston Round Bottles

Designed for demanding lab use

- Opaque amber HDPE with opaque amber polypropylene caps
- Durable, uniform walls are resistant to splitting or puncturing
- Leakproof[†], linerless caps included
- Manufactured in compliance with ISO 13485:2003 quality requirements

COMPLIANCE:

Meet USP requirements for light-resistant containers.

02-923-56, 03-313-60, 03-313-56

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of

[†] For definition of "leakproof," see p. 172.

Nalgene* Polypropylene Boston Round Bottles

Excellent chemical resistance

- Ideal for lab applications requiring excellent chemical resistance and autoclaving of containers with or without contents
- Translucent; better clarity than HDPE or LDPE
- Leakproof[†] polypropylene screw caps included

NOTE:

Completely disengage threads or remove caps before autoclaving.

*Fisherbrand** Wide-Mouth Polypropylene Jars

Higher temperature resistance than LDPE or HDPE

- Handles up to 135°C (275°F) for short periods and 100°C (212°F) continuously
- Brittleness temperature of 0°C (32°F)
- Rigid walls
- Excellent chemical resistance
- Can be sterilized by all normal methods, except dry heat and radiation
- Polypropylene linerless screw caps included

NOTE:

Completely disengage threads or remove cap before autoclaving.

Nalgene* Straight-Side Jars

Polycarbonate Jars

Useful for collecting and storing pastes, solids, specimens, and lab supplies

- Excellent for coldroom and refrigerated use
- Transparent polycarbonate jars
- With wide mouths and no shoulders to trap materials
- Nontoxic; autoclavable
- White polypropylene screw caps included

02-925 Series

NOTE:
Completely disengage threads or remove caps before autoclaving.

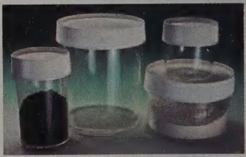
Nalgene* Transparent Polymethylpentene Jars

Straight-sided jars with white screw caps

- Caps have recessed tops for stacking
- Excellent chemical resistance
- Excellent museum jars, formaldehyde loss approximately 2% a year
- 4 and 8 oz. sizes fit Osterizer* and other blenders with Mason jar threads
- Autoclavable
- White polypropylene screw caps included



11-823 Series

NOTE:
Completely disengage threads or remove caps before autoclaving.

Biomedical Polymers Screw-Top Multipurpose Containers

Designed for the collection, transport and storage of specimens and samples

- Nongraduated, white containers
- Polypropylene offers excellent chemical resistance
- Containers and lids are autoclavable
- Screw-top lid has three-ply polypropylene copolymer liner that forms a tight seal, preventing leaks and odors
- Screw-top lids included

02-544 Series

Capacity	Mfr. No.	Cat. No.	Case of 25

16 oz. (500mL)	28mm-410	**02-912-323**	48/128.66
32 oz. (1000mL)	38mm-430	**02-912-324**	24/91.41

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

*Fisherbrand** HDPE Bulk-Packaged Field-Sample Bottles

Excellent chemical resistance

- Bulk packaging makes these containers ideal for field sampling and for storing and transporting liquids
- Rigid and translucent
- Polypropylene screw caps included

02-895D

Capacity	Screw Cap Size	Cat. No.	Case of
4 oz. (125mL)	24mm	**02-895A**	500/317.03
8 oz. (250mL)	24mm	**02-895B**	250/227.35
16 oz. (500mL)	28mm	**02-895C**	125/169.12
32 oz. (1000mL)	38mm-430	**02-895D**	50/108.35

*Fisherbrand** Amber Narrow-Mouth HDPE Bottles

Protect light-sensitive materials during sampling, shipping or storage

- Amber polypropylene screw caps included

COMPLIANCE:
U.S. Pharmacopoeia 661†

NOTE:
Fisherbrand HDPE containers can be used for long-term storage, but direct UV exposure should be avoided.

03-007 Series

Capacity	Screw Cap Size	Cat. No.	Pack of	Case of
4 oz. (125mL)	24mm	**03-007-46**	12/15.14	6 Pk./68.24
8 oz. (250mL)	24mm	**03-007-47**	12/18.80	6 Pk./96.39
16 oz. (500mL)	28mm	**03-007-48**	12/45.83	4 Pk./122.23

64 oz. (2L)	38mm-430	**03-007-50**	1/7.80	6 Pk./31.20

†U.S. Pharmacopoeia 661(Containers, Light Transmission) states that a "light resistant" container must comply with requirements for maximum light transmission. Fisherbrand amber bottles pass the USP light transmission test. USP criteria states that a container greater than 20mL in size cannot allow more than 10% light transmission for any wavelength between 290 and 450 nanometers, measured every 20nm.

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

*Fisherbrand** HDPE Cylinder Rounds

Ideal for storing, shipping, and packaging liquids for long periods

- Rigid and translucent
- Shoulder permits pouring of small quantities without spilling
- Narrow mouth
- Natural color
- With or without caps

† For definition of "leakproof," see left.

Nalgene* Amber HDPE Diagnostic Bottles

Resist splits and punctures

- Opaque amber HDPE with opaque amber polypropylene caps
- Meet USP requirements for light-resistant containers
- Designed for demanding lab use
- Durable, uniform walls are resistant to splitting or puncturing
- Leakproof†, linerless caps
- Manufactured in compliance with ISO 9001 quality requirements

03-313-24B, 03-313-25B

INCLUDES:

Opaque amber polypropylene caps

COMPLIANCE:

Meet USP requirements for light-resistant containers.

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of
¼ oz. (8mL)	20mm-415	312004-9025	**03-313-24B**	2000/761.00
½ oz. (15mL)	20mm-415	312004-9050	**03-313-25B**	2000/787.75

† For definition of "leakproof," see below.

Nalgene* Amber Narrow-Mouth HDPE Sample Bottles

Protect light-sensitive liquids during sampling, shipping or storage

- Amber HDPE reduces UV light transmission.
- Leakproof†, amber polypropylene screw caps included

03-313-1E, -1F, -1C

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of
1 oz. (30mL)	20mm-415	DS2085 0001	**03-313-1A**	72/79.90

32 oz. (1000mL)	38mm-430	DS2085 0032	**03-313-1F**	24/113.50

† For definition of "leakproof," see below.

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* Narrow-Mouth HDPE Packaging Bottles

Ideal for diagnostics, biologicals, specialty chemicals, reagents, adhesives and veterinary pharmaceuticals

- Injection blow molded for uniform wall thickness and strength
- Tough plastic construction; guaranteed leakproof†
- Made from high-purity, food-grade resins; no plasticizers, fillers or extenders
- Polypropylene caps included

COMPLIANCE:

Manufactured in compliance with ISO 13485:2003 quality requirements

Nalgene* Low-Particulate HDPE Bottles

Excellent for storing high-purity chemicals

- Average particle level of less than 30 particles per mL at 0.3µm and greater
- Nonsterile; leakproof†
- Suitable for use as inner containers in UN combination packaging
- Polypropylene screw caps included

03-313-87 Series

INCLUDES:
Certificate of quality per Nalgene specifications

COMPLIANCE:
IP2 bottles have been hydrostatically tested to meet UN Performance Capability requirements of 15psi (103 kPa).

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of

† For definition of "leakproof," see p. 178.

Nalgene* LDPE Narrow-Mouth Bottles

Ideal for trace metal analysis

- Translucent, impact resistant and extremely low in trace metal content
- Leakproof†
- Good for freezer use to -100°C
- Excellent chemical resistance to most acids, bases and alcohols
- Polypropylene screw caps included

02-924-6C

Wheaton Leak-Resistant Plastic Bottles

No-drip pour lip facilitates clean, safe pouring

- Leak-resistant, double-seal closure system
- Caps remain tight over an extended time
- Available in polypropylene, or high- or low-density polyethylene
- Choose narrow or wide mouth, natural or amber
- Ideal for short- and long-term storage and packaging
- Convenience packed
- Caps included

Nalgene* Large-Capacity Polycarbonate Bottles

Excellent impact resistance

- Clear polycarbonate bottles
- 16 oz. and ¼ gal. sizes are good for smaller volume applications where contents need to be seen
- ½ and ⅔ gal. sizes can be used as culture vessels for batch, suspension or nonattached roller culturing
- 1 and 2 gallon sizes have shoulder loops
- Good for freezer use to -135°C
- Leakproof†, polypropylene screw caps included

02-960-52 Series

NOTE:

Before autoclaving, completely disengage threads or remove cap.
Autoclave empty. Repeated autoclaving will shorten the bottle life.

Nalgene* PFA Narrow Mouths

Temperature, chemical and corrosion resistant

- Withstand -270° to +250°C (-454° to +482°F)
- Inert to virtually all chemicals except molten alkali metals, fluorine at high temperatures, and complex halogenated compounds at high temperatures and pressures
- Packaged individually
- Leakproof[†], linerless PFA screw caps; included

NOTE:
Completely disengage threads or remove cap before autoclaving.

Nalgene* Polypropylene Diagnostic Bottles

ORDERING INFORMATION:
Caps sold separately (Cat. No. 03-700-27).

02-923-120

Capacity	Finish	Mfr. No.	Cat. No.	Case of 2000
1/8 oz. (3.4mL)	13mm-415	362006-9125	**02-923-120**	452.06

Nalgene* Large Polypropylene Bottles

Ideal for corrosive chemicals and distilled water storage

- Autoclavable
- One-third the weight of glass
- Built-in shoulder loops on 1- and 2-gallon sizes only
- Translucent; better clarity than LDPE bottles
- Leakproof[†], polypropylene screw caps included

NOTE:
Completely disengage threads or remove cap before autoclaving.

02-924B

† For definition of "leakproof," p. 180.

Nalgene* Large Amber Polypropylene Bottles

Ideal for storing light-sensitive materials

- Autoclavable
- 1- and 2-gallon sizes have shoulder loop
- Leakproof[†], polypropylene screw caps included

COMPLIANCE:
Comply with U.S. Pharmacopeia XXIII requirements for maximum allowable light transmission.

NOTE:
Completely disengage threads or remove cap before autoclaving.

PLASTIC—WIDE MOUTHS, ROUND

*Fisherbrand** Leak-Resistant HDPE Wide-Mouth Bottles

Economical bottles with a double-seal, leak-resistant cap

- Translucent HDPE
- No drip lip ensures safe, clean pouring
- Linerless screw caps attached

02-911-955, -958, -975

Capacity	Screw Cap Size	Cat. No.	Case of
1 oz. (30mL)	28mm-410	**02-911-974**	72/82.85

*Fisherbrand** Amber Wide-Mouth HDPE Bottles

NEW

Reduce UV light transmission to protect light-sensitive liquids

- Amber high-density polyethylene
- Wide mouth allows easy retrieval of grab samples and reduces turbulence when filling
- Amber polypropylene screw caps included

03-007-52, -53, -51

COMPLIANCE:
U.S. Pharmacopoeia 661[†]

NOTE:
Fisherbrand HDPE containers can be used for long-term storage, but direct UV exposure should be avoided.

Capacity	Screw Cap Size	Cat. No.	Pack of	Case of
2 oz. (60mL)	28mm	**03-007-51**	12/18.80	6 Pk./75.21
4 oz. (125mL)	38mm	**03-007-52**	12/20.65	6 Pk./82.59
8 oz. (250mL)	43mm	**03-007-53**	12/31.48	6 Pk./125.91
16 oz. (500mL)	53mm	**03-007-54**	12/42.83	4 Pk./114.21
32 oz. (1L)	63mm	**03-007-55**	6/49.04	4 Pk./130.77

[†] U.S. Pharmacopoeia 661(Containers, Light Transmission) states that a "light resistant" container must comply with requirements for maximum light transmission. Fisherbrand amber bottles pass the USP light transmission test. USP criteria states that a container greater than 20mL in size cannot allow more than 10% light transmission for any wavelength between 290 and 450 nanometers, measured every 20nm.

*Fisherbrand** Bulk-Packaged Field Sample Bottles

Ideal for field sampling

- Translucent bottles feature all the same characteristics and advantages of Fisherbrand HDPE Wide Mouth Round Bottles except in bulk packaging
- Polypropylene screw caps included

02-895-1C

Capacity	Screw Cap Size	Cat. No.	Case of
4 oz. (125mL)	38mm	**02-895-1A**	500/352.17
8 oz. (250mL)	43mm	**02-895-1B**	250/261.95
16 oz. (500mL)	53mm	**02-895-1C**	125/192.24
32 oz. (1000mL)	63mm	**02-895-1D**	50/120.66

Fisherbrand* PET Bottles

Transparent PET bottles provide a clear view of contents

- Lightweight, with good chemical resistance
- Can withstand temperatures from -20° to +80°C (-4° to +176°F)
- Can be EtO sterilized; not autoclavable
- Snap-on caps included

03-319C

Capacity	Neck Opening	Cat. No.	Case of 50
1 oz. (30mL)	25mm	**03-319A**	87.40
1⅝ oz. (50mL)	36mm	**03-319B**	111.59
3⅜ oz. (100mL)	34mm	**03-319C**	132.78

Fisherbrand* Wide-Mouth LDPE Bottles

Translucent for better visibility; ungraduated

- Virtually unbreakable, yet very flexible
- Chemically resistant to most weak and strong acids and organic solvents, but can be slowly attacked by strong oxidizing agents and some solvents that can cause softening and swelling
- Maximum use temperature 80°C (176°F) with brittleness temperature of -100°C (-148°F)
- Bottles can be radiation, gas, EtO or chemically sterilized; not autoclavable
- Polypropylene screw caps included

02-896-1E

Capacity	Screw Cap Size	Cat. No.	Pack of	Case of
1 oz. (30mL)	28mm	**02-896-1A**	12/22.23	6 Pk./88.91
2 oz. (60mL)	28mm	**02-896-1B**	12/23.10	6 Pk./92.40

8 oz. (250mL)	43mm	**02-896-1D**	12/41.77	6 Pk./167.10
16 oz. (500mL)	53mm	**02-896-1E**	12/59.54	4 Pk./158.77
32 oz. (1000mL)	63mm	**02-896-1F**	6/52.20	4 Pk./139.21

Fisherbrand* HDPE Round Bottles

Rigid, translucent bottles are suitable for storing a variety of items including liquids, solids, and chemicals

- Leakproof†
- Higher temperature-use rating than LDPE—up to 120°C (248°F) for short periods and 110°C (230°F) for continuous uses
- Brittleness temperature at -100°C (-148°F)
- Bottles may be radiation, EtO, or chemically sterilized; not autoclavable
- Polypropylene screw caps included

02-896-2D, 2B

Capacity	Screw Cap Size	Cat. No.	Pack of	Case of
1 oz. (30mL)	28mm	**02-896-2A**	12/23.15	6 Pk./92.60
2 oz. (60mL)	28mm	**02-896-2B**	12/23.45	6 Pk./93.80

8 oz. (250mL)	43mm	**02-896-2D**	12/42.45	6 Pk./169.80
16 oz. (500mL)	53mm	**02-896-2E**	12/59.03	4 Pk./157.42
32 oz. (1000mL)	63mm	**02-896-2F**	6/53.71	4 Pk./143.23

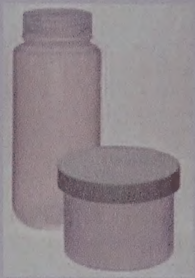
† For definition of "leakproof," see right.

Fisherbrand* Wide-Mouth Polypropylene Bottles

Higher temperature resistance than LDPE or HDPE

- Handle up to 135°C (275°F) for short periods and 100°C (212°F) continuously
- Brittleness temperature of 0°C (32°F)
- Rigid walls
- Excellent chemical resistance
- Can be sterilized by all normal methods, except dry heat and radiation
- Polypropylene linerless screw caps included

NOTE:
Completely disengage threads or remove cap before autoclaving.



02-896D, 02-891B

*† Fisher Scientific assigns the term "leakproof" to bottle/closure systems with closures smaller than 100mm after they are filled with water, are inverted, and withstand air pressure of 2psig for 2 minutes; or to bottle/closure systems of 100 or 120mm after they are filled with water and inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Fisher Scientific advises customers to test Fisherbrand* bottles and closures under conditions of their planned applications.*

*Fisherbrand** Wide-Mouth Graduated LDPE Bottles

NEW

Wide-mouth bottles provide easy filling and pouring

03-415-503, -502, -501, -500

Inner surfaces are smooth and rounded for thorough emptying and cleaning.

- Translucent for better visibility
- FDA-compliant LDPE is virtually unbreakable, yet flexible
- Ideal for general storage of liquids and powders
- Chemically resistant to most weak and strong acids and organic solvents
- Maximum use temperature: 80°C (176°F)
- Can be radiation, gas, EtO or chemically sterilized

Closures

- Polypropylene caps have valve-seal design for perfect, leakproof† fit with molded pouring lip and seal
- Deep square threads withstand vibration and help prevent closure back-off
- Ribbed caps provide good grip for tight closure and easy opening
- Protruding neck ring under cap holds shrink-wrap securely in place

INCLUDES:
Polypropylene screw caps

NOTE:
Not autoclavable. Strong oxidizing agents and some solvents can cause softening and swelling.

Capacity	Screw Cap Size	Cat. No.	Case of
4 oz. (125mL)	38mm	**03-415-500**	12/35.75
8 oz. (250mL)	45mm	**03-415-501**	12/52.57

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* FEP Bottles with Tefzel* ETFE Closures

Excellent chemical and temperature resistance

- Clear; leakproof[†]
- Withstand temperatures from -105°C (-157°F)
- Ideal for high- or low-temperature work, trace metal analysis and applications with organic solvents

02-924-15 Series

INCLUDES:
Tefzel ETFE caps

NOTE:
Before autoclaving, completely disengage threads or remove caps.

† For definition of "leakproof," see p. 184.

Nalgene* LDPE Wide-Mouth Bottles

Translucent bottles provide better visibility than HDPE bottles

- Flexible, with excellent impact resistance
- Good for freezing to -100°C
- Excellent chemical resistance to most acids, bases and alcohols
- Leakproof†

02-893-4 Series

INCLUDES:

Polypropylene screw caps

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of	Case of
1 oz. (30mL)	28mm-415	2103 0001	**02-893-4F**	12/24.98	6 Pk./99.90

† For definition of "leakproof," see p. 184.

Nalgene* Polypropylene Wide-Mouth Bottles

Use for storing chemicals and specimens

- Excellent chemical resistance to most acids, bases and alcohols
- Autoclavable, but completely disengage threads or remove cap first
- Leakproof†

02-893 Series

INCLUDES:

Polypropylene screw caps

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of	Case of
1 oz. (30mL)	28mm-415	2105 0001	**02-893AA**	12/27.57	6 Pk./110.25

† For definition of "leakproof," see p. 184.

Nalgene* Heavy-Duty Polypropylene Vacuum Bottles

Sturdy, thick-walled bottle, ideal for heavy-duty biotechnology lab use

- Autoclavable and chemical resistant; leakproof†
- Can withstand repeated room-temperature vacuum applications
- Rugged 53B and 83B closures of polypropylene with TPE gaskets
- Use as a waste aspirator bottle or as autoclavable vessel for scaleup activities in cell culture applications

Left to right, front: 02-923-5, 02-923-3, 06-443A; back: 02-923-11

INCLUDES:

Polypropylene caps

NOTE:

Completely disengage threads or remove caps before autoclaving

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Price	Case of

Wheaton Leak-Resistant Wide-Mouth HDPE Bottles

Natural and Amber HDPE Bottles

- Leak-resistant, double-seal closure system
- Attached closures remain tight over an extended time
- Available in polypropylene, or high- or low-density polyethylene
- Ideal for short- and long-term storage and packaging
- Convenience packed

PLASTIC—WIDE MOUTHS, SQUARE

*Fisherbrand** Graduated Square HDPE Bottles

Save valuable shelf space—while providing greater materials storage

- Graduated in mL
- Ideal for shipping and storing solid chemicals, liquids and pastes
- Wide mouth for convenient cleaning, sample filling and retrieval
- HDPE screw cap with LDPE inner security seal eliminates leaks
- Attachment holes on closure and bottle shoulder permit attachment of identification tag or custody seal

Corning* Square Polycarbonate Storage Bottles

NEW

Ideal for storage, mixing or sampling

13-700-412, -402, -400, -401

Easier to handle; require less space on the shelf or in the autoclave.

- Polycarbonate resin makes them more break resistant than other glass or plastic bottles
- 45mm size cap provides larger access for liquid transfer
- Screened graduations are easier to see when compared to molded
- Sterile; individually packaged
- Large marking spot
- Linear tear packaging
- Can be autoclaved once at 121°C and 15psi
- Linerless, one-piece, autoclavable orange GL45 threaded polypropylene plug-seal caps included

APPLICATIONS:
Pharmaceutical and cell culture laboratories, academic institutions, life science applications, and any application that requires storage, mixing or sampling.

NOTE:
Repeated autoclaving weakens polycarbonate and is not recommended.

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of 24
4 oz. (125mL)	45mm	431430	**13-700-400**	87.84

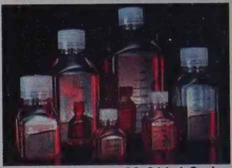
32 oz. (1L)	45mm	431433	**13-700-402**	199.26

Nalgene* Square Polycarbonate Bottles

Durable bottles for storage of aqueous solutions and short-term storage of media

- Autoclavable, transparent bottles
- Mouths are wider than conventional narrow-mouth bottles
- With molded-in graduations and drip-proof spout
- 64 oz. (2L) capacity has white polypropylene cap and molded-in hand grips
- Leakproof†, polypropylene screw closures included



03-311-1 Series

NOTE:
Remove cap or completely disengage threads before autoclaving. Autoclave empty. Repeated autoclaving will shorten bottle life.

† For definition of "leakproof," see p. 178.

Nalgene* Square Polypropylene Bottles

Repeatedly autoclavable and resistant to acids, alcohols, and bases

- Mouths are wider than conventional narrow-mouth bottles
- Square shape saves shelf space
- Translucent bottles provide visible liquid level
- Useful between 0° and 135°C (32° and 275°F)
- With molded-in graduations and drip-proof spout for easier measuring and dispensing
- Leakproof†, polypropylene caps included

03-310 Series

NOTE:
Remove cap or completely disengage threads before autoclaving.

[†] *For definition of "leakproof," see p. 178.*

Nalgene* HDPE Large Square Bottle

Molded-in handgrips provide greater convenience and safety when pouring

- Useful for collecting, storing and transporting dry chemicals, environmental samples, reagents and distilled water
- Good for freezing to -100°C
- Excellent chemical resistance to most acids, bases and alcohols
- Square shape saves space, handles easily
- Wide mouth gives easy access
- Leakproof[†], polypropylene caps included

02-925-4

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of 6
1 gal. (4L)	100mm-415	2123 0010	**02-925-4**	31.13	124.50

[†] *For definition of "leakproof," see p. 178.*

Nalgene* Polypropylene Large Square Bottle

Excellent for storing and autoclaving contaminated slides and other small lab equipment

- Autoclavable; wide mouth
- Molded-in hand grips
- Translucent; better clarity than HDPE
- Polypropylene screw caps included

NOTE:

Completely disengage threads or remove cap before autoclaving.

[†] *For definition of "leakproof," see p. 178.*

Nalgene* Rectangular HDPE Bottles

Excellent for sampling, transporting or storing liquids or dry materials

- Good for freezing to -100°C
- Space-saving rectangular style
- Sturdy wall construction, straight sides and wide mouth for easy filling
- Leakproof[†], polypropylene screw caps included

02-924-5E, -5C

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of	Case of

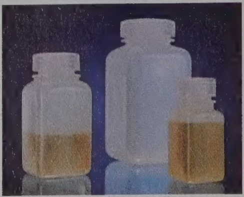
Nalgene* Square HDPE Bottles

Square shape saves shelf space

- Good for freezer use to -100°C
- Ideal for transporting samples
- Leakproof† polypropylene screw caps included



03-312B, 03-312C, 03-312AA

Nalgene* Square Polypropylene Bottles

Wide mouth for easy cleaning, sample filling and retrieval

- Leakproof† polypropylene bottle and cap
- Square design saves space; has large area for labeling
- Resistant to acids, alcohols and bases
- Translucent; better clarity than HDPE bottles
- Autoclavable

03-311-2B, -2C

NOTE:
Completely disengage threads or remove cap before autoclaving.

Nalgene* HDPE Wide-Mouth Square Bottles

Designed for demanding lab use

- Wide mouth for easy filling and pouring
- Square shape saves shelf space
- Durable, uniform walls are resistant to splitting or puncturing
- Leakproof†, linerless polypropylene caps
- Manufactured using ISO 13485:2003-certified processes.

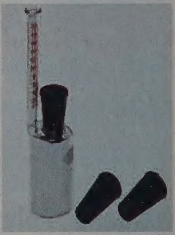
SPECIALTY—BABCOCK

Kimax* Babcock Bottles for Cheese Testing

Paley centrifuge bottles feature large stoppered opening next to neck to accommodate both liquids and solids

- Let you pour sample directly into body, eliminating the danger of sample sticking to neck
- Stir bar can also be used through opening to smooth or spread out sample
- Graduated to 20% in 0.2% subdivisions, or to 50% with 0.5% increments
- Bottles are marked with permanent brown stain
- Sample size: 9g
- Overall height: 165mm
- Both bottles can be used for cheese testing, but the 20% bottle can also perform ice cream tests
- Three rubber stoppers included



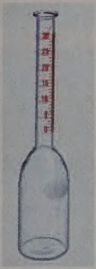
12-725-25

Graduated To	Tolerance	Mfr. No.	Cat. No.	Case of 3
20%	±0.2%	508 20	**12-725-25**	148.44
50%	±0.5%	509 50	**02-943-10**	148.44

Kimax* Babcock Bottles for Cream Testing

With "Sealed 3" marking

- Bottles graduated to 50% in 0.5% subdivisions
- Graduations are marked with permanent brown stain
- Overall height: 165mm
- Marked "Sealed 3" for states requiring this special designation



12-700-30

Graduated To	Sample Size	Tolerance	Mfr. No.	Cat. No.	Case of 12
50%	9g	±0.25%	2085S 50	**12-705-1**	143.16
50%	18g	±0.5%	2015S 50	**12-700-30**	184.08

Kimax* Babcock Bottle for Gasoline Testing

For determination of unsaturated hydrocarbons in gasoline

- Recommended for use in tests like E8 of the Barrett Company
- Modified design permits use of about four times the oil permitted in an ordinary Babcock bottle
- Durable white scale; neck capacity, 10mL
- Graduated to 100% in 2% subdivisions
- Tolerance: ±1%
- Overall height: 164mm

06-904

COMPLIANCE:

Designed for Babcock Method according to U.S. Bureau of Mines, Technical Paper 323, Method 550.1.

Mfr. No.	Cat. No.	Pack of 6	Case of 2 Packs
15066 10	**06-904**	**206.90**	302.04

Kimax* Babcock Bottles for Milk Testing

8% Bottle with "Sealed 3" marking

- Graduations marked with permanent brown stain
- Vertical line allows direct reading of percent butterfat
- Neck is graduated to 8% in 0.1% subdivisions
- Tolerance: ±0.1%
- Sample size: 18g
- Overall height: 165mm

COMPLIANCE:

Meets specifications of AOAC and Fed. Spec. DD-B-603

12-700-17

Graduated To	Tolerance	Mfr. No.	Cat. No.	Case of 12
8%	±0.1%	1003S 8	**12-700-17**	208.32

Kimax* Babcock Bottles for Ice Cream Testing

- Graduated to 10% in 0.1% subdivisions
- Scale is marked with permanent brown stain on neck
- Sample size: 18g
- Overall height: 165mm

12-700-15

Graduated To	Tolerance	Mfr. No.	Cat. No.	Case of 12
10%	±0.1%	1025 10	**12-700-15**	179.76

SPECIALTY—BOD

Pyrex* Water Sampling/Reagent Bottle

- With interchangeable stopper ground to a 1:10 taper

ORDERING INFORMATION:

Dia. × H: $2\frac{1}{4} \times 5\frac{19}{32}$" (57 × 142mm).

COMPLIANCE:

Meets APHA requirements

125 mL
PYREX

03-374

Capacity	Mfr. No.	Cat. No.	Case of 24
4 oz. (125mL)	1580 125	**03-374**	1056.72

Kimax*-35 300mL BOD Bottles

For sampling and incubation of aqueous samples for biochemical oxygen demand (BOD) analysis

Flared mouth forms a water seal to prevent air from being drawn into the bottle during incubation, while shoulder radius provides an interior shape that sweeps entrapped air out of the stopper opening.

- Type 1, Class B borosilicate glass
- Stopper design ensures that no air is entrapped in sample
- Available numbered and unnumbered

02-885A shown with optional 02-939 snap lid

- Optional snap lid secures stopper in bottle and reduces evaporation of water seal during incubation (sold separately, 02-939)

ORDERING INFORMATION:
Dia. × H: 2¾ × 6½" (69 × 165mm); neck I.D. approximately ⅔" (16.7mm)

COMPLIANCE:
Conforms to ASTM* E 438

No. Sequence	Mfr. No.	Cat. No.	Case of 24
With Stopper			
01-24	15070 01	**02-885B**	271.92
25-48	15070 25	**02-885C**	274.32
Unnumbered	15070 00	**02-885A**	261.12
Without Stopper			
Unnumbered	15070G 00	**02-940-1A**	222.48

Wheaton BOD Bottles

With glass robotic or pennyhead stoppers

Borosilicate glass bottles in 60 or 300mL sizes, numbered or unnumbered.

Bottles

- Borosilicate glass, 60 or 300mL, numbered or unnumbered
- With permanent marking areas; numbered versions are also bar-coded
- Specially designed shoulder radius sweeps all air from inside the bottle during filling
- 300mL bottles are recommended for the five-day BOD test referenced in *Standard Methods for the Examination of Water and Wastewater*, 18th Edition, 5210B, 1992

02-926-27

Stoppers

- Interchangeable 400-glass stoppers have tapered bottoms that also prevent air entrapment
- Flared mouth of bottle forms a water seal around stoppers that prevents air from being drawn in during incubation
- Stopper joint is compatible with the probes of the leading BOD and DO meters
- Glass robotic stoppers are compatible with most robotic systems

02-926-8

ORDERING INFORMATION:
Dimensions: 300mL bottles are 2¾ diameter × 6½" high (69 × 165mm); 60mL bottles are 1¾ diameter × 4½" high (43 × 115mm).

APPLICATIONS:
Use to incubate diluted samples of sewage, sewage effluents, polluted waters and industrial wastes to determine the amount of oxygen required during stabilization of decomposable organic matter by aerobic biochemical action.

---

[1] Maximum force varies greatly among glass bottles, depending on factors such as the rotor, size of the load, quality of the glass, and the age and condition of the bottle. Only after testing the bottle in actual conditions can the maximum force be determined.

[2] Requires adapter cushion; contact your Fisher Scientific Customer Service Representative.

*[3] Use 05-579-13 (visit **www.fishersci.com**) to fit Thermo Scientific* Sorvall* GSA rotors.*

[4] Bottles designated as "leakproof" will not leak during ordinary use outside a centrifuge.

*[5] For maximum speed use Nalgene Sealing-Cap assembly (05-563-1D); to order, visit **www.fishersci.com**.*

Pyrex* Glass Centrifuge Bottles

Permit concentration of sediment for decanting operations

- Closure not included; use a No. 6 rubber stopper
- Large white marking area
- Heavy wall construction

05-586

Capacity	O.D. × L	Mfr. No.	Cat. No.	Case of

DISPENSING

*Fisher*brand* LDPE Dispensing Bottles

Versatile, reliable bottles and spouts

- LDPE bottles and spouts with sealer caps
- Sealer snaps on easily after use and gives tight seal
- Spout openings are standard 0.03" (0.08cm)
- Can be enlarged by cutting back with scissors

03-402B, -402C

Capacity	Screw Cap Size	Cat. No.	Pack of 12	Case of

Nalgene* FEP Drop-Dispensing Bottle

Dripless dropping of strong liquids

- Ideal for dispensing strong acids/alkalis, reagents, and solvents
- Dispenses drops without drips
- Transparent FEP resin construction
- Autoclavable (with tips uncapped)
- Tefzel* ETFE closure and captive plug for safe storage

03-007

Capacity	Mfr. No.	Cat. No.	Each	Case of 4
1 oz. (30mL)	2414 0030	**03-007**	58.25	155.33

Nalgene* LDPE Drop-Dispensing Bottles

Dispense a drop at a time with one hand

- Easy to fill and leakproof†
- Captive spout cap will not pop or leak when bottle is squeezed
- Dispenser top consists of polypropylene screw cap with spout and cap

03-006-3

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Pack of	Case of

8 oz. (250mL)	24mm-400	2411 0250	**03-006-4**	6/43.32	6 Pk./173.25

† For definition of "leakproof," see p. 178.

Nalgene* Polypropylene Copolymer Dispensing Bottles

Autoclavable, noncontaminating

- Linerless, noncontaminating with captive spout caps
- Fine, steady stream when squeezed
- Can be used to dispense sterile solutions
- Autoclave full, with tips uncapped
- Leakproof† blue polypropylene dropping closures with caps

03-007-1A

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Case of 6
4 oz. (125mL)	24mm-400	DS2420-0125	**03-007-1A**	43.40

DROPPING

*Fisher*brand* LDPE Dropping Bottle

Constructed of low-density polyethylene

- Includes tip and cap

02-911-870

Capacity	Screw Cap Size	Cat. No.	Case of 48
2 oz. (60mL)	24mm-410	**02-911-870**	184.19

*Fisherbrand** Amber Glass Dropping Bottles

Ideal for light-sensitive chemicals

- Amber glass protects light-sensitive chemicals
- Half-moon shape prevents rolling
- Screw cap with rubber bulb and glass pipet included

02-983A

Capacity	Cat. No.	Case of
1 oz. (30mL)	**02-983A**	72/373.00
2 oz. (60mL)	**02-983B**	36/87.94

Nalgene* LDPE Bottles with Dropper Control Tip

One-drop dispensing and excellent chemical resistance

- Leakproof[†]
- Contact-clear or white
- Dropper control tip snaps into place for a secure fit
- Dispensing tip and caps included

ORDERING INFORMATION:
Case of 25 bottles with assorted-color closures contains five bottles of each color (white, red, yellow, green, blue).

IMPORTANT TERMS TO KNOW

Low Particulate Processed—Low-particle processing is designed to remove particulate contaminants @ 0.5µm from glass and plastic containers to levels as low as <5pcs/mL.

Depyrogenated—Depyrogenation is the destruction and removal of fever producing substances commonly known as endotoxins. Effective depyrogenation must reduce endotoxin content by at least 99.9% or 3 logs. Containers processed to this standard are referred to as Pyrogen-free™.

DNase/RNase Processing—Containers are processed to remove traces of DNA and RNA resulting from human contact, bacterial contamination or contact with any biological substance.

TOC Processed—Total Organic Carbon as a measure of the amount of carbon covalently bound in organic molecules in a water sample. TOC processed containers are cleaned and certified to as low as 10ppb TOC as background.

WFI (Water For Injection)—WFI is purified to exceed USP specifications for TOC, conductivity, bacterial and endotoxin levels to provide a final product that meets FDA requirements. WFI water is a highly effective cleaning agent used in many scientific cleaning processes.

Steam Sterilization—Steam sterilization involves the application of steam, heat and pressure to destroy all viable forms of life including bacterial spores, to an acceptable sterility assurance level (SAL) of 10^{-6}. Steam sterilization does not remove endotoxins.

Gamma Radiation Sterilization—A gamma radiation dose, sufficient to destroy all viable forms of life including bacterial spores, is applied to achieve an acceptable sterility assurance level (SAL) of 10^{-6}.

BEFORE YOU BUY PROCESSED CLEAN CONTAINERS

PROCESS	APPLICATION
Low Particle Processed	Applications in the pharmaceutical, biotech, medical, and semiconductor industries; anywhere cleanrooms or controlled environments are utilized
Depyrogenated	Injectable or parenteral drugs, lyophilization, final packaging prior to drug delivery, stability studies, clinical trials
DNase/RNase Processed	Applications in molecular biology, pharmaceutical, biotech and medical research
TOC Processed	Validation of water systems, equipment validations, cleaning validations, and monitoring low levels of organic contaminants in numerous applications
Steam Sterilization	Injectable or parenteral drugs, lyophilization, final packaging prior to drug delivery, stability studies, clinical trials
Gamma Radiation Sterilization	Injectable or parenteral drugs, lyophilization, final packaging prior to drug delivery, stability studies, clinical trials
Sterile Foil Wrap	Injectable or parenteral drugs, stability studies, clinical trials
Surface Modification	Proteins, assays of blood serum, pharmacological assays of therapeutic drugs

Sterile Foil-Wrap—Glassware is sterilized via a validated dry-heat, foil-wrap method. Stoppers, seals and other closures are sterilized via autoclave methods.

Surface Modification—Glass, and in some cases plastic, containers are processed to provide controlled surface characteristics. Silanization and siliconization are two common methods of surface modification that yield a hydrophobic, nonreactive surface.

Processed Clean Containers

EP Scientific Environmental Containers

For laboratories and remediation companies

Various styles and sizes of certified clean and noncleaned, assembled-only containers prepared in two ways:

Level 1

- Each case is custody sealed
- Every container is labeled with a lot number for traceability to the enclosed Certificate of Analysis
- Processed one of two ways:
  1. *Cleaning Procedure A* for clear and amber glass 2 oz. (60mL) or larger, recommended for semivolatile, pesticide, and metal sampling
  2. *Cleaning Procedure B* for 1⅜ oz. (40mL) borosilicate glass vials and some larger bottles, recommended for volatile sampling

Level 3

- No EPA certification
- Can receive any cleaning procedure

CERTIFICATIONS:
Level 1 containers are certified to meet or exceed EPA standards for metals, pesticides, volatiles, and semivolatiles, depending on the procedure.

NOTE:
EP Scientific also offers custom cleaning services for additional applications. Contact your Fisher Scientific Customer Service Representative for more information.

Boston Round Bottles

- Clear or amber glass
- Level 1 bottles processed with Cleaning Procedure A
- Polypropylene caps with PTFE liners included

CERTIFICATIONS:
Certified for semivolatiles, pesticides, and metals sampling

I-Chem* Environmental Sample Type III Glass Jars and Bottles

High-quality containers cleaned to EPA standards

300 Series

- Processed, assembled, and packaged in strict accordance with I-Chem Performance-Based Specifications
- Quality control analyses performed
- Certificates of Analyses certify that products meet or exceed all analyte specifications established in the latest U.S. EPA *Specifications and Guidance for Contaminant-Free Sample Containers* document
- Certificate of Analysis (included) has a manual and laser-readable bar code of the Production Number for absolute traceability
- Bar-code label attached to each container with Production Number and Unique Container Identification Number
- Production Number also on box description label and can be used to reliably trace the container to I-Chem's internal documents and laboratory data
- Analysis labels are included in each case

200 Series

- Processed, assembled, and packaged in strict accordance with I-Chem Performance-Based Specifications
- Quality control analyses performed
- Certificates of Analyses certify that products meet or exceed all analyte specifications established in the latest U.S. EPA *Specifications and Guidance for Contaminant-Free Sample Containers* document
- Bar-code labels and Certificates of Analysis not provided (Certificate of Analysis available on request)
- Production Number on box description label

100 Series

- Same quality materials and materials specifications as 200 and 300 Series
- Not processed nor certified
- Analysis labels not included

05-719 Series

INCLUDES

Attached blue or black polypropylene closures with PTFE liners. Liners sized to remain firmly in caps.

ORDERING INFORMATION:

Replacement closures available; contact your Fisher Scientific Customer Service Representative.

Septa-Jar* Wide-Mouth Containers

- Type III glass jars
- Increase accuracy of soil headspace analysis by eliminating sample transfer step to minimize volatile loss
- Short containers in amber or clear glass—amber glass protects samples from UV light
- Each has blue polypropylene open-top cap with bonded PTFE resin/silicone septum ultrasonically bonded to cap

ORDERING INFORMATION:
Replacement caps are available; contact your Fisher Scientific Customer Service Representative.

CERTIFICATIONS:
300 and 200 Series septa jars are certified for volatile organic analysis.

EP Scientific EP Preserved* Containers

Chemical preservatives for the environmental sampling field

- Most commonly requested chemical preservatives in choice of containers and sizes

INCLUDES:

Certificate of Analysis for container and reagent

12-100 Series

Container Style	Chemical Preservative	Mfr. No.	Cat. No.	Case of
Volatile Organics Analysis				
40mL Clear Glass Vial	0.2mL 1:1 Hydrochloric Acid	PP140-40CEP.2HA	**12-100-255**	72/131.70
40mL Clear Glass Vial	0.2mL 1:1 Hydrochloric Acid	PP140-40CDB.2HA	**12-100-184**	144/247.76
40mL Amber Glass Vial	0.2mL 1:1 Hydrochloric Acid	PP141-40AEP.2HA	**12-100-183**	72/127.89
40mL Amber Glass Vial	0.2mL 1:1 Hydrochloric Acid	PP141-40ADB.2HA	**12-100-185**	144/247.76
1L Amber Boston Round	5mL 1:1 Hydrochloric Acid	PP112-01A.5HA	**12-100-273**	12/71.02
Metals Analysis				
125mL HDPE Cylinder	0.5mL 1:1 Nitric Acid	PP156-125W.5NA	**12-100-341**	48/150.74
250mL HDPE Cylinder	1.0mL 1:1 Nitric Acid	PP157-250W.1NA	**12-100-186**	24/81.70
500mL HDPE Cylinder	2.0mL 1:1 Nitric Acid	PP151-500W.2NA	**12-100-187**	24/92.81
1L HDPE Cylinder	5.0mL 1:1 Nitric Acid	PP150-01W.5NA	**12-100-344**	12/58.53
Nitrate/Nitrite, Chemical Oxygen Demand, Oil and Grease/TPH Analysis				
250mL Clear Glass Boston Round	0.5mL 1:1 Sulfuric Acid	PP114-250A.5SA	**12-100-188**	12/55.63
1L Clear Glass Boston Round	5.0mL 1:1 Sulfuric Acid	PP112-01A.5SA	**12-100-189**	12/68.97
Cyanides Analysis				
500mL HDPE Cylinder	1.0mL 10 Normal Sodium Hydroxide	PP151-500W.1SH	**12-100-192**	24/92.81

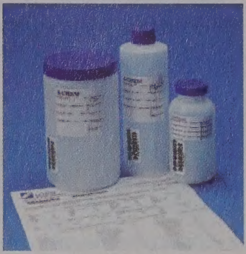
LOOKING FOR PRESAMPLING CONTAINERS?

EP Scientific offers many presampling containers not listed here. For custom quotes and help determining the correct amount of preservative for your specific containers and needs, contact your Fisher Scientific Customer Service Representative.

I-Chem* High-Density Polyethylene Jars, Bottles, and Packers

Meet or exceed U.S. EPA analyte specifications and detection/quantitation limits for applications like metal analyses

- 300 Series HDPE containers
- Bar-coded labels assist data collection; can be used with automated sample tracking systems
- "3 of 9" barcode format—the recognized standard for environmental field data collection
- Label encodes unique identification and production numbers for traceability
- Virgin container from each lot retained for one year should additional testing be required
- Variety of styles and sizes to meet testing requirements
- Polypropylene caps included



05-719-239, -145, -151

INCLUDES:

Certificate of Analysis and listing of all analytes with detection/quantitation limits.

Capacity	Dia. × H	Mfr. No.	Cat. No.	Case of
Cylinder Round				
8 oz. (250mL)	2 × 6⅛" (5.1 × 15.6cm)	313-0250	**05-719-146**	24/46.51
16 oz. (500mL)	2⅝ × 7⅜" (6.7 × 18.7cm)	313-0500	**05-719-145**	24/55.39
32 oz. (1L)	3⅛ × 9$\frac{9}{16}$" (7.9 × 24.3cm)	313-1000	**05-719-88**	12/32.76
Wide-Mouth Jars				
8 oz. (250mL)	2⅞ × 3$\frac{7}{16}$" (7.3 × 8.7cm)	311-0250	**05-719-245**	48/126.29
16 oz. (500mL)	3¾ × 4⅝" (9.5 × 11.8cm)	311-0500	**05-719-242**	24/82.95
32 oz. (1L)	3⅝ × 6⅝" (9.2 × 16.8cm)	311-1000	**05-719-239**	12/51.24
Boston Round Style				
4 oz. (125mL)	1¾ × 4$\frac{5}{16}$" (4.4 × 11cm)	319-0125	**05-719-151**	48/105.28
16 oz. (500mL)	3 × 6$\frac{9}{16}$" (7.6 × 16.7cm)	319-0500	**05-719-251**	24/89.49
32 oz. (1L)	3½ × 8⅝" (8.9 × 21.9cm)	319-1000	**05-719-248**	12/46.65
Wide-Mouth Packers				
8 oz. (250mL)	2½ × 4⅜" (6.4 × 11.1cm)	312-0250	**05-719-149B**	24/44.31
16 oz. (500mL)	2$\frac{13}{16}$ × 6" (7.1 × 15.2cm)	312-0500	**05-719-149C**	24/70.12
32 oz. (950mL)	3¾ × 7" (9.5 × 17.8cm)	312-0950	**05-719-149D**	12/39.78

I-Chem Certified* High-Density Polyethylene Nalgene* Containers

Standard-format bar-code labels attached to each container

- Excellent for soil, sludge or sediment samples
- Bar code can be used with automated sample tracking systems to assist in environmental field data collection
- Choose wide-mouth clear or amber, or narrow-mouth clear polyethylene bottles

COMPLIANCE:
I-Chem Certified* to meet the EPA's Performance Based Specifications for metals analysis and water quality parameters.

05-719-358E, -358C, -358F, -358D

I-Chem* Field-Temp* Cooler Thermometer

Designed for quick, accurate temperature readings from environmental shipping coolers

- Mercury free
- Encased in I-Chem 40mL vial filled with deionized water
- Engraved with unique serial number traceable to NIST* standards; useful for tracking purposes

INCLUDES:
Certificate of NIST traceability

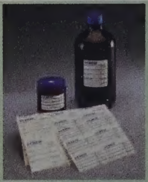
05-719-530

Temperature Range	Subdiv.	Mfr. No.	Cat. No.	Each
-10° to +20°C	0.5°C	ER-0040	**05-719-530**	24.28

ACCESSORIES

I-Chem* Container Labels

- For I-Chem jars, bottles and containers



05-719-333, -334, -338

For	L × W	Mfr. No.	Cat. No.	Pack of 96
Paper Container Labels				
All 20, 40, and 60mL vials	1¼ × $2\frac{5}{16}$" (3.1 × 5.9cm)	502	**05-719-334**	19.30
All 40 and 60mL vials	2½ × $2\frac{5}{16}$" (6.4 × 5.9cm)	501	**05-719-338**	22.73

Nalgene* Wide-Mouth EP Tox/TCLP Bottle

Specially designed for U.S. EPA Method 1311: Toxicity Characteristic Leaching Program (TCLP)

- 2.2L temperature-resistant PTFE resin FEP bottle has wide mouth for testing large-sized samples
- Ideal at high and low temperatures for trace metal analysis and applications with organic solvents
- Natural color permits easy viewing of sample
- Autoclavable
- Leakproof†
- PTFE resin-lined polypropylene caps included

NOTE:
Completely disengage threads before autoclaving.

02-924-15H

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of 2
2.2L	100mm-400	2101 2200	**02-924-15H**	300.56	400.75

† For definition of "leakproof," see p. 178.

Nalgene* Narrow-Mouth HDPE Sample Bottles

Suitable for long-term storage

Single-use, environmental sampling bottles, guaranteed leakproof† for safe sampling, shipping and storage.

- Break-resistant translucent HDPE construction
- Not precleaned
- Polypropylene caps attached

ORDERING INFORMATION:
Conveniently packaged in bulk quantities.

NOTE:
Direct UV exposure should be avoided.

† For definition of "leakproof," see p. 178.

Nalgene* Wide-Mouth HDPE Sample Bottles

Wide mouth makes cleaning easier

Single-use, environmental sampling bottles guaranteed leakproof† for safe sampling, shipping and storage.

- Break-resistant translucent HDPE construction
- Suitable for long-term storage
- Not supplied precleaned
- Polypropylene caps attached

ORDERING INFORMATION:
Packaged in bulk quantities.

NOTE:
Direct UV exposure should be avoided.

FLUORINATED

Nalgene* HDPE Bottle with Fluorinated Surface

Provides improved barrier properties, reduced solvent absorption and penetration

Enhances long-term performance and prevents permeation loss.

- Safe, durable, fluorinated HDPE bottle has fluorocarbon surface, inside and out
- Usable for toxic sample containment and with most acids, alkalis, and aggressive organic solvents
- Leakproof†
- Fluorinated white polypropylene screw caps included

02-925-5

Capacity	Mfr. No.	Cat. No.	Each	Case of 6
½ gal. (2L)	2124 0005	**02-925-5**	26.06	104.25

† *For definition of "leakproof," see p. 178.*

Nalgene* HDPE Fluorinated Bottles and Carboys

Enhance long-term performance, prevent permeation loss

Improved barrier properties, reduced solvent absorption and penetration.

- Fluorocarbon surfaces inside and out
- Heavy-duty walls are safe, durable, resistant to splitting and punctures
- Useful with most acids, alkalis and aggressive organic solvents
- Leakproof†
- Available with narrow or wide mouths
- HDPE screw caps included

INTERNATIONAL SHIPPING

Nalgene* HDPE Wide-Mouth IP2 Bottles

Safe, durable, resistant to splitting and punctures

- Leakproof† HDPE bottles
- Wide mouths for easy filling with dry or liquid materials
- IP2 marking, material, volume, registration notch and brand name molded into bottom
- Polypropylene screw caps included

COMPLIANCE:
Meet international hazardous material shipping standards which incorporate United Nations Performance-Oriented Packaging regulations.

MEDIA

Pyrex* Low-Actinic Media/Solution Bottles

Ideal for storing and transporting light-sensitive materials

Small Wide-Mouth Bottles

- Graduated in mL increments
- Permanent white enamel graduations and marking spots
- Thread size, GL45; neck opening, 29mm I.D.
- Orange autoclavable polypropylene plug-seal caps (06-414-2A) with replaceable drip-free clear pouring rings (06-414-2B)

Large Narrow-Mouth Bottles

- Tooled necks for increased mechanical strength and uniform stopper fit
- Accept No. 12 rubber stoppers (not included)
- Available in two sizes: conventional 9.5L bottle and carboy-shaped 19L size

06-423-2B

COMPLIANCE:

Large narrow-mouth bottles meet ASTM* E 438, Type I, Class A requirements.

Capacity	Dia. × H	Mfr. No.	Cat. No.	Case of

Pyrex* Brand Reusable Media/ Solution Bottles

Heavy duty, for media, buffers, aqueous, and nonaqueous solutions

- Graduated in mL increments
- Orange autoclavable polypropylene plug-seal caps and drip-free clear polypropylene pouring rings, that withstand temperatures up to 140°C (284°F), are included on sizes 50 mL through 10L

NOTE:

Optional red melamine caps and PTFE rings are available for applications requiring temperatures to 180°C (356°F).

† Replacement caps not available.

WARNING

Bottles larger than 2L should not have caps tightened immediately after autoclaving, nor should they be used with bottle-top filter units or other applications involving vacuum pressure, as breakage may occur.

ACCESSORIES

Caps for Pyrex* Laboratory Bottles

- Choose orange polypropylene caps for temperatures to 140°C (284°F)
- Red PBT caps for temperatures to 180°C (356°F).

Style	Mfr. No.	Cat. No.	Case of
Orange Plug-seal	1395 45LTC	**06-414-2A**	20/50.06
Red Plug-seal	1395 45HTC	**06-414-2C**	10/95.38

Pyrex* Reusable Laboratory Bottle Pouring Rings

- As supplied with Pyrex media/solution bottles
- Choose clear rings for temperatures to 140°C (284°F)
- Red rings for temperatures to 180°C (356°F)

Color	Mfr. No.	Cat. No.	Case of 50
Clear‡	1395 45LTR	**06-414-2B**	46.63
Red	1395 45HTR	**06-414-2D**	107.01

‡ As supplied with Pyrex Laboratory Bottles.

Pyrex* Square Media/Solution Bottles and Caps

Require 13–20% less space than round bottles

- Heavy-duty borosilicate glass
- Slight convex curvature of square sides minimizes glass-to-glass contact during sterilization and creates easy-to-reach corners for cleaning
- White enamel graduations, large marking spot, and molded glass ridge indicate full capacity
- Linerless, orange, autoclavable polypropylene plug-seal caps and drip-free clear polypropylene pouring rings that withstand temperatures up to 140°C (284°F) included

Left to right: 06-414-8, -6, -7 with 06-414-11 caps

NOTE:

For syringe sampling or reagent introduction, use with polybutylene terephthalate (PBT) caps with aperture (sold separately).

Capacity	Screw Thread Size	W × H†	Mfr. No.	Cat. No.	Case of 10

Nalgene* PETG Square Media Bottles

Space-saving square design with molded-in graduations

Feature transparency and reduced permeability to CO_2/O_2—perfect for media storage.

- Made from durable, break-resistant polyethylene terephthalate copolyester, glycol modified (PETG)
- White closures have heat-shrink band around closure and neck, providing tamper-evident seal for assurance of sterility
- 2L size has molded-in handgrips.
- High-density polyethylene screw caps included

Left to right (back): 03-312-3, 03-311-1X, 03-312-5, 03-312-1; front: 03-311-1W, -1V

Nalgene* B³ Media Bag* System

Sterile, ready to use, disposable

Gamma-sterilized (to 10^{-6} Sterility Assurance Level), single-use, biocompatible bags. Ideal for storing, delivering, and handling biomedia and critical reagents.

01-814-220

- Comprised of multilayered film with high barrier properties for UV light, CO_2, O_2 and water vapor
- Traceable by manufacturing lot number embossed on bag
- Standard three-port filling/ evacuation system includes two EVA tubing ports with ⅜" (9.5mm) hose barbs and one septum port.
- Built-in handle

ORDERING INFORMATION:
Individually sealed in double-lined cartons for cleanroom use.

COMPLIANCE:
Film, tubing and hose barbs comply with USP Class VI, USP (661) Noncytotoxic, Nonpyrogenic, and European Pharmacopeia Abnormal Toxicity testing.

Wheaton Nongraduated Media/ Lab Bottles

Autoclavable and versatile

Borosilicate glass bottles ideal for mixing and storing culture media when fitted with a rubber-lined screw cap, or for use with distilled water, analytical standards and reagents when fitted with a polyethylene-lined screw cap.

06-407, -412, 06-451-278, 06-410

- Large opening, special lip and sloping shoulders for easy pouring, cleaning
- Clear glass for maximum content visibility or amber glass for light-sensitive materials
- Autoclavable bottles and rubber-lined caps

COMPLIANCE:
Meet USP Type 1 standard.

Wheaton Graduated Media/Lab Bottles

Rugged space-savers

- Heavy walls prevent breakage
- Sturdier than Erlenmeyer flasks
- Smaller diameter at base conserves space in sterilizers and freezers
- Large opening, special lip, sloping shoulders
- Graduated in mL to show approximate volumes

COMPLIANCE:
Meets USP Type 1 requirements.

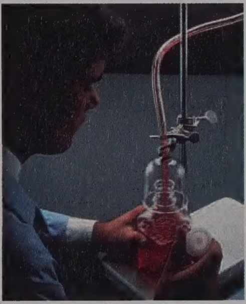
Nalgene* Polycarbonate Filling Bell

Ideal for use in microbiological and cell culture applications



09-751

Transparent, autoclavable filling bell fits most common media bottles. Use to transfer sterile media aseptically from large containers to media bottles or culture vessels.

- Nontoxic polycarbonate will not shatter
- Bell lip beaded for added strength
- Equipped with autoclavable polypropylene tubing adapter that accepts ¼, ⅜, and ½" I.D. (6, 9, and 13mm) tubing
- Bell I.D., 2⅞" (70mm)
- Dripless inner fill tube has length of 2½" (63mm); O.D., ⅜" (9mm); I.D., ¼" (6mm)

ORDERING INFORMATION:

Overall height with tubing adapter, 4½" (114mm).

Mfr. No.	Cat. No.	Each
DS03900070	**09-751**	33.00

Pyrex* Filling Bells

Ideal for aseptically filling culture tubes and bottles

- Rubber tubing is attached to top of tubulation while receiving vessel is placed inside bell
- Use with Pyrex aspirator bottles with bottom sidearm tubulation to aseptically dispense sterile media and solutions

11-850-07

O.D. × H	Tubulation O.D.	Mfr. No.	Cat. No.	Case of 2
2 × 3¾" (51 × 95mm)	⅜" (11mm)	3965-50	**11-850-07**	73.50

Pyrex* Filling Bells with Male Luer Tip

For aseptically filling small-necked flasks using syringe needles or cannulas

- Male Luer tip allows for aseptic filling of small-necked flasks using syringe needles or cannulas
- Rubber tubing is attached to top of tubulation while receiving vessel is placed inside bell
- Use with Pyrex aspirator bottles with bottom sidearm tubulation to aseptically dispense sterile media and solutions

11-850-08

O.D. × H	Tubulation O.D.	Mfr. No.	Cat. No.	Case of 2

Kimax*-35 Milk Dilution Bottles

Designed from requirements for milk dilution bottles given in APHA Standard Methods for the Examination of Dairy Products

- Available plain or graduated at 99mL level with accuracy of ±1mL
- 5½ oz. (160mL) capacity, square 45 × 45mm cross section, smooth marking spot, and 28-400 GPI thread finish
- Autoclavable black phenolic screw cap with cemented-in rubber liner included

03-422-13

Style	Mfr. No.	Cat. No.	Case of 48
Plain	14915 160	**03-422-13**	211.68
Graduated	14925 160	**03-422-11**	294.24

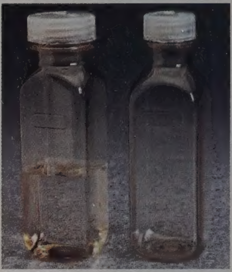
Nalgene* Dilution Bottles

Comply with *Standard Methods*

Choose from two types of dilution bottles in narrow- and wide-mouth configurations. Both include autoclavable, linerless polypropylene screw caps.

Polysulfone Dilution Bottles

- Ideal for use with food products
- Excellent chemical resistance to bases and weak acids
- Transparent, graduated at both 90mL (±1mL) for 0.1 dilutions and 99mL (±1mL) for 0.01 dilutions
- Withstand temperatures from -100° to +165°C (-148° to +329°F)



02-945-5C, -5A

NOTE: Do not autoclave with Tween* wetting agent or with media containing Tween wetting agent

Polypropylene Copolymer Dilution Bottles

- Contact-clear polypropylene copolymer resists effects of strong acids, alcohols and bases
- Temperature range from -40° to +121°C (-40° to +250°F)
- Graduated at 90 and 99mL
- Accurate to ±4mL
- Withstand repeated washing and autoclaving, even with Tween wetting agent

COMPLIANCE:

Comply with dilution methodology described in *Standard Methods for the Examination of Water and Wastewater (17th ed.)* and *Standard Methods for the Examination of Dairy Products (15th ed.)*

Cap Size	Capac. to Neck	Capac. to Brim	Mfr. No.	Cat. No.	Pack of 12	Case of 4 Pk.

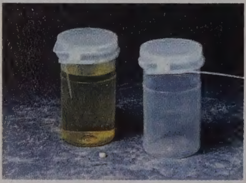
I-Chem* Security-Snap* BacT Bottles

Ideal for all types of bacteriological sampling, including coliform testing

Sterile, nontoxic polypropylene containers with a 10mg sodium thiosulfate tablet for Field-Ready* chlorinated sample collection, or without a tablet for situations in which chlorine is not present.

- Break-away security seal assures container sterility
- Security-Snap flip-top cap design helps prevent closure contamination
- Closure snaps down tightly with a positive snap
- Tethered sealing strap prevents tampering and spillage
- Use with I-Chem custody seals (05-719-337, order online)
- Clear and nonautofluorescent for chromogenic/fluorogenic substrate tests
- 140mL brim capacity meets 120mL minimum volume requirements
- 100mL fill line is accurate within ±2.5mL
- 1" (2.5cm) of headspace between fill line and closure



05-719-361, -362

COMPLIANCE:

Meet all requirements for microbiology sample containers (*EPA Manual for the Certification of Laboratories Analyzing Drinking Water*). Headspace permits mixing in accordance with EPA requirements for membrane filtration procedures.

Description	Mfr. No.	Cat. No.	Case of 250
With tablet	411G10R27	**05-719-361**	146.62
Without tablet	411 0125	**05-719-362**	135.34

*Trademark. See Trademark Reference.

Prices subject to change.

BD* Sterility Bottles

Glass sterility bottles available with a variety of media

- Transparent labels for easy viewing and identification of medium
- Labels are laminated acetate to resist alcohol or chlorine treatment for cleanroom use
- Prepared bottles for sterility testing and microbial limits

Wide-Mouth Bottles

- Openings are 48mm in diameter to accommodate bulky samples

DF9066-78-0, DF9082-74

ORDERING INFORMATION:
Supplied in packs of 10 bottles.

INCLUDES:
Certificate of Analysis

COMPLIANCE:
Conform to harmonized USP requirements.

ROLLER

Corning* Disposable Roller Bottles

Promote cell attachment

Left to right: 06-413, 06-415-7, 06-415-3, 09-761-113

Made from optically clear virgin polystyrene and tissue culture–treated.

- Seamless, one-piece construction reduces the chance of damage from accidental drops
- Extra-large neck permits easy access to interior
- Sterile

ORDERING INFORMATION:
490cm2 size is ungraduated and comes with a plug seal cap; larger bottles feature black printed graduations and easy-grip caps. 06-443-8 has vented cap for continuous gas exchange.

CERTIFICATIONS:
Certified nonpyrogenic for consistent performance.

Surface Area	Capacity	Packaging	Mfr. No.	Cat. No.	Case of

† With vented cap.

Corning* Expanded-Surface Roller Bottles

Twice the usable growth area, less space required

06-415-8

Ribbed design provides twice the usable growth area of traditional 850cm^2 bottles, but with the same outside dimensions. Reduces the space required in roller racks and incubators.

- 1700cm^2 surface area
- Tissue culture–treated to optimize cell attachment
- Virgin polystyrene
- Sterile
- Windows on two sides for easy pouring and microscopic viewing
- With vented or nonvented easy-grip caps and black printed graduations

ORDERING INFORMATION:
Packaged two bottles per bag, six bottles per bag or 20 bottles per tray.

CERTIFICATIONS:
Certified nonpyrogenic

Corning* Polystyrene Roller Bottles

Treated with patented Corning CellBIND* surface treatment

08-757-210

May eliminate the need for tedious, time-consuming, expensive and low-stability biological coatings such as poly-D-lysine to improve cell attachment. 07-201-221 has expanded-surface design for twice the surface area with the same exterior dimensions.

Features

- Easy Grip Vent Cap is designed for applications requiring consistent gas exchange; features large knurls designed for ergonomic handling
- Manufactured from virgin polystyrene
- Supplied with HDPE caps
- One-piece seamless construction with printed graduations; neck O.D., 48mm
- Printed lot numbers aid in product traceability
- Sterilized by gamma irradiation

CellBIND Surface Treatment

- Improves cell attachment leading to increased cell growth and yields
- Results in more consistent and even cell attachment
- Helps adapt cells to reduced serum or serum-free conditions
- Reduces premature cell detachment from confluent cultures
- Not a coating, requires no refrigeration or special handling; stable at room temperature
- Can be handled with same techniques as standard tissue culture-treated products

COMPLIANCE:
Both resins meet the USP Class VI requirements for plastic containers and closures.

CERTIFICATIONS:
Certified nonpyrogenic

LOOKING FOR MICROCARRIERS?

For a complete selection of microcarriers, go to Cell Culture section and look through Growth Environments.

Nunc* InVitro PETG Roller Bottles

Excellent substrate for adherent cells

Rugged material yields superior impact resistance over glass or polystyrene while providing an excellent gas and vapor barrier.

- Excellent for freezing down to -40°C
- Standard smooth surface or patented expanded surface (XPS)[1]
- Quick-action ergonomic closure and easy-to-read graduations
- Gamma-radiation sterilized
- Lot number on each bottle maximizes traceability

BD Falcon* Roller Bottles

Compatible with manual and automated filling systems

Ideal for use in research and manufacturing applications involving the scale-up of mammalian cells for purposes of virus propagation and bioproduct production.

- Available with smooth 850cm^2 growth area configuration or pleated 1450cm^2 growth area configuration
- One-piece BD Tufrol* polystyrene manufactured using a proprietary process that provides high impact resistance
- Sterilized by gamma irradiation, non-pyrogenic
- Vented cap has integral hydrophobic 0.2μm membrane filter
- Supplied with easy ON/OFF standard or vented-style caps designed to prevent misthreading and provide a secure seal

Front, 06-413-15; Back, 06-419-9

Wheaton Serum Tubing Vials

Clear or amber borosilicate glass

- Clear vials made from Wheaton-33* low extractable borosilicate glass tubing to ensure uniform wall thickness
- Amber vials made from Wheaton "300" brand borosilicate glass
- Withstand extreme temperature variations
- Necks finished for aluminum crimp seals
- Blowback feature of neck and specially designed bottom radius for lyophilization applications

ORDERING INFORMATION:

Packaged in shrink-wrapped modules to reduce particulate contamination.

COMPLIANCE:

Meet ASTM* Type 1, Class A and USP Type 1 standards

Wheaton Stoppers for Serum Bottles and Vials

- Provide airtight covers
- Five styles, in red natural rubber† or gray butyl
- Flange-type stoppers are secured with aluminum crimp seals
- Slotted and three-prong plug stoppers are for freeze-dry applications

SPRAY

*Fisherbrand** Wash Bottles with Adjustable Spray

Handle hot/cold, aqueous/solvent-based solutions

Fully adjustable spray pattern: “fine mist” for TLC plates; “needle” for rinsing glassware; “big stream” for powerful jet needed to wash filters. 1000mL bottle has double-headed design, with side-fill opening to ensure contamination-free solutions.

03-405

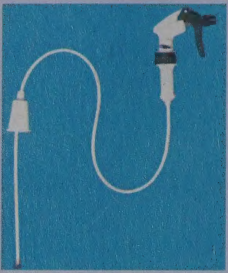
- Bottle is made of high-density polyethylene; sprayer is polypropylene
- Trigger allows one-handed, controlled delivery with light pressure
- Engraved markings show how much fluid is left
- Squat shape takes up little bench space and ensures a low center of gravity
- 1000mL bottle dip-tube has an easy-access filter to prevent clogging

Capacity	Cat. No.	Price
235mL	**03-405A**	Pk. of 3/21.79
1000mL	**03-405**	Ea./31.82

*Fisherbrand** Spray-Anywhere Adjustable Sprayer

Quickly change any bottle into a wash bottle and any reagent into a spray

Virtually unbreakable and chemical resistant, polypropylene sprayer is ideal for hot, cold, aqueous and solvent-based solutions. Continuously adjustable spray suits every lab requirement: "fine-mist" for TLC plates, "needle" to rinse glassware, "big-stream" to pump a continuous forceful jet to wash filters.



14-648-48

- Closed position prevents evaporation and air/dust contamination, maintains solution purity
- Easy one-handed operation: trigger-controlled delivery with very light pressure
- Contoured shape for comfortable grip and reduced finger fatigue
- Instant-off release prevents messy drips on the lab bench
- Cone-shaped universal adapter bung fits virtually all glass, plastic and metal containers, bottles and flasks (container not included)
- Can be gas or chemically sterilized; dishwasher safe

ORDERING INFORMATION:
Fits bottles with 1 to 1⅜" I.D. (2.5 to 3.5cm). Tube length, 32" (81.3cm).

Cat. No.	Each
14-648-48	12.65

LOOKING FOR CARBOYS?

Fisherbrand* HDPE Wide-Mouth Carboys have a wide neck that allows easy access for cleaning or filling.

Features:
- Chemical resistant
- Available with or without spigots
- Can be used at temperatures down to -100°C (-148°F)
- Molded handgrips allow easy lifting or carrying

For more information about Fisherbrand Carboys, and for our complete selection of glass, polyethylene, polypropylene and polycarbonate carboys, check out the Carboys section, beginning on p. 248.

Nalgene* Aerosol Spray Bottle

Reusable; fills and pressurizes manually

No external source of compressed air required—Airspray* System uses air pressure to propel contents from container.

- Translucent polypropylene permits visible volume check
- Comes with two nozzles

NOTE:
Not for use with solvents.

15-232-8

Capacity	Mfr. No.	Cat. No.	Each	Case of 4
6¾ oz. (180mL)	2430 0200	**15-232-8**	15.88	42.35

Dynalon* Quick Mist* HDPE Sprayer Bottles

Trigger-type operation provides fine mist with large pattern

- Trigger assembly made from chemical-resistant polypropylene
- Valve and intake easily cleaned
- Dispenses thin liquids

NOTE:
Not for use with food products.

***Fisher**brand** **500mL Easy-Squeeze Wash Bottles**

Easy to fill, read, use

02-897-7

Bottles have wide mouths for easy filling and easy-to-read, color-coded silkscreened labels. Tips can be easily cut back to increase flow. When not in use, bottles relieve internal pressure without dripping.

- Translucent, sputter-free, low-density polyethylene (LDPE)
- Label information includes:
  - Chemical name
  - National Fire Protection Association (NFPA) codes and symbols
  - Chemical Abstracts Service (CAS) number
  - Hazard codes
  - Laboratory protective equipment information
  - arget organ information
  - Recommended fill level
  - LDPE recycling code
  - Bottle volume capacity
  - "For Dispensing Only, Not Recommended For Storage" statement

ORDERING INFORMATION:
Available in cases of six, all with the same label; in a 6-bottle Solvent Pack (one each labeled acetone, deionized water, ethanol, isopropanol, methanol and universal); or 6-bottle Cleaning Pack (one each labeled acetone, bleach, deionized water, saline, soap and universal bottles).

INCLUDES:
Come with colored polypropylene closures with PTFE membrane (except 02-897-2, which has an HDPE closure).

NOTE:
Not recommended for use above 60°C (140°F).

Description	Cat. No.	Case of 6

***Fisher**brand** **Labeled Wash Bottles**

Color coded and leakproof†, with one-piece cap and nozzle assemblies

03-409-23 Series

Molded leakproof polyethylene bottles with wide mouth for easy filling.

- Easy-to-read, color-coded silkscreened labels ensure instant identification and include:
  - Department of Transportation (DOT) and National Fire Protection Association (NFPA) codes and symbols
  - Chemical Abstract Service (CAS) numbers where applicable
  - Protective equipment
  - Target organ information
  - Inks resist chemical to be contained
  - Toluene bottle is red with white labeling to set it apart; all others are translucent

ORDERING INFORMATION:
Capacity 500mL, except 03-409-23Q, which has a 1000mL capacity. Available in cases of six, all with the same label, or in a six-bottle assortment: one 500mL bottle each of acetone, ethanol, isopropanol, methanol, toluene and water.

NOTE:
Toluene bottle is for short-term use only, not for long-term storage.

† Fisher Scientific assigns the term leakproof to bottle/closure systems with closures smaller than 100mm after they are filled with water, are inverted, and withstand air pressure of 2psig for 2 minutes; or to bottle/closure systems of 100 or 120mm after they are filled with water and inverted for 15 minutes, and no water escapes.
Note: these tests, using other liquids, may not yield the same results. To ensure safe usage, Fisher Scientific advises customers to test Fisherbrand bottles and closures under conditions of their planned applications.*

‡ 1000mL.

Fisherbrand* Red Washing/Dispensing Bottles

Red for dangerous contents

- Polyethylene bottle with integral, one-piece, molded polypropylene cap and nozzle to eliminate leakage
- Rigid spout permits controlled delivery: single drop or fine stream
- Tip may be cut back to increase flow

03-409-16A

Capacity	Cat. No.	Pack of 6	Case of

Nalgene* Right-to-Know Narrow-Mouth LDPE Wash Bottles

Flexible for convenient dispensing, translucent for viewing contents

Isopropanol
Distilled Water
Methanol
Ethyl Alcohol

03-409-11D, 03-409-11E, 03-409-11C, 03-409-11B

LDPE bottles have narrow mouths, one-piece molded closure and spout, draw tube welded to closure so they can't separate. Sodium Hypochlorite bottle is white LDPE with HDPE closure for light-protective barrier qualities between 280 and 450nm; all others have polypropylene closures.

- Tips can be cut back to increase flow
- Silk-screened labels with chemical-resistant inks:
    - Chemical name
    - International Chemical (ICS) formula
    - Chemical Abstract System (CAS) number
    - DOT and NFPA codes/symbols
    - Color-coded bar on bottle corresponds to closure color to prevent cross-contamination
    - Break-resistant and leakproof†

ORDERING INFORMATION:
Available in packs of the same 16 or 32 oz. (500 or 1000mL) bottle, or in a 5-bottle (16 oz./500mL only) assortment pack consisting of one each acetone, ethyl alcohol, isopropanol, methanol, and distilled water.

COMPLIANCE:
Meet requirements of OSHA Hazard Communication Regulation [29 CFR 1910.1200(f)(4)].

16 oz. (500mL)	DS2408-0500	**03-409-16D**	43.86

† For definition of "leakproof," see below.

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** These tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* Vented Right-To-Know Unitary* Wash Bottles

Keep hazardous volatile liquids in the bottle and off the lab bench

- LDPE with PTFE membrane
- Bottle and tubulation molded into one piece to prevent chemical splash when removing the lid and contamination when filling
- No draw tube assembly for picking up unwanted spilled chemicals on surfaces
- Unique 38mm colored vented closure designed to prevent dripping
- Leakproof†, break-resistant, translucent
- Sturdy polypropylene closures (HDPE on Sodium Hypochloride bottles)
- Color-coded bar corresponds to closure, preventing cross-contamination
- Prelabeled with ICS name and formula, as well as DOT and NFPA symbols for chemical handling, hazard, care, and storage of six commonly used chemicals

03-409-19A, -20A, -20D, -20C, 21E, 20B

COMPLIANCE:
Meet OSHA requirements for workplace chemical container labeling.

Kimax* Weighing Bottles

Tall, cylindrical form with ＄ caps or stoppers

With Outside ＄ Ground Caps

- Caps protect bottle in case of tipping; have open bottom
- Prevent material from touching cap edges, provide increased headroom
- Designed from Fed. Spec. NNN-B-1493, Type I, Style I

With ＄ Stoppers

- Plug stopper fits into internally ground body; has closed bottom
- Designed from Fed. Spec. NNN-B-1493, Type I, Style III

CARRIERS

*Fisherbrand** Safety Bottle Carriers

Hold one 5 pt. or 1 gal. (2.5 or 4L) bottle

- Thick molded rubber safely cushions glass bottles
- Circular cup in the bottom centers bottle with 1" (2.5cm) between wall and bottle
- Integral molded handle

03-439, 03-439A

Color	Cat. No.	Each
Black	**03-439**	171.15
Red	**03-439A**	156.68

*Fisherbrand** Polyethylene Safety Bottle Carriers

Carry up to eight bottles

- Heavy-duty, high-density polyethylene (HDPE)
- Safe and easy method of carrying bottles

ORDERING INFORMATION:
Dimensions: (L × W × H), 14½ 7½ × 6¼" (36.8 × 19.1 × 15.9cm)

03-439-75B

Style	Cat. No.	Each
Unpartitioned	**03-439-75A**	111.46
8 compartments	**03-439-75D**	177.46
6 compartments	**03-439-75B**	158.47
2 compartments	**03-439-75C**	132.74

Nalgene* Collapsible Carrier

Transports up to six 1 gal. (4L) containers

- Folds flat to save valuable storage space
- Made of white polypropylene and stainless steel
- Molded-in handgrips for easy carrying
- Lightweight, durable

03-439-1C

ORDERING INFORMATION:
Open, measures 13¾L × 20¾W × 10¾"H (35 × 53 × 27cm). Folds to 13¾L × 20¾W × 2¾"H (35 × 53 × 7cm); five folded carriers fit into same space as one open unit.

NOTE:
Not autoclavable.

Mfr. No.	Cat. No.	Each	Case of 4
7155 1421	**03-439-1C**	85.35	227.60

Nalgene* 4-in-1 EZ Tote* Bottle Carrier

Versatile carrier can be easily reconfigured to accommodate 500mL, 1L, or 4L bottles

- Carries eight 500mL, six 1L, or two 4L bottles
- Reconfigureable partitions
- Holds up to 28 lb. (12.7kg)
- Manufactured from 3mil corrugated HDPE plastic
- Stores flat and easy to assemble
- Blue

02-923-170

ORDERING INFORMATION:
Dimensions: 13L × 8W × 13½"H (33 × 23 × 34cm)

NOTE:
Do not autoclave.

Mfr. No.	Cat. No.	Case of 4
6565-0001	**02-923-170**	103.89

Nalgene* 500mL Bottle Carrier

Holds up to six standard 500mL reagent bottles in any profile

- Sturdy, comfortable handle is molded into the base
- Cover latches securely
- Linear LDPE provides greater rigidity and impact resistance
- Bright yellow for safety
- Can be stacked empty or full

03-439-31

ORDERING INFORMATION:
Dimensions (L × W × H): 14 × 10 × 11" (35 × 25 × 28cm)

Mfr. No.	Cat. No.	Each	Case of 6
6505-0010	**03-439-31**	109.32	437.25

Nalgene* Safety Bottle Carriers

Ideal for transporting acid and chemical bottles

- Impact-resistant, low-density polyethylene carrier and lid
- Clear polycarbonate viewing insert in top of lid
- Locking handle
- Cushions against breakage

03-439-29

Accommodates	Mfr. No.	Cat. No.	Each	Case of 6
½ gal.	6501 2500	**03-439-28**	93.12	372.47

Corning* Black Phenolic Caps with PTFE Liners

Resist temperature and steam in autoclaving

- Phenolic screw caps have glued-in rubber lining firmly bonded to an interface of PTFE, providing a highly inert sealing face

02-883-8C

Size	Mfr. No.	Cat. No.	Case of
13mm-415	9998 13	**02-883-8C**	288/221.06
15mm-415	9998 15	**02-883-8D**	288/221.06
18mm-415	9998 18	**02-883-8E**	192/181.55

24mm-400	9998 24	**02-883-8A**	12/30.17

Kimble* Black Phenolic Screw Caps

Bond between liner and cap retains adhesive properties even after repeated autoclaving

With PTFE-faced rubber liner

- Identified in ASTM* specification E 982-94, Class B requirements

With 14B rubber liner (SBR)

- Has fewer threads than regular GPI caps for easier application and removal
- Not recommended for use with standard GPI finishes usually found on blown-molded bottles
- Identified in ASTM specification E 982-94, Class A requirements

14-930-14G

GPI Thread	Mfr. No.	Cat. No.	Case of
With PTFE-Faced Rubber Liner			
13-415	45066C-13	**14-930-15D**	300/219.00

With 14B Rubber Liner (SBR)			
38-430	45066B-38	**14-930-14G**	150/291.00

Nalgene* Colored Closures

Polypropylene closures are easy to identify

- Reduce chance of cross contamination
- Opaque; protect contents from UV light when used with opaque Nalgene bottles
- One-piece, linerless, with integrally molded seal ring
- Fit Nalgene narrow-mouth bottles up to 1000mL
- Well-defined closure knurl makes gripping and capping easy
- Guarantee leakproof†, when used with Nalgene narrow-mouth bottles

03-700229, 02-923-143, 03-700-27

COMPLIANCE:

Meet FDA 21CFR177.1520 for food and beverage use. Materials meet CONEG regulations for heavy metal content.

Diameter	Color	Mfr. No.	Cat. No.	Case of 2000
20mm	Natural	362150-0200	**03-700-27**	281.25

† *For definition of "leakproof" see page 178.*

BRUSHES

BEAKER

Fisherbrand* White Nylon Bristle Brush

Heavy-duty brush for cleaning beakers, jars, and similar containers

- Extra-heavy bristle with double-tufted end
- Wooden handle
- Chemical-resistant

03-536

Overall Length	Bristle L × Dia.	Cat. No.	Each	Pack of 6
16" (41cm)	5 × 2⅞" (13 × 7cm)	**03-536**	49.15	252.05

Fisherbrand* Heavy-Duty Brushes

Spiral-wound bristles for cleaning beakers

- Spiral-wound bristles
- Extra-heavy tuft end
- Wooden handle

03-541-5

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
12" (30cm)	4 × 2½" (10 × 6.4cm)	**03-541**	24.80	254.40
16" (41cm)	5 × 3" (13 × 7.6cm)	**03-541-5**	32.00	328.05

Fisherbrand* Low-Cost Brush

Economical brush for beakers

- Two rows of bristles provide slightly oval shape
- End tuft for cleaning corners
- Wooden handle

03-555

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
16" (41cm)	6 x 3" (15 x 7.6cm)	**03-555**	14.80	151.45

FLASK

*Fisherbrand** Adaptable-to-Container Brush

Useful for cleaning a wide variety of glassware

- Single-row bristles
- Attached to heavy wire handle by swivel joint
- Handle with ring for hanging

03-565

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
12" (30cm)	4¼ × 1½" (10.8 × 3.8cm)	**03-565**	12.55	128.75

*Fisherbrand** Brush with Extension for Flask Curves

For cleaning bottom curves and inside shoulders of flasks and bottles

- White unbleached hog bristles
- Extended bristled end
- Plastic shaft and handle

03-571-5

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
16" (41cm)	4 × 1½" (10 × 3.8cm)	**03-571-5**	14.10	144.50

*Fisherbrand** Flexible-Handle Brushes

Soft, single row of bristles fits easily into flask necks

- Plastic handle bends to allow fitting of bristles to container shape
- Handle has hanging ring

03-570A

Flask Size	Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
250mL	12" (30cm)	3½ × 1⅜" (8.9 × 3.5cm)	**03-570A**	9.85	96.60
500mL	14" (36cm)	4 × 1½" (10 × 3.8cm)	**03-570B**	10.05	98.95
1000mL	17" (43cm)	5 × 1¾" (12.7 × 4.4cm)	**03-570C**	12.60	123.90

TEST TUBE

*Fisherbrand** Budget-Priced Brushes

Economical brushes for test tubes

- 03-576 is nylon with radial tufted end; rest are unbleached white hog bristles
- Galvanized wire handles resist rust and corrosion

03-573

Overall Length	Bristle L × Dia.	Cat. No.	Price	Case of 144
10½" (27cm)	4 × 1⅜" (10 × 3.5cm)	**03-573**	Ea./3.60	394.85
½" (24cm)	3½ × ¾" (8.9 × 1.9cm)	**03-574**	Pk. of 12/31.15	319.45
9" (23cm)	3 × 7/16" (7.6 × 1.1cm)	**03-576**	Pk. of 12/26.70	273.65

*Fisherbrand** Stainless-Steel Handled Brushes

Stiff, white nylon bristles for cleaning test tubes

- Bristles are chemical resistant
- Radial tufted end
- Stainless-steel handle is rustproof, corrosion resistant

03-572-5

Overall Length	Bristle L × Dia.	Cat. No.	Pack of 12	Case of 12 Pack
11" (28cm)	4 × 1⅜" (10 × 3.5cm)	**03-572-5**	73.80	783.45
9" (23cm)	3½ × ¾" (8.9 × 1.9cm)	**03-578**	61.20	649.65

*Fisherbrand** Nylon Tufted Brush

Unbleached bristles with tuft for test tubes

- Unbleached white hog bristles
- Black, nylon tuft, 1" (2.5cm)
- Galvanized wire handle

03-590

Overall Length	Bristle L × Dia.	Cat. No.	Pack of 12	Case of 12 Pack
10" (25cm)	3 × 1⅜" (7.6 × 3.5cm)	**03-590**	50.50	517.95

SPECIAL PURPOSE

*Fisherbrand** Centrifuge Tube Brush

For 15mL centrifuge tubes

- Tapered bristle portion, ½" dia. (1.3cm) at tip
- Galvanized wire handle

03-608

Overall Length	Bristle L x Dia.	Cat. No.	Pack of 12	Case of 12 Pack
9" (23cm)	3½ x 1 13/16" (8.9 x 2cm)	**03-608**	28.25	289.55

*Fisherbrand** Buret Brushes

Wire handle galvanized to resist rust and corrosion

- 03-614 features tapered bristle section

03-614

Buret Size	Overall Length	Bristle L × Dia.	Cat. No.	Price	Case of
25 × 50mL	36" (91cm)	3¼ × ¾" (8.2 × 1.9cm)	**03-614**	Pk. of 12/96.50	6 Pk./ 512.25
75 × 100mL	36" (91cm)	5¼ × 1¼" (13.3 × 3.2cm)	**03-615**	Ea./6.25	12/62.35

*Fisherbrand** Nessler Tube Brushes

For low- and high-form Nessler tubes

03-621A

- Full bristles to make complete contact with cylinder walls and bottom
- 03-621A is natural black bristle; others are black nylon
- Radial, double-fan tip
- Galvanized wire handle

Overall Length	Bristle L × Dia.	Cat. No.	Each	Pack of 12
For Low-form Nessler Tubes				
12" (30cm)	4 × 1¾" (10 × 4.4cm)	**03-621A**	7.70	76.65
20" (51cm)	6 × 2⅜" (15.2 × 6cm)	**03-621B**	14.35	147.20
30" (76cm)	6 × 2⅜" (15.2 × 6cm)	**03-621C**	----	156.97
For High-form Nessler Tubes				
19" (48cm)	4 × 1" (10 × 2.5cm)	**03-622**	7.70	76.95

*Fisherbrand** Funnel or Graduate Brush

Two rows of tapered bristles

03-560

- Bristles securely fastened to flat metal strip which inserts into black plastic handle
- Tapered bristle section

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
13" (33cm)	6 × 2¼" (15.2 × 5.7cm)	**03-560**	22.30	228.70

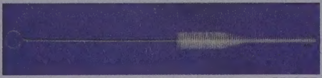
LOOKING FOR GLASSWARE?

Fisher Scientific offers a wide selection of glassware for all laboratory needs. To review these products, please refer to the following sections:Beakers, Bottles, Cylinders, Flasks, Pipets, Tubes, Watch Glasses.

PIPET

*Fisherbrand** Transfer Pipet Brush

Cone-shaped brush with stiff nylon bristles for cleaning transfer pipets



03-625

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
17" (43cm)	7½ × 15⁄16" (19 × 2.4cm)	**03-625**	6.50	64.90

NARROW TUBE

*Fisherbrand** Stiff Bristled Brushes

Clean tubes to 7⁄16" dia. (1.1cm)

03-635

Overall Length	Bristle L x Dia.	Cat. No.	Pack of 12	Case of 12 Pack
12" (30cm)	3 × ½" (7.6 × 1.3cm)	**03-635**	25.60	262.40
24" (61cm)	½" (7.6 × 1.3cm)	**03-637**	39.40	403.70

*Fisherbrand** Soft Nylon Bristle Brush

For cleaning funnel stems and capillary tubes

03-636

Overall Length	Bristle L x Dia.	Cat. No.	Pack of 12	Case of 12 Pack
12" (30cm)	2½ × ½" (6.3 × 1.3cm)	**03-636**	28.40	291.40

BJ Long Pipe Cleaner Brushes

Cut at any length for cleaning small pipets, stopcocks, capillary tubes

- May be used for slightly larger sizes by bending in moderate zig-zag pattern

03-642A

For Tubing Diameter	Overall Length	Cat. No.	Case of 6 Rolls
1.5 to 3mm	53' (16.2m)	**03-642A**	111.56
2.5 to 5mm	53' (16.2m)	**03-642B**	118.37

GENERAL PURPOSE

*Fisherbrand** Brass Wire Brush

For cleaning corroded or dirty metal surfaces

- Wooden handle
- Handle length, 5" (13cm)

03-685

Overall Length	Bristle L x W	Cat. No.	Each	Pack of 12
10" (25cm)	5 × ⅝" (12.7 × 1.6cm)	**03-685**	39.49	405.03

*Fisherbrand** Flat Camel's Hair Brushes

For dusting sensitive instruments

- Hair mounted with metal ferrule
- Wooden handle

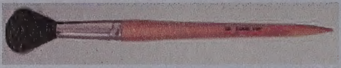
03-665A

Overall Length	Hair L × W	Cat. No.	Each	Pack of 12
6½" (17cm)	¾ × ½" (1.9 × 1.3cm)	**03-665A**	12.40	127.00
6½" (17cm)	1 × 1¼" (2.5 × 2.5cm)	**03-665B**	14.80	151.45
8¼" (21cm)	1¼ × 2" (3.2 × 5.0cm)	**03-665D**	30.40	311.70

*Fisherbrand** Long Handled Camel's Hair Brush

For dusting balances

- Slightly pointed tip and full body tapering toward handle



03-661

Overall Length	Bristle L x Dia.	Cat. No.	Each	Pack of 12
9" (23cm)	1½ × ¾" (3.8 × 1.9cm)	**03-661**	16.20	166.17

*Fisherbrand** StaticAway* Antistatic Brush

Dissipates static and whisks away dust, lint, and dirt from balance pans, optics, cuvets, slides, film, microscopes, electronics, computer monitors

- Blend of natural hair, synthetic conductive fiber, and a conductive composite handle
- Prevent inaccurate balance readings by eliminating pan weight variances caused by static
- Won't scratch critical surfaces
- Washable

Fisher Scientific

03-405-1

Overall Length	Bristle L × W × Thickness	Cat. No.	Each
2½" (6.4cm)	1¼ × 2½ × ¼" (3.1 × 6.4 × 0.6cm)	**03-405-1**	22.68

*Fisherbrand** Table-Dusting Brushes

For dusting tables and lab benches

- Soft-bristle brush
- Handle, 5"L (13cm)

03-680

Overall Length	Bristle L x W	Cat. No.	Each	Pack of 6
12⅝" (32cm)	7½ × 2" (19 × 5cm)	**03-680**	32.42	166.25

BURETS

MANUAL

Pyrex* Burets with Colored Markings

Class A

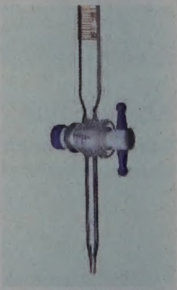
- Tips carefully drawn to ensure accuracy
- Accurate bore tubing in body

INCLUDES:

No. 2 Teflon* fluorocarbon-resin stopcock and dust cap

COMPLIANCE:

Meet ASTM* E 694, E 542, and E 287



03-701-25 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	0.05mL	±0.02mL	2103 10	**03-701-25A**	121.94
25mL	0.10mL	±0.03mL	2103 25	**03-701-25B**	130.36
50mL	0.10mL	±0.05mL	2103 50	**03-701-25C**	139.59
100mL	0.20mL	±0.10mL	2103 100	**03-701-25D**	176.74

Pyrex* Burets with Pyrex Stopcock

Class A

- Precision bore tubing assures accuracy between any two points
- Durable colored graduations are sharply defined and easy to read

03-791-5

INCLUDES:

Carefully ground ₸ stopcock, 2mm bore stopcock plug, and dust cover

COMPLIANCE:

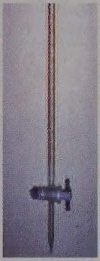
Meet ASTM*E 287 and E 42

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	0.05mL	±0.02mL	2130-10	**11-850-01**	150.33
25mL	0.10mL	±0.03mL	2130-25	**03-791-5**	165.91
50mL	0.10mL	±0.05mL	2130-50	**03-747**	180.97

Pyrex* Burets with Colored Scale

Class B

- Ideal for use in educational and institutional labs
- Tips carefully drawn to ensure accuracy and proper drainage rate
- Durable, colored enamel markings



03-701-26 Series

INCLUDES:

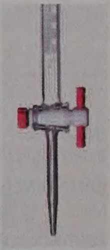
No. 2 PTFE stopcock plug and dust cap

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	5/100mL	±0.04mL	2122A 10	**03-701-26A**	100.81
25mL	1/10mL	±0.06mL	2122A 25	**03-701-26B**	104.21
50mL	1/10mL	±0.10mL	2122A 50	**03-701-26C**	105.59
100mL	2/10mL	±0.20mL	2122A 100	**03-701-26D**	127.37

Kimax* Precision Bore Burets with PTFE Stopcock

Class A

- Precision bore tubing
- Durable white scale
- Permanently marked with individual serial number



03-700-22 Series

INCLUDES:

No. 2 PTFE stopcock and KimKap* dust cap

COMPLIANCE:

Meet ASTM* E 287. 4½" (115mm) delivery stem on 10mL size meets ASTM D 664

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by NIST*.

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	0.05mL	±0.02mL	17027F 10	**03-700-22A**	160.73
25mL	0.10mL	±0.03mL	17027F 25	**03-700-22B**	171.31
50mL	0.10mL	±0.05mL	17027F 50	**03-700-22C**	177.04
100mL	0.20mL	±0.10mL	17027F 100	**03-700-22D**	196.57

Kimax* Burets with 3-Way PTFE Stopcock

Class A

- Precision bore tubing
- Durable white scale
- Permanently marked with individual serial number
- Filling tube accepts ¼" I.D. flexible tubing

INCLUDES:

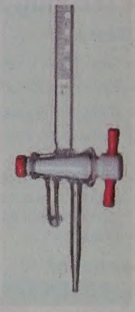
No. 2 PTFE stopcock and KimKap* dust cap

COMPLIANCE:

Meet ASTM*E 287

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by NIST*.



03-724-10 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
25mL	0.10mL	±0.03mL	17052F 25	**03-724-10A**	143.65
50mL	0.10mL	±0.05mL	17052F 50	**03-724-10B**	150.84
100mL	0.20mL	±0.10mL	17052F 100	**03-724-10C**	193.25

Kimax* Buret with Funnel Top and PTFE Stopcock

Class A

- Easy to fill with precision bore tubing
- Durable white scale
- Permanently marked with individual serial number

INCLUDES:

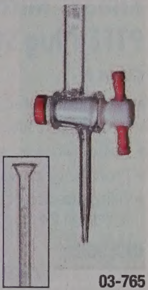
Diagonal No. 2 PTFE stopcock

COMPLIANCE:

Meets ASTM*E 287

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by NIST*.



Buret top configuration

03-765

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
50mL	0.1mL	±0.05mL	17094F 50	**03-765**	154.02

Kimax* Reservoir Fill Burets

Class A

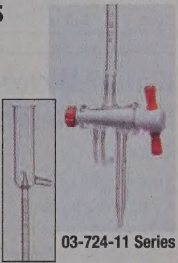
- Durable black scale
- Permanently marked with individual serial number
- Filling tube and overflow tube accept ¼" O.D. flexible tubing
- Self-zeroing

INCLUDES:

No. 2 PTFE stopcock

COMPLIANCE:

Meet ASTM* E 287



Buret top configuration

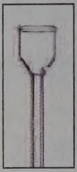
03-724-11 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	0.05mL	±0.02mL	17054F 10	**03-724-11**	179.07
25mL	0.10mL	±0.03mL	17054F 25	**03-724-11A**	179.19
50mL	0.10mL	±0.05mL	17054F 50	**03-724-11B**	185.13
100mL	0.20mL	±0.10mL	17054F 100	**03-724-11C**	219.57

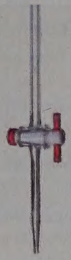
Kimax* Microburets with PTFE-Plug Stopcock

Class A

- Type I, Style I, Fed. Spec. NNN-B-789
- Precision bore tubing
- Durable white scale
- Permanently marked with individual serial number
- No. 3 rubber stopper, carrying short length of glass tubing, can be inserted into funnel top when desirable to fill buret from below by suction



Buret top configuration



20-105 Series

INCLUDES:
No. 2 PTFE-plug stopcock

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by NIST*.

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
5mL	0.01mL	±0.01mL	17110F 5	**20-105A**	249.68
10mL	0.02mL	±0.02mL	17110F 10	**20-105B**	249.68

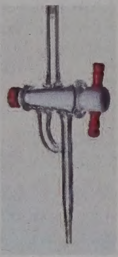
Kimax* Microburets with 3-Way PTFE-Plug Stopcock

Class A

- Type I, Style II, Fed. Spec. NNN-B-789
- Precision bore tubing
- Durable white scale
- Permanently marked with individual serial number
- Filling tube accepts ¼" I.D. flexible tubing—filling is through the stopcock

INCLUDES:
Three-way No. 2 PTFE stopcock

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by NIST*.



20-106 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
5mL	0.01mL	±0.01mL	17115F 5	**20-106C**	280.45
10mL	0.02mL	±0.02mL	17115F 10	**20-106B**	248.75

Kimax* Burets with PTFE-Plug Stopcock

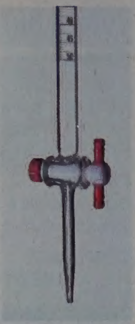
Class B

- Permanently colored black scale

INCLUDES:
No. 2 PTFE-plug stopcock and KimKap* dust cap

COMPLIANCE:
Meet ASTM* E 287

NOTE:
If glass body breaks, stopcock plug can be used in replacement glass body 03-700-21C, (sold separately).



03-700-20 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
10mL	0.05mL	±0.04mL	17026F 10	**03-700-20A**	98.22
25mL	0.10mL	±0.06mL	17026F 25	**03-700-20B**	98.22
50mL	0.10mL	±0.10mL	17026F 50	**03-700-20C**	107.38
100mL	0.20mL	±0.20mL	17026F 100	**03-700-20D**	124.09

ACCESSORIES

Replacement Glass Body for 03-700-20C Buret

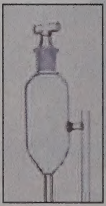
- With Lubri-Flo* stopcock barrel
- Without PTFE plug

Capacity	Mfr. No.	Cat. No.	Each
50mL	17026G 50	**03-700-21C**	72.28

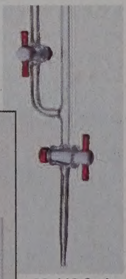
Kimax* Microburets with Integral Reservoir

Class A

- Type I, Style I, Fed. Spec. NNN-B-789
- Precision bore tubing
- Durable white scale
- Permanently marked with individual serial number
- Reservoir capacity: Approximately 70mL



Buret top configuration



20-112 Series

INCLUDES:
₮ 14/20 stopper in reservoir and two No. 2 PTFE-plug stopcocks.

COMPLIANCE:
Meet ASTM* E 694

CERTIFICATIONS:
A certificate is provided to indicate instrument traceability to standards provided by NIST*.

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
2mL	0.01mL	±0.01mL	17132F 2	**20-112A**	260.34
5mL	0.01mL	±0.01mL	17132F 5	**20-112B**	282.92
10mL	0.05mL	±0.02mL	17132F 10	**20-112C**	269.41

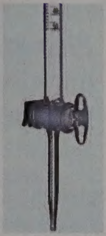
Kimax* Buret with Black Scale

Class B

- Durable black ceramic enamel scale

INCLUDES:
Straight Ꞩ No. 2 glass stopcock and KimKap* dust cap

COMPLIANCE:
Meets ASTM*E 287



03-693C

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
50mL	0.10mL	±0.10mL	17026 50	**03-693C**	84.92

Nalgene* Acrylic Burets

Class B

- Durable, transparent body with polymethylpentene tip
- Unaffected by diluted acids and bases (except hydrofluoric acid and ammonium hydroxide) used as titrants

INCLUDES:
Leakproof† TFE stopcock and plug

COMPLIANCE:
Meet ASTM* E 287

03-705 Series

NOTE:
Not recommended for use with organic solvents and alcohol.

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each	Case of 4
25mL	0.10mL	±0.06mL	3650 0025	**03-705B**	103.88	277.00
50mL	0.10mL	±0.10mL	3650 0050	**03-705C**	117.56	313.50
100mL	0.20mL	±0.20mL	3650 0100	**03-705D**	132.19	352.50

†Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** These tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

BUDGET PRICED

*Fisherbrand** Manual Student Burets

With blue markings

- Well suited for both educational and routine laboratory work

INCLUDES:
Straight Ꞩ glass stopcock

03-700 Series

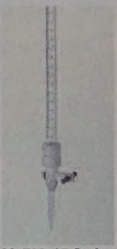
Capacity	Subdivision	Tolerance	Cat. No.	Each	Case of 12
10mL	0.05mL	±0.05mL	**03-700A**	74.70	761.95
25mL	0.10mL	±0.06mL	**03-700B**	69.25	706.35
50mL	0.10mL	±0.10mL	**03-700C**	114.85	1171.45
100mL	0.20mL	±0.20mL	**03-700D**	113.55	1158.20

Pyrex* Burets with Locking Stopcock

Replaceable components for cost savings

- Easy-to-read, wear-resistant white enamel graduations in 0.10mL increments
- Barrel tooled at top and bottom
- Ground tip for accurate fluid control and leak-resistance

INCLUDES:
Locking PTFE fluorocarbon resin stopcock



03-700-15 Series

Capacity	Tolerance	Mfr. No.	Cat. No.	Pack of 2	Case of 3 Pack
25mL	±0.06mL	2116 25	**03-700-15A**	176.39	395.09
50mL	±0.10mL	2116 50	**03-700-15B**	183.44	411.49

Kimax* Burets with Threaded Closure Fit

Educational grade

- Economical and versatile
- Accept PTFE stopcock assembly with threaded closure to prevent dislodging
- Tube has a reinforced top with tooled lower end
- Ground tip fits into lower end of stopcock assembly

INCLUDES:
KimKap* dust cap

03-857 Series

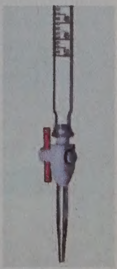
Capacity	Subdivisions	Mfr. No.	Cat. No.	Each
25mL	0.1mL	17121H 25	**03-857A**	66.51
50mL	0.1mL	17121H 50	**03-857B**	69.29

Kimax* Burets with Replaceable PTFE Stopcock

Replaceable glass barrels and tips

- Borosilicate glass construction
- Permanent brown scale on the 25mL size and black on the 50mL

INCLUDES:
KimKap* dust cap and 2mm PTFE-plug stopcock



03-700-12 Series

Capacity	Subdivisions	Mfr. No.	Cat. No.	Each	Case of 6
25mL	0.1mL	17021H 25	**03-700-12A**	91.05	398.76
50mL	0.1mL	17021H 50	**03-700-12B**	93.94	411.42

ACCESSORIES

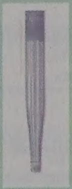
Replacement Glass Barrels

- For 03-700-12 Series burets
- Without stopcock, tip, or dust cap

Capacity	Mfr. No.	Cat. No.	Case of 6
25mL	17021J 25	**03-700-13A**	----
50mL	17021J 50	**03-700-13B**	132.62

Replacement Glass Tips

- For 03-700-12 Series and 03-857 Series burets
- Fit 25 and 50mL sizes



10-310-31

Mfr. No.	Cat. No.	Case of 6
17034H 99	**10-310-31**	32.17

Replacement PTFE Stopcock Assembly

- For 03-700-12 Series burets
- Assembly is PTFE and free of expansion/contraction problems.

Stopcock Bore	Mfr. No.	Cat. No.	Each
2mm	41006F 2	**10-310-165**	49.11

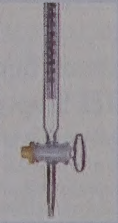
SCHELLBACH

*Fisherbrand** Schellbach Burets

With straight $\overline{\mathsf{S}}$ glass stopcock

- Accentuate meniscus for easy reading
- Accuracy established within the limits of error allowed by NIST*

Buret top confrigruation



03-740 Series

Capacity	Subdivision	Tolerance	Cat. No.	Each	Case of
25mL	0.10mL	±0.06mL	**03-740A**	141.65	12/1444.85
50mL	0.10mL	±0.10mL	**03-740B**	133.40	12/1360.70
100mL	0.20mL	±0.20mL	**03-740C**	166.10	6/847.10

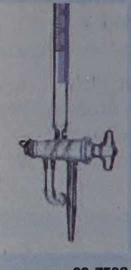
*Fisherbrand** Schellbach Burets with Three-Way Stopcock

Automatic zeroing

- Calibrated to a tip at top
- Tip located in overflow cup with drain at side
- Black graduations with Schellbach stripe

COMPLIANCE:
Meet ASTM* E 287

Buret top configuration



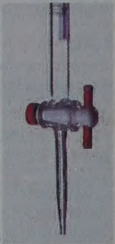
03-750C

Capacity	Subdivision	Tolerance	Cat. No.	Each	Case of 6
25mL	0.10mL	±0.06mL	**03-750A**	328.51	1684.69
50mL	0.10mL	±0.10mL	**03-750B**	309.11	1585.18
100mL	0.20mL	±0.20mL	**03-750C**	369.59	1895.31

Kimax* Schellbach Burets

With straight PTFE-plug No. 2 stopcock and KimKap*dust cap

- Durable black ceramic enamel scale
- Blue line on a broader white band running vertically behind the scale
- Meniscus is read at narrowest point of blue line above the true meniscus, ensuring greater accuracy



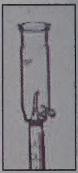
03-740-5 Series

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each
25mL	0.10mL	±0.06mL	17150F 25	**03-740-5A**	84.54
50mL	0.10mL	±0.10mL	17150F 50	**03-740-5B**	86.98

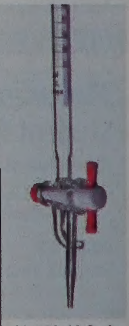
Kimax* Schellbach Burets with Three-Way Stopcock

No. 2 stopcock with automatic PTFE plug

- Durable black ceramic enamel scale
- Schellbach stripping applied to back opposite scaletop
- Overflow tube at top and filling tube at stopcock accept ¼" I.D. flexible tubing
- Calibrated to self-zero tip at top



Buret top configuration



03-750-10 Series

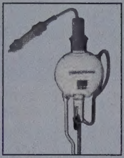
Capacity	Subdivisions	Tolerance	Mfr. No.	Cat. No.	Each
25mL	0.10mL	±0.06mL	17170F 25	**03-750-10A**	184.47
50mL	0.10mL	±0.10mL	17170F 50	**03-750-10B**	198.43

AUTOMATIC

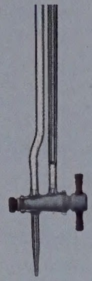
Fisherbrand* Machlett Automatic Burets

Class A

- Gravity filling eliminates errors and guards against deterioration of liquids affected by air
- Half turn of PTFE-plug stopcock fills buret; another half turn dispenses liquid
- Overflow is automatically drawn back into reservoir through tube connecting reservoir with overflow tube
- With stopcock handle in horizontal position, all action stops
- Single air intake on reservoir neck is protected by drying tube, which removes moisture from incoming air
- Can be used in multiples by connecting central storage vessel to each reservoir neck opening—when used in this way, detachable drying tube is placed on storage vessel



Buret top configuration



03-847-1 Series

Capacity	Subdivision	Tolerance	Reservoir Capacity	Cat. No.	Each
2mL	0.01mL	±0.01mL	500mL	**03-847-1A**	359.13
5mL	0.02mL	±0.01mL	1000mL	**03-847-1B**	413.13
10mL	0.05mL	±0.02mL	1000mL	**03-847-1C**	417.21
25mL	0.10mL	±0.03mL	2000mL	**03-847-1D**	450.80
50mL	0.10mL	±0.05mL	2000mL	**03-847-1E**	506.29

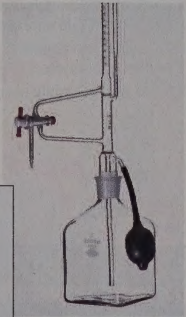
Kimax* Automatic Burets with Bottles

Class A

- \$ joints fit into reagent bottles with \$ necks
- Constructed with overflow tubes that return directly to reservoir
- For air intake, overflow cups have hose connection for attaching drying tube; second drying tube provided for use between rubber bulb and reservoir
- Precision bore tubing permanently marked with individual serial number
- Durable black ceramic enamel scale

CERTIFICATIONS:

A certificate is provided to indicate instrument traceability to standards provided by NIST*.



03-848-2 Series

Buret top configuration

Capacity	Sub-division	Grad. Intervals	Reservoir Capacity	\$ Joint No.	Mfr. No.	Cat. No.	Each
10mL	0.05mL	0.5-10	1000mL	29	17124F 10	**03-848-2A**	530.90
25mL	0.10mL	1.0-25	1000mL	29	17124F 25	**03-848-2B**	530.86
50mL	0.10mL	1.5-50	2000mL	34	17124F 50	**03-848-2C**	551.67

Kimax* Automatic Burets

Class B

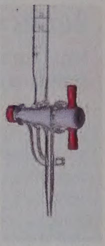
- For industrial and educational applications
- Calibrated "To Deliver" from tip of overflow tube
- Refill through inlet tube on stopcock and automatically adjust for zero
- Inlet and overflow tubes accept ¼" I.D. flexible tubing
- Durable black ceramic enamel scale
- Graduations at top are omitted since diameter in this portion varies due to sealing of overflow cup

INCLUDES:

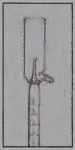
No. 2 PTFE-plug three-way stopcock

COMPLIANCE:

Designed from ASTM* E 287



03-727 Series



Buret top configuration

Capacity	Subdivision	Tolerance	Mfr. No.	Cat. No.	Each

ACCESSORIES

Replacement Burets for 03-842 Series

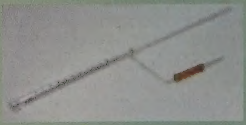
For 03-842-1 and 03-842-2 Series. With Ŧ glass stopcock.

03-842-3B

Capacity	Cat. No.	Each
10mL	**03-842-3A**	186.85
25mL	**03-842-3B**	214.55

Replacement Burets for 03-843 Series

For 03-843-1 and 03-843-2 Series.



03-843-3A

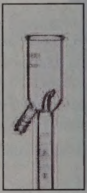
Capacity	Cat. No.	Each	Case of 12
10mL	**03-843-3A**	193.00	- - - -
25mL	**03-843-3B**	188.80	1925.75

Pyrex* Automatic Burets with Two Rotaflo* Stopcocks

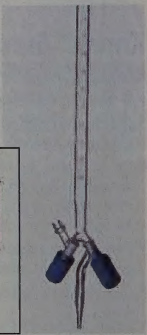
No lubricants or O-rings necessary

Two Rotaflo stopcocks seal completely but are less likely to freeze up.

- Rotaflo design permits fine control, high accuracy
- One stopcock controls titrant delivery; second stopcock (on side arm) controls filling
- Automatic zero feature is conventional overflow tip variety
- Wear-resistant white enamel markings



Buret top configuration



03-832 Series

Capacity	Subdivision	Tolerance	Stopcock Bore	Mfr. No.	Cat. No.	Each
25mL	0.10mL	±0.06mL	3.0mm	2110 25	**03-832A**	323.03
50mL	0.10mL	±0.1mL	3.0mm	2110 50	**03-832B**	320.25

Nalgene* Break-Resistant Self-Zeroing Automatic Burets

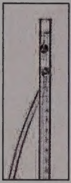
Easy to use and safer than glass

- Crystal-clear acrylic body with polymethylpentene stopcock and tip, and PTFE plug
- Unaffected by dilute mineral acids and bases except hydrofluoric acid and ammonium hydroxide

INCLUDES:
Squeeze-bottle filling assembly, 36" (91cm) clear plastic tubing, and buret cover

COMPLIANCE:
Meet ASTM E* 287

NOTE:
Not for use with alcohol, organic solvents.



Buret top configuration

03-834 Series (clamp not included).

Capacity	Subdivisions	Tolerance	Reservoir Capacity	Mfr. No.	Cat. No.	Each	Case of 4
10mL	0.1mL	±0.04mL	500mL	3640 0010	**03-834A**	115.22	307.25

Scienceware* Automatic Self-Zeroing Glass Burets

Large separable base for stability

- Borosilicate glass burets mounted to polyethylene screw caps that fit onto polyethylene reservoirs
- Squeezing reservoir forces liquid into buret
- Overfill drains back to reservoir when pressure is released
- White 0.1mL subdivisions

INCLUDES:
Drain arm with 2mm bore glass stopcock

03-830

Capacity	Reservoir Capacity	Base Diameter	Mfr. No.	Cat. No.	Each

Brinkmann* Metrohm* 765 Series Dosimat Automatic Burets

Perform GLP dosing test automatically

20-751-142

- Versatile dispensing instruments for titrating and dosing operations feature six modes
- Can be used as an electronic dropping funnel in synthesis lab and pilot plant
- Easy-to-read LCD shows total volume added
- Resolution of 1µL when using a 10mL buret
- Nonvolatile memory stores up to 10 user-specific methods
- Keyboard access to automatic preparation of standard solutions; pipetting, diluting and dispensing; and results calculation
- Digital setting of discharge and filling rates
- With RS-232-C data interface to connect to balance, printer or computer—can be remotely controlled via a computer
- Continuous dispensing available when used in tandem with second 765 Dosimat unit
- Accommodate auxiliary pipetting equipment

ORDERING INFORMATION:
Dimensions: 10L × 11W × 14"H (25 × 28 × 36cm). Certification and accessories available through your Fisher Scientific Customer Service Representative.

INCLUDES:
Trigger to remotely add reagents

SPECIAL PURPOSE

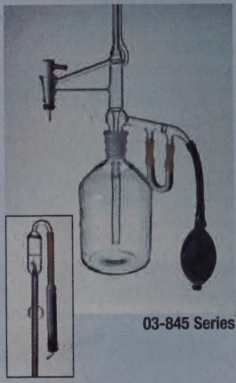
*Fisherbrand** Automatic Burets for Petroleum Neutralization

Class A

- Borosilicate glass construction
- Petroleum sample is dissolved in beaker, then titrated with standard acid or base reagent from buret until neutralized
- Buret reading indicates amount of reagent dispensed to reach neutralization
- Air openings on buret have drying tubes filled with activated alumina for absorption of vapors and moisture
- Absorbent can be regenerated by heating

INCLUDES:
PTFE fluorocarbon resin stopcock, reagent bottle and aspirator bulb

COMPLIANCE:
Meet ASTM* D 974



03-845 Series

Buret top configuration

Capacity	Subdivisions	Tolerance	Reservoir Capacity	₮ Joint No.	Cat. No.	Each

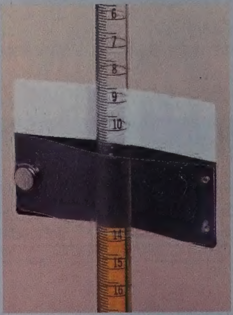
ACCESSORIES

*Fisherbrand** Meniscus Reader

Simplifies buret readings

- Vinylite* reader provides background that is white above and black beneath
- Transparent front strap with snap holds reader in place
- Slide up or down to position black demarcation just below meniscus
- For dark liquids, illuminate from behind to make meniscus visible (black background provides shield against glare)
- For clearer liquids, ordinary illumination produces black reflection that defines meniscus sharply



03-872

03-872	26.58	271.10

*Trademark. See Trademark Reference.

Prices subject to change.

Nalgene* Economical Self-Zeroing Buret Filler Kit

No funneling, no spills

- Converts any conventional glass or plastic 25 or 50mL buret into an automatic-filling, self-zeroing buret to save time, and add convenience
- Insert adjustable fill tube into buret to zero mark, squeeze bottle, then release
- Excess titrant in buret is drawn back into bottle, automatically zeroing buret
- Reverse adapter plug to switch from 25 to 50mL buret or to store or transport titrating reagents

INCLUDES:

1000mL low-density polyethylene squeeze bottle, 4' length (1.2m) of clear, flexible PVC tubing, fill tube, adapter and closure for reagent bottle.

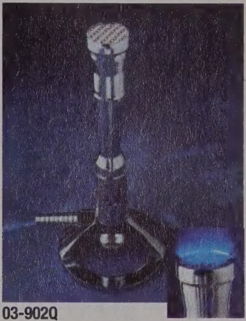
237070	04-245-1	163.31

GAS

Fisher Scientific* accuFlame* Natural Gas Burner

Stainless-steel grid top for better flame adjustment

- Provides better Meker Cone definition for easier fine tuning
- Distributes flame through 100 separate openings for uniform heating; flame arrester prevents flashback
- Provides twice the heat output (2930w/10,000 BTU/hr.) of straight-tube burners
- Features Venturi tube for thorough mixing of gas and air, and adjustable gas orifices and air shutter for complete combustion
- Burns natural gas at 10 cu. ft./hr.
- Rustproof chrome-plated brass body with no-tip, zinc-aluminum alloy base



03-902Q

REQUIRED ACCESSORIES:

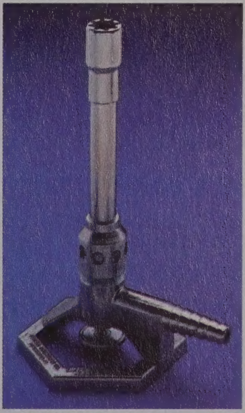
¼" I.D. gas supply tubing recommended (not included)

Grid Diameter	Height	Heat Value	Cat. No.	Each
1½" (3.8cm)	8⅝" (22cm)	800–1200 BTU/ft.^{3} (29.8–44.7MJ/m^3)	03-902Q	80.26

Fisher Scientific* Adjustable-Flame Burners

Ideal for very slow heating or quick boiling

- Pittsburgh-Universal straight-tube burners have flames adjustable from ¾ to 12" (20 to 305mm)
- Obtain heat output of over 1465w (5000 BTU/hr.)
- Consume 5 cu. ft./hr. of gas
- Flame retainer (supplied) prevents flame lifting or extinguishing
- Adjustable air and gas controls ensure complete combustion
- Tapered, serrated gas connection
- Nonferrous, rustproof construction
- Separate models for natural and LP gases

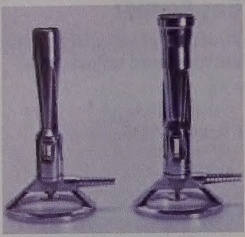


03-962Q

Heat Value	O.D. × H	Cat. No.	Each
Natural Gas Type			
800–1200 BTU/ft.^{3} (29.8–44.7MJ/m^3)	½ × 6½" (13 × 165mm)	03-962Q	77.19
LP Gas Type			
2400–3300 BTU/ft.^{3} (89.4–122.9MJ/m^3)	½ × 6" (13 × 165mm)	03-962PQ	74.80

Fisher Scientific* Standard Grid-Top Adjustable-Flame Burners

Separate models for artificial and LP gases



03-900Q, 03-902PQ

- Channel flame through 100 separate openings for uniform heating
- Provide twice the heat output (2930w/10,000 BTU/hr.) of straight tube burners
- Feature Venturi tube for thorough mixing of air and gas, and adjustable air shutter and gas orifices for complete combustion (uses 10 cu. ft. per hour of gas)
- ⅜" thick (10mm) stainless-steel grid prevents flashback
- Rustproof chromium-plated brass body and no-tip, zinc-aluminum alloy base
- LP model operates best on Philgas*, Shellgas, and Pyrofax*; also operates with propane and butane

REQUIRED ACCESSORIES:
¼" I.D. gas supply tubing recommended (not included)

Grid Dia.	Height	Heat Value	Cat. No.	Each
Artificial Gas Type				
1 3/16" (3cm)	7½" (19cm)	150–600 BTU/ft.^{3} (5.6–22.4MJ/m^3)	**03-900Q**	127.69
LP Gas Type				
1½" (3.8cm)	8⅝" (22cm)	2400–3300 BTU/ft.^{3} (89.4–122.9MJ/m^3)	**03-902PQ**	92.61

Fisher Scientific* Economy Burners

Nonferrous, rustproof construction

03-917Q

- Two large adjustable air inlets produce clear, blue, efficient flame
- Tapered, serrated gas inlet provides secure tubing connection
- Flame retainer (supplied) prevents flame lifting or extinguishing
- Tip-resistant base
- Separate models for natural and LP gases

COMPLIANCE:
Meet NIST* Standards and Fed. Spec. NNN-B-795, including 1465w (5000 BTU/hr.) requirement

Heat Value	O.D. × H	Cat. No.	Each
Natural Gas Type			
800–1200 BTU/ft.^{3} (29.8–44.7MJ/m^3)	½ × 6½" (13 × 165mm)	**03-917Q**	32.54
LP Gas Type			
2400–3300 BTU/ft.^{3} (89.4–122.9MJ/m^3)	½ × 6½" (13 × 165mm)	**03-917PQ**	40.67

Fisher Scientific* Small-Size Burners

For natural, artificial, and LP gases

- Heat output, 1465w (5000 BTU/hr.)
- Adjustable air supply and tapered, serrated gas connection
- Nonferrous construction

ORDERING INFORMATION:
Dimensions: 3¼H (8cm) × ½" O.D. (1.3cm)

04-067PQ

Fisher Scientific* Portable Bunsen Burner

Compact and portable

Fisher Scientific

14-648-15

Ideal for soldering, heat shrink tubing, wire annealing, bending glass, plastic or metal, sterilizing, electronics, or repairing metal tubing leaks. Quickly heats anything under the fume hood or out in the field to 2500°F (1371°C).

- Self-igniting with an automatic piezoelectric-ignition button for an instant, adjustable, antiflare flame
- Temperature is controllable by varying the gas flow to the burner
- Tough aluminum body holds 20cc of butane and is easily refilled
- Single filling provides 1½ hours of operating time
- Burner can be held in hand or used with the built-in, hands-free stand

ORDERING INFORMATION:
Height: 6½" (16.5cm). Diameter: 2" (5.1cm). Filled weight: 7 oz. (0.2kg). Butane fill sold separately, order Cat. No. 14-648-2.

INCLUDES:
Bunsen head, two tips (blowtorch and solder). Burner Kit (14-648-7) includes burner, Bunsen head, six attachment tips (heat shrink tubing, precision soldering, hot knife cutting, polyfoam cutting, interchangeable tip, and hot blowtorch), wire cutter, needle-nose pliers, plastic carrying case.

Description	Cat. No.	Each
Portable Bunsen Burner	**14-648-15**	60.34
Portable Bunsen Burner Kit	**14-648-7**	72.51

Argos Fireboy* Safety Burners

03-391-173

03-391-174

Easy, safe operation without a pilot flame

Portable (Fireboy Plus) and nonportable (Fireboy Eco) burners are ideal for laboratory procedures requiring flame sterilization.

Fireboy Plus Bunsen Burner

- Portable
- Can be operated using in-house gas (propane, butane, town or natural gas) and electricity
- Functions independently when equipped with a disposable gas cartridge adapter (sold separately) and battery
- **Continuous Mode:** Ignited flame remains on until turned off; safety timer can be set from 10–60 minutes
- **Foot Switch Mode:** Hands-free operation—depress foot switch to ignite, release foot switch to extinguish flame
- **Sensor Mode:** Flame ignites when hand passes within 6–8cm of infrared sensor; safety switch allows flame to be extinguished after 3–12 seconds

Fireboy Eco Bunsen Burner

- Nonportable
- Operates by foot switch only
- Ideal for use in laminar flow hoods
- Can be operated independent of in-house gas when equipped with gas cartridge and adapter

INCLUDES:

Fireboy Plus: Power supply, 7.2V battery, and three nozzles for propane/butane, mixed and natural gas.

Fireboy Eco: Three nozzles and a foot switch.

COMPLIANCE:

CE marked, UL listed

† External charger (03-391-181) can be connected to Fireboy Plus power supply.

Touch-O-Matic* Bunsen Burner

Safer than continuous open flame of conventional Bunsen burner

03-975

Simply depress ON/OFF platform with side of hand to release gas stream, and continuous pinpoint pilot light ignites gas to produce full flame. Release platform and flame goes out to conserve gas.

- ON/OFF platform doubles as convenient hand rest
- Removable and rotatable shield protects pilot and flame from drafts (shield comes wrapped in tissue paper)
- Sturdy, diecast zinc construction is easy to clean
- For use with mixed gas only; butane, natural and propane gas nozzles can be purchased separately (contact your Fisher Scientific Customer Service Representative for ordering information)
- With tapered gas inlet tube; accepts ¼ to 5⁄16" I.D. tubing

CALCULATORS

Fisher Scientific* Solar-Powered, Big-Digit Calculator

Performs all arithmetic calculations

- Features memory, percent, and floating decimal point
- Oversized keys and ½"-high (1.3cm) digits permit easy reading and operation
- Requires no batteries or other independent power source

12-099-20

ORDERING INFORMATION:
Dimensions: 4¼L × 2⅜W × ¼"H (10.8 × 6.0 × 0.6cm). Weight: 2 oz. (57g).

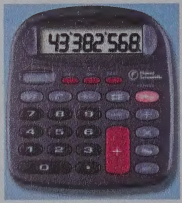
INCLUDES:
Pocket carrying case

Cat. No.	Each
12-099-20	14.07

Fisher Scientific* Solar Desktop Calculator

Solar-powered unit can be read in any light

- Performs chain calculations
- Oversized keys with 8- or 12-digit, ¾" LCD display, angled to eliminate reflected glare
- 12-digit unit permits calculating numbers as large as 999,999,999,999 and as small as .000000000001 without using scientific power notations or symbols
- Tough ABS plastic case is ideal for rough lab use
- Feet protect the unit from spills



12-099-24

ORDERING INFORMATION:
Dimensions: 6½L × 4½W × 3⁄16"H (16.5 × 11.4 × 0.9cm).
Weight: 4 oz. (113kg).

INCLUDES:
Built-in solar panels and instructions

Description	Cat. No.	Each
8-Digit	12-099-24	15.59
12-Digit	12-099-25	20.43

Fisher Scientific* Credit-Card-Sized Metric Conversion Calculator

Performs multiple conversions and calculator functions

Unit provides fast and accurate answers for 126 types of metric conversions. Simply enter a number, press an arrow, and read the exact metric or U.S. equivalent with decimal point in place.

14-648-50

- Converts length, area, volume, weight, liquid, energy, and temperature
- Performs English (Imperial) conversions and has all routine calculator functions
- With raised keys, large digits (½"), and a bright, 8-digit LCD for easy reading and operation
- Credit-card size makes it perfect for carrying anywhere

ORDERING INFORMATION:
Dimensions: 2½L × 4¼W ×½"H (6.4 × 11.4 × 1.3cm). Weight: 1 oz. (28g).

INCLUDES:
1.5V alkaline battery and integrated protective cover

Cat. No.	Each
14-648-50	28.51

Fisher Scientific* 12-Digit Calculator with Oversized Display

With oversized, raised keys for easy operation

12-099-23

- Performs all arithmetic calculations
- Features memory, percent, floating decimal point, ratios, and grand totals
- Displays answer to 12 places with ½"-high (1.3cm) digits
- Powered via solar panel or silver-oxide battery

ORDERING INFORMATION:
Dimensions: 4½L × 2½W × ⅝"H (11.4 × 6.4 × 1.6cm).
Weight: 3 oz. (85g).

INCLUDES:
Chemical-resistant ABS plastic case, built-in solar panels, and silver oxide battery.

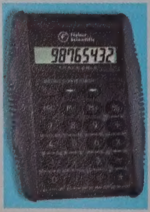
Cat. No.	Each
12-099-23	60.69

Fisher Scientific* Metric Conversion Calculator

Change lab measurements to U.S. or metric in an instant

Provides fast and accurate answers for 126 types of metric conversions.

- Converts length, area, volume, weight, liquid, energy, and temperature
- Performs English (Imperial) conversions and has all routine calculator functions
- With 8-digit, ½" high LCD, raised oversized keys and rubberized side grips for easy handling
- Automatic flip-open LCD cover converts to a benchtop stand



12-099

ORDERING INFORMATION:
Dimensions: 3¾L × 3W × ½"H (9.5 × 7.6 × 1.3cm). Weight: 2 oz. (57g).

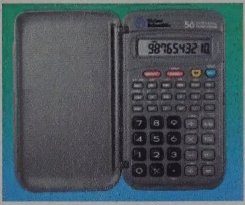
INCLUDES:
Backup battery and instructions.

Cat. No.	Each
12-099	83.58

*Trademark. See Trademark Reference.

Fisher Scientific* Pocket-Sized Scientific Calculator

Ideal for virtually all routine calculations performed in scientific labs, including square roots, percentages, and raising to powers



12-099-21

Performs more than 50 functions including science, math, common/hyperbolic trigonometric, logs/natural logs, powers, roots, reciprocals, factorials, percentages, hexadecimals, random number generation, and degree/decimal conversion.

- Statistical features include standard deviation, mean, sum of squares, sum of data, and much more
- Easy-to-use, raised keys and large, easy-to-read, ¼"H, 10-digit, two-digit exponent LCD
- Three-key memory and "Forever Memory" store data when the unit is off
- Automatic power-down function conserves battery life

ORDERING INFORMATION:
Dimensions: 5L × 3W × ½"H (12.7 × 7.6 × 1.3cm). Weight: 1½ oz. (43g).

INCLUDES:
Backup battery and instructions.

Cat. No.	Each
12-099-21	24.86

CALIPERS

Fisher Scientific* Traceable* Digital Carbon Fiber Calipers

Switch between inches and millimeters easily

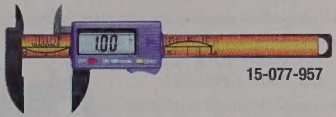
For measuring the outside or inside diameter. Ergonomically designed. No lubrication is ever required on the ultra-smooth slide bar.

- Large digital display: 0.3"H
- Made of strong composite carbon fiber
- Greater-than or less-than results without calculations
- Zero button instantly resets unit at any position
- Runs on the supplied battery for 10,000 hours
- Resolution: 0.01" and 0.1mm
- Accuracy: ±0.01" and ±0.2mm

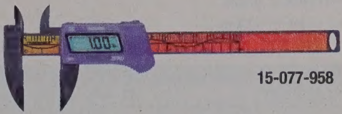
4" version
- Range: 0 to 4" (0 to 100mm)
- Dimensions: 7 × 2.5"
- Weight: 1 oz.

6" version
- Range: 0 to 6" (0 to 150mm)
- Dimensions: 9.5 × 3"
- Weight: 2 oz.

COMPLIANCE:
Individually serial-numbered Traceable Certificate is provided from our ISO 17025 calibration laboratory accredited by A2LA. Indicates traceability to standards provided by NIST*.



15-077-957



15-077-958

Description	Mfr. No.	Cat. No.	Each

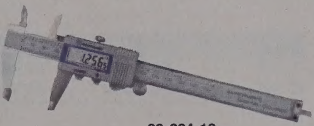
Fisher Scientific* Traceable* Digital Calipers

Switch from inches to millimeters, set jaws closed, or read differential measurements with the touch of a button



06-664-16

- ⅓"-high digital display
- Durable hardened stainless steel
- Resolution: 0.0005" or 0.01mm
- Accuracy: ±0.001" or ±0.03mm

9" version
- Range 0 to 6" (0 to 150mm)
- Dimensions: 9 × 3"
- Weight: 5 oz.

11" version
- Range: 0 to 8" (0 to 200mm)
- Dimensions: 11 × 3"
- Weight: 6 oz.

INCLUDES:
Runs on supplied 1.5V Button Cell 357 Battery for 10,000 hours. (Replace with Cat. No. 02-440-1C.)

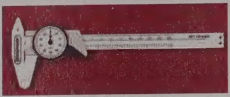
CERTIFICATIONS:
Supplied with serial-numbered certificate from an ISO 17025 calibration laboratory indicating traceability to NIST* standards.

Readings	Cat. No.	Each
0 to 6" (0 to 150mm)	**14-648-17**	78.66
0 to 8" (0 to 200mm)	**06-664-16**	108.20

Scienceware* Dial-Type Vernier Calipers with Metric Scale to 150mm

Nonconducting and corrosion resistant

- Black numbers on white background
- 150mm scale with 0.1mm subdivisions plus 1.3" (33mm) diameter dial
- Dial is adjustable for zero and differential measurements
- Upper scale reads in millimeters, lower scale in inches
- Fine adjustment thumb roller
- Polymeric plastic
- Length: 8¾" (22.2cm)



12-122

Mfr. No.	Cat. No.	Each
H13416 0001	12-122	73.50

Scienceware* Vernier Calipers Double Scales to 150mm

Will not scratch like metal

- Luminescent green numbers on black background
- 150mm scale with 0.1mm subdivisions, plus 6" scale with 0.005" subdivisions
- Upper scale reads in millimeters, lower scale in inches
- Quick, simple thumb roller
- Polymeric plastic
- Length: 9" (23cm)

Additional measuring implements can be found in the Rulers and Measuring Devices section.

CALORIMETERS

IKA* 2000 Analytical Calorimeters

Compact, integrated, modular calorimeters with a high level of automation and simple handling characteristics

Determine gross calorific values of liquid and solid samples using isoperibolic (static jacket) or dynamic (reduced-time) working methods.

- Convenient operating console to access automated features
- Water handling system automatically tempers, fills, and empties inner vessel
- Automatic oxygen filling of decomposition vessel
- Automatic sample ignition
- C 2000 measuring cell with control unit
- KV 600 Digital Cooling Water Supply to provide cooling water to the calorimeter
- Choice of 115V and 230V versions

14-505-131

Basic Version 1 Package

- C 5010 Decomposition Vessel

Basic Version 2 Package

- C 5012 Halogen-resistant Decomposition Vessel for quantitative decomposition of sulfur and halogens

INCLUDES:

Interface connections for scale, printer, monitor, sample rack

COMPLIANCE:

Validation according to DIN 51900, ASTM* 240D, ISO 1928, BSI

PyrexPlus* Aspirator Bottles with Tubulation

Protective PVC coating reduces breakage and contains glass and liquids in case of accident

- Neck takes cork or rubber stopper
- Side outlet is left uncoated for tubing attachment
- Autoclavable up to 121°C (250°F)

REQUIRED ACCESSORIES:
Tubing

ALERT:
Do not place over direct heat or flame. Do not heat above 121°C (250°F) moist heat or 110°C (230°F) dry heat.

02-972K

Kimax* Aspirator Bottles with Tubulation

Bottom glass hose-connection outlet is fused to bottle

- With tooled top
- Narrow mouth for rubber stopper
- With white enamel marking spot

ORDERING INFORMATION:
8½ oz. (250mL) and 17 oz. (500mL) sizes accept 5⁄16" I.D. (8mm) tubing. 34 oz. (1L) and larger accept ⅜" I.D. (9.5mm) flexible tubing.

REQUIRED ACCESSORIES:
Tubing

COMPLIANCE:
Meet ASTM* E 438 Type I, Class A requirements.

POLYCARBONATE

Nalgene* Round Clearboys*

Transparent polycarbonate carboys are tougher, lighter, and safer than glass

- Ideal for distilled water, medial and other culture preparations
- Molded graduations in 5L/1 gallon increments
- Suitable for mixing, storing and freezing aqueous-based reagents and biologicals
- 83mm neck accepts Top Works* and other accessories based on 83B cap
- Autoclavable
- Carboys without spigots are graduated "To Contain"
- Leakproof (see definition below)

02-962-7G

Two Styles Available

- Carboys with spigots are graduated "To Deliver" and include spigot closure
- Polypropylene cap and TPE gasket

ALERT:

Completely disengage cap threads and disassemble spigot before autoclaving

Capacity	Cap Size	Mfr. No.	Cat. No.	Each	Case of 4
With Spigots					
2½ gal. (10L)	83mm	2317 0020	**02-962-7G**	220.60	588.25
5¼ gal. (20L)	83mm	2317 0050	**02-962-7H**	285.75	762.00
Without Spigots					
2½ gal. (10L)	83mm	2251-0020	**02-962-6A**	144.84	386.25

Nalgene* Rectangular Clearboys*

Space-saving design

- Suitable for storing and freezing aqueous-based reagents and biologicals
- Clear polycarbonate
- Wide neck with 100mm polypropylene closure simplifies cleaning
- Autoclavable
- Leakproof (see definition)

Two Styles Available

- Carboys with Spigots are graduated "To Deliver" and include spigot closure

02-961-55A

- Carboys without Spigots are graduated "To Contain"

ALERT:

Completely disengage closure threads and disassemble spigot before autoclaving.

Capacity	Cap Size	Mfr. No.	Cat. No.	Each	Case of
With Spigots					
2¼ gal. (9L)	100mm	2322 0020	**02-963-10A**	236.32	6/945.25

Without Spigots					
2¼ gal. (9L)	100mm	DS2213 0020	**02-961-55A**	----	1/135.25
5¼ gal. (20L)	100mm	DS2213 0050	**02-961-55C**	----	1/185.75

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

POLYETHYLENE

*Fisherbrand** HDPE Wide-Mouth Carboys

Wide neck allows easy access for cleaning or filling

- Chemical resistant
- Can be used at temperatures down to -100°C (-148°F)
- Molded handgrips allow easy lifting or carrying
- Leakproof (see definition)

12-565-635, -637, -642

Carboys with Spigots

Convenient dispensing and storage of stock solutions

- Spigot features spring-loaded lever action
- Will automatically shut off when released, or set in a locked position
- Graduated in liters "To Deliver"

INCLUDES:

Polypropylene screw cap

Capacity	Cap Size	Cat. No.	Each	Case of
1¼ gal. (5L)	100mm	**12-565-641**	117.96	6/471.83

5¼ gal. (20L)	100mm	**12-565-637**	105.50	4/281.33

Nalgene* HDPE Carboys

Tough, rigid, translucent

- Convenient wide mouth for filling, transferring, and cleaning
- Graduated "To Deliver" in gallons and liters
- Leakproof (see definition)
- Polypropylene screw cap, steel handles included

Carboys with Spigots

- Have spigot with two fluoropolymer O-rings and handy tubing adapter
- Spigot closure provides positive fluid control

02-963-6B

POLYPROPYLENE

*Fisherbrand** Polypropylene Wide-Mouth Carboys

Wide neck with 100mm polypropylene closure allows easy access for cleaning or filling

- Chemical-resistant containers are autoclavable and meet FDA Requirements for Food Use
- Molded handgrips allow easy lifting or carrying
- Leakproof (see definition below)

Carboys with Spigots

- Spigot features spring-loaded lever action
- Automatically shuts off when released, or set in a "locked" open position
- Provide convenient dispensing and storage of stock solutions
- Graduated in liters "To Deliver"

INCLUDES:

Polypropylene screw cap

WARNING

Completely disengage threads or remove cap before autoclaving. Not recommended for hazardous materials.

With Bottom Tubulation

- Bottom tubulation molded in one piece with bottle for strength and leak resistance
- Outlet low on bottle for more complete drainage

ORDERING INFORMATION:

Both sizes accept ½" I.D. (1.3cm) tubing.

02-960-22, 02-960-23
(Tubing not included)

INCLUDES:

Polypropylene screw cap

NOTE:

A hose clamp should be used when attaching tubing to ensure tight fit.

WARNING

Completely disengage threads or remove closure before autoclaving.

Nalgene* Heavy-Duty Vacuum Carboys

Extra-thick walls to withstand applications of full vacuum up to 8 hours at 20°C

- Use as a vacuum trap with 02-923 Series Nalgene filling/venting closures
- Biologically inert, food-grade, natural-color polypropylene resin conforms to USP Class VI and noncytotoxic standards
- Autoclavable when closure threads are disengaged and vessel is empty
- Leakproof for vacuum uses (see definition below)

INCLUDES:

White polypropylene screw cap

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of
2½ gal. (10L)	83B	2226 0020	**02-960-14**	148.32	6/593.25

5¼ gal. (20L)	2630 0020	**02-963-8B**	202.51
13 gal. (50L)	2630 0050	**02-963-8C**	269.59

Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

Nalgene* Carboys with 1½" Sanitary Flanges

With welded-in sanitary fitting for use as a dispensing port

- Autoclavable polypropylene
- Provides secure hookup for use as a supply reservoir to systems such as a fermentor or chromatography column
- Graduated in 1 gal. and 5L increments
- Leakproof (see definition below)
- Noncytotoxic
- Accepts No. 13½ rubber stopper

02-963-3B

INCLUDES:

Size 83B closure

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each
2½ gal. (10L)	83B	2640 0020	**02-963-3A**	295.25
5¼ gal. (20L)	83B	2640 0050	**02-963-3B**	300.50
13 gal. (50L)	83B	2640 0130	**02-963-3C**	360.25

WARNING

Remove all metal clamps, disengage threads, and remove cap before autoclaving.

JERRICANS AND LOWBOYS

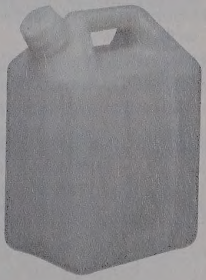
Nalgene* Fluorinated Jerricans

Coating reduces solvent absorption and penetration, providing excellent chemical resistance and improved long-term storage with minimal volume loss

- Treated with fluorocarbon coating
- Long, integral spout and built-in handle
- Graduated in liters and gallons
- Leakproof (see definition left)

INCLUDES:

White, fluorinated polypropylene screw cap, size 53B (53mm)



02-960-13

Capacity (To Shoulder)	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of
2½ gal. (10L)	53B	2242 0025	**02-960-12**	74.31	6/297.25
5¼ gal. (20L)	53B	2242 0050	**02-960-13**	106.59	4/284.25

Nalgene* HDPE Jerricans

Have wide stance and low center of gravity

- Graduated in liters and gallons
- Integral spout and built-in handle
- Strap-fastened cap provided
- Recessed bottom aids handling
- Leakproof (see definition next page)

Jerricans with Second 38mm Port

- Both polypropylene caps are tethered to container
- Use secondary port to fill in place as reservoir in applications where front opening is plumbed to the host equipment

Scienceware* Jerricans

NEW

Wide base ensures stability

Heavy side panels include a large, smooth molded-in area for clear labeling and additional information.

- High density polyethylene
- Built-in spout retracts into the collar to conserve shelf space when transported or stored
- Separate air vent cap for smooth pouring and venting as needed
- Molded-in top handle and hand grip on the bottom
- Heavy side panels
- Graduated in liters and U.S. gallons
- Extra headspace for expansion of contents

11-865-133, -131, -132

Capacity	Mfr. No.	Cat. No.	Each	Case of
5L	H109350000	**11-865-131**	30.40	12/311.79
10L	H109360000	**11-865-132**	39.64	6/203.26
20L	H109370000	**11-865-133**	64.49	6/342.43

Nalgene* Low-Profile, HDPE Lowboys

Perfect for dispensing most liquids, including reagents, distilled water and titrants

- Tolerate strong acids and bases
- Can be stacked up to three high
- Special contour handle allows easy one-handed carrying—even when full
- With four acidproof, pressure-sensitive identification labels
- Leakproof (see definition next page)

02-963-4

Capacity	Screw Cap Size	Mfr. No.	Cat. No.	Each	Case of 4

4 gal. (15L)	63N	2323 0015	**02-963-4**	162.39	433.04

WARNING

Not recommended for use with aggressive organic solvents.

Nalgene* Heavy-Duty Wide-Mouth Jug

Translucent, high-density polyethylene jug graduated in liters and gallons

- Ideal for storing solids or powders
- Features wide mouth, molded-in handle and recessed bottom
- Wide stance and low center of gravity adds stability
- Space-saving rectangular shape
- Large neck allows easy cleaning

INCLUDES:

120mm polypropylene screw cap

NOTE:

Not leakproof

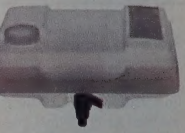
02-960-11

Capacity (To shoulder)	Mfr. No.	Cat. No.	Each	Case of 4
5¼ gal. (20L)	2241 0050	**02-960-11**	124.32	331.50

Nalgene* Autoclavable Polypropylene Lowboys

Can be stacked up to three high

- Space-saving flat rectangular design permits storing in cramped quarters such as refrigerators or cabinets
- Chemical resistant
- With polypropylene spigot and 63mm screw cap
- Leakproof (see definition next page)



02-963-4C

Capacity	Mfr. No.	Cat. No.	Each	Case of 4
2 gal. (8L)	2324 0008	**02-963-4B**	169.90	453.07
4 gal. (15L)	2324 0015	**02-963-4C**	195.85	522.25

WARNING

Disengage threads and dismount spigot before autoclaving.

ACCESSORIES

Nalgene* Top Works* Closures

With silicone stoppers and drop tubes

Provide elastomeric seal for aseptic handling of various fluids in pharmaceutical and biotechnology applications. Long drop tube can be cut to fit multiple bottle sizes.

- For use with Nalgene bottles and carboys
- Available with two, three, or no tubing ports
- Reusable and autoclavable
- Polypropylene
- Closure inserted with silicone stopper/tubing assembly

02-923-15K

COMPLIANCE:

USP Class VI requirements

Closure Size	Tubing I.D.	Mfr. No.	Cat. No.	Each

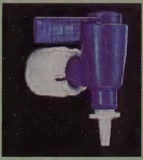
ACCESSORIES

Replacement Spigots

For Nalgene* carboys

- Take ⅝" I.D. tubing
- 02-963-7 supplied with adapter for ¼ or 5⁄16" tubing



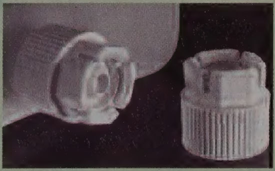
02-963-7

Description	Mfr. No.	Cat. No.	Each	Case of
Polypropylene	6422 0010	**02-963-7**	34.95	12/279.60
Tefzel*	6432 0010	**02-963-7D**	76.03	2/101.38

Spigot Closure

For Nalgene* bottles, jars, carboys

- Polypropylene lock nut and plug
- Replaces 02-963-7 to provide leakproof seal (see definition) when autoclaving liquids in a carboy



02-963-7E

Mfr. No.	Cat. No.	Pack of 4	Case of 6 Pack
6423 0010	**02-963-7E**	28.48	113.93

Nalgene* Barbed Bulkhead Fittings

Convert Nalgene closures for fluid transfer operations

- Use ¼" size on 53mm or larger closures; ½" size on 83mm or larger closures
- Fittings are barbed at both ends to accept tubing for inside and outside container
- Autoclavable
- Leakproof (see definition below)

15-315 Series

INCLUDES:

Instructions, drilling template and two each of polypropylene barbed fitting, acetyl nuts and silicone gaskets.

Tubing Size	Mfr. No.	Cat. No.	Pack of 2	Case of 12 Pk.

83mm	¼" (6.4mm)	2162 0831	**02-923-13Z**	41.79	167.12
83mm	½" (13mm)	2162 0830	**02-923-15**	41.79	167.12

[†] Nalgene assigns the term "leakproof": a) To bottle/closure systems with closures smaller than 100mm, after they are filled with water, inverted, withstand air pressure of 2psig for 2 minutes, and no water escapes;. b) To bottle/closure systems of 100 or 120mm after they are filled with water, inverted for 15 minutes, and no water escapes. **Note:** these tests, using other liquids, may not yield the same results. To ensure safe usage, Nalgene advises customers to test Nalgene bottles and closures under conditions of their planned applications. Nalgene bottles and carboys are leakproof at ambient temperature and pressure when used with their Nalgene closures.

CARTS

Thermo Scientific* Hamilton* Max/Lab* Mobile Instrument Carts

Ideal for adapting workstations to stand-up or sit-down procedures, for meeting ADA applications, or for transporting heavy instruments between labs

Available in four adjustable styles with a variety of upper shelf and suspended drawer/cabinet configurations, including optional components. See individual model specifications.

- Maximum height of frame: 78⅜" (199cm)
- Load-bearing capacity of all models: 900 lb. (408kg)

Mobile Cart, 48" (122cm) Overall Width

- With fixed bottom shelf and 48W × 31"L (122 × 79cm) laminate top on adjustable-height frame
- Optional components available

Full-height Mobile Cart, 72" (183cm) Overall Width

- Features two or three 36W × 18"L (91 × 46cm) upper adjustable shelves and one or two 36W × 31"L (91 × 79cm) laminate tops on adjustable-height frame
- Available with or without fixed bottom shelf, suspended cabinet with lock (choice of two depths), and suspended drawer with lock
- Optional cabinets and drawers available

Full-height Mobile Cart, 60" (152cm) Overall Width

- With one 60W × 18"L (152 × 46cm) upper adjustable shelf and one 60W × 31"L (152 × 79cm) laminate top on an adjustable-height frame
- Available with or without fixed bottom shelf, suspended cabinet with lock, and suspended drawer with lock
- Optional cabinets and drawers available

HMM1CLAB002

Mobile Cart with Upper Frame (to make full-height assembly)

- Features either a 48W × 18"L (122 × 46cm) or a 72W × 18"L (183 × 46cm) upper adjustable shelf; either a 48W × 31"L (122 × 79cm) or a 72W × 31"L (183 × 79cm) laminate top on an adjustable-height frame
- Available with or without suspended cabinet with lock
- Suspended drawer optional on select models

Fisher Scientific* Mini-Dolly Folding Cart

Ideal platform cart to move chemicals, carboys, computer paper, filing boxes, and scientific equipment

- Load capacity: 265 lb. (120kg)
- Constructed of ABS plastic and chrome-plated steel with low, nonskid platform
- Eliminates lifting required by high-shelf carts
- Easy-roll wheels swivel for added maneuverability
- Plastic guard on four sides protects walls
- Folds for storage

ORDERING INFORMATION:
Weight: 20 lb. (9.1kg).

INCLUDES:
Three bungee cords

Platform Length	Width	Cat. No.	Each
25½" (65cm)	17¾" (45cm)	**04-681**	109.16

04-681

Fisher Scientific* Aluminum Foldup Cart

Moves heavy lab chemicals, drums, and cases of glassware with ease

- Load capacity 330 lb. (150kg)
- Sturdy aluminum alloy construction with telescoping platform for longer loads
- Folds up to briefcase size for easy storage or transport
- Rolls easily on large, solid rubber wheels
- Handle adjusts to two heights: 27 and 30" (69 and 76cm)
- Rubber bumpers on all four corners protect walls from accidental scuffs

11-928-1

ORDERING INFORMATION:
Weight: 20 lb. (9kg).

INCLUDES:
Three bungee cords

Platform Length	Width	Cat. No.	Each
18 to 28" (46 to 65cm)	16" (41cm)	**11-928-1**	173.05

Fisher Scientific* Aluminum Foldup Hand Truck

Folds completely to briefcase size for easy storage

- Load capacity: 220 lb. (100kg)
- Sturdy aluminum alloy construction for moving cartons, chemicals, gas cylinders, etc.
- 6½" dia. (16.5cm) solid-rubber wheels easily move heavy loads
- Handle extends from 28 to 42" (71 to 107cm)

11-928-2

ORDERING INFORMATION:
Weight: 15 lb. (6.8kg).

INCLUDES:
Three bungee cords

Labconco* Variable-Height Bench

Easy-to-adjust bench can be set at four heights

- Load capacity: 540 lb. (245kg)
- 2" (5cm) welded tubular frame
- 1⅛" (3cm) thick fiber-resin work surface is melamine high-pressure laminate
- Heavy-duty bench height adjustable from 29⅝ and 37⅜" (75 to 95cm) using steel pins and nuts
- Baked-on epoxy powder coating resists abrasion and corrosion
- 5" dia. (12.7cm) nonmarking polyurethane casters with toe locks maneuver easily and absorb vibration

11-926-110

ORDERING INFORMATION:

Labconco* Instrument Cart/Desk

Ideal instrument cart, desk or lab table

- Load capacity: 400 lb. (181kg)
- 1" (2.5cm) square steel tubing welded frame
- Phenolic board work surface is melamine high-pressure laminate that resists stains and corrosion
- Centered support bar permits seating on either side
- Baked-on epoxy powder coating resists abrasion and corrosion
- 4" dia. (10.2cm) hard rubber casters maneuver easily and absorb vibration; toe locks on two casters keep cart in position

31 × 19 × 33¾" (79 × 48 × 86cm)	**11-954-751**	592.00

InterMetro* Standard-Duty Three-Shelf Utility Carts

Dependable, attractive carts available with solid and wire shelves

91-134

- Load capacity: 800 lb. (363kg)
- Fully interchangeable Super Erecta* shelves
- Center shelf can be positioned at any height in 1" (2.5cm) increments
- One-piece stainless-steel or chrome handles (depends on model) add rigidity and durability
- 18" (46cm) carts have 4" dia. (10cm) casters; 21" (53cm) wide carts have 5" dia. (13cm) casters
- Models available with solid shelves, wire shelves, or a combination

Solid Shelves

- 18-gauge stainless steel, doubly thick at the edges for rigidity and strength
- Raised edges help contain spills and make cleanup easier
- Sturdy corner castings facilitate mounting

Wire Shelves

- Chrome-plated with trademarked truss design for added strength
- Corners slide easily over special tapered snap-together plastic sleeves to fasten them securely in place

ORDERING INFORMATION:
Shipped knocked down. Assemble/disassemble quickly and easily without tools.

Standard-Duty Utility Cart

Ideal for light-duty transport and storage

11-954-750

- Load capacity: 300 lb. (136kg)
- Durable welded stainless-steel construction cleans and sanitizes easily
- Designed for continuous transport even over uneven floor surfaces
- Integrated push handle for easy handling
- Three fixed, open shelves with reinforced, hemmed front for added strength
- Sound-deadening panels under shelves restrict vibrations and noise
- Bumpers on legs and handles protect walls and furniture
- Four 3½" dia. (8.9cm) rubber-cushioned, swivel casters for maneuverability

Rubbermaid* Flat-Shelf Utility Carts

Made from durable, structural foam to eliminate denting, rusting, and bending

11-825-84A

- Load capacity: 250 lb. (113kg) per shelf
- All-plastic construction and 5" dia. (12.7cm) casters provide quiet operation and easy maintenance
- Easy to maneuver with quiet, mark-resistant casters
- Rounded corners prevent damage to walls and doorways
- Handle bin holds tools and other items
- Top-shelf "moat" keeps parts and accessories in place
- Mounting bracket serves as cord wrap and is ideal for holding soft wastebaskets

ORDERING INFORMATION:

Rubbermaid* Heavy-Duty Utility Carts

Perfect for transporting equipment and heavy loads in any environment

11-926-75

- Load capacity: 500 lb. (227kg)
- Sturdy structural foam construction resists alkalis, solvents, and dilute acids
- Won't chip, flake, or dent
- Molded in cup holder and compartments for small parts and tools
- Two deeply recessed seamless shelves help contain accidental spills and keep shelf contents in place
- Rounded external edges prevent damage to walls and furniture; rounded inside corners won't trap residue—making cleaning easier
- Comfortable molded handle for firm grip
- Two fixed and two swivel nonmarking, 5" dia. (13cm) casters

ORDERING INFORMATION:
Color, beige. Shipped unassembled. Assemble in minutes using screwdriver and pliers. Optional middle shelf available separately. Carts also available in black. Contact your Fisher Scientific Customer Service Representative for ordering information.

Rubbermaid* X-tra* Carts

Large shelves hold small baths, centrifuges, pH meters, and other equipment

11-926-97

- Load capacity: 300 lb. (135kg)
- Tough HPDE construction resists chips, dents, scratches, and rust
- Shelves feature easy-to-clean surfaces, rounded interior corners, and raised edges to keep small items from slipping off
- Ergonomically designed handles on both cart ends
- Quiet-rolling, nonmarking 4" dia. (10cm) casters

Utility Carts

- Choice of three-shelf models in three styles: open, enclosed on two ends, and enclosed on three sides (virtually a cabinet on wheels)
- Also available in four-shelf open style

Instrument Cart

- Ideal for securely transporting tools and smaller equipment
- Three-shelf design; open top and middle shelves; enclosed bottom shelf has lockable doors
- Sliding drawer mounted underneath top shelf

11-926-89

CELL BIOLOGY

APOPTOSIS ASSAYS

Thermo Scientific* Cellomics* HitKit* HCS Reagent Kits

Assay-ready reagents produce cells optimized for fluorescent imaging

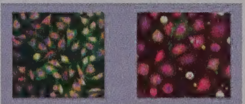
Rapidly incorporate high-content assays into your drug discovery efforts with proprietary and exclusively licensed fluorescent reagents designed to achieve the highest emission of light for each fluorophore. Background fluorescence and non-specific cross-talk minimized for increased sensitivity, specificity, and signal-to-noise ratios. Sample preparation protocols have been optimized to produce high-quality cell preparations and are automation compatible for maximum productivity and reproducibility.

- Compatible with a wide range of cell types
- No cell lysis, purification, or filtration steps
- Fluorescence-based assays provide sensitive quantitative and qualitative results without radioactivity
- Prepared cells may be analyzed directly via standard fluorescence microscopy
- Kits include all imaging-tested reagents and detailed protocols needed for sample preparation
- Pre-validated on the Thermo Scientific* Cellomics* ArrayScan* HCS Reader

Multiparameter Apoptosis 1 HitKit*

Contain three spectrally distinct fluorophores that report various cellular targets

- Multiplexed assay quantifies three features of apoptosis: nuclear morphology (condensation/fragmentation), mitochondrial mass/potential, and cytoskeletal changes (f-actin content) specifically and reliably in whole cells
- Quantification on a cell-by-cell basis; allowing direct cross-correlation of features
- No cell lysis, purification, or filtration steps
- Versatile assay is widely applicable to a variety of cell types



L929 cells treated with 2.5µM paclitaxel for 30 hr. (right), and untreated (left). F-actin appears in green (Alexa Fluor 488 Phalloidin), nuclei appear in blue (Hoechst), and mitochondria appear in red (Mito Tracker Red). Images acquired using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

INCLUDES:

MitoTracker* Red CMXRos; Alexa Fluor* 488 conjugated phalloidin; Hoechst dye; Wash buffer (10X); Positive control compound (Paclitaxel); Permeabilization buffer (10X); Plate seals

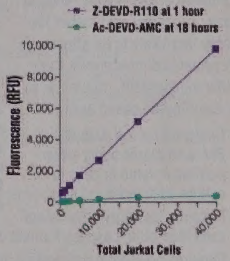
Description	Evaluation Size	Cat. No.	Each
Multiparameter Apoptosis I	5 x 96	**K04-0001-1**	504.00

Promega* Apo-ONE* Homogeneous Caspase-3/7 Assay Kit

Provides a fluorescent method for the fast and sensitive measurement of active caspase-3 and -7 in a homogeneous format

Substrate and buffer solutions are combined to make the Apo-ONE Caspase-3/7 Reagent which is added directly to samples. The amount of fluorescent product generated is representative of the amount of active caspase-3/7 present in the sample.

- May be used with purified enzyme preparations, cell extracts, or cultures of adherent, suspension, or primary cells; compatible with use in cuvets and 96- or 384-well plate
- Simple "add, mix, and measure" protocol and high assay sensitivity decreases time to result; requires fewer cells than comparable caspase assays
- Single reagent addition format is compatible with high throughput applications
- PR-G7792 provides sufficient reagents to perform 10 assays of 100µL/well in a 96-well plate or 40 assays of 25µL/well in a 384-well plate
- PR-G7790 provides sufficient reagents for 100, 100µL assays or 400, 25µL assays
- PR-G7791 provides sufficient reagents to perform 1000, 100µL assays or 4000, 25µL assays
- Apo-ONE Homogeneous Caspase-3/7 Buffer is also available separately



Apoptosis was induced in Jurkat cells by treatment with anti-Fas antibody for five hours. Apo-ONE Homogeneous Caspase-3/7 Buffer containing either Z-DEVD-R110 or Ac-DEVD-AMC (Cat. No. PR-G5961) was added to the cells and incubated at room temperature. Z-DEVD-R110 data were collected one hour post-addition. Ac-DEVD-AMC data were collected 18 hours post-addition. Because of inherent differences in the fluor signals, significantly different incubation times were required for the two substrates.

INCLUDES:

Apo-ONE Caspase Substrate Z-DEVD-R110, 100X; Apo-ONE Homogeneous Caspase Buffer

STORAGE CONDITIONS:

Store at -20°C, protected from light and moisture.

Description	Quantity	Cat. No.	Each
Apo-ONE Homogeneous Caspase-3/7 Assay Kit	10 assays	**PR-G7792**	56.28
	100 assays	**PR-G7790**	311.75
	1000 assays	**PR-G7791**	1602.00
Apo-ONE Homogeneous Caspase-3/7 Buffer	100mL	**PR-G7781**	1121.00

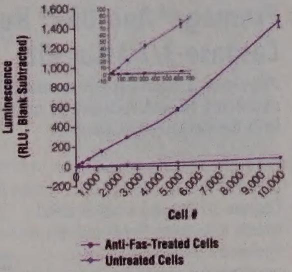
---

† This product is covered by U.S. Patents 4,557,862 and 4,640,893 and is sold for research use only. All other uses, including but not limited to use as a clinical diagnostic or therapeutic, require a separate license. Please contact Promega Corporation for details relating to obtaining a license for such other use.

Promega* Caspase-Glo* 3/7 Assay Kit

Provides a homogeneous luminescent assay that measures caspase-3/7 activities

Utilizes a proluminescent caspase-3/7 DEVD-aminoluciferin substrate and a proprietary thermostable luciferase in a single reagent optimized for caspase-3/7 activity, luciferase activity, and cell lysis. Stabilized luciferase improves assay performance across a wide range of assay conditions and makes the assay less likely to be affected by compound interference than other luminescent-, fluorescent-, or colorimetric-based assays.



Jurkat cells were treated with anti-Fas mAb for 4.5 hours to induce apoptosis; an identical population of cells was left untreated. Luminometer readings were taken after one hour of incubation with Caspase-Glo 3/7 Reagent.

- Designed for use with 96- or 384-well plates using either purified enzyme or cells in culture as sample
- Requires less enzyme or fewer cells than other caspase formats due to low background luminescence
- Requires no sample preparation, manipulation, or extended incubation times—maximum sensitivity is achieved in as little as one-half to one hour
- "Add-mix-measure" protocol makes the assay easy to automate
- Extended-glow signal allows the plates to be read over a three-hour period for batch processing—no injectors required
- PR-G8090 contains sufficient reagents for 25 assays at 100μL per assay in a 96-well format or 400 assays at 25μL per assay in a 384-well format
- PR-G8091 contains sufficient reagents for 100, 100μL assays or 400, 25μL assays
- P7-809C contains sufficient reagents for 1000, 100μL assays or 4000, 25μL assays
- PR-G8092 contains sufficient reagents for 1000, 100μL assays or 4000, 25μL assays

INCLUDES:
Caspase-Glo 3/7 Substrate; Caspase-Glo 3/7 Buffer

STORAGE CONDITIONS:
Store at -20°C.

Assays/96 wells	Assays/384 wells	Size	Cat. No.	Each
25	100	2.5mL	**PR-G8090**	94.48

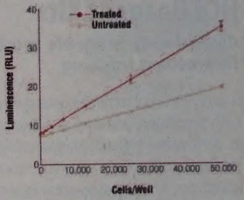
Promega* Caspase-Glo* 8 and Caspase-Glo 9 Assay Systems

Highly sensitive homogeneous luminescent assays that measure either caspase-8 or caspase-9 activity

The addition of a single Caspase-Glo reagent in an "add-mix-read" format results in cell lysis, followed by caspase cleavage of the substrate, and generation of a stable "glow-type" luminescent signal. The signal generated is proportional to the amount of caspase activity present.



Sensitivity of the Caspase-Glo 8 Assay in apoptotic Jurkat cells with MG-132 Inhibitor added to the Caspase-Glo 8 Reagent.

- Utilize a proprietary thermostable luciferase, Ultra-Glo* Recombinant Luciferase, which improves performance across a wide range of assay conditions
- Do not require sample preparation, sample manipulation, or extended incubation time—maximum sensitivity is achieved in as little as a half hour
- Provide excellent signal-to-noise ratios and superior sensitivity, allowing assays to be performed in 96- or 384-well formats
- Easily automated

INCLUDES:
Caspase-Glo 8 Buffer or Caspase-Glo 9 Buffer; Caspase-Glo 8 Substrate or Caspase-Glo 9 Substrate

STORAGE CONDITIONS:
Store at -20°C protected from light.

Promega* DeadEnd* Fluorometric TUNEL System

Detects and quantifies apoptotic cells within a cell population

The DeadEnd Fluorometric TUNEL System measures the fragmented DNA of apoptotic cells by catalytically incorporating fluorescein-12-dUTP at 3′-OH DNA ends using the enzyme Terminal Deoxynucleotidyl Transferase (TdT), which forms a polymeric tail using the principle of the TUNEL (TdT-mediated dUTP Nick-End Labeling) assay (1). The fluorescein-12-dUTP-labeled DNA can then be visualized directly by fluorescence microscopy or quantitated by flow cytometry.

- Classic TUNEL System measures nuclear DNA fragmentation at the single cell level or in cell suspensions
- Nonradioactive
- Direct incorporation of fluorescent nucleotides reduces number of incubation steps and saves time
- Compatible with cultured cells as well as formalin-fixed, paraffin-embedded tissue sections

INCLUDES:

Plastic coverslips for simplified sample handling

STORAGE CONDITIONS:

Store reagents at –20°C. Store the Nucleotide Mix away from light.

Size	Cat. No.	Each
60 reactions	**PR-G3250**	409.75

Promega* DeadEnd* Colorimetric TUNEL System

Provides rapid detection of apoptotic cells in situ at the single cell level

The DeadEnd Colorimetric TUNEL System end-labels the fragmented DNA of apoptotic cells using a modified TUNEL (TdT-mediated dUTP Nick-End Labeling) assay. Biotinylated nucleotide is incorporated at the 3′-OH DNA ends using the enzyme Terminal Deoxynucleotidyl Transferase (TdT). Horseradish-peroxidase-labeled streptavidin (Streptavidin HRP) is then bound to these biotinylated nucleotides, which are detected using the peroxidase substrate, hydrogen peroxide, and the stable chromogen, diaminobenzidine (DAB). Using this procedure, apoptotic nuclei are stained dark brown.

- Modified TUNEL Assay measures nuclear DNA fragmentation
- Versatile system is compatible with both tissue sections and cultured colorimetric detection is effective in thick tissue sections and enables assessment of cell morphology

INCLUDES:

DAB substrate and H_2O_2 plus plastic coverslips for easy sample handling

Size	Cat. No.	Each
40 reactions	**PR-G7130**	405.75
20 reactions	**PR-G7360**	280.75

DRUG SCREENING ASSAYS

Promega* P450-Glo* CYP450 Assay Systems

Provide homogeneous, luminescent methods for measuring cytochrome P450 activity

- Measure the activity of P450s from recombinant or native fractions[1, 2]
- Test the effects of analytes including drugs and new chemical entities on P450 activities
- Simple "add-and-read" procedures feature high sensitivity, low background signals, and broad dynamic range
- Scalable to 384-well format
- Eliminate interference from fluorescent test compounds
- Exhibit "glow-type" signal with a half-life of over two hours, eliminating the need for luminometers with injectors and allowing for batch plate processing
- Formulation reduces the incidence of false positives

INCLUDES:

Luciferin Detection Reagent; P450-Glo Buffer; 5mM Luciferin-CEE, -ME, -H, or -BE

STORAGE CONDITIONS:

Store all components at -20°C, protected from light.

Promega* P450-Glo* CYP450 Screening Systems

Provide a complete set of reagents for performing luminescent cytochrome P450 assays

Membranes are prepared from baculovirus-infected insect cells and contain human cytochrome P450 and P450 reductase (and cytochrome b5 for CYP2C9 and CYP3A4)[1]. Reaction is performed by incubating a luminogenic cytochrome P450 substrate with a cytochrome P450 enzyme and the NADPH Regeneration System.

- Each system includes a membrane fraction devoid of cytochrome P450 activity as a negative control
- Assays are ideal for testing the effects of drugs and new chemical entities on cytochrome P450 enzyme activities
- Glow-type reaction produces a stable signal and eliminates the need for strictly timed luminescence detection
- Protocols are configured for multiwell plate formats but can be easily adapted for single-tube applications
- Easily scalable to 384-well plate format
- Luminescent format eliminates the need for time-consuming analyses such as HPLC
- Highly predictive results with Z′ values greater than 0.8 in either 96- or 384-well plate formats
- No interference by fluorescent compounds
- Excellent sensitivity due to broad dynamic range and low background
- Low false-positive rate

INCLUDES:

Membrane preparation containing recombinant human cytochrome P450 enzyme; Luminogenic cytochrome P450 substrate appropriate for the enzyme; NADPH Regeneration System; Reaction buffer; Luciferin Detection Reagent; Luciferin-Free Water

STORAGE CONDITIONS:

Store the CYP1A2, CYP2C9 and CYP3A4 membranes at -70°C. Avoid multiple freeze-thaw cycles of all components.

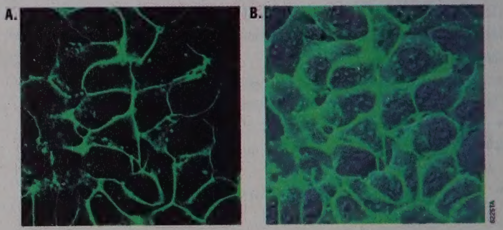
LABELING

Promega* HaloTag* Interchangeable Labeling Technology

Multiple applications from one genetic construct: Add fluorescent labels, affinity handles or immobilize HaloTag fusion protein to a solid support



Live cell imaging of a truncated human ß-integrin HaloTag Fusion protein. HEK 293 cells that stably express ß-integrin HaloTag fusion protein were labeled with 1µM HaloTag Alexa Fluor* 488 Ligand. Panel A: HaloTag Alexa Fluor 488 fluorescence. Panel B: Overlaid HaloTag Alexa Fluor 488 fluorescence and transmitted light.

- Create a HaloTag fusion protein with one easy cloning step
- HaloTag protein creates strong and very specific covalent bonds with the different HaloTag ligands
- Cell membrane permeable fluorescent ligands allow imaging of live or fixed cells
- HaloTag PEG-Biotin Ligand for pull-down applications

APPLICATIONS:

Protein localization, Protein trafficking, Protein capture, Cell-to-gel analysis, Protein:protein interactions

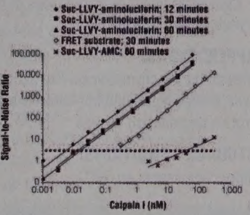
PROTEASE ASSAYS

Promega* Calpain-Glo* Assay System

Homogeneous, luminescent assay measures calpain 1 (μ) and 2 (m) activities

Provides a succinyl, proluminescent calpain substrate in a buffer system optimized for calpain and luciferase activities. The addition of the calpain reagent results in calpain cleavage of the substrate and rapid development of a glow-type luminescent signal produced by the luciferase reaction. The signal is proportional to the amount of calpain activity present.



Sensitivity of the Calpain-Glo* Protease Assay compared to fluorescent assays.

- ▸ Designed for use with purified enzyme preparations
- ▸ Maximum sensitivity is reached in as little as 10 min.
- ▸ Add-mix-measure protocol makes the assay easy to automate
- ▸ Avoids inherent fluorescent background signals, providing excellent signal-to-background readings, and is linear over 4 logs of calpain concentration

APPLICATIONS:

Measures calpain activity and/or inhibition in a multiwell format

STORAGE CONDITIONS:

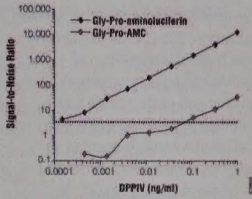
Store components at -20°C protected from light.

Quantity	Cat. No.	Each
50mL	**PR-G8502**	612.00
10mL	**PR-G8501**	238.00

U.S. Pat. No. 6,602,677, Australian Pat. No. 754312 and other patents and patents pending. The method of recombinant expression of Coleoptera luciferase *is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673.*

Promega* DPPIV-GLO* Protease Assay

Homogeneous, luminescent assay that measures dipeptidyl peptidase IV (DPPIV) activity



Sensitivity of the DPPIV-Glo Protease Assay compared to a fluorescent assay.

DPPIV is a serine protease that cleaves N-terminal dipeptides from polypeptides with L-proline or L-alanine at the penultimate position. The DPPIV-Glo Assay provides a proluminescent DPPIV substrate, Gly-Pro-aminoluciferin, in a buffer system optimized for DPPIV and luciferase activities. The addition of a single DPPIV-Glo* Reagent in an "add-mix-measure" format results in DPPIV cleavage of the substrate and generation of a "glow-type" luminescent signal produced by the luciferase reaction. In this homogeneous, coupled-enzyme format, the signal is proportional to the amount of DPPIV activity present. The assay is designed for use with purified enzyme preparations.

- ▸ The homogeneous protocol makes the assay highly amenable to automation
- ▸ More sensitive than fluorescent-based DPPIV assays; in contrast to fluorescent assays, the luminescent assay avoids inherent fluorescent background signals and thus provides excellent signal-to-background readings
- ▸ Linear over more than 3 logs of DPPIV concentration and can detect less than 1pg/mL enzyme
- ▸ Maximum signal (and maximum sensitivity) of the assay is reached in as little as 30 minutes after reagent addition and is not dependent on accumulation of cleaved product
- ▸ Stable signal allows plates to be read over an extended period of time

APPLICATIONS:

DPPIV enzyme activity determination, Kinetic studies of DPPIV inhibitor

STORAGE CONDITIONS:

-20°C protected from light

Size	Cat. No.	Each
10mL	**PRG8350**	235.88
50mL	**PRG8351**	610.00

Promega* Pgp-Glo* Assay System

Detects effects of compounds on recombinant human P-glycoprotein (Pgp) in a cell membrane fraction

Assay[1] relies on ATP dependence of light-generating reaction of firefly luciferase. Proprietary stabilized firefly luciferase and proprietary luciferase assay formulation to minimize incidence of false positives.

- ▸ Provides necessary reagents to perform luminescent P-glycoprotein (Pgp) ATPase assays
- ▸ Stable glow-type signal allows for multiple sample processing without concerns of variability over time
- ▸ Low false-positive rate
- ▸ Simple protocol makes assay suitable for high-throughput screening in multiwell plates

APPLICATIONS:

Screening drugs and new chemical entities for capacity to modulate Pgp ATPase activity

STORAGE CONDITIONS:

Membranes must be stored at -70°C and are stable for up to five freeze-thaw cycles; for best results, dispense Pgp membranes into single use aliquots. All other components can be stored at -70° or -20°C, protected from light. Reconstituted ATP Detection Reagent can be stored at -20°C for up to three months (or 4°C for one week) without loss of activity. When stored and handled properly, system is stable for up to six months from date of purchase.

Description	Quantity	Cat. No.	Each
Pgp-Glo Assay System	10mL	**PR-V3591**	195.56
Pgp-Glo Assay System with P-glycoprotein	10mL	**PR-V3601**	395.75

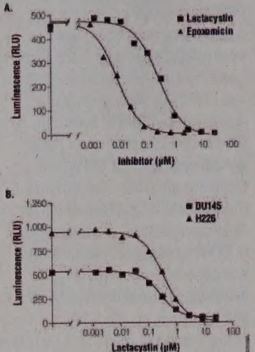
[1] *The method of recombinant expression of* Coleoptera luciferase *is covered by U.S. Pat. Nos. 5,583,024, 5,674,713 and 5,700,673.*

Promega* Proteasome-Glo* Cell-Based Assay System

Measures the chymotrypsin-like protease activity of the proteasome complex in cultured cells

Provides a luminogenic proteasome substrate, Suc-LLVY-amnioluciferin, in a buffer optimized for cell permeabilization, proteasome activity and luciferase activity. Addition of the Proteasome-Glo Cell-Based Assay Reagent in an add-mix-measure format results in proteasome cleavage of the substrate and rapid generation of a luminescent signal produced by the luciferase reaction.

- Obtain activity data directly from a cellular environment
- Add-mix-measure protocol minimizes handling steps and makes the assays amenable to automation
- Maximum sensitivity is reached 10-30 minutes after reagent addition



Monitoring proteasome inhibition using different inhibitors and cell lines.

- Avoids inherent fluorescent background signals, providing excellent signal-to-background readings
- Assays are linear over three logs of cell number or four logs of proteasome concentration

APPLICATIONS:

Measuring the chymotrypsin-like activity of the proteasome in cultured cells; screening of inhibitor libraries and monitoring proteasome-regulated protein degradation in cells

STORAGE CONDITIONS:

Store components at -20°C.

Quantity	Cat. No.	Each
10mL	**PR-G8660**	350.44
5 × 10mL	**PR-G8661**	1110.00
2 × 50mL	**PR-G8662**	1800.00

REPORTER ASSAYS

Promega* Bright-Glo* Luciferase Assay System

Designed to meet the needs of continuous-process systems

- Provides robust, homogeneous assay chemistry that achieves high sensitivity and approximately half-hour signal half-life
- Does not require sample processing prior to assay—cells may be grown and assayed in the same multiwell plate
- Produces up to tenfold greater light intensity than other homogeneous luciferase assay reagents
- Less sensitive to mixing conditions, sample evaporation, and pipetting errors than other systems, resulting in improved assay reproducibility
- Easy to use—no need to thaw or measure substrate before use
- Also suitable for use in lower throughput applications that require high sensitivity and ease of use

INCLUDES:

Bright-Glo Luciferase Assay Substrate; Bright-Glo Luciferase Assay Buffer

STORAGE CONDITIONS:

Store substrate at -20°C; store buffer below 25°C.

Quantity	Cat. No.	Each
10mL	**PR-E2610**	96.20
100mL	**PR-E2620**	604.00
10 × 100mL	**PR-E2650**	5308.00

U.S. Pat. No. 5,744,320, Australian Pat. No. 721172, European Pat. No. 0 833 939, Canadian Pat. No. 2,221,522, Japanese Pat. No. 3601606 and Korean Pat. No. 10-438880 have been issued to Promega Corporation for quenching reagents and assays for enzyme-mediated luminescence.
U.S. Patents 5,283,179; 5,641,641; 5,650,289; and 5,814,471; Australian Patent 649289 and other patents and patents pending.
The method of recombinant expression of Coleoptera *luciferase is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673.*
Certain applications of this product may require licenses from others.

Promega* Steady-Glo* Luciferase Assay System

Provides long-lived luminescence when added to cultured cells

- Ideal for quantitation of firefly luciferase expression in mammalian cells by batch processing of 96- and 384-well plates
- Can process several thousand samples per hour with high reproducibility under standard laboratory conditions
- Provides signal half-lives over five hours in commonly used cell culture media without prior sample processing
- Results in greater assay sensitivity than other extended-lifetime firefly luciferase assay reagents
- Less sensitive to mixing conditions for improved assay reproducibility
- Compatible with many tissue culture media, including those containing up to 10% serum

STORAGE CONDITIONS:

Store substrate at -20°C; store buffer below 25°C.

Prices subject to change.

Promega* Dual-Glo* Luciferase Assay System

Generates both firefly and *Renilla* luciferase luminescence signals

Homogeneous reagent system enables fast and simple quantitation of stable luminescence from two reporter genes in a single sample. The activity of the primary reporter is correlated with the effect of specific stimuli and the activity of the co-transfected control reporter provides an internal control to normalize results.

- Co-reporter minimizes effects of cell number, cell health, transfection efficiency, and nonspecific cellular responses
- Cells may be assayed for both reporters directly in growth medium—no preconditioning or prelysing necessary
- Stable signal may be measured for up to two hours after reagent addition—ideal for batch or continuous processing of 96- and 384-well plates
- Two-step assay is suitable for any luminometer—no on-board injectors required
- Linear range extends over at least six logs of enzyme concentration for each reporter

INCLUDES:

Dual-Glo Luciferase Buffer; Dual-Glo Luciferase Substrate; Dual-Glo Stop & Glo* Buffer; Dual-Glo Stop & Glo Substrate

STORAGE CONDITIONS:

Substrates at -20°C; store Dual-Glo Buffers below 25°C.

Quantity	Cat. No.	Each

U.S. Pat. Nos. 7,078,181, 7,108,996 and 7,118,878 have been issued to Promega Corporation for a method for increasing luminescence assay sensitivity. Other patents are pending.

Promega* Dual-Luciferase* Reporter (DLR*) Assay Systems

Combine the speed and sensitivity of two luciferase reporter enzymes into an integrated single-tube dual reporter assay

Provide immediate, sequential quantitation of both firefly and sea pansy (*Renilla reniformis*) luciferases in cell lysates or cell-free translation systems for internal normalization of gene expression measurements. Supplied Passive Lysis Buffer (also available separately) can be used to rapidly prepare cell lysates from cells grown in 96-well plates.

- Offer a linear range that extends 7 logs
- Sensitive enough to allow study of weak promoters, low-level expression/regulation, and expression in cells that transfect poorly
- Complete both assays in approximately four seconds when used with reagent auto injectors

Dual-Luciferase Reporter 1000 Assay System

- Developed for larger volume users
- Configured for use in 96-well luminometry plates
- Supplies additional volume of both assay reagents to allow for priming of reagent injectors

INCLUDES:

Luciferase Assay Buffer II; Luciferase Assay Substrate (lyophilized product); Stop & Glo Buffer; Passive Lysis 5X Buffer; Stop & Glo Reagent Bottle (PR-E1980 only

STORAGE CONDITIONS:

Store at -20°C.

Certain applications of this product may require licenses from others.

Promega* EnduRen* Live Cell Substrate

Allows measurement of *Renilla* luciferase luminescence for at least 24 hours after substrate addition

- Utilizes engineered coelenterazine to produce up to ten-fold higher signal-to-background ratios than wildtype coelenterazines
- Enables luminescent reporter assays with live cells, conserving test compounds
- Creates response profiles in real time to generate more data-rich results
- Accommodates assays in microplate format without the need for autoinjectors
- Quantitates low expression levels for reporter gene assays and bioluminescence resonance energy transfer (BRET)
- Permits multiplexing when paired with any lytic assay

STORAGE CONDITIONS:

Store at -20°C.

Promega* Luciferase Assay Systems

Extremely sensitive and rapid systems for the quantification of firefly luciferase

The Luciferase Assay System is a homogeneous assay system; the cells containing the luciferase must be lysed before addition to the reagent. Cell Culture Lysis Reagent and Reporter Lysis Buffer may be used with the Luciferase Assay System for reporter quantitation in mammalian cells. This system may also be used for quantitation in plant and bacterial cells, but Reporter Lysis Buffer is not suitable for these applications.

- Linear results are seen over at least eight orders of magnitude of enzyme concentration
- Patented technology has allowed less than 10^{-20} moles of luciferase to be measured under optimal conditions
- Systems typically provide 100-fold greater sensitivity than the chloramphenicol acetyltransferase (CAT) assay
- Cell lysis, sample preparation, and assays can be performed in as little as five minutes
- Reporter Lysis Buffer allows luciferase, CAT, and β-galactosidase assays to be performed from the same cell extract
- Simple procedure eliminates the need for autoinjectors and rapid mixing protocols when using single-tube luminometers
- Protocol can be adapted for use with scintillation counters
- System components are also available separately

The method of recombinant expression of Coleoptera luciferase *is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673.*

Certain applications of this product may require licenses from others.

Promega* QuantiLum* Recombinant Luciferase

Recombinant source eliminates the possibility of seasonal and regional variability that may be found in luciferase purified from natural sources

- Expressed from a cloned gene from the North American firefly, *Photinus pyralis*
- Provides the reliability and dependability needed when performing research or producing kits using bioluminescence reagents
- Specific Activity: ≥2.0×10^{10} light units/mg protein
- SDS-PAGE Purity: >95%

STORAGE CONDITIONS:

Store at -70°C; avoid multiple freeze-thaw cycles.

Quantity	Concentration	Cat. No.	Each

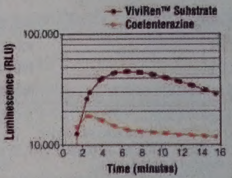
Promega* ViviRen* Live Cell Substrate

Proprietary coelenterazine generates three- to fivefold brighter *Renilla* luciferase luminescence from live cells under normal growth conditions than wildtype coelenterazine

- Produces up to 100-fold higher signal-to-noise ratios than coelenterazine
- Provides sensitive quantitation—ideal for miniaturized formats, low-level expression, and CCD imagers
- Permits real-time measurement in multiwell plates
- Suitable for the generation of kinetic profiles for reporter gene, bioluminescence resonance energy transfer (BRET), and ddRNAi applications
- Can be multiplexed with assays that lyse cells with minimal *Renilla* luciferase luminescence carryover into the lysed-cell signals



Luminescence reaches near-maximum levels within minutes of ViviRen Live Cell Substrate or coelenterazine addition. CHO cells stably expressing *Renilla* luciferase were exposed to 20µM of ViviRen Live Cell Substrate or coelenterazine approximately 1.5 min. after continuous luminescent reading was initiated.

STORAGE CONDITIONS:

Store PR-E6491 at -70°C; store PR-E6492 and PR-E6495 at -20°C.

Thermo Scientific* Cellomics* HitKit* HCS Reagent Kits

Assay-ready reagents produce cells optimized for fluorescent imaging

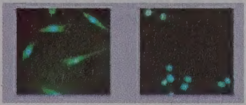
Rapidly incorporate high-content assays into your drug discovery efforts with proprietary and exclusively licensed fluorescent reagents designed to achieve the highest emission of light for each fluorophore. Background fluorescence and non-specific cross-talk minimized for increased sensitivity, specificity, and signal-to-noise ratios. Sample preparation protocols have been optimized to produce high-quality cell preparations and are automation compatible for maximum productivity and reproducibility.

- Compatible with a wide range of cell types
- No cell lysis, purification, or filtration steps
- Fluorescence-based assays provide sensitive quantitative and qualitative results without radioactivity
- Prepared cells may be analyzed directly via standard fluorescence microscopy
- Kits include all imaging-tested reagents and detailed protocols needed for sample preparation
- Pre-validated on the Thermo Scientific* Cellomics* ArrayScan* HCS Reader

---

ATF-2 Activation HitKit*

Designed for assays based on indirect immuno-fluorescence



Images of immunofluorescently stained NIH3T3 cells before (left) and after (right) activation of ATF-2 by anisomycin. Cells were stimulated with 200ng/mL anisomycin for 30 min. and then prepared using the HitKit protocol. Nuclei appear blue (Hoechst) and ATF-2 appears green (Alexa Fluor* 488). Images were acquired using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

Responding to the inflammatory cytokines and cellular stressors including genotoxicity and ischemia/reperfusion, ATF-2 is activated through threonines 69 and 71 by members of the SAPK family. Once activated, ATF-2 forms complexes with Jun family or other ATF family members. These complexes bind to the cAMP Response Element found in the promoters of many genes, stimulating gene transcription. Because ATF-2 must be in the nucleus to induce gene expression, its translocation is a definitive measure of its activation, and marks an earlier event than reporter gene expression.

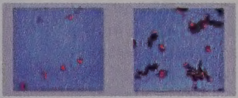
- Earlier and more definitive measure of ATF-2 activation relative to electophoretic mobility shift or gene reporter assays
- Cells may be analyzed directly via standard fluorescence microscopy; or any HCS Imaging System
- Prepared cells are ready for analysis in less than 3 hr. post-test compound incubation
- Kit protocol requires no cell lysis, purification or filtration steps
- Sensitive quantitative and qualitative results without radioactivity
- Validated protocol included with all necessary stains and components

INCLUDES:

ATF-2 primary antibody; Alexa Fluor 488— conjugated secondary antibody; Hoechst dye; Positive control compound; Wash buffer (10X); Permeabilization buffer (10X)

Target	Evaluation Size	Cat. No.	Each
ATF-2 Activation	5 x 96	**K01-0010-1**	403.00

Cell Motility HitKit*



Images of tracks (black) generated by A549 cells in the absence (unstimulated, left) or presence (stimulated, right) of serum. Cells appear as red fluorescent spots due to the cytoplasmic staining (rhodamine-conjugated phalloidin). Images were acquired by a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

The Cell Motility HitKit HCS Reagent Kit provides High Content Screening (HCS)-quality fluorescence reagents and a protocol optimized for visualizing and quantifying cell movement by directly measuring the size of tracks generated by migrating cells.

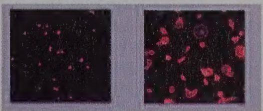
- Versatile assay is widely applicable to a variety of cell types
- Validated protocol for sample preparation/processing requires 2.5 hours post-compound incubation
- Assay utilizes fluorescence reagents and requires no cell lysis, purification or filtration steps; and no handling of radioactive isotopes
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or any HCS imaging systems

INCLUDES:

Blue fluorescent microspheres; Rhodamine—conjugated phalloidin; Wash buffer (10X); Permeabilization buffer (10X); Plate seals

Description	Evaluation Size	Cat. No.	Each
Cell Motility	5 × 96	**K08-0001-1**	504.00

Cell Spreading HitKit*



Images of fluorescently labeled PC-3 cells acquired using the Thermo Scientific* Cellomics* ArrayScan* HCS Reader. Left panel: a composite image of cells treated for 3 hrs. with the Negative Control Compound (supplied with the kit); nuclei appear blue (Hoechst Dye) and cytoplasm appears red (Rhodamine-Conjugated Phallodin). Right panel Image of cells that were incubated for 33 hrs.

The Cell Spreading HitKit HCS Reagent Kit provides High Content Screening (HCS)-quality fluorescence reagents and a validated, optimized protocol necessary to quantify the spreading of cells by directly measuring their areas using a fluorescent cytoskeletal marker, rhodamine-conjugated phalloidin.

- Assay is versatile and widely applicable to a variety of cell types
- Validated protocol for sample preparation/processing requires approximately 1.5 hours post-compound incubation

Contd. on next page.

Thermo Scientific* Cellomics* Cell Spreading HitKit*, Contd.

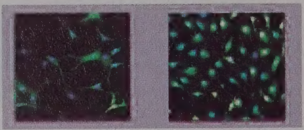
- Utilizes fluorescent reagents and requires no cell lysis, purification, or filtration steps; and no handling of radioactive isotopes
- Cells prepared with the HitKit HCS Reagent Kits may be analyzed directly via standard fluorescent microscopy; or using any HCS Imaging System

INCLUDES:
Rhodamine — conjugated phalloidin; Negative control compound (Cytochalasin D); Hoechst dye; Wash buffer (10X); Permeabilization buffer (10X); Plate seals

Description	Evaluation Size	Cat. No.	Each
Cell Spreading	5 x 96	**K06-0001-1**	504.00

ERK MAPK Activation HitKit*

Designed for assays based on indirect immuno-fluorescence



Images of fluorescently labeled NIH3T3 cells before (left) and after (right) activation of ERK by PMA (100ng/mL for 30 min.). Cells were prepared according to the HitKit protocol. Nuclei appear blue (Hoechst) and ERK appears green (Alexa Fluor* 488). Images were acquired by a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

Mitogen-activated protein kinase (MAPK) pathways regulate a broad range of cellular processes including gene transcription, cytoskeletal organization, metabolic homeostasis, cell growth, and apoptosis. MAPKs are activated by concomitant Tyr and Thr phosphorylation, catalyzed by members of the MAP Kinase Kinase (MKK) family. MKKs, in turn, are activated by Ser/Thr phosphorylation, catalyzed by protein kinases of several families collectively termed Mitogen-Activated Protein Kinase Kinase Kinases (MAPKKK). Upon activation of this pathway, MAPK is phosphorylated and translocated to the nucleus of cells.

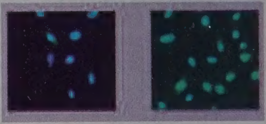
- A more biologically relevant measure of kinase activation relative to Western blots or in vitro kinase assays
- No cell lysis, purification, or filtration steps
- Immunofluorescence based assay provides sensitive quantitative and qualitative results without radioactivity
- Kit antibody preferentially binds to dually phosphorylated (fully active) ERK, with minimized cross-reactivity to other MAPKs
- Manual sample preparation/processing requires approximately three hours post-compound treatment

INCLUDES:
phospho-ERK primary antibody; Alexa Fluor 488* conjugated secondary antibody; Hoechst dye; wash buffer (10X); positive control compound (PMA); permeabilization buffer (10X); Detergent buffer (10X); plate seals

Target	Evaluation Size	Cat. No.	Each
ERK MAPK Activation	5 x 96	**K01-0007-1**	504.00

c-Jun Activation HitKit*

Designed for assays based on indirect immuno-fluorescence



Images of fluorescently labeled HeLa cells before and after activation of c-Jun by anisomycin (500ng/mL for 25 min.). The left panel shows c-Jun localization in unstimulated cells. Nuclei appear blue due to low levels of nuclear (phosphorylated) c-Jun. The right panel shows c-Jun localization in stimulated cells. Blue-green color of nuclei is due to colocalization.

Because c-Jun must be in the nucleus to induce gene expression, its translocation is a definitive measure of its activation, and marks an earlier event than reporter gene expression.

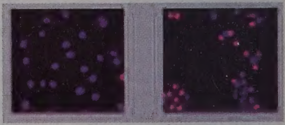
- Quantify endogenous c-Jun activation specifically and reliably in whole cells
- Immunofluorescence-based screening assay provides sensitive quantitative and qualitative results without radioactivity
- No cell lysis, purification, or filtration steps
- No need to generate stable clonal lines; entire assay completed in 3 hr. (post-stimulation)
- Earlier and more definitive measure of transcription factor activation relative to electophoretic mobility shift or gene reporter assay

INCLUDES:
phospho-c-Jun primary antibody; Alexa Fluor* 488—conjugated secondary antibody; Hoechst dye; positive control compound; wash buffer (10X); permeabilization buffer (10X); detergent buffer (10X); positive control compound (Anisomycin) (10X); plate seals (10X)

Target	Evaluation Size	Cat. No.	Each
c-Jun Activation	5 x 96	**K01-0003-1**	403.00

Mitotic Index HitKit*

Detects mitotic cells by the presence of phosphorylated histone core protein



Images taken from the Thermo Scientific* Cellomics* ArrayScan* HCS Reader of MDCK cells, while the right panel was treated with the mitotic inhibitor vinblastine (25nM for 10 hrs.). Blue channel indicates nuclei, pink channel indicates mitotic bodies.

The Mitotic Index assay is used to characterize proliferating cells and to identify compounds that inhibit or induce mitotic progression. Compounds that inhibit mitotic progression result in an increase in the mitotic index of a population.

- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or HCS imaging systems
- Simple sample preparation/processing requires less than 2.5h after compound treatment
- Functional whole cell assay is more accurate and biologically relevant than flow cytometric analysis
- No cell lysis, purification, or filtration steps
- Kit antibody binds to epitope abundant in mitotic cells with high sensitivity and specificity

Contd. on next page.

Thermo Scientific* Cellomics* Mitotic Index HitKit*, Contd.

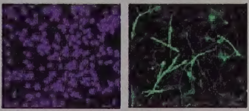
INCLUDES:

Mitotic Index primary antibody; Alexa Fluor* 488 conjugated secondary antibody; Hoechst dye; Positive control compound; Wash buffer (10X); Permeabilization buffer (10X); Anti-Mitotic control compound (Vinblastine); Plate seals (10X); Block (100X)

Description	Evaluation Size	Cat. No.	Each
Mitotic Index	5 x 96	K05-0001-1	504.00

Neurite Outgrowth HitKit*

The Neurite Outgrowth HitKit HCS Reagent Kit product provides a solution for quantifying neurite outgrowth by combining High Content Screening (HCS)-quality fluorescence reagents with a validated, automation-compatible protocol.



A primary human brain culture was prepared with the Neurite Outgrowth HitKit Reagents. All of the cells' nuclei were labeled with Hoechst Dye (left). Only the neurons and their neurites were labeled with the neuron-specific marker (right).

- Neuronal-specific fluorescent reagent identifies neuronal cell bodies and neurites in a heterogeneous cell population without isolation steps
- Validated protocol for sample preparation and processing requires approximately 2.5h post-compound treatment and is automation compatible
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or HCS imaging systems.
- No radioactivity, cell lysis, purification, or filtration steps

INCLUDES:

Neuronal-specific primary antibody; Alexa Fluor* 488 conjugated secondary antibody; Hoechst dye; wash buffer (10X); permeabilization buffer (10X); detergent buffer (10X); plate seals

Description	Evaluation Size	Cat. No.	Each
Neurite Outgrowth	5 x 96	K07-0001-1	504.00

NFAT Activation HitKit*

Designed for assays based on indirect immuno fluorescence

Images of HeLa cells before (left) and after (right) activation of NFAT by thapsigargin. Cells were stimulated with 60nM thapsigargin for 40 min., and then prepared using the HitKit reagents and protocol. Nuclei appear blue (Hoeschst) and NFAT appears green (Alexa Fluor 488). Images were acquired by a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

Transcription factors belonging to the NFAT (Nuclear Factor of Activated T cells) family are know to regulate cytokine expression in T cells, and thus are intimately involved in regulation of early events of immune response regulation. Normally found in the cytoplasm, NFAT translocates to the nucleus upon dephosphorylation via binding to calcinerin (calcium/calmodulin-dependent phosphatase). Upon translocation, NFAT forms complexes with AP-1 proteins to regulate gene expression.

- Cell-based assay provides an earlier and more definitive measure of NFAT activation relative to electophoretic mobility shift or gene reporter assays
- Immunofluorescence-based screening assay provides sensitive quantitative and qualitative results without radioactivity
- Protocol requires no cell lysis, purification, or filtration steps
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescent microscopy; or HCS imaging systems

INCLUDES:

NFAT primary antibody; Alexa Fluor* 488-conjugated secondary antibody; Hoechst dye; block (100X); wash buffer (10X); permeabilization buffer (10X); plate seals

Target	Evalutation Size	Cat. No.	Each
NFAT-1 Activation	5 x 96	K01-0011-1	403.00

NFκB Activation HitKit*

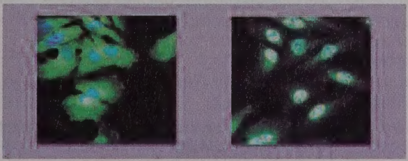
Designed for assays based on indirect immunofluorescence

- All reagents and protocols included for optimized sample preparation
- No cell lysis, purification, or filtration steps
- Fluorescent conjugates; no handling of radioactive isotopes
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or HCS imaging system

INCLUDES:

NFκB primary antibody; Alexa Fluor* 488 - conjugated secondary antibody; Hoechst dye; wash buffer (10X); permeabilization buffer (10X); detergent buffer (10X)

Target	Evaluation Size	Cat. No.	Each
NFkB Activation	5 x 96	K01-0001-1	402.25



Images of immunofluorescently stained HeLa cells before and after activation of NFκB by IL-1. Cells were stimulated with 25ng/mL IL-1 for 20 min. and prepared according to the HitKit protocol. (Left) Image of the NFκB channel in unstimulated cells. (Right) Image of the NFκB channel in stimulated cells. Both images were aquired from a Thermo Scientific* Cellomics* Array Scan* HCS Reader.

Contd. on next page.

Thermo Scientific* Cellomics* HitKits*, Contd.

Multiplexed NFkB and c-Jun Activation HitKit*

Provide a highly effective tool for the simultaneous quantification of NFkB and c-Jun activation in the same cell

- Allow direct measurements of NFkB and phospho-c-jun translocation from the cytoplasm to the nucleus
- Optimized protocol requiring no cell lysis, purification or filtration steps
- Primary antibodies are specific for their targets and have minimal cross-reactivity with other targets
- Sensitive results without radioactivity
- Available as multiplex (orange NFkB and green c-Jun) or singleplex kits (NFkB only)

INCLUDES:

- Thermo Scientific* Pierce* DyLight* 549 conjugated goat anti-rabbit IgG, Hoechst dye, wash buffer (10X Dulbecco's PBS), permeabilization buffer (10X Dulbecco's PBS with 1% Triton* X-100), blocking buffer (10X), thin plate seals
- NFkB and c-Jun Activation Kit Multiplex also contains: NFkB primary antibody, c-Jun primary antibody, Alexa Fluor* 488 conjugated goat anti-mouse IgG

Target	Quantity	Cat. No.	Each
NFkB and c-Jun Activation	1 x 96	**8400301**	300.56
	5 x 96	**8400302**	650.00
NFkB only	1 x 96	**8400401**	226.27
	5 x 96	**8400402**	500.94

Oxidative Stress 1 HitKit*

Designed for assays based on indirect immuno fluorescence

The method's principle is that reactive oxygen species convert non-fluorescent dihydroethidium to fluorescent ethidium, which intercalates into DNA. The DNA binding dye, Hoechst 33342, is used to identify the nuclei of the individual cells, and then the DHE fluorescence is measured to evaluate whether oxidative stress occurred.

- Robust assays—Z' values are >0.3 for multiplexed and singleplexed assays
- HitKits have been validated in high content screening (HCS) assays for reliable and reproducible results
- Validated on Thermo Scientific* Cellomics* ArrayScan* HCS readers; also works on other HCS platforms and fluorescent microscopes
- HitKits work on all HCS platforms offering flexibility in end-user instrumentation
- Optimized protocol and reagent preparations included
- No optimization or assay development required

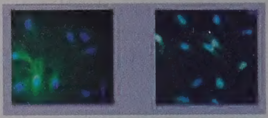
INCLUDES:

Dihydroethidium (DHE); Hoechst 33342 Dye; wash buffer (10X Dulbecco's PBS); thin Plate Seal Assembly

Description	Quantity	Cat. No.	Each
Oxidative Stress I Kit	1 x 96 wells	**8401001**	226.27
Oxidative Stress I Kit	5 x 96 wells	**8401002**	500.94

p38 MAPK Activation HitKit*

Designed for assays based on indirect immuno-fluorescence



Images of fluorescently labeled HeLa cells before (left) and after (right) activation of p38 MAPK by TNF-α (100ng/mL for 15 min.). Cells were prepared according to the HitKit protocol. Nuclei appears blue (Hoechst) and ERK appears green (Alexa Fluor* 488). Images were acquired using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

The MAPK super family comprises c-Jun N-terminal kinases (JNKs), also known as stress activated protein kinases (SAPKs); extracellular signal-regulated kinases (ERKs); and p38 kinases, each of which forms a separate pathway. The kinase members that populate each pathway are sequentially activated by phosphorylation. Upon activation, p38 MAPK translocates into the nucleus where it phosphorylates one or more nuclear substrates, effecting transcriptional changes and other cellular processes involved in cell growth, division, differentiation, inflammation, and death. p38 MAPK is activated by a variety of chemical stress inducers including hydrogen peroxide, heavy metals, anisomycin, sodium salicylate, LPS, and biological inducers such as certain growth factors and cytokines (e.g. Tumor Necrosis Factor-α, TNF-α).

- A more biologically relevant measure of kinase activation relative to Western blots or in vitro kinase assays
- No cell lysis, purification, or filtration steps
- Immunofluorescence based assay provides sensitive results without radioactivity
- Kit antibody preferentially binds to dually phosphorylated (fully active) p38, with minimized cross-reactivity to other MAPKs
- Manual sample preparation/processing requires approximately 3 hours post-compound treatment

INCLUDES:

phospho-p38 MAPK primary antibody; Alexa Fluor 488-conjugated secondary antibody; Hoechst dye; Block (100X); wash buffer (10X); permeabilization buffer (10X); plate seals

Target	Quantity	Cat. No.	Each
p38 MAPKActivation	5 x 96	**K01-0004-1**	504.00

Multiplexed phospho-53 (ser15) and p53 Detection HitKit*

Enables the simultaneous quantitative monitoring and correlation of levels of total p53 and phosphorylated (ser15) p53 within the same cell

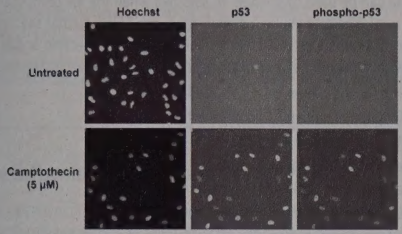
- Uses a fixed end-point assay based on immunofluorescence detection in cells grown on standard high-density microplates
- Optimized protocol requiring no cell lysis, purification or filtration steps
- Primary antibodies are specific for their targets and have minimal cross-reactivity with other targets
- Nonradioactive

INCLUDES:

phospho-p53 primary antibody, p53 primary antibody, Thermo Scientific* Pierce* DyLight* 549 conjugated goat anti-rabbit IgG, Alexa Fluor* 488 conjugated goat anti-mouse IgG, Hoechst dye, wash buffer (10X Dulbecco's PBS), permeabilization buffer (10X Dulbecco's PBS with 1% Triton* X-100), blocking buffer (10X), thin plate seals

Contd. on next page.

Thermo Scientific* Cellomics* Multiplexed phospho-53 (ser15) and p53 Detection HitKit*, Contd.



Staining of p53 and phospho-p53 in A549 cells treated with media only (Untreated) or with 5μM camptothecin for 20 hrs. (Camptothecin 5μM). Proteins were detected according to the kit protocol. The cells were imaged using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

Quantity	Cat. No.	Each
1 x 96	**8400501**	300.56
5 x 96	**8400502**	650.00

Phospho-p53 Activation HitKit*

Enables monitoring of Phospho-p53 activation

p53 is a tumor suppressor protein that regulates the expression of a wide variety of genes involved in apoptosis, growth arrest, inhibition of cell cycle progression, differentiation and accelerated DNA repair or senescence in response to genotoxic or cellular stress$^{1-3}$. p53 is maintained at low levels in normal cells. However, when the cell is confronted with stress like DNA damage, hypoxia, cytokines, metabolic changes, viral infection, or oncogenes, p53 accumulates in the nucleus, where it is activated. Once activated, p53 can function as a sequence-specific transcription factor that can act both directly and indirectly to turn on or off various genes that affect cell growth and survival. Additionally, p53 can directly interact with several proteins that influence growth and survival.

- Available in multiplex or singleplex configurations
- Optimized protocol requiring no cell lysis, purification or filtration steps
- Immunofluorescence-based assay provides sensitive results without radioactivity
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or HCS Imaging Systems including the Thermo Scientific* Cellomics* ArrayScan* HCS Reader
- Primary antibodies are specific for their targets and have minimal cross-reactivity with other targets

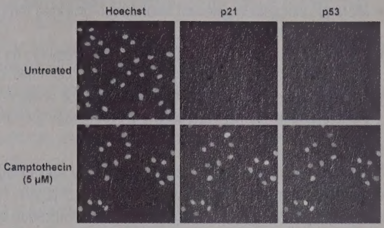
INCLUDES:

phospho-p53 primary antibody, Thermo Scientific* Pierce* DyLight* 549 conjugated goat anti-rabbit IgG, Hoechst dye, wash buffer (10X Dulbecco's PBS), permeabilization buffer (10X Dulbecco's PBS with 1% Triton* X-100), blocking buffer (10X), thin plate seals

Quantity	Cat. No.	Each
1 x 96	**8400701**	226.27
5 x 96	**8400702**	500.94

p53 and p21 Detection and Activation HitKit*

Provide simultaneous quantitation of p53 and p21 expression in the same cell



Staining of p21 and p53 in A549 cells treated with media only (Untreated) or with 5μM Camptothecin for 20 hrs. Proteins were labeled according to the kit protocol. The cells were imaged using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader

- Kits allow direct measurements of p53 and p21 in the nucleus
- Employ a fixed end-point assay based on immunofluorescence detection in cells grown on standard high-density microplates
- Optimized protocol requiring no cell lysis, purification or filtration steps
- Primary antibodies are specific for their targets and have minimal cross-reactivity with other targets
- Achieve sensitive results without radioactivity

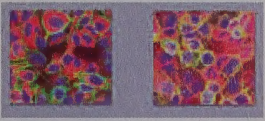
INCLUDES:

p53 primary antibody, p21 primary antibody, Thermo Scientific* Pierce* DyLight* 549 conjugated goat anti-rabbit IgG, DyLight 549 conjugated goat anti-mouse IgG, Alexa Fluor* 488 conjugated goat anti-mouse IgG, Hoechst dye, wash buffer (10X Dulbecco's PBS), permeabilization buffer (10X Dulbecco's PBS with 1% Triton* X-100), blocking buffer (10X), thin plate seal

Target	Quantity	Cat. No.	Each
p53 and p21	1 x 96	**8400501**	300.56
p53 and p21	5 x 96	**8400502**	650.00
p53	1 x 96	**8400801**	226.27
p53	5 x 96	**8400802**	500.94
p21	1 x 96	**8400901**	226.27
p21	5 x 96	**8400902**	500.94

PKC α Activation HitKit*

Designed for assays based on indirect immunofluorescence



HeLa cells unstimulated (left) or stimulated with 400nM PMA (right). PKC (red), Membrane Marker (green), Hoechst (blue); colocalization of PKC and Membrane Marker (yellow).

The Protein Kinase C (PKC) family is a group of related signal transduction proteins, and their activation is one of the earliest events leading to a variety of cellular responses including cytokine secretion,differentiation, proliferation, muscle contraction and modulation of membrane excitability. PKCα is believed to play an important role in the development and growth of cancer cells. Inhibition of PKCα production is the basis for therapeutic candidates currently in clinical trials for the treatment of non-small cell lung cancer. PKCα may also underlie the cellular mechanism leading to inflammatory lung vascular injury and adult respiratory distress syndrome.

Contd. on next page.

Thermo Scientific* Cellomics* PKC α Activation HitKit*, Contd.

- Time-saving and convenient kit provides HCS-qualified antibodies and fluorescent reagents that identify the cell membrane, nucleus, as well as PKCα in cells
- More physiologically relevant information provided through measurement of endogenous PKCα
- Convenient automation-compatible protocol requires no cell lysis, protein purification, generation of stable transfected cell lines, or radioactivity
- Cells prepared with the HitKit reagents may be analyzed directly via standard fluorescence microscopy; or HCS imaging systems

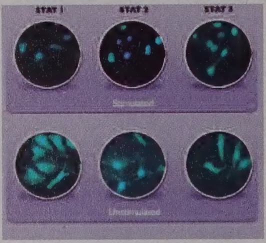
INCLUDES:
PKCα monoclonal antibody; secondary antibody Alexa Fluor* 555 conjugate; membrane marker-Alexa Fluor 488 conjugate; Hoechst dye; block (100X); wash buffer-M (10X); permeabilization buffer (10X); detailed protocol and assay data; plate seals

Target	Evaluation Size	Cat. No.	Each
PKCα Activation	5 x 96	**K09-0001-1**	403.00

STAT Activation HitKit*

Designed for assays based on indirect immunofluorescence

- Kits detect STAT1, STAT2, or STAT3 activation specifically, sensitively, and reliably in whole cells without radioactivity
- Cost-effective, streamlined kits include all fluorescent reagents and protocols for optimized screening results
- No cell lysis, purification, or filtration steps
- Measurements made on endogenous STATs
- An earlier and more biologically relevant measure of transcription factor activation than gene reporter and electophoretic mobility shift assays



STAT activation by nuclear translocation. Images of monitoredunstimulated (bottom row) and stimulated (top row) HeLa cells taken from a Thermo Scientific* Cellomics* ArrayScan* HCS Reader (1st column) STAT1, 5ng/mL INF-gamma, 45 mins. (2nd column) STAT2, 500U/mL INF-α, 20 min. (3rd column) STAT3, 25000U/mL INF-α, 20 min. Nuclei of stimulated cells appear blue-green due to co-localization of Hoechst and fluorescently labeled STAT.

INCLUDES:
Validated plate preparation protocol; STAT isoform-specific primary antibody; Alexa Fluor* 488 conjugated secondary antibody; Hoechst dye; wash buffer (10X); permeabilization buffer (10X); detergent buffer (10X); plate seals

Target	Evaluation Size	Cat. No.	Each
STAT1 Activation	5 x 96	**K01-0002-1**	403.00
STAT2 Activation	5 x 96	**K01-0005-1**	403.00
STAT3 Activation	5 x 96	**K01-0008-1**	403.00

Thermo Scientific* Pierce* ExcelArray*

Each slide can be used to analyze 10 samples when the six point standard curve is used. The protocol is a simple sandwich ELISA format that uses a Thermo Scientific Pierce DyLight 649 conjugate for detection and is compatible with conventional fluorescent slide readers.

- Quantitative and robust
- Low picogram sensitivity
- Validated with natural samples
- Simple sandwich ELISA procedure
- Calibrated against NIBSC standards
- Compatible with common slide scanners
- Complete and easy to use kits

INCLUDES:
Array slides; array sample diluent (1X); lyophilized standards; lyophilized detection antibodies; lyophilized Streptavidin Thermo Scientific* Pierce* DyLight 649 reagent; wash buffer (30X); final rinse buffer (5X); screw cap slide containers

Human Angiogenesis Fluorescent Array Kit

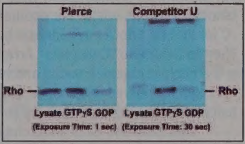
Thermo Scientific* Pierce* EZ-Detect* Rho Activation Kit

Utilizes a sensitive, convenient pull-down assay to measure the activity of Rho

Measures the activity of Rho, a small GTPase, by isolating it via its specific downstream effector. The binding domain of the downstream effector is expressed as a GST-fusion protein which, when immobilized on a resin, is used to pull down the active or GTP-bound Rho from cell lysate. The pulled-down GTP-bound Rho is then detected by Western blot.



Performance comparison of EZ-Detect Rho Activation Kit with competitor kit. Affinity precipitation of Rho from NIH3T3 cell lysates (500µg) treated with GTPγS or GDP was carried out using Pierce and competitor U kits. Half of eluted pulled-down samples (25µL) were analyzed by Western blot using anti-Rho antibody. Analyses were conducted according to the manufacturer's instructions.

- Eliminates the need to express and purify GST-RBD fusion proteins
- Utilizes Thermo Scientific* Pierce* SwellGel* discs to eliminate the inconsistencies associated with measuring small volumes of resin
- Provides optimized conditions for ease of use

INCLUDES:

GST-Rhotekin-RB; Thermo Scientific* Pierce* SwellGel* immobilized glutathione disc; Lysis/binding/wash buffer; primary antibody; GTPγS and GDP; 2X SDS sample buffer; spin columns and collection tubes

Size	Cat. No.	Each
30 assays	PI-89854	620.00

Promega* cAMP-Glo* Assay

Homogeneous, bioluminescent and high-throughput assay to measure cAMP levels in cells

Monitors cAMP production in cells in response to the effects of an agonist or test compound on G protein-coupled receptors (GPCR). GPCRs that couple with adenylate cyclase will increase or decrease intracellular cAMP. The assay is based on the principle that cyclic AMP (cAMP) stimulates protein kinase A (PKA) holoenzyme activity, decreasing available ATP and leading to decreased light production in a coupled luciferase reaction.

- Homogeneous assay can be completed in approximately 45 minutes
- Two steps following lysis of cells
- Excellent signal-to-noise ratios
- Easily scalable to 1536-well plate formats and beyond
- Powered by Ultra-Glo* Recombinant Luciferase
- No interference by fluorescent compounds
- Non-radioactive

APPLICATIONS:

High-throughput analysis of library compounds to identify modulators of GPCR activity.

STORAGE CONDITIONS:

Store the system at -20°C. Once prepared, the cAMP detection solution (cAMP-Glo Reaction Buffer with Protein Kinase A) should not be frozen. Once prepared, the Kinase-Glo Reagent should be dispensed into aliquots and stored at -20°C. See the product label for the expiration date.

Size	Cat. No.	Each
300 assays	PR-V1501	250.00
3000 assays	PR-V1502	1400.00
30,000 assays	PR-V1503	10495.00

Promega* Kinase-Glo* Plus Luminescent Kinase Assay System

Homogeneous, high-throughput screening (HTS) method of measuring kinase activity

Quantifies amount of ATP remaining in solution following a kinase reaction. Easily performed in a single well of a 96- or 384-well plate: simply add volume of Kinase-Glo Plus reagent equal to volume of completed kinase reaction, then measure luminescence.

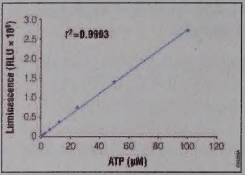
- Ideal for high-throughput analysis of library compounds to identify kinase inhibitors
- Compatible with virtually any kinase/kinase substrate combination
- Can be performed at higher ATP concentrations than traditional Kinase-Glo assay
- Suitable for screening non-ATP binding site inhibitors using ATP concentrations as high as 100µM
- Can be used for a wide variety of kinases (lipid, sugar, and alcohol) and substrates (peptides, proteins, lipids, sugars, alcohols)
- Less susceptible to interference than traditional luciferase-based ATP detection reagents
- Non-radioactive

STORAGE CONDITIONS:

Kinase-Glo Plus Buffer and the lyophilized Kinase-Glo Plus Substrate should be stored at -20°C; avoid multiple freeze-thaw cycles.

Contd. on next page.

Promega* Kinase-Glo* Plus Luminescent Kinase Assay System, Contd.



Luminescence correlates with amount of ATP. Serial dilutions of ATP were made in 50μL kinase reaction buffer. An equal volume of Kinase-Glo* Plus Reagent was added to each well, incubated at room temperature, and luminescence was recorded. Values represent the mean of 2 replicates. There is a linear relationship between the luminescent signal and the amount of ATP in the kinase reaction buffer up to 100μM (r2 = 0.9993).

TOXICITY ASSAYS

Thermo Scientific* Cellomics* HitKit* HCS Reagent Kits

Assay-ready reagents produce cells optimized for fluorescent imaging

Rapidly incorporate high-content assays into your drug discovery efforts with proprietary and exclusively licensed fluorescent reagents designed to achieve the highest emission of light for each fluorophore. Background fluorescence and non-specific cross-talk minimized for increased sensitivity, specificity, and signal-to-noise ratios. Sample preparation protocols have been optimized to produce high-quality cell preparations and are automation compatible for maximum productivity and reproducibility.

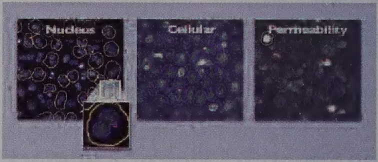
- Compatible with a wide range of cell types
- No cell lysis, purification, or filtration steps
- Fluorescence-based assays provide sensitive quantitative and qualitative results without radioactivity
- Prepared cells may be analyzed directly via standard fluorescence microscopy
- Kits include all imaging-tested reagents and detailed protocols needed for sample preparation
- Pre-validated on a Thermo Scientific Cellomics ArrayScan* HCS Reader

Micronucleus BioApplication HitKit*

Decreases the time required to quantitatively analyze populations of cells for micronucleus induction, reduces subjectivity, and provides an easy method for evaluating multiple exposed wells

Micronucleus (MN) formation is a hallmark of genetic toxicity; as such, micronuclei are used as indicators of genotoxicity caused by drug candidates or environmental toxins. The in vitro micronucleus assay is among a new set of genetic toxicology assays wherein cultured cells are treated and scored for micronucleus induction.

- BioApplication reports the number of nuclei, micronuclei, and percentage of cells that contain micronuclei
- HitKit HCS Reagent Kit provides optimized reagents and cell preparation protocol designed to work with the BioApplication
- Automatically distinguishes agents that can lead to micronuclei formation by use of reference wells
- Allows gating of subpopulations of interest using permeability as well as up to three additional channels
- Can simultaneously measure early and late indicators of cytotoxicity by measuring the ratio of multinucleated to mononucleated cells and membrane permeability, respectively
- Flexibility allows optimization of the assay for different cell types including, but not limited to, CHO-K1, BALB-3T3, and V79
- Significantly reduces time required to evaluate micronucleus formation
- Enables, for the first time, automated screening for genotoxicity
- Provides a more objective analysis of micronucleus formation
- Allows genotoxic compounds to be identified earlier in the drug discovery process, saving valuable time and money



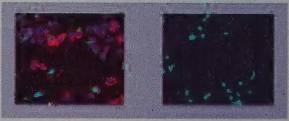
The Micronucleus BioApplication is a flexible HCS application that automatically identifies and quantifies micronuclei in a 96 well format. Images of CHO-K1 cells stained with the Micronucleus HitKit HCS Reagent Kit following 28 hr. incubation with cytochalasin B. Note the large number of binucleated cells within the population. Cells were exposed to a mitomycin C for 20 hrs. prior to cytokinesis blocking. Images were collected using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader and a 20X objective. In the nuclear channel, nuclei and micronuclei are identified (see inset). The cellular channel determines the boundary of the cell for purposes of calculating the number of nuclei per cell. The permeability channel detects and excludes cells which have compromised cell membranes.

Evaluation Size	Cat. No.	Each
5 x 96	**K11-0001-1**	403.00

Multiparameter Cytotoxicity 1 HitKit*

An in vitro assay tool that analyzes nuclear morphology/size, cell membrane permeability, lysosomal mass-pH and cell density (number of cells per field)

Following a toxic insult, cells may respond with changes in nuclear size and/or morphology depending on the cell type and the compound. Loss of cell membrane integrity is another common phenotypic feature of cytotoxicity. Some toxins can interfere with the cell's functionality by affecting the pH of organelles such as lysosomes and endosomes, or by causing an increase in the number of lysosomes.



HepG2 cells treated with 100uM valinomycin for 24 hrs. (right), and untreated (left). Nuclei appear in blue, lysosomes in red, cell membrane impermeant dye in green. All cells in right panel are dead, as indicated by co-localized nuclear and cell impermeant dye. Images taken from a Thermo Scientific* Cellomics* ArrayScan* HCS Reader.

- Simultaneously quantify four hallmark indicators of cytotoxicity: nuclear size/morphology, cell membrane permeability, lysosomal mass-pH, and cell density (number of cells per field)—shortening the assay from days to hours
- Lysosomal marker makes it ideal for measuring phospholipidosis

Contd. on next page.

Thermo Scientific* Cellomics* Multiparameter Cytotoxicity 1 HitKit*, Contd.

- Multiplexed fluorescence-based assay provides sensitive quantitative and qualitative results without radioactivity
- No cell lysis, purification, or filtration steps—saving time and labor

INCLUDES:
MPCT1 Fluor Cocktail (100X); wash buffer (10X); detailed protocol and assay data; plate seals

Evaluation Size	Cat. No.	Each
5 x 96	**K02-0002-1**	504.00

Multiparameter Cytotoxicity 2 HitKit*

Optimized reagents provide simultaneous detection and quantitation of changes in nuclei, permeabilized cells, and lysosomal mass/pH

Fluorescence-based assays contain indicators to assess the toxic effects of compounds on nuclear morphology and size, cell membrane's permeability status, cell density (number of cells per field), and either the lysosome's mass or pH or the mitochondria's transmembrane potential.

- Faster, more cost-effective results than traditional, animal-based screening methods
- Supplied fluorescent reagents enable a fixed end-point assay
- Optimized and validated in the human hepatoma cell line HepG2
- Assay can be easily adapted for a variety of cell types or cell lines
- Once prepared, cells can be analyzed using standard fluorescence microscopy or using a Thermo Scientific* Cellomics* ArrayScan* HCS Reader with the Cell Health Profiling BioApplication

Available in three different versions

- One version contains fluorescent probes for nuclear morphology/size (blue fluorescence), cell membrane's permeability status (green fluorescence), lysosome mass or pH (orange fluorescence), and mitochondrial transmembrane potential (orange fluorescence)
- The other two versions have, in addition to the nuclear and cell probes, either the lysosomal or the mitochondrial fluorescent probe

INCLUDES:
Lysosomal mass/pH dye[†]; Mitochondrial membrane potential dye[†]; Hoechst dye permeability dye[†]; wash buffer (10X Dulbecco's PBS); thin plate seals

Probe Type(s)	Quantity	Cat. No.	Each
Lysosomal, Mitochondrial	1 x 96	**8400001**	300.56
	5 x 96	**8400002**	650.00
Lysosomal	1 x 96	**8400101**	226.27
	5 x 96	**8400102**	500.94
Mitochondrial	1 x 96	**8400201**	226.27
	5 x 96	**8400202**	500.94

[†] Kit components vary depending on multiplex or single-plex version of the kit.

Promega* CytoTox 96* Nonradioactive Cytotoxicity Assay

Colorimetric method for estimating the number of non-viable cells present in a sample

Quantitatively measures lactate dehydrogenase (LDH), a stable cytosolic enzyme that is released upon cell lysis, in much the same way as [^{51}Cr] is released in radioactive assays. Released LDH in culture supernatants is measured with a 30 min. coupled enzymatic assay that results in the conversion of a tetrazolium salt (INT) into a red formazan product. The amount of color formed is proportional to the number of lysed cells. Visible wavelength absorbance data are collected using a standard 96-well plate reader. The assay can be used to measure membrane integrity for cell-mediated cytotoxicity assays in which a target cell is lysed by an effector cell, or to measure lysis of target cells by bacteria, viruses, proteins, chemicals, etc.

- Provides a quantitative measurement of lactate hydrogenase to determine cell-mediated cytoxiticy, chemical-mediated cytotoxicity, and total cell number
- Reveals early, low-level damage to cell membranes
- Allows collection of absorbance (visible wavelength) data with a standard 96-well plate reader
- Eliminates need to pre-label target cells
- Requires no radioactive waste disposal

APPLICATIONS:
Cytotoxicity; Chemosensitivity; Total cell number determination

Size	Cat. No.	Each
1000 assays	**PR-G1780**	226.40

Promega* CytoTox-ONE* Homogeneous Membrane Integrity Assay

Fluorometric method for estimating the number of nonviable cells present in a mixed population

Cell viability is most often defined based on the integrity of the cell membrane. Measuring leakage of components from the cytoplasm into the surrounding culture medium is widely accepted as a valid method to estimate the number of nonviable cells.

- Rapidly measures the release of lactate dehydrogenase (LDH) from cells with a damaged membrane, while leaving cells intact
- Assay can be completed in a single 96- or 384-well plate without separating cells from supernatant
- Enables multiple homogeneous cell-based assays to be performed on a single sample
- Versatile protocol allows assays to be read over several hours or after 10-minute incubation
- HTP Assay offers convenient, alternate packaging for processing multiple plates; each bottle of reagent is sufficient to perform 500 assays in a 96-well format or 2000 assays in a 384-well format

STORAGE CONDITIONS:
Store components at -20°C, protected from light.

APPLICATIONS:
Cytotoxicity determination; total cell number determination

Description	Size	Cat. No.	Each
Homogeneous Membrane Integrity Assay	200–800 assays	**PR-G7890**	105.40
	1000–4000 assays	**PR-G7891**	322.75
Homogeneous Membrane Integrity Assay, HTP	1000–4000 assays	**PR-G7892**	322.75

Promega* CytoTox-Fluor* Cytotoxicity Assay

Homogeneous, fluorescent assay measures the relative number of dead cells in cell populations

Measures a distinct protease activity associated with cytotoxicity and uses a fluorogenic peptide substrate. Assay is designed to accommodate downstream multiplexing with several Promega luminescent assays or spectrally distinct fluorescent assay methods, such as assays to measure caspase activation, reporter gene expression or orthogonal measures of viability.

- Single reagent addition
- Data normalization for dead-cell number makes results more comparable well-to-well, plate-to-plate, day-to-day
- Add-mix-measure protocol avoids the cumulative error associated with multistep protocols
- Determine cytotoxicity, multiplex with Caspase-Glo Assays or orthogonal cell viability assays, multiplex with spectrally distinct assays

STORAGE CONDITIONS:
Store at -20°C.

Quantity	Cat. No.	Each
10mL	P7926	99.50
5 × 10mL	P7926A	390.49
2 × 50mL	P7926B	599.00

Promega* MultiTox-Fluor Multiplex Cytotoxicity Assay

Single-reagent-addition, homogeneous, fluorescent assay that measures the number of live and dead cells simultaneously in culture wells

- Simultaneously measures cell viability and cytotoxicity by detecting two distinct protease activities
- Normalizes data for cell number to make results more comparable well-to-well, plate-to-plate, day-to-day
- Complementary live- and dead-cell measures with independent chemistries reduces false positives and false negatives
- Allows you to multiplex the MultiTox-Fluor Assay† with most Promega bioluminescent cell-based apoptosis or genetic reporter assays
- Add-mix-measure protocol avoids the cumulative error associated with multistep procedures

ORDERING INFORMATION:
Each 10mL aliquot is sufficient for 100 assays at 100µL/assay in a 96-well format or 400 assays at 25µL/assay in a 384-well format

INCLUDES:
Assay buffer; bis-AAF-R110 Substrate; GF-AFC Substrate

STORAGE CONDITIONS:
Store at -20°C.

Size	Cat. No.	Each
10mL	P7920	179.67
5 × 10mL	P7920A	490.61
2 × 50mL	P7920B	890.00

† Patent pending.

VIABILITY ASSAYS

Thermo Scientific* Cellomics* HitKit* HCS Reagent Kits

Assay-ready reagents produce cells optimized for fluorescent imaging

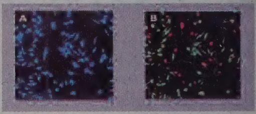
Rapidly incorporate high-content assays into your drug discovery efforts with proprietary and exclusively licensed fluorescent reagents designed to achieve the highest emission of light for each fluorophore. Background fluorescence and non-specific cross-talk minimized for increased sensitivity, specificity, and signal-to-noise ratios. Sample preparation protocols have been optimized to produce high-quality cell preparations and are automation compatible for maximum productivity and reproducibility.

- Compatible with a wide range of cell types
- No cell lysis, purification, or filtration steps
- Fluorescence-based assays provide sensitive quantitative and qualitative results without radioactivity
- Prepared cells may be analyzed directly via standard fluorescence microscopy
- Kits include all imaging-tested reagents and detailed protocols needed for sample preparation
- Pre-validated on a Thermo Scientific Cellomics ArrayScan HCS Reader

Cell Viability HitKit*

High Content Screening (HCS)-qualified fluorescence reagents and a validated, optimized protocol for cytotoxicity screening

- Assay is versatile and widely applicable to a variety of cell types
- Utilizes fluorescent reagents and requires no cell lysis, purification, or filtration steps; and no handling of radioactive isotopes
- Cells prepared with the HitKit HCS Reagent Kits may be analyzed directly via standard fluorescence microscopy; or HCS imaging systems.
- Proprietary DeadDye* and VitalDye* fluorescent probes offer sensitivite, quantitative and qualitative screening results without radioactivity



Live and dead cells distinguished by a Thermo Scientific* Cellomics* ArrayScan* HCS Reader and the Cell Viability HitKit reagents. HeLa cells were plated in a 96-well microplate and then treated with the Positive Control Compound (supplied with the kit). Hoechst staining identifies all cells in the imaged field (A). VitalDye (green) and DeadDye (red) show live and dead cells, respectively (B).

INCLUDES:
VitalDye Fluorescent probe; DeadDye Fluorescent probe; Wash buffer (10X); Hoechst dye; positive control compound; plate seals

Evaluation Size	Cat. No.	Each
5 x 96	K02-0001-1	403.00

[1] Patent pending.

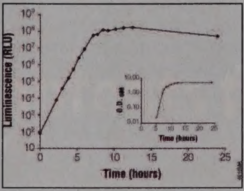
Prices subject to change.

Promega* BacTiter-Glo* Luminescent Cell Viability Assay Kit

Fast, homogeneous method for determining the number of viable microbial cells in culture based on quantitation of the ATP present

"Add-mix-measure" format utilizes a single reagent that causes cell lysis and generation of a luminescent signal after direct addition to bacterial cells cultured in medium. The luminescent signal is proportional to the amount of ATP present, which is directly proportional to the number of viable cells in culture.



Evaluate bacterial growth with the BacTiter-Glo Assay.

- Generates a stable, "glow-type" luminescent signal with a half-life generally over 30 minutes
- Detects ATP from as few as 10 bacterial cells
- Produces results quickly—data can be recorded in five minutes or less after reagent addition
- Requires fewer handling steps than other ATP assays, making the kit ideal for automation
- Compatible for use with 96- or 384-well plates

INCLUDES:

BacTiter-Glo Buffer; BacTiter-Glo Substrate (lyophilized)

STORAGE CONDITIONS:

Store at -20°C.

Evaluation Size	Cat. No.	Each
10mL (100 assays at 100µL/assay in 96-well plates)	**PR-G8230**	79.40
10 × 10mL (1000 assays at 100µL/assay in 96-well plates)	**PR-G8231**	369.75
100mL (1000 assays at 100µL/assay in 96-well plates)	**PR-G8232**	287.75
10 × 100mL (10,000 assays at 100µL/assay in 96-well plates)	**PR-G8233**	2450.00

U.S. Patent 6,602,677, Australian Patent 754312 and other patent pending.
The method of recombinant expression of Coleoptera luciferase *is covered by U.S. Patents 5,583,024; 5,674,713; and 5,700,673.*

Promega* CellTiter 96* AQueous Nonradioactive Cell Proliferation Assay Kit

Provides a colorimetric method for determining the number of viable cells in proliferation, cytotoxicity, or chemosensitivity assays

Contains a solution composed of a novel tetrazolium compound, MTS[1] [3-(4,5-dimethylthiazol-2-yl)-5-(3-carboxymethoxyphenyl)-2-(4-sulfophenyl)-2H-tetrazolium, inner salt] and an electron coupling reagent, PMS (phenazine methosulfate). The MTS and PMS solutions are combined and added to cells in culture.

- Designed to be performed quickly and easily in a 96-well plate with no washing or cell harvesting; detects as few as 1000 cells/well
- Flexible assay can follow either a 5 hour or overnight protocol
- Eliminates solubilization steps because the colored product is soluble in tissue culture medium
- Requires no scintillation cocktail, volatile organic solvents, or radioactive waste disposal, increasing user safety
- For long-term storage, MTS and PMS solutions should be kept at -20°C, protected from light
- CellTiter 96 AQueous MTS Reagent is also available separately in powdered form

APPLICATIONS:

Cell proliferation; Cytotoxicity; Cell viability; Chemosensitivity; Cell attachment determinations; Chemotaxis

STORAGE CONDITIONS:

For long-term storage, store MTS and PMS Solutions at –20°C, protected from light.

Description	Quantity	Cat. No.	Each
CellTiter 96 AQueous Nonradioactive Cell Proliferation Assay	1000 Assays	**PR-G5421**	188.40
	5000 Assays	**PR-G5430**	622.00
	50,000 Assays	**PR-G5440**	5126.00
CellTiter 96 AQueous MTS Reagent Powder	250mg	**PR-G1112**	232.40
	1g	**PR-G1111**	664.00

[1] The MTS tetrazolium compound is the subject of U.S. Patent No. 5,185,450 assigned to the University of South Florida and is licensed exclusively to Promega Corporation.

Promega* CellTiter 96* AQueous One Solution Cell Proliferation Assay (MTS)

Homogeneous colorimetric assay determines the number of viable cells in proliferation, cytotoxicity, or chemosensitivity assays

Convenient solution combines PES, a chemically stable electron coupling reagent, and MTS, a novel tetrazolium compound that is soluble in tissue culture medium[1]. Absorbance of the formazan product at 490nm can be measured from the assay plate and is directly proportional to the number of living cells in culture.

- Solution is supplied filter sterilized and ready to use
- Simple "add-incubate-measure" format enables design of homogeneous high-throughput screening assays
- Entire assay is performed in a multiwell plate with no washing or cell harvesting; no solubilization steps required
- Eliminates need for scintillation cocktail or volatile organic solvents; produces no radioactive waste
- Plates can be read and returned to incubator for further color development

APPLICATIONS:

Cell proliferation; Cell viability; Cytotoxicity; Chemosensitivity; Cell attachment determination; Chemotaxis

STORAGE CONDITIONS:

Store at –20°C, protected from light.

Quantity	Cat. No.	Each
200 assays	**PR-G3582**	63.20
1000 assays	**PR-G3580**	226.40
5000 assays	**PR-G3581**	755.00

[1] The MTS tetrazolium compound is the subject of U.S. Patent 5,185,450 assigned to the University of South Florida and is licensed exclusively to Promega Corporation.

Promega* CellTiter 96* Nonradioactive Cell Proliferation Assay (MTT)

Collection of reagents provide a convenient method of determining viable cell number in proliferation

- Modification of MTT Assay method reduces serum protein precipitation and interference by phenol red; increases solubilization of formazan crystals and stability of colored product
- Measures cell proliferation, cell attachment, cytotoxicity, chemotaxis, and results of apoptosis
- Detects as few as 1000 cells/well with a 96-plate reader; greater sensitivity than the neutral red assay procedure
- Time-saving procedure eliminates washing steps, cell harvesting, and scintillation counting; no need to weigh or mix dye components
- Flexible assay allows either a 4-hour or overnight protocol

APPLICATIONS:
Cell proliferation; Cell viability; Cytotoxicity; Cell attachment; Chemotaxis

STORAGE CONDITIONS:
Store Dye Solution at –20°C and Solubilization/Stop Solution at room temperature.

Quantity	Cat. No.	Each
1000 assays	**PR-G4000**	220.40
5000 assays	**PR-G4100**	622.00

Promega* CellTiter-Blue* Cell Viability Assay Kit

Homogeneous, fluorescent method for monitoring cell viability

- Ideal for measuring cell proliferation, cytotoxicity, or results of apoptosis
- Versatile system can be used with 96- or 384-well formats; data can be recorded using fluorescence (preferred) or absorbance
- Enables user to perform more than one assay on the same sample
- Excellent Z' factor; offers superior flexibility in assay incubation times
- Reagent is generally nontoxic to cells; requires no scintillation cocktail, radioactive waste disposal, or hazardous solvents
- PR-G8080 contains sufficient reagents for 1000 assays in 96 well plates or 4000 assays in 384 well plates
- PR-G8081 contains sufficient reagents for 5000 assays in 96 well plates or 20,000 assays in 384 well plates
- PR-G8082 contains sufficient reagetns for 50,000 assays in 96 well plates or 200,000 assays in 384 well plates

APPLICATIONS:
Cell proliferation; Cytotoxicity; Cell viability

STORAGE CONDITIONS:
Store frozen at –20°C, protected from light.

Quantity	Cat. No.	Each
20mL	**PR-G8080**	87.20
100mL	**PR-G8081**	246.40
10 × 100mL	**PR-G8082**	2130.00

Promega* CellTiter-Glo* Luminescent Cell Viability Assay Kit

Luminescent method for determining the number of viable cells in culture based on the amount of ATP present

"Add-mix-measure" format results in cell lysis and generation of a luminescent signal proportional to the amount of ATP present. Data can be recorded using a luminometer or CCD camera 10 minutes after adding reagent.

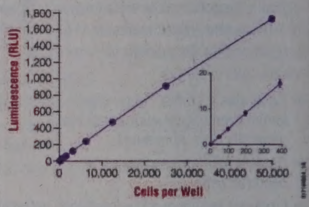


Figure 1. Excellent Sensitivity and Extended Linearity.

Dynamic range from less than 10 cells to over 50,000 cells.

- Designed for use with 96- or 384-well plates, making the kit ideal for automated high-throughput screening, cell proliferation assays, and cytotoxicity assays
- Does not require cell washing, media removal, or multiple pipetting steps
- Detects as few as 15 cells per well in a 384-well format or 50 cells per well in a 96-well format, reducing the number of cells required per assay
- Luminescent signal has a half-life generally greater than five hours, depending on cell type and medium used, eliminating the need to use reagent injectors and providing the flexibility for continuous or batch mode processing of multiple plates
- PR-G7570 contains sufficient reagents for 100 assays at 100µL/assay in 96-well plates or 400 assays at 25µL/well in 384-well plates
- PR-G7571 contains sufficient reagents for 10 × 100, 100µL assays or 10 × 400, 25µL assays (1000 to 4000 total assays)
- PR-G7572 contains sufficient reagents for 1000, 100µL assays or 4000, 25µL assays
- PR-G7573 contains sufficient reagents for 10 × 1000, 100µL assays or 10 × 4000, 25µL assays (10,000 to 40,000 total assays)

APPLICATIONS:
Cell proliferation; Cytotoxicity; Cell viability

INCLUDES:
CellTiter-Glo Buffer; CellTiter-Glo Substrate (lyophilized)

STORAGE CONDITIONS:
Store at -20°C.

Quantity	Cat. No.	Each
10mL	**PR-G7570**	79.20

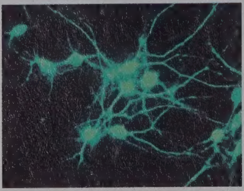
Genlantis* NeuroPure* Rat Neuronal Cells

Save time with fresh, ready-to-use cells

NEW



N200200 NeuroPure Rat Neuronal Cells

Cells are prepared fresh each week and shipped in a nutrient-rich medium that keeps the cells alive for up to 14 days under refrigeration.

- Freshly isolated healthy cells—never frozen
- Get your primary culture up and running within one hour
- Pure neuronal cells, 99.9% glial cell free
- Isolated from microsurgically dissected regions of Sprague/Dawley or Fischer 344 rats
- Available in seven popularly used cell types

Applications: Transfection, Pharmacology, Immunocytochemistry, Neuron Development studies

INCLUDES:

All cells include one 12mL vial of NeuroPure plating media per vial of cells

STORAGE CONDITIONS:

Stable at 4°C for up to two weeks

Description	Quantity	Cat. No.	Each
E18 Primary Rat Spinal Cord Neurons	1 vial × 2mL	**N600200**	320.60
E18 Primary Midbrain Neurons	1 vial × 2mL	**N700200**	320.60

E18 Primary Rat Striatal Neurons	1 vial/1 spinal cord	**N500200**	320.60
Rat Hippocampal Neuronal Cells	1 vial/1 midbrain	**N100200**	320.60

Genlantis* PrimaPure* Human Aortic Endothelial Cells (HAOEC) and Kits

Functionally characterized

NEW

HAOEC cells

Human Aortic Endothelial Cells (HAOEC) are primary endothelial cells isolated from normal human aorta. They are cryopreserved at second passage and can be cultured and propagated at least 16 population doublings. They respond to cytokine stimulation by expressing cell adhesion molecules. Aortic endothelial cells have been used as an *in vitro* model for the study of morphological and ultra-structural changes[1] in the development of atherosclerosis. HAOEC system has also been used for the study of endothelial cell-dependent lymphocyte activation[2] and chemoattractant activity for lymphocytes[3] in relation to the degree of atherosclerosis.

- Each lot functionally characterized
- Single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- Performance guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

Aortic (HAOEC), Adult	>500,000 cells	**PH30405A**	590.00
Aortic, Adult (HAOEC)	1 Kit†	**PH30405AK**	745.00

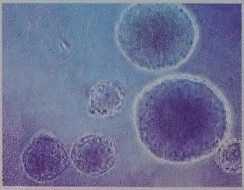
† Each kit contains an ampule of cryopreserved HAOEC (PH30405A), 500mL of Endothelial Cell Growth Medium (PM211500), and a Subculture Reagent Kit (PR090100K).

Genlantis* NeuroStem* Neuronal Progenitor Cells

NEW

Complete kits with fresh cells, optimized reagents

- High quality cells prepared by experienced scientists
- Complete kits with optimized reagents for easy handling and highest viable yield
- Clear and easy to follow protocol
- Multiple experimental uses for in vitro or in vivo experiments
- Can multiply for many generations under appropriate culture conditions, which include trophic growth factors and low adhesion



NeuroPure Rat Neuronal Cells

STORAGE CONDITIONS:

4°C for a few days, culture as soon as possible.

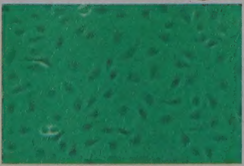
INCLUDES:

Each set of cells comes with 12mL NeuroPrep Media; 25mg Cell Culture grade Papain; 12mL NeuroStem Plating Media

Description	Quantity	Cat. No.	Each
Rat Cortical	1 million cells/2mL	**N200300**	360.68
Rat Hippocampal	1 million cells/2mL	**N100300**	360.68

Genlantis* PrimaPure* Human Coronary Artery Endothelial Cells (HCAEC) and Kits

Functionally characterized



HCEAC cells

Human Coronary Artery Endothelial Cells (HCAEC) are isolated from normal human coronary arteries. They are cryopreserved at second passage and can be cultured and propagated at least 15 population doublings. The endothelium are crucially involved in the regulation of coronary blood flow and cardiac functions, such as thrombosis[1,2], atherosclerosis[3], and hypertension[4]. Strategically located between the circulating blood and the vascular smooth muscle, endothelial cells release numerous vasoactive substances regulating the function of vascular smooth muscle and trafficking blood cells[5]. HCAEC is an ideal candidate for the studies of endothelial cell metabolism and functional vasodilators, such as pro-stacyclin, bradykinin, nitric oxide and independent of the former endo-thelium-derived hyperpolarizing factor[5]. Co-culturing HCAEC with human coronary artery smooth muscle cells (HCASMC) could generate an in vitro model for the cell-cell interaction system[3].

- Single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B, C, mycoplasma, bacteria, yeast, and fungi
- Performance guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

LOOKING FOR GENLANTIS* MEDIA?

See the Specialty Media section.

Genlantis* PrimaPure* Human Dermal Microvascular Endothelial Cells (HMVEC) and Kits

Functionally characterized

HMVEC cells

HMVEC are isolated from normal human neonatal foreskin or adult skin capillaries. They are cryopreserved at second passage and can be cultured and propagated at least 16 population doublings. They are responsive to cytokine stimulation in the expression of cell adhesion molecules. HMVEC express CD36 constitutively, while large vessel endothelial cells do not. HMVEC is an organ-specific endothelial cell system for the study of angiogenesis[1], tumor metastasis[2,3], wound healing[4], inflammation[5,6], macromolecule transport[7], and drug metabolism[8]. There is growing evidence of differences in physiology and pharmacology between microvascular endothelial cells and macrovascular endothelial cells[9,10].

- Each lot functionally characterized
- Single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- Performance guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

Functionally characterized

HPAEC cells

Human Pulmonary Artery Endothelial Cells (HPAEC) are isolated from normal human pulmonary arteries. They are cryopreserved at second passage and can be cultured and propagated at least 15 population doublings. HPAEC possess an array of enzymatic activities[1],[2]. They respond to a wide range of vasoactive substances[3], commensurate with their control of blood pressure and blood pH in vivo . HPAEC have been used for the study of vascular permeability[4] and inflammatory responses[5]. HPAEC in co-culture with HPASMC have been used as a model for pulmonary angiopathy[6].

- Each lot functionally characterized
- Single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- Performance guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

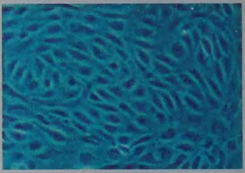
Functionally characterized



HUVEC cells

Human Umbilical Vein Endothelial Cells (HUVEC) are isolated from normal human umbilical vein. They are cryopreserved at the end of primary culture and can be cultured and propagated at least 16 population doublings. HUVEC are responsive to cytokine stimulation in the expression of cell adhesion molecules. These cell systems are commonly used for physiological and pharmacological investigations, such as macromolecule transport[1], blood coagulation[2], and fibrinolysis[3].

- Each lot functionally characterized
- Single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- Performance guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

Genlantis* PrimaPure* Human Aortic Smooth Muscle Cells (HAOSMC) and Kits

Functionally characterized

HAOSMC cells

Human Aortic Smooth Muscle Cells (HAOSMC) are derived from tunica intima and tunica media of normal human, fibrous plaque-free aorta. They are cryopreserved at second passage and can be cultured and propagated at least 16 population doublings. Arterial smooth muscle cells are capable of synthesizing collagen, elastin, myosin and glycosaminoglycan[1],[2]. Increasedproduction of connective tissue components, hyperplasia and hypertrophy of intimal smooth muscle cells are found to gradually occlude the vessel lumen in atherosclerosis[1],[2]. HAOSMC respond to various factors by proliferating or differentiating[3],[4]. They are a well established cell system for the study of human vascular disorders such as atherosclerosis[5],[6] and stroke.

- Each lot functionally characterized
- Lots from single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- 16 population doublings guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

HPASMC Cells

Human Pulmonary Artery Smooth Muscle Cells (HPASMC) are derived from tunica intima and tunica media of normal human, fibrous plaquefree pulmonary arteries. They are cryopreserved at second passage and can be cultured and propagated at least 16 population doublings. HPASMC are well suited for the study of pulmonary vascular disorders[1], associated liver diseases[2], and connective tissue diseases[3]. Phenotypic changes of smooth muscle cells have been found to be related to smooth muscle cell migration and intimal proliferation. Switches in smooth muscle cell phenotype lead to pulmonary hypertension and eventually heart and lung disorders.[4]

- Each lot functionally characterized
- Lots from single donors to allow variability comparisons
- Each lot tested negative for HIV, Hepatitis B & C, mycoplasma, bacteria, yeast, and fungi
- 16 population doublings guaranteed with Genlantis media and reagents

STORAGE CONDITIONS:

Cells are cryopreserved immediately after purification and delivered on dry ice. Place cryovials immediately in liquid nitrogen upon arrival. Store the growth medium at 4°C in the dark. Store the subculture reagent at -20°C upon receipt and at 4°C upon thawing.

Functionally characterized

NEW

HCASMC cells

Human Coronary Artery Smooth Muscle Cells (HCASMC) are derived from the tunica intima and tunica media of normal human, fibrous plaquefree coronary arteries. They are cryopreserved at second passage and can be cultured and propagated at least 16 population doublings. Smooth muscle cells are present in various amounts in early fatty streaks and they are the predominant type of cells in fibrous plaques[1,2,3]. Atherosclerosis of the coronary arteries can cause angina pectoris and heart attack. Intimal smooth muscle proliferation plays a key event in the development of atherosclerosis. HCASMC is an ideal cellular model for the investigations of coronary artery diseases, such as alteration of smooth muscle cell differentiation in atherosclerosis[4,5].

- Each lot functionally characterized

Mediatech* cellgro* Liquid Media in 10- and 20-Liter Bags

Flexible media containers supply volumes of cellgro media in compact packaging for more efficient shipping, storage and handling

- Production-scale size
- Strong, laminated plastic bags are nontoxic and provide a gas barrier equivalent to glass–ensuring both biological compatibility and media stability
- Hybridoma tested
- Bags are filled by a proprietary steam-in-place method
- Bags are shipped at ambient temperature.

ORDERING INFORMATION: Media tote and collection containers available separately.

STORAGE CONDITIONS: Store media at 2° to 8°C (36° to 46°F); water at 15° to 30°C (59° to 86°F)

Description	Size	Description	Each
Dulbecco's Modification of Eagle's Medium (DMEM) 1X

MEDIA-SPECIALTY

Thermo Scientific* HyClone* Serum-Free and Specialty Media

Wide selection of media optimize the expression of protein in CHO cells

Developed through Metabolic Pathway Design* to support superior performance and increased process yields of multiple cell culture platforms. Serum-free media (SFM) have been designed to provide a consistent nutrient supply without the need for serum prescreening.

- CCM5* for anchorage–dependent cells
- SFX–CHO* for suspension cells
- SFX–CHO produces high cell yields and recombinant protein production in a variety of culture vessels, including high–density perfusion bioreactors
- CDM4CHO chemically defined, animal-defined component-free (ADCF) media for therapeutic recombinant protein production without the reliance upon undefined hydrolysates and lipids

HyQ CDM4CHO
HyClone

SH3055702

ORDERING INFORMATION:

Some products available in convenient HyQPAK* six-packs

Description	Quantity	Cat. No.	Each
CDM4CHO			
w/o L-Glutamine	500mL	**SH3055701**	27.30
	1L	**SH3055702**	45.32

	100L	**SH3055604**	2369.00

Thermo Scientific* HyClone* HyQ*–RS Reduced Serum Media

Nutritionally enhanced versions of classical media require a lower concentration of serum supplementation

Reduce FBS supplementation rate by 2 to 4% for most cell culture applications.[1]

- Suitable for a wide variety of cell types normally used with standard classical formulations
- Maintain cell performance while reducing serum supplementation by up to 80%

Description	Quantity	Cat. No.	Each
HyQ DMEM-RS	500mL	**SH3056501**	13.34
	1L	**SH3056502**	20.55
HyQ MEM-RS	500mL	**SH3056401**	15.40

	1L	**SH3062202**	20.55
HyQ Ham's/F12-RS	500mL	**SH3062301**	13.34
	1L	**SH3062302**	16.43

[1] *The concentration of serum used may need to be adjusted for specific cell types of applications to achieve optimal performance.*

LOOKING FOR TISSUE CULTURE FLASKS?
See the Flasks-Specialty Surfaces subsection of this catalog.

Thermo Scientific* HyClone* Protein-Free CHO Media

For broad-spectrum applications with many CHO cell clones in suspension

SFM4CHO* and SFM4CHO–Utility

- Developed through Metabolic Pathway Design* to increase process yields for industrial manufacturing of recombinant proteins for therapeutic use in a variety of cell lines
- SFM4CHO is suitable for a variety of culture vessels, including bioreactors and supports the DHFR selection/amplification system; formulations without L-glutamine support the GS gene expression system
- SFM4CHO–Utility promotes growth of multiple CHO cell lines in a variety of culture environments with minimal adaptation and supports the DHFR expression system; all formulations contain Pluronic* F68

PF CHO Series

- Successfully tested in a variety of research and biopharmaceutical applications
- Recommended for suspension cultures

ORDERING INFORMATION:

Some products available in convenient HyQPAK* six-packs.

PREPARING YOUR OWN MEDIA?

See our Water Purification section for Millipore* Milli-Q* Ultrapure Water Systems.

Thermo Scientific* HyClone* HyQ* CDM4MAb* Media

Chemically defined media for therapeutic MAb manufacturing

Developed through Metabolic Pathway Design* to increase process yields for the manufacture of monoclonal antibodies for therapeutic use in a variety of engineered hybridoma and recombinant myeloma cell lines.

- Animal derived component-free
- Contains Pluronic* F68; without Phenol Red

ORDERING INFORMATION:

All liquids are 0.2µm sterile filtered. Available in HyQPAK* six-packs for convenient storage and use. Volumes above 1L are supplied in BioProcess Container* systems. Liquid formulations contain Pluronic* F68. Without Phenol Red; some formulations contain 6mM L-glutamine.

Description	Quantity	Cat. No.	Each
Liquid Media			
w/L-Glutamine	500mL bottle	**SH3080101**	27.30
	1L bottle	**SH3080102**	45.32
	6 × 1L HYQPAK	**SH30801LS**	244.73
w/o L-Glutamine	500mL bottle	**SH3080201**	27.30
	1L bottle	**SH3080202**	45.32
	6 × 1L HYQPAK	**SH30802LS**	244.73

w/o L-Glutamine	1 × 5L bottle	**SH3080001**	123.60
	1 × 10L bottle	**SH3080002**	247.20
	1 × 50L pail	**SH3080003**	1184.50
	1 × 100L pail	**SH3080004**	2369.00

Thermo Scientific* HyClone* AdvanceSTEM* Culture Media

Optimized for robust growth of embryonic cell cultures

Embryonic stem cells grow quickly and require daily maintenance. When co-cultured in ES cell media with a mouse embryonic fibroblast (MEF) feeder layer, these stem cell cultures are suitable for electroporation, expansion, or further experimentation.

- ES cell-qualified with Thermo Scientific* HyClone* ES Screened FBS—no prescreening required
- Mycoplasma free and sterility tested
- HyQ DMEM4SC is formulated without L-glutamine or sodium pyruvate and is ideal for use with 129 ES cells
- HyQ IMDM4SC contains no L-glutamine and supports excellent growth of B6 ES cells

STORAGE CONDITIONS:

Storage requirements: 2° to 8°C (36° to 46°F)

Description	Quantity	Cat. No.	Each
HyQ IMDM4SC	500mL	**SH3082201**	18.00
HyQ DMEM4SC	500mL	**SH3082401**	16.95

Thermo Scientific* HyClone* Gene Therapy Cell Culture Media

Serum-free, protein-free media support the growth of human embryonic kidney cell line 293 (HEK 293) and Crucell NV's proprietary PER.C6* cell line

- HyQ SFM4HEK293* media supports cell growth and the production of adenoviral vectors and proteins in a variety of culture systems; contains no animal-derived components
- HyQ CDM4Retino* media increases process yields for the industrial manufacture of adenoviral vectors and proteins using PER.C6 and other retinoblast cells; free of animal-derived components, hydrolysates and other undefined components and can be used in a variety of culture systems including perfusion bioreactors

APPLICATIONS:

Designed to support the growth of human embryonic kidney cell line 293 (HEK 293)

ORDERING INFORMATION:

Some products available in convenient HyQPAK* six-packs.

Description	Quantity	Cat. No.	Each
HyQ SFM4HEK293, Liquid Media			
w/L-Glutamine, Pluronic* F-68; w/o phenol red	500mL	**SH3052101**	28.08
	1L	**SH3052102**	45.76
	6 X 1L HyQPAK	**SH30521LS**	247.10

w/Pluronic* F-68; w/o L-Glutamine or phenol red	5L	**SH3052201**	128.75
	10L	**SH3052202**	257.50
HyQ CDM4Retino, Liquid Media			
w/L-Glutamine	500mL	**SH3052001**	27.81
	1L	**SH3052002**	46.35
HyQ PF 293			
w/L-Glutamine	500mL	**SH3035601**	25.75

Thermo Scientific* HyClone* Viral Vaccine Cell Culture Media

Serum-free/protein-free media

- Eliminates concerns regarding serum supply and exogenous contaminants

Media Include:

- HyQ* PF Vero* was designed specifically for Vero cells and produces excellent performance in multiple cell culture environments, including suspension microcarrier bioreactors
- HyQ SFM4MegaVir* contains no animal-derived components and was developed to increase process yields in the manufacture of viral vaccines in a variety of cell lines including Vero, COS-7, MDCK, and MDBK

ORDERING INFORMATION:

Some products available in convenient HyQPAK* six-packs.

Description	Quantity	Cat. No.	Each
PF Vero			
w/o L-Glutamine, w/Phenol Red	1L	**SH3035202**	41.20
SFM4MegaVir			
w/o L-Glutamine, w/Phenol Red	500mL	**SH3055201**	27.04
	6 x 1L HyQPAK	**SH30552LS**	235.87
	1L	**SH3055202**	43.68

Thermo Scientific* HyClone* Insect Cell Culture Media

Increase cell yields with multiple insect lines in a variety of culture environments

- HyQ* SFX-Insect* for multiple cell lines and high density bioreactor cultures; protein-free
- HyQ* TNM-FH, a modification of Grace's medium; requires serum supplementation
- HyQ CCM3* for Sf9 cells
- HyQ IPL-41, a basal medium frequently used for serum-free media development and optimization

Left to right: SH30350, SH30278, SH30610, SH30280

ORDERING INFORMATION:

Some products are supplied in convenient HyQPAK* six-packs. Products are also available as large volume liquids or cost-effective powders.

Description	Quantity	Cat. No.	Each
HyQ SFX-Insect			
Protein-free; w/L-Glutamine	500mL	**SH3027801**	26.00
	1L	**SH3027802**	41.60
	6 x 1L HyQPAK	**SH30278LS**	Pk. of 6/224.64

Unsupplemented	500mL	**SH3061001**	27.30
Baculovirus plaque assay kit			
HyQ BEVS PlaKit	1 Kit	**SH30340**	200.00

Thermo Scientific* HyClone* Hybridoma and Myeloma Cell Culture Media

Serum-free media eliminate contamination concerns while maintaining excellent monoclonal antibody (MAb) production

Available in formulations with low or no protein as well as media free of animal derived components (ADCF) for MAb production in a variety of hybridoma and recombinant myeloma cell lines

- HyQ* SFM4MAb*, an ultralow protein formulation developed for use with suspension cultures in high density bioreactors
- HyQ SFM4MAb–Utility* for high yields in multiple cell lines and culture environments
- HyQ CCM1* supports multiple hybridoma/myeloma cell lines and culture environments
- HyQ SFX-MAb is a serum-free medium for hybridoma and myeloma cell lines
- HyQ PF-MAb is a 100X concentrate designed for use with RPMI-1640 and other basal formulations to reduce or eliminate serum dependency
- HyQ CDM4NSO* ADCF media increases therapeutic monoclonal antibody production in NSO cell lines in a variety of culture environments without the need for supplementation

Description	Quantity	Cat. No.	Each
Lipid supplement	100mL	**SH3055501**	113.30

PREPARING YOUR OWN MEDIA?

See our Water Purification section for Millipore* Milli-Q* Ultrapure Water Systems.

LOOKING FOR CULTURE CHAMBERS?

Fisher Scientific carries a variety of coated culture chambers that are ideal for scale-up and production of biomaterials. For complete descriptions, see Culture Chambers.

Genlantis* NeuroPrep* Media

Keep cells alive up to 14 days under refrigeration

Description	Quantity	Cat. No.	Each
NeuroPrep Media	100mL	**NM100100**	55.41

Genlantis* Smooth Muscle Cell Growth Medium

Supports robust growth of smooth muscle cells

Description	Quantity	Cat. No.	Each
Smooth Muscle Cell Growth Medium	500mL	**PM311500**	110.62
Bovine Smooth Muscle Cell (SMC) Growth Medium	500mL	**PMB311500**	105.59

Genlantis* PrimaPure* Human Endothelial Cell Growth Media

Optimized for endothelial cells

Description	Quantity	Cat. No.	Each
Human Microvascular Endothelial Cells (HMVEC)	500mL	**PM112500**	110.62
Serum-Free; Growth Factor-Free	500mL	**PM114500**	110.62
Human Endothelial Cell Growth Medium	500mL	**PM211500**	105.59
Serum-Free; Defined	500mL	**PM113500**	110.62
Human Coronary Artery Endothelial Cells (HCAEC)	500mL	**PM212500**	105.59

Mediatech* cellgro* Serum-Free and Specialty Media

Viable alternative to FBS for many hybridomas

Serum-free media features low protein concentration without hormones, growth, or attachment factors.

- Formulation is based on a 50/50 mix of DMEM/F-12 and smaller percentages of RPMI 1640 and McCoy's 5A
- Works on a broad range of suspension and attachment cell lines
- Can be cell line dependent
- Offers a viable alternative to FBS for many hybridomas and works on a broad range of suspension and attachment cells; can be cell line dependent

Description	Quantity	Cat. No.	Each
w/ L-Glutamine and 1g/L BSA	6 × 500mL	**MT-40-101-CV**	128.70
w/ L-Glutamine and 1g/L BSA, w/o Phenol Red	6 × 500mL	**MT-40-102-CV**	170.52

Mediatech* cellgro FREE* Serum-Free and Protein-Free Culture Media

Optimized for the cultivation of Chinese Hamster Ovary (CHO) cells in addition to many derivatives of this parent line

CHO K-1 cells require minimal adaptation into cellgro FREE, saving valuable research time.

Description	Quantity	Cat. No.	Each
w/o L-Glutamine	6 × 500mL	**MT-40-200-CV**	186.84

Lonza BioWhittaker* Serum-Free and Specialty Media

Chemically defined media optimized for specific cell types

- PC-1 Serum-Free Media provides a complete media system, including PC-1 Supplement for the cultivation of primary cells
- UltraCULTURE general-purpose serum-free media is designed for the growth of adherent and nonadherent cells

BW Series

Description	Quantity	Cat. No.	Each†
PC-1* Serum-Free Media			
w/o L-Glutamine	2 × 500mL	**BW77232**	126.00
UltraCULTURE*			
w/o L-Glutamine. Protein Concentration 3mg/mL	500mL	**BW12-725F**	39.00

† Store as detailed on label.

Lonza BioWhittaker* Hematopoietic Serum-Free Culture Media

For adoptive immunotherapy and cellular therapy research

- Do not contain any lymphokines required for activation of human lymphocytes; intended for in vitro procedures
- Device Master Records (DMRs) for these products are held in an FDA Master File
- X-VIVO 10* is designed for the ex-vivo cultivation of lymphocytes
- X-VIVO 15* supports the proliferation of lymphocytes, including tumor infiltrating lymphocytes (TIL) and macrophages
- X-VIVO 20* encourages the proliferation of lymphocytes at high cell densities

STORAGE CONDITIONS:
Store at 2° to 8°C (36° to 46°F).

NOTE:
Limited by Federal (USA) law to investigational use

Description	Quantity	Cat. No.	Each†
X-VIVO 10*

Lonza BioWhittaker* Serum-Free and Specialty Media, Contd.

Hybridoma Serum-Free and Protein-Free Culture Media

Prescreened in actual hybridoma systems to ensure minimal variation

- HL-1 supports the serum-free growth of hybridomas and differentiated cells of lymphoid origin
- UltraDOMA contains no human-derived proteins and supports hybridoma cell growth and monoclonal Ab production
- UltraDOMA-PF is a completely defined medium and does not contain peptides or tissue extracts

STORAGE CONDITIONS:
Store at 2° to 8°C (36° to 46°F). Store UltraDOMA in the dark.

Description	Quantity	Cat. No.	Each
HL-1 Complete Serum-Free Medium			
w/o L-Glutamine, Does not require HL-1 supplement	2 × 500mL	**BW77201**	78.49
HL-1 Supplement (100X)			
w/L-Glutamine; 100X Powder	10mL	**BW77227**	63.00
UltraDOMA* Serum-Free Medium			
w/o L-Glutamine. Protein Concentration 30µg/mL	500mL	**BW12-723B**	29.95

w/ L-Glutamine	500mL	**BW12-727F**	27.00
w/ L-Glutamine; Powder	10L[1]	**BW15-727D**	488.38

[1] *Rehydrates to quantity.*

UltraMEM* Reduced-Serum Media

For supporting the growth and maintenance of anchorage-dependent cells

- Use with 0 to 4% serum

Description	Quantity	Cat. No.	Each†
Protein-Free Basal Media			
w/o L-Glutamine	500mL	**BW12-745F**	28.07
Low-Protein Media			
w/ Insulin, Transferrin, Ethanolamine, Selenium and L-Glutamine	500mL	**BW12-743F**	29.61

† *Store as detailed on label.*

293 Cell Serum-Free Media

Completely balanced to support vaccine and viral vector production of high-density human embryonic kidney (HEK) 293 cell culture environments

- Very low levels of recombinant proteins facilitate downstream purification and provide regulatory compliance

Description	Quantity	Cat. No.	Each†
Pro293a-CDM Adherent Culture Media			
w/ 0.1% Pluronic F-68; w/o L-Glutamine or Phenol Red	1L	**BW12-764Q**	61.00
Pro293s-CDM Suspension Culture Media			
w/ 0.1% Pluronic F-68; w/o L-Glutamine or Phenol Red	1L	**BW12-765Q**	62.00

† *Store as detailed on label.*

Lonza BioWhittaker* Cryoprotective Medium

Use 1:1 with Growth Medium

STORAGE CONDITIONS:
Store at 15° to 30°C (59° and 86°F)

Description	Quantity	Cat. No.	Each
BME w/HBSS and 15% DMSO, w/o L-Glutamine, w/Phenol Red	100mL	**BW12-132A**	29.47

Lonza BioWhittaker* CHO (Chinese Hamster Ovary) Serum-Free Culture Media

For optimized expression of protein in CHO cells

- UltraCHO* is a modified DMEM/F-12 base which has been optimized to support the growth of transfected and non-transfected CHO cells
- ProCHO*-4 is designed for the concurrent transition of adherent CHO cells to serum-free and suspension culture; supports faster doubling times
- ProCHO-5 supports increased protein production of CHO cells already growing in suspension
- UltraCHO is a modified DMEM/F-12 base which has been optimized to support the growth of transfected and non-transfected CHO cells
- ProCHO4 is designed for the concurrent transition of adherent CHO cells to serum-free and suspension culture; supports faster doubling times
- ProCHO5 supports increased protein production of CHO cells already growing in suspension

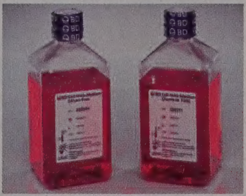
LOOKING FOR CRYOGENIC VIALS?

For a selection of vials designed for cryogenic storage, see the Cryogenics section.

*Trademark. See Trademark Reference.

BD Cell* Monoclonal Antibody (MAb) Medium

Produces yields higher than classical basal media with similar supplementation



CB220509 (left) and CB220511

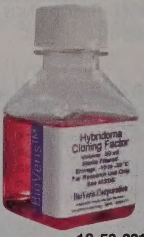
Promotes an acceleration in the monoclonal antibody secretion rates of cells in a batch mode for performance in hollow fiber and stir tank systems.

- Also suitable for use in perfusion systems
- Shown to increase purified monoclonal antibody yields by 5 to 25 times over classical basal media with similar supplementation.
- Reduces media consumption
- Shown to reduce media consumption and labor cost, reduce requirements for media storage and preparation time, decrease labor required to perform continuous feeding and decrease contamination because of decreased handling of the culture
- Concentration step is eliminated in most cases, and final bulk harvest is reduced, producing less material to run through the purification process
- Only minimal adaptation is needed
- Hybridomas grown in MAb Basal Medium can be supplemented in the same way as those grown in traditional basal media
- MAb Serum-Free and Animal-Free are complete media and do not require serum supplementation; Basal Medium does require serum supplementation

Description	Quantity	Cat. No.	Each
Serum-Free Medium	1L	**CB220509**	53.55
Basal Medium	1L	**CB220511**	36.05
Animal Component–Free Medium	1L	**CB220513**	51.40

BioVeris* Specialty Culture Media

Optimized for specific applications



1G-50-0615

- Giant Cell Tumor Conditioned Medium (GCT-CM*)is ideal for a variety of applications including growth of hematopoietic and leukemic cells, cytogenetic analysis of bone marrow cells, HIV isolation and recovery; and production and growth of human hybridomas
- DMSO Freeze Medium minimizes intracellular ice crystal formation for increased cell viability and recovery
- Hybridoma Cloning Factor (HCF) enhances growth at low cell densities during HAT selection and also eliminates the need for feeder cell layers

NOTE:
For research use only

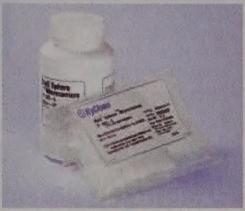
MEDIA-MICROCARRIERS

Thermo Scientific* HyClone* HyQSphere* Microcarriers

Wide variety of coatings enhance the attachment and growth of many anchorage-dependent cell types



SV3005601

Incorporate various surface modifications for use with a wide array of cell lines and applications. Animal Derived Component-Free (ADCF*) coatings facilitate adaptation from other microcarriers that utilize animal-derived components and ease the transition into ADCF culture systems.

- Manufactured using cross-linked polystyrene
- Rigid substrate provides optimal durability (no fragmentation) and does not allow the extracellular material to grow into the bead
- Provide high surface to volume ratios, allowing large-scale culture inside a relatively small footprint
- Tightly controlled specific gravity maintains suspension with gentle stirring

Description	Nominal Specific Gravity	Bead Dia.	Quantity	Cat. No.	Each

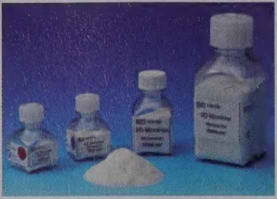
Nunc* 2D MicroHex* Microcarriers

Virtually two dimensional—only 25µm thick

Microscopic, polystyrene, hexagon-shaped microcarriers for adherent cell culture.

- Shape and low density (1.05g/cm³) of the particles allows them to be kept in suspension at low stirring speeds
- Uniform covering of the surface



12-565 Series

- Nunclon* Δ surface treatment enables fast cell attachment, easy trypsinisation, and high yields
- Particles are nonswelling, nonporous, and nonabsorbing
- Radiation sterilized and ready for use—no conditioning required

MEDIA-GROWTH ENVIRONMENTS

BD Matrigel* Basement Membrane Matrix

Solubilized basement membrane preparations polymerize at room temperature

Produces a biologically active matrix material resembling the mammalian cellular basement matrix. Provides a physiologically relevant environment for studies of cell morphology, biochemical function, migration, invasion, and gene expression.

Key Features

- Tested for the ability to promote neurite outgrowth of chick dorsal root ganglia cells
- Tested and found negative for bacteria, fungi, and mycoplasma
- Source: Engelbreth-Holm-Swarm (EHS) mouse tumor
- Base formulation: Dulbecco's Modified Eagle's Medium with 50µg/mL gentamycin, with or without Phenol Red
- Stable for at least three months at -20°C or twelve days at 37°C

Three Formulations

- Growth Factor Reduced (GFR) formulation is well suited for applications that require a more highly defined basement membrane preparation
- Phenol Red-free is available for assays that require color detection, including fluorescence assays
- High concentration (HC) formulation is ideal for applications in which a high protein concentration augments the growth of tumors; allows a Matrigel basement membrane matrix plug to maintain its integrity after subcutaneous injection into mice

Note: *Avoid multiple freeze-thaws; do not store in a frost-free freezer*

BD BioCoat* Cell Growth Environment

Cells cultured in these systems can be subcultured according to routine procedures, seeded into fermentation systems, or used in a variety of bioassays

Interactions between components of the extracellular matrix and growth factors play a crucial role in determining the adaptation and responses of mammalian cells to their micro environments both in vivo and in vitro. These cell culture systems provides cells with conditions derived from their natural environment in vivo and integrate specially formulated low-serum or serum-free medium, culture supplements and growth factors, as well as BD BioCoat Cellware products with cell-specific extracellular matrix proteins.

- Other applications include construction of model systems to study angiogenesis, atherosclerosis, wound healing and in vitro toxicology
- Each environment lot is tested in a bioassay and all components are tested for bacteria and fungi (cell culturing media and supplements are also tested for Mycoplasma; K-STIM, E-STIM, Entero-STIM and Hepato-STIM media are also tested for endotoxins using LAL assay); all include protocol
- Stable for at least three months from date of shipment when stored at 2–8°C (36–46°F) (except BD Matrigel* matrix products that should be stored at -20°C [-4–F]); do not freeze

NOTE: These products are for research use only and are not intended for diagnostic purposes

Endothelial Cell Growth Environment

Increases endothelial cell yield from a variety of sources

Ideal for human umbilical vein (HUVEC), pulmonary artery (HPAEC), and aorta (HAEC), as well as fetal bovine heart (FBHEC) cells.

ORDERING INFORMATION:

Media and cellware are also available separately.

INCLUDES:

500mL BD Endothelial Cell Culture Medium (MCDB 131 medium containing hydrocortisone, heparin and 2% fetal bovine serum, 5µg lyophilized Mouse Epidermal Growth Factor (EGF), receptor grade, 100mg lyophilized Bovine Endothelial Cell Growth Supplement (ECGS), 50mg lyophilized Soybean Trypsin Inhibitor, Five BD BioCoat* Type I Collagen 75cm² Flasks

Description	Mfr. No.	Cat. No.	Each
Complete Environment	355053	**08-774-149**	253.14
Endothelial Cell Culture Medium	355054	**08-774-149AA**	149.46

Contd. on next page.

BD BioCoat* Cell Growth Environments, Contd.

Hepatocyte Differentiation Environment

Serum-free environment

Optimized to support cultures of differentiated hepatocytes in vitro for extended culture periods (at least three weeks).

ORDERING INFORMATION:

Media and cellware (08-774-200) available separately.

INCLUDES:

500mL Hepatocyte Differentiation Medium (Williams' E containing dexamethasone and BD ITS+* Universal Culture Supplement), 5µg lyophilized Mouse EGF (receptor grade), five BD Matrigel* Matrix 6-well plates.

Description	Mfr. No.	Cat. No.	Each
Complete Environment	355055	**08-774-176**	393.09
Hepato-STIM* Medium	355056	**CB-30055M**	115.13

Intestinal Epithelium

Used to create intestinal models that exhibit barrier function for use in transport and absorption studies of drugs, metabolites and infectious diseases of the intestine

INCLUDES:

400mL Entero-STIM* Enterocyte Differentiation Medium (DMEM containing sodium butyrate), Lyophilized BD* MITO+ Serum Extender Supplement, 100mL Seeding Basal Medium (DMEM), 24 BD BioCoat* Fibrillar Collagen Cell Culture Inserts (inserts contain 1µm pore size membranes packaged in one 24-well BD Falcon* Companion TC Plate with one additional plate

Description	Mfr. No.	Cat. No.	Each
Complete Environment	355057	**08-774-175**	285.16

Smooth Muscle Cell Differentiation Environment

Induce differentiation of human and rat aortic smooth muscle cells

- Smooth muscle cells cultured in this environment are characterized by a low proliferative index and multilayered nodular morphology
- Additional characteristics include expression of the cytoskeletal proteins α-smooth muscle actin, heavy-chain myosin and 150kD h-caldesmon
- Consists of MCDB 131 Medium with BD ITS+* Universal Culture Supplement with insulin, transferrin, selenous acid, linoleic acid and bovine serum albumin
- Stable for at least three months from date of shipment when stored at 4°C (39.3°F) under subdued lighting conditions

SERA/SERUM REPLACEMENTS

Thermo Scientific* HyClone* Fetal Bovine Serum, U.S. Origin

Vertical integration of sera production from collection through processing

Collected and processed with strict adherence to Current Good Manufacturing Practices (cGMP) and using ISO 9001:2000 certified processes. Tightly controlled processing from blood collection to filtration to packaging, all to assure quality, uniformity, origin, complete traceability and purity. Meet Thermo Scientific HyClone's high standards required for quality cell culture. Production of USA-sourced sera, from collection through processing, is vertically integrated.

Defined Fetal Bovine Serum

- The highest quality FBS available
- Widely used by cell culturists who have a concern for viral contaminants and require an extensive biochemical profile
- Filtered through serial 40nm (0.04µm) pore-size rated filters, the most retentive filters used in commercial FBS production
- Meets specifications of ≤10EU/mL of endotoxin and ≤10mg/dL of hemoglobin
- Over 50 components are analyzed and the results are included on the biochemical assay

Characterized Fetal Bovine Serum

- Comparable to the highest quality FBS from other suppliers
- Meets specifications of ≤25EU/mL of endotoxin and ≤25mg/dL of hemoglobin
- Filtered through three sequential 100nm (0.1µm) pore-size rated filter

Standard Fetal Bovine Serum

- Used by price-conscious cell culturists
- Filtered through three sequential 100nm (0.1µm) pore-size rated filters
- Endotoxin and hemoglobin are tested and reported

ORDERING INFORMATION:

Orders requesting a specific lot of serum must reference the lot number; please place lot specific orders with a Fisher Scientific Customer Service Representative. Volume discounts are available for most Thermo Scientific HyClone serum products. Orders based on price quotations from Thermo Scientific HyClone must reference the quotation number. Please place price quotation orders with a Fisher Scientific Customer Service Representative.

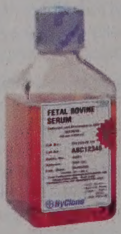
Thermo Scientific* HyClone* Embryonic Stem (ES) Cell Screened Fetal Bovine Serum

Eliminates the need for prescreening serum prior to using it with embryonic stem cells



SH30070 Series

Collected and processed with strict adherence to Current Good Manufacturing Practices (cGMP) and using ISO 9001:2000 certified processes. Tightly controlled processing from blood collection to filtration to packaging, all to assure quality, uniformity, origin, complete traceability and purity. Meets the highest standards required for quality cell culture. Production, from collection through processing, is vertically integrated.

- Screening process, which is performed by experienced ES cell culturists, includes plating efficiency, colony morphology and toxicity tests
- Filtered through sequential 40nm (0.04µm) pore-size rated filters

ORDERING INFORMATION:

Orders requesting a specific lot of serum must reference the lot number; please place lot specific orders with a Fisher Scientific Customer Service Representative. Volume discounts are available for most serum products. Orders based on price quotations from Thermo Scientific HyClone must reference the quotation number; please place price quotation orders with a Fisher Scientific Customer Service Representative.

Description	Quantity	Cat. No.	Each
ES Screened	100mL	SH3007002E	94.00
	500mL	SH3007003E	360.00

Thermo Scientific* HyClone* Fetal Bovine Serum, Non-U.S. Origin

Collected and processed with strict adherence to Current Good Manufacturing Practices (cGMP) and using ISO 9001:2000-certified processes

Meet Thermo Scientific HyClone's high standards required for quality cell culture.

USDA Tested Fetal Bovine Serum

- Collected in USDA approved abattoirs in Central America. Filtered through three sequential 100nm (0.1µm) pore-size rated filters

New Zealand Fetal Bovine Serum

- Carefully collected, processed and filtered in Thermo Scientific Hyclone's New Zealand facility, following exacting standards to ensure highest quality and absolute traceability
- Meets specifications of ≤20 EU/mL of endotoxin and ≤25mg/dL of hemoglobin; filtered through three sequential 100nm (0.1µm) pore-size rated filters

Australian, Characterized Fetal Bovine Serum

- Sourced from only USDA approved abattoirs in Australia; meets specifications of ≤25EU/mL of endotoxin and ≤25mg/dL of hemoglobin
- Filtered through three sequential 100nm (0.1µm) pore-size rated filters

Australian, Standard Fetal Bovine Serum

- Sourced only from USDA approved abattoirs in Australia
- Filtered through triple 100nm pore-size rated filters; supplied with a biochemical assay

Thermo Scientific* HyClone* Fetal Bovine Serum Replacements

Can take the place of FBS in many cell culture applications

- Designed to deliver both cost-effectiveness and high performance
- All FBS replacements are triple 0.1µm filtered

FetalClone*

- Optimized for the growth of hybridomas, with IgG levels comparable to those found in FBS

FetalClone II*

- Optimized for the growth of CHO cells and derivatives
- Offers same basic formulation as FetalClone I, plus additional growth factors and supplements
- No adaptation is required and suggested concentrations are the same as those used with FBS

FetalClone III*

- The most widely applicable of the group and is designed to include fibroblasts in its applications

Alpha Calf* Fraction

- Low–cost supplement recommended for hybridoma production as well as general cell growth
- Produced from bovine calf serum using a process which reduces immunoglobulins and protein to levels very similar to those in FBS (typically contains less than 200µg/mL IgG)
- Non-iron Alpha Calf Fraction averages 40µg/dl iron

NOTE:

Catalog numbers ending in "HI" have been heat inactivated at 56°C for 30 minutes; those ending in "IR" have been gamma irradiated at 25-40kGy.

Thermo Scientific* HyClone* Specialty Fetal Bovine Serum

Collected and processed with strict adherence to Current Good Manufacturing Practices (cGMP) and using ISO 9001:2000-certified processes

Low IgG Fetal Bovine Serum

- Typically averages IgG levels of 20µg/mL
- Non-chemically treated, occurs naturally
- Naturally low IgG levels—may be directly substituted for other FBS without seeking regulatory approval that may be required for serum chemically depleted of IgG
- Filtered through three sequential 100nm (0.1µm) pore-size rated filters

Charcoal/Dextran Treated Fetal Bovine Serum

- Processed using a proprietary treatment shown to reduce the levels of many hormones and growth factors
- Assayed for a variety of components before and after treatment, thus assuring the efficacy of the treatment
- Established to be effective in reducing steroid levels for utilization in receptor studies or estrogen-related investigations
- May also be used to minimize lot-to-lot serum variability
- Filtered through three sequential 100nm (0.1µm) pore-size rated filters

Dialyzed Fetal Bovine Serum

- Used in applications requiring serum depleted of small molecules (less than 10,000 mw)
- Filtered through three sequential 100nm (0.1µm) pore-size rated filters
- Dialysis reduces concentrations of low molecular weight components such as nucleotides and amino acids that are necessary for alternative biochemical survival pathways

ORDERING INFORMATION:

Orders requesting a specific lot of serum must reference the lot number; please place lot specific orders with a Fisher Scientific Customer Service Representative. Volume discounts are available for most serum products. Orders based on price quotations from Thermo Scientific HyClone must reference the quotation number; please place price quotation orders with a Fisher Scientific Customer Service Representative.

NOTE:

All prescreened products are serially filtered using 0.04µm filters.

Thermo Scientific* HyClone* Bovine Calf Serum

Sourced from U.S. veal calves, which results in consistency from lot to lot and uninterrupted supply

- Provide excellent and cost-effective alternatives to FBS
- All products are filtered through three sequential 100nm (0.1µm) pore size filters
- Defined bovine calf serum is available with and without iron supplementation
- Cosmic Calf Serum contains iron supplemented calf serum plus additional growth factors, vitamins, and amino acids
- HI products are Heat inactivated at 56°C for 30 minutes; IR products are Gamma Irradiated at 25-40 kGy

Thermo Scientific* HyClone* Bovine Growth Serum* (BGS*)

Cost-effective replacement for Fetal Bovine Serum in most applications

BOVINE GROWTH SERUM
HyClone

SH3054103

- Consists of Thermo Scientific HyClone Iron-Supplemented Defined Bovine Calf Serum, supplemented with chemically defined components, including vitamins, amino acids, trace metals, and other small molecules to stimulate cell growth and proliferation
- Filtered through three sequential 100nm pore-size rated filters
- COS-1/COS-7, TT, DMS53, HUVCC, HeLa, BHK, HEK293, Jurkat, Hep G2, MRC5, 721, HCT116/RKO, MCF-7, McCoy, NT2, PC-3, WiDr, BXPC-3, U-87, CaSki, and T24 are among the cell lines that have been successfully cultured in Thermo Scientific HyClone BGS
- Post-filtration treatments include heat inactivation at 56°C for 30 minutes and gamma irradiation at 25-40kGy

Mediatech* Fetal Bovine Serum

Used as a supplement to cell culture media to help sustain growth and metabolism

- Sera is aseptically collected and processed in a facility that is compliant with FDA guidelines for Class I Medical Devices
- Each batch of raw serum is screened for endotoxin, residual hemoglobin concentration, pH and microbiological quality before being used in production
- Each lot is 0.1µm triple-filtered, low in endotoxin, and is final tested for the absence of mycoplasma and viruses
- Premium FBS is sourced from U.S. herds
- Heat-inactivated Fetal Bovine Serum (FBS) is heated at 56°C for 30 minutes

COMPLIANCE:

USDA Certified FBS is sourced from USDA-certified facilities (abbatoirs).

Description	Quantity	Cat. No.	Each
Regular	500mL	**MTT35010CV**	365.65
Regular, Heat-Inactivated	500mL	**MTT35011CV**	375.95
Premium	500mL	**MTT35015CV**	366.10
Premium, Heat-Inactivated	500mL	**MTT35016CV**	376.40

Mediatech* Human AB Serum

Used as a supplement to cell culture media to help sustain growth and metabolism

- Raw serum is screened for endotoxin, residual hemoglobin concentration, pH and microbiological quality before being used in Human AB Serum production
- Each lot is 0.1µm triple-filtered, low in endotoxin, and is final tested for the absence of mycoplasma and viruses

COMPLIANCE:

Sera is aseptically collected and processed in a facility that is compliant with FDA guidelines for Class I Medical Devices.

Description	Quantity	Cat. No.	Each
Human AB Serum	100mL	**MT-35-060-CI**	165.73

Lonza BioWhittaker* Cell Culture Serum

Low in endotoxin and hemoglobin; screened for mycoplasma and viruses

- Triple 0.1µm filtered Premium Fetal Bovine Serum (FBS) has full traceability to U.S. origin
- Used to supplement media preparations for cell growth

	500mL	**BW14-492F**	42.56

Serum Supreme

Bovine-serum derived alternative to Fetal Bovine Serum

- U.S. Origin
- Screened for viruses by Modified 9/CFR and the absence of mycoplasma

Quantity	Cat. No.	Each
100mL	**BW14-492E**	20.00
500mL	**BW14-492F**	42.56

Biomeda* Fetal Bovine Serum

Triple 0.1µm filtered and performance tested in accordance with 9CFR

Fully traceable to U.S. and USDA sources and are 0.2µm sterile filtered, unless otherwise specified. Pure serum, ideal for use in cell culture.

- Hemoglobin levels are <20mg/dl; endotoxin levels are <0.5ng/mL
- Sterile FBS, Charcoal-stripped has reduced levels of hormones for use in receptor or estrogen studies

STORAGE CONDITIONS:

Store at -20°C.

Description	Quantity	Cat. No.	Each
Premium Grade	100mL	**BMES1054**	131.39

Mediatech* cellgro* Balanced Salt Solutions

Salt solutions are shipped at ambient temperature unless otherwise indicated.

STORAGE CONDITIONS:
Shipped frozen; store at -5° to -20°C (+23° to -4°F).

NOTE:
pH of 10X solutions must be adjusted following dilution to 1X concentration.

Description	Quantity	Cat. No.	Price
Hank's Balanced Salt Solution 10X			
Without Bicarbonate, Calcium, and Magnesium	6 × 500mL	**MT-20-021-CV**	152.80
Hank's Balanced Salt Solution 1X			
Complete Solution	6 × 500mL	**MT-21-020-CV**	59.84

MEDIA ADDITIVES-GROWTH FACTORS

BD* Biosciences Growth Factors and Lymphokines

A broad range of highly purified natural and recombinant lymphokine and growth factor biochemicals designed specifically for use in basic cell biology research

- Products are tested for biological activity in appropriate assays, such as the ability of growth factors to stimulate proliferation or DNA synthesis
- Lymphokines and growth factors are also sterile filtered using a 0.2µm membrane (except where another purification method is specified) and tested for the presence of bacteria, fungi and mycoplasma

Highly purified natural and recombinant lymphokine and growth factor biochemicals

- Tested for biological activity in appropriate assays, such as the ability of growth factor to stimulate proliferation or DNA synthesis
- Sterile filtered using a 0.2µm membrane
- Tested for the presence of bacteria, fungi and mycoplasma

INCLUDES:

Specification sheets with detailed information on quality control testing, product source, storage, stability and recommendations on proper experimental concentrations

STORAGE CONDITIONS:

Refrigerate as detailed on label.

Hepatocyte Growth Factor (HGF)

Fully functional protein with both mitogenic and scatter activities

- Recombinant HGF is isolated from Sf9 insect cells

ORDERING INFORMATION:

Supplied frozen in Tris/NaCl buffer

Description	Quantity	Mfr. No.	Cat. No.	Each
HGF/SF, human recombinant	5µg	354103	**CB-40103**	435.10

Granulocyte-Macrophage Colony Stimulating Factors (GM-CSF)

Produced in E. coli; supplied lyophilized

Description	Quantity	Mfr. No.	Cat. No.	Each
GM-CSF, human recombinant	1µg	354048	**CB-40048**	228.60

Nerve Growth Factors (NGF)

Isolated from mouse submaxillary glands

- 2.5S form consists of two β subunits
- 7S form consists of two α, one β and two γ subunits

ORDERING INFORMATION:

Both supplied in lyophilized form

Description	Quantity	Mfr. No.	Cat. No.	Each
2.5S NGF, mouse natural	10µg	354005	**CB-40005**	120.70
	100µg	356004	**CB-40005A**	171.70
	2 × 500µg	356005	**CB-40005B**	1219.30
7S NGF, mouse natural	100µg	354009	**CB-40009**	176.40

BD* Biosciences Growth Factors and Lymphokines, Contd.

Stem Cell Factor (SCF)

Plays a key role in the regulation of hematopoiesis, acting as a positive and negative regulator

- Also known as *c-kit* and steel factor
- Potentiates the stimulatory effects of other hemoproteins such as interleukins

Description	Quantity	Mfr. No.	Cat. No.	Each
SCF, human recombinant	10µg	354105	**CB-40105**	406.10

Vascular Endothelial Growth Factor (VEGF)

Stimulates proliferation of cultured endothelial cells, induces migration of endothelial cells and monocytes

- In vivo, VEGF increases permeability of vascular endothelium
- Supplied lyophilized

Description	Quantity	Mfr. No.	Cat. No.	Each
VEGF, human recombinant	10µg	354107	**CB-40104**	433.90

Transforming Growth Factors (TGF)

Can stimulate or inhibit proliferation, depending on the context of its action

- Isolated from human platelets and supplied in 36% acetonitrile/0.1% TFA

Quantity	Mfr. No.	Cat. No.	Each
1µg	354039	**CB-40039**	300.60
5 × 2µg	356040	**CB-40039B**	1070.10

Tumor Necrosis Factor (TNF)

Inhibits cell growth in a wide range of tumor cells

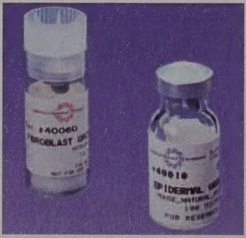
- Lyophilized

Description	Quantity	Mfr. No.	Cat. No.	Each
TNF-α, human recombinant	10µg	354066	**CB-40066**	278.50

Epidermal Growth Factors (EGF)

Enhance the proliferation of a wide variety of cell types

- Mouse EGF isolated from male mouse submaxillary glands and supplied in lyophilized form
- Receptor grade EGF has been further purified by DEAE chromatography to >98% purity
- Human EGF obtained as a recombinant from *E. coli* and supplied in lyophilized form



CB-40060, CB-40010

Description	Quantity	Mfr. No.	Cat. No.	Each
EGF, mouse natural				
Culture Grade	100µg	354001	**CB-40001**	116.10
	10 × 100µg	356001	**CB-40001B**	898.56
Receptor Grade	100µg	354010	**CB-40010**	163.70
EGF, human recombinant				
	100µg	354052	**CB-40052**	131.10
	10 × 100µg	356052	**CB-40052B**	904.52

LOOKING FOR MULTIWELL PLATES?
See Speciality Plates in the Microplates section.

Growth Factors (FGF)

Isolated from pituitary glands

- FGF is supplied lyophilized, bFGF in 3.6mM Tris, PBS pH 7 buffer
- bFGF (human) is lyophilized

Description	Quantity	Mfr. No.	Cat. No.	Each
bFGF, bovine natural	10µg	356037	**CB-40038A**	402.60
bFGF, human recombinant	10µg	354060	**CB-40060**	164.80
	5 × 10µg	356060	**CB-40060A**	466.02
	10 × 10µg	356061	**CB-40060B**	841.24

Interleukins (IL)

Elicit a range of responses from many cell types

- Choose from natural and recombinant
- Supplied frozen in buffer or lyophilized

Description	Quantity	Mfr. No.	Cat. No.	Each
IL-1β, human recombinant	2µg	354042	**CB-40042**	314.50
IL-2, human recombinant	10,000 units[1]	354043	**CB-40043**	146.30
	50,000 units	356043	**CB-40043B**	471.10
IL-2, mouse recombinant	10,000 units[1]	354058	**CB-40070A**	136.90
	25,000 units	354068	**CB-40070**	320.20
IL-2, rat natural	4000 units[1]	354078	**CB-40114**	263.40
IL-3, mouse recombinant	10µg	356078	**CB-40058**	342.30

Mediatech* cellgro* Cell Culture Supplements

Mediatech incorporates many principles developed by the pharmaceutical industry including the use of WFI quality water, raw material testing, in-process monitoring, and finished product testing.

- HAT = Hypoxanthine/Aminopterin/Thymidine
- HT = Hypoxanthine/Thymidine
- Trace Elements A includes Cupric Sulfate, Ferric Citrate, Sodium Selenite, and Zinc Sulfate
- Trace Elements B includes Ammonium Molybdate, Ammonium Vanadate, Manganese Sulfate, Nickel Sulfate, Sodium Silicate, Stannous Chloride and Hydrochloric Acid
- Trace Elements C includes Aluminum Chloride, Barium Acetate, Cadmium Chloride, Chromic Chloride, Cobalt Dichloride, Germanium Dioxide, Potassium Bromide, Potassium Iodide, Rubidium Chloride, Silver Nitrate, Sodium Fluoride, and Zirconyl Chloride

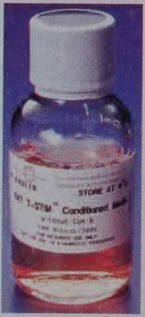
BD* Biosciences Rat T-STIM Culture Supplement

Promotes polyclonal activation and IL-2 proliferation of most antigenically sensitized rat or mouse lymphoid T-cells

- Conditioned medium (RPMI 1640) from ConA-stimulated rat splenocyte cultures containing 10% fetal bovine serum and 10mM HEPES
- Medium with ConA supports high-titer HIV production by leukocytes
- Medium without ConA (from washed rat splenocyte cultures) designed for applications that support proliferation of lectin-activated T-cells and single-cell cloning of antigen-specific T-cells from polyclonally activated primary cultures
- Both undergo an appropriate bioassay, are filtered through a 0.2µm membrane and are tested for the absence of bacteria, fungi and *Mycoplasma*—guaranteeing a high-quality product



CB-40115

ORDERING INFORMATION:

Supplied in 100mL bottles; refrigerate as detailed on label.

Description	Max. ConA Content	Mfr. No.	Cat. No.	Each
With ConA	10µg/mL	354115	**CB-40115**	382.36
Without ConA	≤0.5µg/mL	354116	**CB-40116**	625.52

BD* Biosciences Collagen

Used as either a thin layer on tissue-culture surfaces to enhance cell attachment and proliferation, or as a gel to promote expression of cell-specific morphology and function

Description	Quantity	Mfr. No.	Cat. No.	Each
Collagen I, Human Recombinant	0.25mg	354254	**CB-40254**	199.75
Collagen I, Human	0.25mg	354231	**CB-40231**	225.16
Collagen IV, Mouse	1mg	354233	**CB-40233**	104.87
Collagen I, Rat Tail	100mg	356233	**CB-40233B**	151.00
Collagen I, Rat Tail	10 × 100mg	354236	**CB-40236**	1177.64
Collagen II, Bovine	0.25mg	354257	**CB-40257**	217.11
Collagen III, Human	0.25mg	356236	**CB-40236B**	289.02
Collagen IV, Human	0.25mg	354243	**CB-40243**	372.24

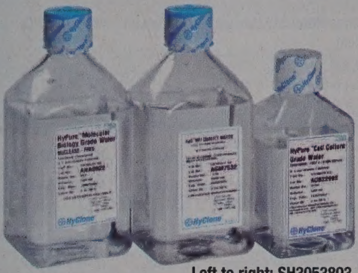
MEDIA ADDITIVES-SPECIALTY WATER

Thermo Scientific* HyClone* HyPure* Specialty Water

Processed and tested for use in critical applications



Left to right: SH3053803, SH3022110, SH3052902

Cell Culture Grade Water

- Endotoxin-free; contains no detectable gram-negative bacteria
- Recommended for media and buffer preparation, LAL reagent testing
- Processed using continuous deionization, reverse osmosis, distillation, and 0.1µm filtration
- Meets <0.005 EU/mL endotoxin by turbidimetric assay

Molecular Biology Grade Water

- Nuclease-free water is certified to have no detectable contaminating activity in DNase, RNase, and Protease assays
- Suitable for DNA/RNA purification, DNA sequencing and libraries, Gene mapping, Recombinant DNA and cloning, Northern Blot, Southern Blot
- Maximum allowable limit of endotoxin is 0.05EU/mL
- Purification process includes continuous deionization, reverse osmosis, ultraviolet light treatment, distillation, and 0.1µm filtration

ORDERING INFORMATION:

Some products available in convenient HyQPAK* six-packs

COMPLIANCE:

Manufactured according to cGMP guidelines and in ISO 9001:2000-certified processes.

CELL DISSOCIATION REAGENTS

Fisher BioReagents* Lymphocyte Separation Medium (LSM)

One-step centrifugation permits separation of mononuclear lymphocytes from erythrocytes, polynuclear lymphocytes and most platelets

- Formulated for isolation of mononuclear cells from defribrinated or heparinized whole human blood
- Sterile-filtered solution of a sucrose polymer and diatrizoate salts at a specific gravity of 1.077-1.080g/mL at 20°C
- ChemAlert Storage Code: Gray

Quantity	Packaging	Cat. No.	Price

HyQ® TRYPSIN
0.25% (1X)
HyQTase™

From left to right: SH3023601, SH3004201, SV3003001

Used to disaggregate adherent cells from the surface or substrate to which they are attached

Trypsin

- Derived from porcine pancreas
- Gamma irradiated prior to hydration and filling
- Formulated without calcium and magnesium

HyQTase*

- Ultra-filtered, non-mammalian alternative to trypsin that enables gentle, rapid cell detachment of a broad array of adherent cells and tissues for primary cell culture
- Naturally derived complex of proteolytic and collagenolytic enzymes
- Non-recombinant; gamma irradiated
- Ideal for use in both serum-free and serum-containing cell culture systems with a broad array of cell lines

STORAGE CONDITIONS:
Trypsin: store frozen (-5 to -20°C). HyQTase: store frozen; stable for up to 60 days at 4°C

Mediatech* cellgro* Cellstripper*

Non-enzymatic cell dissociation solution gently dislodges adherent cells in culture

Designed to be an alternative to trypsin when used in conjunction with serum-free or serum-containing media.

- Formulated with a proprietary mixture of chelators
- Reduces the risk of cell damage associated with protein digestive enzymes

CELL LIFTERS AND SCRAPERS

*Fisherbrand** Cell Lifter

08-773-1

Disposable lifters quickly remove cell layers undamaged

- Maintain even contact with growth area in culture dishes
- Made entirely of polyethylene
- Presterilized and individually wrapped

Handle Length	Blade Length	Cat. No.	Case of 100
18cm	2cm	**08-773-1**	146.03

*Fisherbrand** Cell Scrapers

08-773-3

Gently harvest cells from tissue culture flasks

- Polystyrene handles are compatible with a variety of culture flasks
- Polyethylene blades swivel for even contact with growth surface
- Presterilized and individually wrapped

Handle Length	Blade Length	Cat. No.	Case of 100
25cm	1.8cm	**08-773-2**	211.69
39cm	3.0cm	**08-773-3**	230.26

Corning* Cell Lifter

07-200-364

Wide beveled edge especially designed for cell culture dishes

- Sterile; certified nonpyrogenic
- Individually wrapped

Handle Length	Blade Length	Mfr. No.	Cat. No.	Case of 100
18cm	1.9cm	3008	**07-200-364**	131.71

Corning* Cell Scrapers

07-200-366

Angled swivel blade minimizes cell damage and ensures even contact with growth area

- Long handle permits easy access to cell culture flasks (Cat. No. 07-200-365) and roller bottles (07-200-366)
- Sterile; certified nonpyrogenic
- Individually wrapped

Handle Length	Blade Length	Mfr. No.	Cat. No.	Case of 100

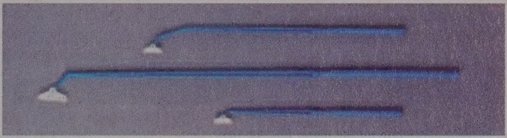
BD Falcon* Cell Scrapers



From top: 08-771-1B, 08-771-1C, 08-771-1A

Improved handle and blade design provides maximum accessibility to growth surfaces

- Suitable for use with a variety of culture vessels
- Highly compliant thermoplastic elastomer (TPE) blade pivots to provide multiple angles to remove cells from entire growth surface
- Cross-ribbed polystyrene handle provides greater rigidity for better control when scraping cells
- Flexible joint between blade and handle improves ease of access into neck of flask or roller bottle
- 02-683-197 features a larger blade for increased efficiency in culture dishes and 75cm² flasks

Available in four sizes

- 08-771-1A for use with 25cm² flasks
- 08-771-1B for 75cm² flasks
- 08-771-1C for use with large flasks
- 02-683-197 features a larger blade for increased efficiency in culture dishes and 75cm² flasks

ORDERING INFORMATION:

Presterilized and individually wrapped in peel-open, medical-style packaging

CELL AND TISSUE GRINDERS

*Fisherbrand** Disposable Pestle System

Low-cost alternative to mechanical or metal and glass tissue grinders

Lightweight, cordless mixer can be used with disposable pestles and microtubes.

03-392-106

- High-speed vortexing action completely homogenizes cells and tissue within seconds; resuspends protein and DNA pellets
- Battery-powered unit greatly reduces hand fatigue
- Grooved handle makes it easy to turn, even when wearing gloves
- Rugged polybutylene terephthalate (PBTP) plastic pestle yields superior homogenization
- Disposable pestles and tubes can be used by themselves or in conjunction with the grinder
- Pestles and tubes are individually wrapped to prevent cross-contamination of samples
- DNase-, RNase-, and pyrogen-free

INCLUDES:

Pestle Grinder System (03-392-106) comes with pestle/mixer adapter and two "AA" batteries. System components also available separately.

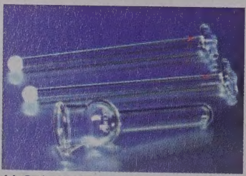
Pyrex* Dounce Tissue Grinders

Two pestles dissociate cells into fine particles with minimal damage to cell nuclei

- Ideal for enzyme studies where heat must be avoided
- Use large clearance pestle for initial reduction of soft tissue
- Use small clearance pestle to complete homogenization



11-850-51 (top) 11-850-50 (bottom)

O.D.× H	Working Capacity	Mfr. No.	Cat. No.	Each
15 × 117mm	7mL	7722-7	**11-850-51**	88.02
20 × 145mm	15mL	7722-15	**11-850-50**	99.19

Pyrex* Glass Pestle Tissue Grinders

Designed to handle both initial grinding and final homogenization

- Lower conical section is intended primarily for initial grinding
- Raise or lower the pestle to adjust the clearance between mortar and pestle
- Use upper cylindrical section for final homogenization

11-850-52

O.D. × H (Tube)	O.D. × H (Pestle)	Working Capacity	Mfr. No.	Cat. No.	Each
19 × 83mm	7 × 155mm	1mL	7724-1	**08-414-21A**	96.22
13 × 125mm	6 × 208mm	3mL	7724-3	**11-850-53**	96.22

Pyrex* Potter-Elvehjem Tissue Grinders

Ideal for homogenization of sample and buffer by hand

- Mortar is unground glass
- Pestle contact surface is PTFE, threaded onto a stainless-steel shaft
- Autoclavable

09-552 Series

Working Capacity	Tube O.D. × L	Mfr. No.	Cat. No.	Each
0.5mL	9 × 50mm	7725T-5X	**09-552-25**	110.99

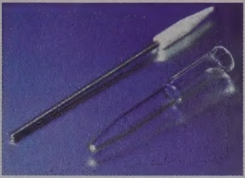
Pyrex* Pestle Tissue Grinders with PTFE

Recommended for soft tissues found in the liver and brain



11-850-56

- Handle both initial grinding and final homogenization
- Mortar is not ground; pestle contact surface is PTFE, threaded onto a stainless-steel shaft

O.D. × H	Working Capacity	Mfr. No.	Cat. No.	Each
13 × 110mm	1mL	7724T-1	**11-850-56**	129.88
13 × 130mm	3mL	7724T-3	**11-850-58**	131.07
19 × 150mm	5mL	7724T-5	**11-850-59**	133.81

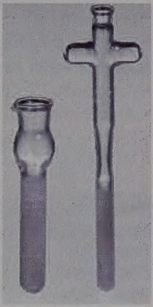
32 × 225mm	30mL	7724T-50	**11-850-60**	240.88

Pyrex* Tenbroeck Tissue Grinders

Designed for hand operation



08-414-10A

- Can be motor driven at low speed (provided that the attachment contains some form of friction release)
- Mortar tubes and pestles ground interchangeably
- Medium grind
- Clearance between two parts is approximately 0.15mm
- Made in accordance with Fed. Spec. NNN-T-360B
- Four sizes available with pour-out; 40mL size is without pour-out

Working Capacity	Tube O.D. × L	Pestle O.D. × L	Mfr. No.	Cat. No.	Each	Case of
2mL	16 × 100mm	10.5 × 165mm	7727 2	**08-414-10A**	165.30	4/455.89

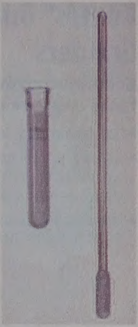
40mL	26 × 210mm	20 × 335mm	7726 L	**08-414-5B**[1]	177.72	----

[1] *Without pour-out.*

Pyrex* Glass Pestle Tissue Grinders

Consist of glass tube and pestle with clearance of 0.15mm



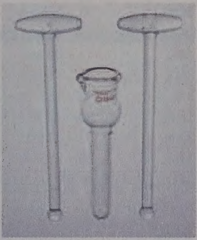
08-414B

- Parts ground to medium grind for abrasive action
- Designed to be motor driven at low speed (provided that the attachment contains some form of friction release)
- Rubber tubing can be placed on pestle for connection to chuck of drive motor

Working Capacity	Tube Reservoir O.D. × L	Mfr. No.	Cat. No.	Each	Case of 4
3mL	16 × 100mm	7725 13	**08-414A**	120.38	331.53
9mL	18 × 150mm	7725 16	**08-414B**	122.72	347.27
16mL	21 × 150mm	7725 19	**08-414C**	385.75	----
50mL	27 × 200mm	7725 25	**08-414D**	127.29	----

Kontes* Dounce Tissue Grinders

Designed for cellular work in which the nucleus remains intact after homogenization



K885300-0015

- All-glass construction

ORDERING INFORMATION:

Supplied with two pestles: large (for initial sample reduction) and small (to form the final homogenate)

Working Capacity	Large Pestle Clearance	Small Pestle Clearance	Overall Length	Cat. No.	Each
2mL	0.12mm	0.06mm	60mm	**K885300-0002**	94.22
7mL	0.11mm	0.05mm	125mm	**K885300-0007**	83.33

50mL	38 × 225mm	10 × 330mm	**K885480-0025**	138.07

[1] *Approximate volume with pestle inserted.*

WARNING

Operator should wear protective gloves with sufficient thickness to prevent injury in the event of failure of the glass components.

ACCESSORIES

Kontes* Pellet Pestle* Cordless Motor

Produces more complete disaggregation than manual mixing

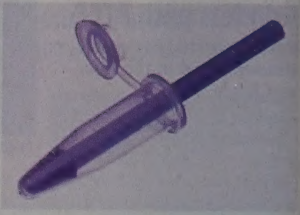
- Use with either the disposable or reusable Pellet Pestle Mixers
- Comes with two "AA" batteries

K749540-0000

Description	Cat. No.	Each
Cordless Motor	**K749540-0000**	96.94
Replacement Motor Adapter	**K749541-0000**	5.00

Kontes* Pellet Pestle*

Resuspend protein and DNA pellets or grind soft tissue in microcentrifuge tubes



K749520-0000

Two pestle styles: disposable or reusable—both of which can be used with Cordless Motor (available separately). Plain and RNase-, DNase-, and pyrogen-free polypropylene microtubes are available separately.

Disposable Pellet Pestle

- Choose autoclavable polypropylene or RNase-, DNase-, pyrogen-free material (manufactured under M5.5 [Class 10,000] cleanroom conditions)
- Available with or without 100 microtubes
- Microtubes have the same properties and come individually wrapped to ensure purity
- Length of pestle with tip, 2¾" (7cm)

Reusable Pellet Pestle

- Autoclavable CTFE polymeric head with a stainless-steel shaft
- Available in 0.5 or 1.5mL sizes
- Pestle length with tip, 2½" (6cm) for 0.5mL size; 5 19/32" (14cm) for 1.5mL size

Material	Size	Cat. No.	Price
Disposable Pellet Pestle with 100 Microtubes

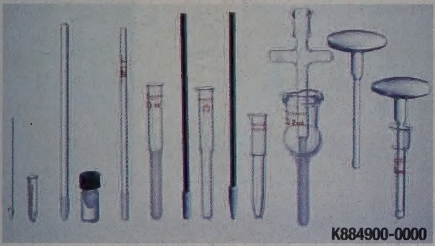
Kontes* Tissue Grinder Kit



Selection includes popular grinder styles with ground glass, smooth glass and PTFE pestles

Convenient high-density polyethylene case with foam inserts protects grinders during transport and storage.

ORDERING INFORMATION:
Grinders also available individually; see individual components list

INCLUDES:
Micro-scale tissue grinders; Duall*-style grinders; one each of the seven grinders listed under Individual Components

Description	Cat. No.	Each
Tissue Grinder Kit	**K884900-0000**	355.08

Kontes* Tenbroeck Tissue Grinder

Hand or motor operation

- All-glass construction
- Pestle is tooled for an appropriate sized single hole rubber stopper (sold separately)
- Can be motor driven at slow speeds by inserting the metal rod into the motor chuck
- Clearance between pestles and tubes is 0.1 to 0.15mm

K885000-0007

Capacity	Cat. No.	Each
2mL	**K885000-0002**	56.31
7mL	**K885000-0007**	63.39
15mL	**K885000-0015**	70.40

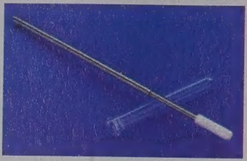
[1] Approximate volume with pestle inserted.
[2] Suitable for motor-driven homogenization.
[3] With one large clearance pestle and one small clearance pestle

WARNING
Because of variations in conditions glassware cannot be guaranteed against breakage under vacuum or pressure. Adequate precautions should be taken to protect personnel who are doing such work.

Wheaton Potter-Elvehjem Tissue Grinders

Choose grinders with or without plastic safety coating



08-414-1 Series

- Manufactured from Wheaton-33* low-extractable borosilicate glass
- Interchangeable parts
- Stainless-steel rod can be inserted in an electric overhead stirrer
- PTFE pestle bottom conforms exactly to tube bottom; clearance of approximately 0.1 to 0.15mm
- Transparent plastic coating on Safe-Grind* tissue grinders protects mortar from becoming scratched, improves grip, and contains homogenate in the case of tube breakage
- Autoclavable

Wheaton Tissue Grinder Kit

Complete selection of micro tissue grinders packed in a protective carrying case

ORDERING INFORMATION:
Complete kit of micro tissue grinders contained in one protective carrying case

INCLUDES:
1mL Tenbroeck, 0.5mL grinder with 13mm-425 GPI cap, 1mL Dounce, 0.1 and 0.2mL standard, 2mL Potter-Elvehjem, 1mL tapered

08-414-17

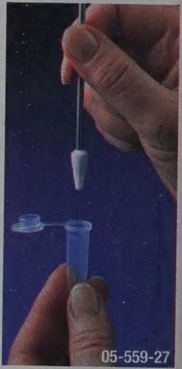
Mfr. No.	Cat. No.	Each
358204	**08-414-17**	353.97

Scienceware* Microcentrifuge Tube Sample Pestles

Can be hand operated or mounted in a motorized chuck

- PTFE and stainless-steel shaft
- Fit inside 1.5mL microcentrifuge tubes with standard or narrow cone (sold separately)

ORDERING INFORMATION:
Overall length, 5½" (143mm).



05-559-27

Description	Mfr. No.	Cat. No.	Each
For standard cone	19922 0000	**05-559-26**	38.83
For narrow cone	19922 0001	**05-559-27**	38.83

Radnoti Econo-Grind Micro Tissue Grinder

For applications that do not require the grinder to be capped

- Precision ground ball pestle provides rapid grinding action and fast tissue dispersion
- Borosilicate glass

08-416C

Working Capacity	Cat. No.	Pack of 3
100–1000µL	**08-416C**	66.37

*Trademark. See Trademark Reference.

Prices subject to change.

CELL STRAINERS

BD Falcon* Cell Strainers

No more fabricating filters from gauze, paper, steel, or nylon mesh

08-771-2

- Use with Falcon* 50mL centrifuge tubes (available separately) to obtain more uniform cell suspensions
- Sterile; Ready to use
- Nylon mesh is available in 40, 70, and 100µm sizes

ORDERING INFORMATION:

Individually wrapped in medical-grade packaging and gamma irradiated

Mesh Size	Color	Mfr. No.	Cat. No.	Case of 50
40µm	Blue	352340	**08-771-1**	105.90
70µm	White	352350	**08-771-2**	105.90
100µm	Yellow	352360	**08-771-19**	105.90

BD Falcon* Tube with Cell Strainer Cap

Designed for flow cytometry applications

08-771-23

- A 35µm nylon mesh is incorporated into the tube cap
- Sterile
- O.D. × L: 12 × 75mm

Mfr. No.	Cat. No.	Case of 500
352235	**08-771-23**	518.60

CULTURE CHAMBERS

Corning* HyperFlask* Cell Culture Flasks

Bar-coded and compatible with cell culture automation platforms

13-700-406

- CellBIND* surface treatment increases oxygen content of the polymer surface, resulting in improved hydrophilicity and wettability for optimal cell spreading and attachment
- Rectangular polystyrene
- Growth Area: 1720cm²
- Max. Working Volume: 560mL
- HDPE plug seal cap on a straight neck is designed for filling with growth medium
- Sterile

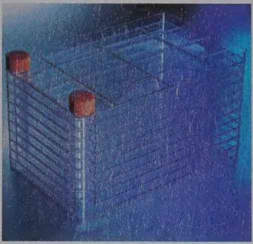
Cat. No.	Case of 4
13-700-406	300.00

WARNING

Because of variations in conditions, glassware cannot be guaranteed against breakage under vacuum or pressure. Adequate precautions should be taken to protect personnel who are doing such work.

Corning* CellSTACK* Culture Chambers

Ideal for scale-up from cell culture flasks



05-539-096

- Two generous 26mm filling ports provide direct access to chamber bottom and flexibility for sterile filling and emptying
- Standard 33mm threaded caps have 0.2µm pore nonwettable membranes sealed to caps—allowing gas exchange, preventing pressure buildup, and minimizing risk of contamination
- Choice of standard tissue culture or Corning CellBIND* surface treatment
- Sterilized by gamma irradiation
- Leak tested

ORDERING INFORMATION:

Individually packaged

COMPLIANCE:

Polystyrene material meets USP Class VI requirements; provides superior optical clarity and structural integrity.

CERTIFICATIONS:

Certified nonpyrogenic

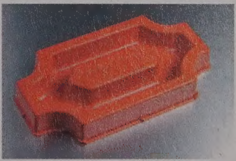
Corning* CellSTACK* Stacking Device

Optimizes incubator space when used to stack CellSTACK Culture Chambers



07-201-631

- Conforms to the top of the CellSTACK chamber
- Provides clearance for venting
- Manufactured from orange ABS plastic
- Not autoclavable

Mfr. No.	Cat. No.	Case of 5
3331	**07-201-631**	151.86

ACCESSORIES

Corning* CellSTACK* Caps

For filling, venting, and manipulation

- Choice of 33mm polyethylene, polypropylene solid, vented, or universal caps with overcaps
- Sterilized by gamma irradiation

COMPLIANCE:

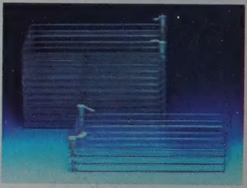
Filling caps with USP Class VI certified C-FLEX* tubing.

Description	Mfr. No.	Cat. No.	Case of
Vented Filling Caps with Tubing			
With ¼" (6.4mm) I.D. tubing and 37mm filter with glass fiber filter hydrophobic membrane	3284	**07-201-232**	4/204.54
Filling Caps with Tubing			
With ⅜" (9.5mm) I.D. tubing and a 5⁄16" (7.9mm) I.D. barbed fitting	3283	**07-201-734**	5/196.04
With ⅛" (3.2mm) I.D. tubing and a ⅛" (3.2mm) female Luer hose barb with a male Luer-lock plug	3282	**07-201-733**	5/177.30
With ¼" (6.4mm) I.D. × 27" (70cm) L tubing with a male MPC coupling and a female MPC end cap	3333	**07-201-230**	4/191.04
Filling Caps without Tubing			
With male MPC polycarbonate end cap with ¼" (6.4mm) I.D. female MPC polycarbonate coupling	3328	**07-202-519**	4/177.20
With male MPC polycarbonate end cap with ⅜" (9.5mm) I.D. female MPC polycarbonate coupling	3329	**07-202-520**	4/176.63
With female MPC polycarbonate end cap with ⅜" (9.5mm) I.D. male MPC polycarbonate coupling	3339	**07-202-522**	4/176.63
Vented Caps			
With 0.2µm pore hydrophobic membrane	3280	**07-201-732**	5/11.76
Solid Caps, Black Phenolic			
Use in closed systems or in applications where venting is not necessary	3279	**07-201-821**	5/10.48
Universal Caps			
Universal Cap with vented overcap with 1.0µm ePTFE membrane sealed into peelable foil cover	3332	**07-202-517**	4/32.17
Filter adapter caps (2) with peel-away covers for inserting barbed disc filters and solid overcap (1) for Universal Caps	3324	**07-201-231**	100/685.44

Nunclon* Δ Cell Factory

Used for large-scale cell culture and production of bio-materials such as vaccines, monoclonal antibodies and interferon

- Features stackable chambers welded together as a single unit sharing common vent and fill ports
- Growth surface of 632cm² available in each chamber
- Easy to fill and empty with virtually no risk of contamination
- Recommended minimum volume of medium is 200mL per chamber (632cm²)



Front, 12-565-38; back, 12-565-39

BD BioCoat* Matrigel Invasion Chambers

Provide rapid and reproducible quantification of cell invasion in vitro

Two human fibrosarcoma cells (HT-1080 cells) migrating through an 8-micron pore in a chamber membrane following their invasion of the Matrigel Matrix-treated membrane.

BD Matrigel* Matrix is a soluble basement membrane extracted from Engelbreth-Holm-Swarm mouse tumor which, when reconstituted at room temperature, forms a gel. Available preapplied as cell culture inserts, as invasion chambers, and as cellware. BD Matrigel Matrix is especially suited for culture of polarized cells, such as epithelial cells. It promotes differentiation of hepatocytes, mammary epithelial cells and smooth muscle cells. It also promotes capillary tubule formation of endothelial cells and neurite regeneration, and can be used for angiogenesis assays.

- Two matrix configurations—chambers with BD Matrigel Matrix and with Growth Factor Reduced (GFR) Matrigel Matrix
- Allow invasion of HT-1080 cells (invasive human fibrosarcoma cells) through 8μm pores and exclude invasion of 3T3 cells (noninvasive mouse fibroblast cells line)
- Chambers with GFR Matrigel Matrix designed for use in studies in which minimal interference by growth factors is desirable

STORAGE CONDITIONS:

Stable for at least three months after shipment when stored at -20°C (-4°F).

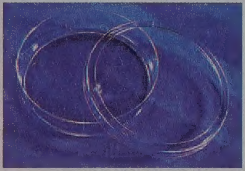
DISHES-SPECIALTY SURFACES

Corning* CellBIND* Surface Culture Dishes

Surface treatment provides optimal cell attachment



07-202-514, -515, -516

- Corning CellBIND-treated surface helps cell adapt to reduced serum or serum-free media
- Manufactured from optically clear virgin polystyrene
- Stacking beads aid in handling
- With vents for consistent gas exchange
- Sterilized by gamma radiation; certified nonpyrogenic
- Requires no refrigeration or special handling, unlike standard coatings used to improve cell attachment

STORAGE CONDITIONS:

Stable at room temperature.

Size	Approx. Growth Area	Inside Dia.	Height	Mfr. No.	Cat. No.	Case of

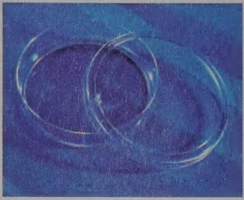
Corning* Ultra-Low Attachment Dishes

Vents provide consistent gas exchange

- Optically-clear virgin polystyrene
- Height: 15mm
- Stacking beads aid in handling



07-539-100, -101

ORDERING INFORMATION:

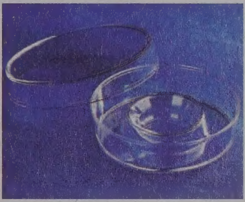
Sterile; packed in sleeves of 5

Size	Growth Area†	Mfr. No.	Cat. No.	Case of 20
60mm	21cm²	3261	**05-539-100**	165.69
100mm	55cm²	3262	**05-539-101**	202.67

† Actual growth surface diameter of 60mm dish is 51.4mm, 100mm dish is 80.5mm.

Corning* IVF Dish

Advanced center-well design promotes isolation, easy handling, and full visibility of oocyte/embryo



07-200-79

Polystyrene dish features a 1mL beveled edge mark for convenient media dispersal, a 45° slope to funnel oocyte/embryo into center well, and a beveled lead-in for additional room to maneuver pipet.

- Treated for optimal cell attachment
- Outer moat provides humidification to specimen and can be easily washed between applications
- Outer well bottom raises dish off benchtop surface to prevent scratches on optical surface
- Beads on lid provide vents for uniform gas flow
- Sterilized by gamma radiation
- Capacity: center well, 3mL; outer moat, 10mL

CERTIFICATIONS:

Certified nonpyrogenic

ORDERING INFORMATION:

Diameter: Center well, 0.77" (19.6mm); dish, 2.33" (60mm).
Height: 0.62" (15.7mm).

LOOKING FOR ROLLER BOTTLES?

Fisher Scientific offers a variety of treated and untreated bottles in several sizes and materials. To find these products, see the Bottles section.

BD BioCoat* Culture Coated Dishes

Ideal for applications involving adhesion, growth and differentiation of neuronal and transfected cell lines

- Tested for the ability to promote firm attachment of rat cerebellar granule cells
- All lots tested and found negative for bacteria and fungi
- Bulk quantities are also available; please contact your Fisher Customer Service Representative
- All lots tested and found negative for bacteria and fungi
- Cellware is tested for the ability to promote firm attachment of rat cerebellar granule cells

ORDERING INFORMATION:
Bulk quantities available unless stated otherwise; please contact your Fisher Scientific Customer Service Representative.

Collagen I, Rat Tail Culture Dish

Ideal for applications involving adhesion, growth and differentiation of neuronal and transfected cell lines

- All lots tested and found negative for bacteria and fungi
- Cellware is tested for the ability to promote firm attachment of rat cerebellar granule cells

ORDERING INFORMATION:
Bulk quantities available; please contact your Fisher Scientific Customer Service Representative.

STORAGE CONDITIONS:
Stable for ≥6 months at 4° to 30°C (39.2° to 86°F) under dry conditions. Do not freeze.

Collagen IV, Mouse Culture Dishes

Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology

Microporous membranes permit diffusion of ions, low-molecular-weight proteins and other substances to both apical and basolateral cell surfaces, simulating the natural environment of cells in vivo.

- Supplied with preapplied extracellular matrices, facilitating cell adaption to in vitro cultivation

ORDERING INFORMATION:
Supplied in ready-to-use BD Falcon* Companion Tissue Culture Plates.

STORAGE CONDITIONS:
Stable for at least three months from date of shipment when stored at 2° to 8°C (36° to 46°F).

Fibronectin, Human, Culture Dishes

Matrix components are applied as an even, optically clear coating

- Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology
- Tested for their ability to promote attachment and spreading of BHK-21 hamster kidney cells

STORAGE CONDITIONS:
Stable for at least three months after shipment when stored at 2° to 8 C (36° to 46°F).

NOTE:
The human plasma used in preparing this product was tested and found negative for HBsAg and HIV antibody.

Gelatin Culture Dishes

Pre-coating with gelatin (obtained from porcine gelatin) eliminates time-consuming preparation

Commonly used in the culture of normal and transfected cell types, including vascular endothelial (i.e., BME, BAEC), muscle, embryonic stem, HUVEC for E-Selectin expression and VEGF induction, and F9 teratocarcinoma cells for gene expression studies.

- Provide attachment and growth-promoting substrate for the culture of a variety of cells
- Lot-to-lot consistency results in reproducible experiments
- Matrix components are applied as an even, optically clear coating

STORAGE CONDITIONS:
Stable for ≥6 months at 4° to 30°C (39.2° to 86°F) under dry conditions

For research use only

Poly-L-Lysine Culture Dishes

Provide excellent substrate for cell attachment and differentiation of primary neurons, glial, neuroblastoma and glioma cells

Suitable for promoting adhesion of transfected cell lines and other fastidious cell types. Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology.

- Minimize assay failure due to cell detachment
- Matrix components are applied as an even, optically clear coating
- Precoated with Poly-L-Lysine to eliminate time-consuming preparation
- Lot-to-lot consistency provides reproducible experiments

STORAGE CONDITIONS

Stable for at least six months after shipment when stored at 4° to 30°C (39° to 86°F).

Diameter	Mfr. No.	Cat. No.	Case of
35mm	354518	**08-772-94**	20/55.99

BD Primaria* Tissue Culture Dishes

Features a surface treatment that is a permanent, stable modification of the polystyrene surface incorporating a mixture of anionic and cationic functional groups

- Samples of each lot are analyzed using Electron Scanning Chemical Analysis (ESCA) to ensure a consistent ratio of nitrogen-containing functional groups
- Suitable for growing a variety of primary cells and cell lines that grow poorly on conventional, negatively charged, standard tissue culture surfaces—including tumor cells, endothelial cells and hepatocytes. Sterile, nonpyrogenic
- Sterile
- Nonpyrogenic
- With lids

ORDERING INFORMATION:

Packaged in red color-coded peel-open, medical-style packages; supplied 20 per sleeve in cases of 200

Approximate Dimensions	Mfr. No.	Cat. No.	Case of 200

LOOKING FOR DISHES?

For additional dishes recommended for Tissue Culture use, refer to the Dishes section.

BD Falcon* In Vitro Fertilization Plasticware

FDA-approved 510(k) medical devices

08-772 Series

Tested for embryotoxicity by culturing mouse embryos in both the labware itself and in media that has been in contact with the labware for 24 hours at 37°C (98.6°F).

- Sterile, nonpyrogenic, tissue culture-treated polystyrene plates and dishes
- Labware is "nontoxic" if it supports growth of ≥75% of the embryos to the expanded and/or hatched blastocyst stage
- Optically clear for optimum viewing during routine observation and manipulation

Standard 60mm dishes

- Available with or without 2.45cm² center well
- Numbered wells and condensation rings on the lid help prevent any cross-contamination between wells
- Large writing area allows for easy marking and plate identification

4-well plate

- Unique patented design improves manipulation of ova or embryos
- Includes lid which provides access to two wells while the other two remain covered

ORDERING INFORMATION:

Supplied in peel-open packaging to ensure sterility. Dishes packed 20 per sleeve; plates individually wrapped.

Description	Well Area	Mfr. No.	Cat. No.	Case of

LOOKING FOR PIPET TIPS?

Fisher Scientific carries pipet tips which are compatible with many brands and sizes of pipetters. See the Pipetter Tips section.

FLASKS-SPECIALTY SURFACES

Corning* CellBIND* Surface Rectangular Cell Culture Flasks

Corning CellBIND surface treatment enhances cell attachment to provide higher cell growth and yields

08-757-212

- Manufactured from optically clear, virgin polystyrene
- Treated surface helps cells adapt to reduced serum or serum-free media; stable at room temperature
- Ideal for short- and long-term cell culture
- Available with vented caps containing a 0.2μm nonwettable membrane sealed to the cap, providing consistent, sterile gas exchange while minimizing risk of contamination; or phenolic-style caps for use in open systems requiring gas exchange
- 05-539-104 flask features redesigned neck for easier media pouring, lower height (1.4") for reduced stacking height, and vented cap with Costar*-style concentric circle support grid geometry
- Choice of canted or angled neck
- Canted neck flasks allow easier pouring and improved access to the flask for pipetting or scraping
- Angled neck improves pipetting access and reduces medium sloshing into the neck
- Printed lot numbers provide easy traceability
- Flasks 08-575-211 and 07-203-10 are prelabeled with bar code for use with SelecT* Robotic System
- Sterilized by gamma irradiation
- Certified nonpyrogenic
- 100% integrity tested

LOOKING FOR COATED PLATES?

Fisher Scientific has a wide assortment of cell culture-treated and specialty plates. In addition to those in the Plates-Specialty Surfaces in this section, check out the Microplates section.

Corning* Cell Culture Flasks

10-126-37

Wide necks reduce sloshing effect

- Stackable, polystyrene flasks have wide necks that reduce sloshing effect
- Cell culture surface treatment promotes cell attachment and growth
- Tested for sterility, toxicity, cell attachment, and growth promotion
- Optically clear surfaces provide distortion-free microscope viewing
- Printed lot number for product traceability
- Sterile and nonpyrogenic

Cap Types

- Phenolic-style screw caps for cultures requiring gas exchange
- Plug seal caps for airtight cultures
- Vent caps to minimize cell culture contamination with gas exchange

Canted-neck flasks feature:

- Antitip skirt
- Molded graduations
- Frosted marking areas on both sides
- Support bar across the top
- Redesigned neck on 75cm^2 flask features redesigned neck to aid media pouring, 1.4" (3.6cm) height for lower stacking height; vent cap has Costar*-style concentric circle

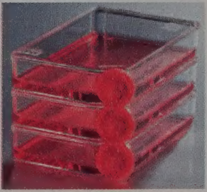
Corning* Low Profile Cell Culture Flask

Unique design reduces stacking height



13-700-433

- 100cm^2 available growth area
- Rectangular with canted neck, corner cap for easy pouring and improved access to flask for pipetting or scraping
- Manufactured from optically clear virgin polystyrene
- Treated with patented Corning CellBIND* surface treatment for enhanced cell attachment
- Vented cap contains a 0.2µm nonwettable membrane sealed to the cap, providing consistent, sterile gas exchange while minimizing risk of contamination
- Graduated
- 100% integrity tested
- Sterilized by gamma radiation and certified nonpyrogenic

Surface Treatment	Mfr. No.	Cat. No.	Case of 60
CellBIND	3073	**13-700-433**	270.88

Corning* Costar* Cell Culture Flasks

Culture areas cover applications ranging from research to scale-up and production

07-200 Series with canted neck

- Optically clear, medical-grade polystyrene
- Tissue culture treated to promote optimal cell attachment and growth
- Graduations
- Frosted labeling surfaces
- Sterile and nonpyrogenic
- Extra-wide neck openings for easier pipetting
- Patented canted-neck design improves accessibility for cell monolayer and overall improved handling
- Hydrophobic 0.2µm pore size membrane ensures consistent gas exchange without requiring the cap to be loosened
- Phenolic-style screw caps for cultures requiring gas exchange
- Vented filter caps maximize gas exchange while minimizing the possibilty of contamination

Culture Area	Cap Type	Volume	Mfr. No.	Cat. No.	Case of
Canted Necks					
225cm^2	Phenolic	900mL	3000	**07-200-69**	24/152.28
225cm^2	Vent	900mL	3001	**07-200-62**	24/158.19
Straight Necks					
162cm^2	Phenolic	720mL	3150	**07-200-74**	25/116.31
162cm^2	Vent	720mL	3151	**07-200-64**	25/122.30

Corning* Costar* Triangular Cell Culture Flasks

Triangular shape provides excellent accessibility to cell surface

07-200-72

- Optically clear, medical-grade polystyrene
- Tissue culture-treated to promote optimal cell attachment and growth
- Graduations
- Frosted labeling surfaces
- Sterile and nonpyrogenic
- Extra-wide neck openings for easier pipetting
- Printed lot number and catalog number on each flask
- Patented canted-neck design improves accessibility for cell monolayer and overall improved handling

Vented filter caps

- Maximize gas exchange while minimizing the possibility of contamination
- Hydrophobic 0.2m pore size membrane ensures consistent gas exchange without requiring the cap to be loosened

Culture Area	Cap Type	Volume	Mfr. No.	Cat. No.	Case of
Angled Necks

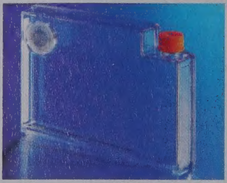
Straight Necks					
75cm^2	Phenolic	300mL	3275	**07-200-75**	100/272.82
75cm^2	Vent	300mL	3276	**07-200-66**	100/310.00

Corning* RoboFlask* Cell Culture Vessels

Stackable to save valuable incubator space

- Manual or automation-compatible
- Manufactured from optically clear, virgin polystyrene
- 92.6cm^2 available cell growth area
- Available tissue culture-treated for optimal cell attachment or with patented CellBIND* surface for improved attachment of stressed cells
- Built-in 2.2cm^2 venting membrane for efficient gas and liquid exchange
- Removal of cap allows up to 5mL pipet access or assist in harvesting of cells
- SBS standard microplate footprint and stackable
- Bar coding for efficient automated tracking
- With straight neck, except 07-200-175 which has short neck
- 100% integrity tested
- Sterilized by gamma irradiation
- Certified nonpyrogenic



07-200-11 Series

INCLUDES:

Cell culture vessel with flat or septum cap

Nunc* Biologically Coated EasYFlask*

Treated surface promotes optimal cell attachment, growth, and differentiation in serum-free and serum-containing media

- Polystryrene flat-sided cell culture flasks with choice of coating
- Ergonomic ⅓ turn open and close HDPE cap
- Angled neck allows full access to growth surface
- Volume graduations on both sides

STORAGE CONDITIONS:

Stable at room temperature

01-814-50 Series

Nunc* Sterile EasYFlask*

Nunclon* Δ treated surface ensures optimal cell attachment and growth

- Polystyrene flat-sided cell culture flasks
- Choice of filter or vent/close caps
- Filter caps for continuous venting are fitted with a hydrophobic filter to ensure consistent gas exchange
- Vent/close caps feature a "Y" mark that allows visual verification of vent position
- Large opening and angled neck allow for easy access to growth surface with pipets and cell scrapers
- Low profile maximizes incubator space and allows viewing of entire growth surface with standard microscope
- Volume graduations printed and molded on both sides
- Frosted writing surfaces on neck
- Certified nonpyrogenic
- Extra caps in every case

12-565 and 12-562 Series Flasks

Culture Area	Working Volume	Mfr. No.	Cat. No.	Case of

Nunclon* Δ TripleFlask* Flasks

Provide 500cm^2 growth surface within the same external dimensions as a standard 175cm^2 flask

- Straight-neck flask
- Three parallel growth surfaces
- Recommended working volume is 100 to 200mL
- Promote conventional, flat, monolayer culturing
- Cell lines do not require recharacterization when scaling up
- Radiation sterilized

12-565-20 Series

INCLUDES:

Certificate of quality provided with each case

Cap Style	Mfr. No.	Cat. No.	Case of 32
Vent/Close	132867	**12-565-24**	341.25
Filter	132913	**12-565-25**	371.50

*Trademark. See Trademark Reference.

Prices subject to change.

Nunclon* Δ Flasks

Treated polystyrene culture flasks provide excellent cell attachment and growth

- High optical quality allows easy microscopic viewing
- Certificate of quality provided with each case
- Radiation sterilized
- Two-position plug-seal screw caps allow venting or closed incubation
- Caps of high-impact polystyrene (HIPS) or high-density polyethylene (HDPE)

12-565 Series

Culture Area	Cap Material	Working Volume	Mfr. No.	Cat. No.	Case of
Angled Necks					
24cm²	HDPE	50mL	163371	**12-565-49**	160/207.50

Straight Necks					
24cm²	HDPE	40mL	152094	**12-565-48**	200/259.25
83cm²	HIPS	260mL	153732	**12-565-50**	50/122.18
175cm²	HDPE	800mL	156502	**12-565-54**	32/160.93

With Polyethylene Filter Caps

Provide maximum protection against contamination

- Polystyrene flasks with polyethylene filter cap
- Unique hydrophobic filter utilizes a three-dimensional matrix of nonwettable polyethylene fibers—bacterial and fungal spores will not penetrate matrix
- Gas exchange is conducted through 0.22µm filter surface area

Culture Area	Working Volume	Mfr. No.	Cat. No.	Case of
Angled Necks

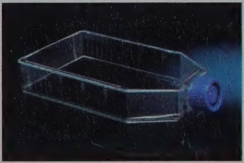
Straight Necks; Barcode				
175cm²	800mL	178983	**12-565-540**	32/191.00

Nunclon* Δ SoLo* Flasks

Designed to maximize incubator and storage space

- Low-profile, 185cm² flasks
- Large-bore, angled neck allows better pipet and cell scraper access
- Flat bottom and tapered shoulder area provide stability and prevent media sloshing—minimizing contamination risk
- Increased wall thickness restrains bulging from pressure buildup during closed incubation
- Hydrophilic surface provides optimum cell attachment and growth
- Certified to ensure consistent biological performance



12-565-293 Series

Cap Style	Mfr. No.	Cat. No.	Case of 50
Vent/Close	144881	**12-565-293A**	238.75
Filter	144903	**12-565-293B**	246.00

BD Falcon* Tissue Culture Nontreated Flasks

Similar to the surface of a bacteriological Petri dish

- Nonpyrogenic
- Sterile
- Constructed from optically clear virgin polystyrene
- Manufactured using ISO 9002:2001-certified processes
- 100% leak testing of injection-molded flasks
- Volumetric graduation accuracy (±5% of volume)
- Stringent requirements for flatness of optical growth surface

08-772 Series (top),
10-126 Series (bottom)

Cap Types

- Two-position plug-seal caps for use in open or closed incubation
- Vented caps incorporate a 0.2µm membrane for consistent gas exchange and reduced contamination
- Rigid phenolic (lined) caps twist on and provide the most reliable liquid/gas-tight sealing
- Canted necks
- Plug seal caps
- Growth surface is more hydrophobic than a treated surface

Culture Area	Volume	Mfr. No.	Cat. No.	Case of
25cm²	70mL	353009	**08-772-1J**	200/265.37
75cm²	250mL	353133	**13-680-57**	60/144.93

BD Falcon* Tissue Culture-Treated Flasks

Vacuum-gas plasma tissue culture treatment ensures consistent growth surface

- Patented locking incubation position, found on the 150cm² and 225cm² flasks, prevents caps from falling off or closing while in the open position
- Canted-neck 150cm² flasks are low-profile for stacking and efficient use in incubator; include locking caps and graduations
- Straight-neck 175cm² flasks have frosted writing area
- 225cm² flasks with locking caps, frosted writing area, vertical graduations, 100mL maximum horizontal working volume line and a skirted, canted neck for extra stability
- 300cm² flasks, manufactured in an ISO Class 8 cleanroom with blow-molded design, printed graduations, straight neck, and white marking area

Contd. on next page.

BD BioCoat* Coated Flasks

Ideal for applications involving adhesion, growth and differentiation of neuronal and transfected cell lines

- Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology
- Matrix components are applied as an even, optically clear coating
- All lots tested and found negative for bacteria and fungi; cellware is tested for the ability to promote firm attachment of rat cerebellar granule cells

STORAGE CONDITIONS

Stable for ≥6 months at 4° to 30°C (39.2° to 86°F) under dry conditions unless otherwise stated; do not freeze.

NOTE:

These products are for research use only and are not intended for diagnostic purposes.

ACCESSORIES

Vented Caps

Designed for use with BD BioCoat* T-25, T-75 and T-175 flasks

- Polyethylene
- Contain a 0.2μm membrane vent that permits consistent gas exchange while preventing passage of bacteria and fungi, reduce the risk of contamination normally associated with standard cell culturing during open incubation

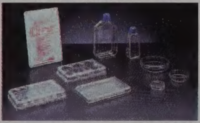
BD Falcon* Primaria* Tissue Culture Flasks

Features a surface treatment that is a permanent, stable modification of the polystyrene surface, incorporating a mixture of anionic and cationic functional groups

- Samples of each lot are analyzed using Electron Scanning Chemical Analysis (ESCA) to ensure a consistent ratio of nitrogen-containing functional groups
- Suitable for growing a variety of primary cells and cell lines that grow poorly on conventional, negatively charged, standard tissue culture surfaces—including tumor cells, endothelial cells and hepatocytes. Sterile, nonpyrogenic



08-772-4 Series (Bottles and dishes not included.)

Choice of neck and cap styles

- With plug-seal screw or vented caps
- Both styles available in two sizes
- 50mL flasks have canted neck
- 250mL flasks have straight neck

ORDERING INFORMATION:
Smaller flasks packed 20 per sleeve in cases of 200 (08-772-45 in cases of 100); larger flasks packed five per sleeve in cases of 100

Nunc* OptiCell* Cell Culture System

Unique format for growing, monitoring, and transporting cells

- Sterile system is created from two parallel, gas-permeable, cell culture-treated polystyrene membranes
- Each membrane has a growth area of 50cm², total area: 100cm²
- Recommended media/cell fill volume of only 10mL for OptiCell and 30mL for OptiCell MAX
- Two resealing access ports provide a closed growth environment with sterile fluid path, reducing the risk of contamination
- Unique freezing capabilities allow for prolonged live cell storage
- Designed with approved shipping system to transfer cell lines
- Production of monoclonal antibodies, cytokines, and other secreted molecules

OptiCell System

INCLUDES:
OptiCell 1100 Starter Kit: 20 ea. of OptiCell 1100, rack, knife, 50 tips, optical shield, manual, mini-CD; OptiCell MAX 2100 Starter Kit: 5 ea. of OptiCell MAX, rack, 50 tips, Hybridoma production protocol, manual; OptiCell Mailer: 5 ea. OptiCell 1100, five mailers, 50 tips, manual, shipping protocol

PLATES—SPECIALTY SURFACES

Millipore* Millicell* 24-Well Cell Culture Microplate Assembly

Provides twice the membrane area of standard 24-well plates

PSHT010R5

Patented assembly is designed to support cell attachment, growth, and differentiation for a variety of applications and is compatible with manual use or with automated cell seeding, feeding, and washing systems.

Filter Plate Features

- Basolateral access ports at each well allow for media addition without disassembling the cell culture plate and receiver tray
- Apical assist protects the cell monolayer during manual feeding
- Feet on the filter plate raise and protect the cell monolayer if the feeder tray is removed
- Tissue culture-treated membrane promotes cell attachment
- Raised well edges improve tape sealing
- Large-font labeling for user convenience

Feeder Tray Features

- 24-well feeder tray incorporates a tear-drop well design to reduce the incidence of air bubbles that can form under the membrane during plate assembly, ensuring that cell monolayers are getting the proper nutrients
- Single-well feeder tray utilizes baffles to reduce media leakage and contamination

INCLUDES:

24-well filter plate; single-well receiver tray; lids

NEED TO SCALE UP YOUR CELL CULTURE?

To browse through many other types and brands to meet your needs, see the Culture Chamber subsection.

Millipore* MultiScreen* Cell Culture Trays

For feeding cells during membrane-based cell culture

MAMC S Series

- For basolateral feeding and/or co-culture in a single well or 96-well format
- Use with sterilized MultiScreen filter plates
- Polystyrene with cut-off corners
- Sterilized and individually wrapped
- Untreated surfaces

Single-Well Tray

- Holds medium and commonly feeds all 96 wells

96-Well Tray

- Independent wells fit the 96 wells of the membrane plate
- Patented "tear drop" shaped wells prevent air entrapment under membrane

Description	Cat. No.	Pack of 10
Single Well	**MAMC S01 10**	75.00
96 Well	**MAMC S96 10**	131.00

Millipore* MultiScreen* 96-Well Assay Systems

Perform cell growth, feeding, and analysis in one plate

MACA and PSRP Series

- Patented 96-well device supports epithelial cell growth and differentiation of the Caco-2 and other cell lines
- After the formation of a differentiated Caco-2 monolayer, the assembly can be used to measure the rate of drug transport across the Caco-2 cell barrier
- All procedures are designed to be carried out in a single device
- Apical and basolateral access ports allow contamination-free access to cells, easy feeding and media changes, and effective sample analysis
- Increased sample throughput when compared to 24-well systems
- Use manually or with automated systems
- Versatile format with 96- or single-well feeder trays

Corning* CellBIND* Surface Microplates

Clear polystyrene plates in multiple well formats

- Corning CellBIND*-treated surface helps cells adapt to reduced serum or serum-free media and improves cell attachment for increased cell growth and yield
- Requires no refrigeration or special handling, unlike standard coatings used to improve cell attachment
- Nonreversible lids with condensation rings to reduce contamination†
- Individual alphanumeric codes for well identification
- Uniform footprint for ease in stacking
- Flat well bottoms
- Sterilized by gamma irradiation

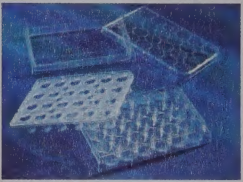
Corning* HTS Transwell*-24 Systems

Run 24 automated, high-throughput drug transport studies at once

- System consists of an array of 24 wells with permeable inserts connected by a rigid, robotics-friendly tray—enabling all 24 Transwell supports to be handled as a single unit
- Sterile and tissue culture-treated for anchorage-dependent cell growth, attachment, and differentiation
- Cell growth area 0.33cm²/well



07-200-685 with 07-200-68 series

Individual package includes two HTS Transwell-24 plates loaded into two 24-well plates and supplied with two open reservoirs

Bulk package consists of 12 HTS Transwell-24 plates loaded into twelve 24-well plates

- Use open reservoir plate for cell feeding without extra pipetting (sold separately)

Costar* Cell Culture Plates

Tissue culture-treated plates for cell attachment

- Designed for a wide range of applications, including general cell growth experiments, cloning studies, virus isolation and susceptibility testing, and in vitro testing
- Plate bottoms feature uniform thickness—allowing for distortion-free observation and microscopic examination
- Alphanumeric coordinates placed on the same focal plane as cell growth—for convenient referencing of well position
- Gripping edges make handling easier
- All plates have nonreversible lids with condensation rings to minimize evaporation and risk of contamination
- Made of optically clear, medical-grade polystyrene (except 07-200-94, which is made of polypropylene with a polystyrene lid)
- Sterile

Corning* Microplates with Poly-D-Lysine Surface

Promote cell attachment

- Enhance cell attachment, growth, and differentiation; increase survival in serum-free and low-serum conditions
- Polystyrene flat bottom plates with lids
- High coating homogeneity
- Clear surface allows for easy visual inspection; opaque walls provide minimal well-to-well crosstalk
- Low background fluorescence and luminescence
- Two-year shelf life

Corning* Ultra-Low Attachment Plates

Nonreversible lids with condensation rings reduce contamination

- Made from optically clear polystyrene
- Individual alphanumeric codes provide well identification
- Uniform footprint aids stacking
- Flat well shape
- Unique covalently bonded hydrogel surface is hydrophilic and neutrally charged
  - Surface is designed to maintain cells in a suspended, unattached state. Greatly reduces binding of attachment and serum proteins, minimizing cell attachment and spreading.
  - Prevents stem cells from attachment-mediated differentiation
  - Prevents anchorage-dependent cells from dividing
  - Minimizes protein absorption, enzyme activation, and cellular activation
  - Biologically inert, noncytotoxic and nondegradable

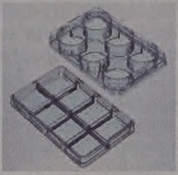
Nunclon* Δ Multidishes

Select either round or rectangular well

- Polystyrene plates feature Nunclon Δ treated surface for cell attachment and growth
- Radiation sterilized



12-565-73 (back), -78

Round Well Styles

- Feature vented lids for gas exchange
- Recessed areas around wells act as a water reservoir to reduce evaporation from wells
- 24-well plates are 17mm deep; 4-well plate is 10mm deep
- Lids are keyed for a one-way fit

Rectangular Well Styles

- Large culture area
- Accept standard glass cover slips: 24 × 60mm for 4-well plate; and 22 × 22mm for 8-well plate

CERTIFICATIONS:

With certificate of traceability and quality (one certificate per case).

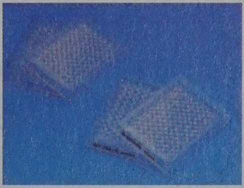
Nunclon* Δ MicroWell* Plates

Exclusive Nunclon surface for excellent cell attachment and growth



12-565-65

- Nunclon-treated polystyrene plates are available in 60-, 72-, or 96-well formats for use in a wide variety of applications, including cloning experiments and tissue culture-based analytical systems.
- Tight-fitting lids reduce evaporation
- Stackable
- Radiation sterilized

60- and 72-well Plates

- Feature conical wells with a working volume of 10µL

96-well Plates

- Available with flat- or round-bottomed wells and with or without vented lid for gas exchange
- Condensation rings control evaporation and retain condensate
- Keyed lids prevent accidental reversals

ORDERING INFORMATION:

Dimensions: 60- and 72-well plates, 56 × 82mm; 96-well plates, 86 × 128mm. Flat- and round-bottomed plates are individually wrapped (except 12-565-292A, which comes six per sleeve); conical plates are packed 10 per sleeve.

CERTIFICATIONS:

Each case of plates contains a certificate that guarantees biological performance and traceability.

Nunc* 96-Well Coated Microplates

Optimum clarity for viewing well contents

12-565-9 Series

- Flat-bottom well geometry for plate reader access
- Available in black for fluorescence assays or white for luminescence and fluorescence assays; both with clear bottoms
- Footprint compatible with standard equipment and automated systems
- Choice of Poly-D-Lysine and Collagen I coated surfaces for use in cell culture
- Produced in clean environment
- Polystyrene construction with polymer base
- Nonsterile
- With lid
- Working range, 50-200µL/well

Color	Mfr. No.	Cat. No.	Case of 20
Collagen I Coated

Nunc* 384-Well Coated Microplates

12-565-9 Series

Pinchbar design

Choose clear polystyrene plates for colorimetric assays and sample storage, white polystyrene/polymer plates for luminescence and fluorescence assays, or black polystyrene/polymer plates for fluorescence assays.

- Optimized for scintillation counting
- Can be read from bottom and top or both
- Rounded square wells eliminate wicking
- White and black plates minimize crosstalk
- Produced in clean environment
- Nonsterile
- With lids
- Working range, 10-100µL/well

Thermo Scientific* Pierce* CellScreen* Poly-D-Lysine Coated Plates

Enable firm attachment and efficient cell growth for applications such as reporter, receptor-binding, cytotoxicity, apoptosis, and cell-proliferation assays

- Polypropylene plates with Poly-D-Lysine coating
- Treated with a predetermined irradiation process after coating for high lot-to-lot consistency and quality assurance
- Automation-compatible for high-throughput applications and robotics
- With lids

STORAGE CONDITIONS:

Store at 4°C (39°F).

No. of Wells	Color	Well Shape	Well Capacity	Well Growth Area	Cat. No.	Pack of 5
96	Clear	Flat-bottom	300µL	78mm^2	**PI-15600**	51.26
384	Black/clear bottom	Flat-bottom	100µL	49mm^2	**PI-15608**	122.46

BD BioCoat* Coated Plates

Ideal for applications involving adhesion, growth and differentiation of neuronal and transfected cell lines

- Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology
- Matrix components are applied as an even, optically clear coating
- All lots tested and found negative for bacteria and fungi; cellware is tested for the ability to promote firm attachment of rat cerebellar granule cells

STORAGE CONDITIONS:

Stable for at least three months from date of shipment when stored at 2° to 8°C (36°-46°F), unless otherwise specified

NOTE:

These products are research use only and are not intended for diagnostic purposes.

Multiwell Plates Collagen IV

Tissue culture vessels have a uniform application of mouse collagen type IV

Treated with Collagen IV, which plays a role in the regulation of cell growth, differentiation, and adhesion, as well as tissue formation.

- Tested for the ability to promote differentiation (neurite outgrowth) of NG-108 rat glioma/mouse neuroblastoma cells
- Manufactured in a highly controlled environment and rigorously tested to assure product consistency and performance

Gelatin Multiwell Plates

Pre-coating with gelatin (obtained from porcine gelatin) eliminates time-consuming preparation

Commonly used in the culture of normal and transfected cell types, including vascular endothelial (i.e., BME, BAEC), muscle, embryonic stem (ES), HUVEC for E-Selectin expression and VEGF induction, and F9 teratocarcinoma cells for gene expression studies

- Provides attachment and growth-promoting substrate for the culture of a variety of cells
- Lot-to-lot consistency results in reproducible experiments

Cellware	Mfr. No.	Cat. No.	Case of

Laminin/Fibronectin Multiwell Plates

An in vitro environment for neural cell attachment and extensive process formation

Useful for construction of neural cell model systems to study central nervous system (CNS) function, development and diseases—as well as for the discovery of new therapeutic agents.

- Both laminin (LM) and human fibronectin (HFN) have been shown to be involved in neuronal cell adhesion, neural crest cell migration, neurite outgrowth, growth and regeneration of axons
- Human fibronectin is derived from human plasma; laminin from EHS mouse tumor
- Primary rat cortical neuron enriched cultures are tested for receptor agonist induced changes in intracellular calcium using Fluo-3A (long-wavelength fluorescent calcium indicator)

NOTE:

Human plasma used in preparing this product was tested and found negative for HBsAg and HIV antibody.

BD BioCoat* Coated Plates, Contd.

Matrigel* Matrix Multiwell Plates

Soluble basement membrane extracted from Engelbreth-Holm-Swarm mouse tumor forms a gel when reconstituted at room temperature

BD Matrigel Matrix is a soluble basement membrane extracted from Engelbreth-Holm-Swarm mouse tumor which, when reconstituted at room temperature, forms a gel. It is especially suited for culture of polarized cells, such as epithelial cells, and promotes differentiation of hepatocytes, mammary epithelial cells and smooth muscle cells. It also promotes capillary tubule formation of endothelial cells and neurite regeneration, and can be used for angiogenesis assays.

- Especially suited for culture of polarized cells, such as epithelial cells, and promotes differentiation of hepatocytes, mammary epithelial cells and smooth muscle cells
- Promotes capillary tubule formation of endothelial cells and neurite regeneration
- Can be used for angiogenesis assays
- Tested for the ability to promote neurite outgrowth from chick dorsal root ganglia (in the absence of NGF)

STORAGE CONDITIONS:
Cellware is stable for at least three months from date of shipment when stored at -20°C (-4°F); thin-layer cellware is stable for at least three months from date of shipment when stored at 2°–8°C (36°–46°F).

Poly-L-Lysine Multiwell Plates

Provide excellent substrate for cell attachment and differentiation of primary neurons, glial, neuroblastoma and glioma cells

Suitable for promoting adhesion of transfected cell lines and other fastidious cell types. Designed to closely mimic *in vivo* environments and enhance expression of cell-specific morphology.

- Minimize assay failure due to cell detachment
- Precoated with Poly-L-Lysine to eliminate time-consuming preparation
- Lot-to-lot consistency provides reproducible experiments

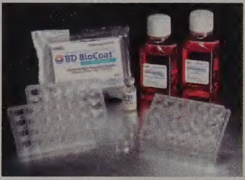
BD BioCoat* HTS Caco-2 Assay System

Automation-friendly design

- Produces a differentiated mono-layer of Caco-2 cells in vitro in just three days
- Fibrillar collagen-coated inserts with specialized BD BioCoat media speed cell differentiation
- Large-volume feeder tray reduces the need for frequent media changes
- Lot-to-lot testing ensures consistency



08-785

INCLUDES:

24-Multiwell* insert plate, specialized media to perform 24 assays, feeder tray, and lid.

Description	Mfr. No.	Cat. No.	Pack of
HTS Caco-2 Assay System	354801	**08-785**	1/291.08
	354802	**08-786**	5/1247.40
Fibrillar Collagen 24-Multiwell Insert Plate only	354803	**08-787**	1/249.10
	354804	**08-788**	5/1120.20

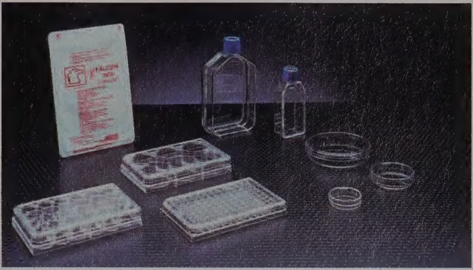
BD BioCoat* Deep-Well Plates

Accommodate the large media volumes required when culturing cells on microporous membranes

- Designed for use with BD BioCoat or BD Falcon* 6-well Cell Culture Inserts
- Basolateral compartment of one plate holds up to seven times as much media as its regular 6-well plate counterpart (17mL versus 2.5mL)
- Larger media volume reduces the frequency of cell feeding during extended cell culture periods or when culturing cells at the air-liquid interface
- Recommended for applications involving culturing of Caco-2 cells, airway epithelial cells or keratinocytes

Mfr. No.	Cat. No.	Case of 4
355467	**08-774-183**	34.91

BD Falcon* Primaria* Tissue Culture Multiwell* Plates



08-772-4 Series (Bottles and dishes not included.)

Features a surface treatment that is a permanent, stable modification of the polystyrene surface incorporating a mixture of anionic and cationic functional groups

Flat-bottomed wells

- With lids
- Samples of each lot are analyzed using Electron Scanning Chemical Analysis (ESCA) to ensure a consistent ratio of nitrogen-containing functional groups
- Surface treatment is a permanent, stable modification of the polystyrene surface incorporating a mixture of anionic and cationic functional groups.
- Samples of each lot are analyzed using Electron Scanning Chemical Analysis (ESCA) to ensure a consistent ratio of nitrogen-containing functional groups
- Suitable for growing a variety of primary cells and cell lines that grow poorly on conventional, negatively charged, standard tissue culture surfaces—including tumor cells, endothelial cells and hepatocytes
- Sterile, nonpyrogenic

ORDERING INFORMATION:

Individually wrapped; 50 plates per case

No. of Wells	Mfr. No.	Cat. No.	Case of 50
6	353846	**08-772-4J**	138.40
24	353847	**08-772-4G**	177.20
96	353872	**08-772-4K**	233.87

BD Falcon* Tissue Culture Plates

Available with tissue culture-treated and nontreated surfaces

- Nontreated growth surface is more hydrophobic than tissue culture surface and is similiar to the surface of a bacteriological Petri dish
- Sterilized by gamma irradiation
- Lid design permits stable stacking on benchtop or in incubator
- All plates (except 08-772-2A and 08-772-16) have patented "labyrinth" lid that reduces evaporation of media from wells, minimizes the risk of contamination
- Deep skirt and serrated edge permit a firmer grip for plate manipulation
- Exceptional optical clarity allows for visualization of all cell monolayers
- Frosted writing ends provide clear writing area for quick identification
- All plates and lids are suitable for both manual and automated handling

08-772-1B, 08-772-29, 08-772-1

ORDERING INFORMATION: Peel-open, medical-style packaging. Individually packaged in recyclable PET tray in cases of 50; or bulk packaged with lids either in sleeves of six, 36 per case, or sleeves of five (96-well plates), 50 per case.

BD Falcon* Plates in Ready-Stack Packaging

Trays are recyclable, stackable, and reusable for transporting, storing, or incubating plates

- Bulk packaged in medical-style peel-open trays for convenient, aseptic handling
- Plates positioned on their sides, permitting labeling before removal
- Tissue culture-treated

08-772-36

ORDERING INFORMATION: Packaged sterile, 14 plates per tray

INCLUDES: Lids

No. of Wells	Total Well Volume	Mfr. No.	Cat. No.	Case of

CHAMBER SLIDES & COVERSLIPS

*Fisherbrand** Coverglass for Growth* Cover Glasses

Made from preferred glass to promote cell growth and to provide an anchor for cells

- Cells grow directly on cover glass—eliminates trauma associated with transferring cells from flask to slide
- Thickness, 0.13 to 0.17mm (Number 1)

12-545-8 Series

ORDERING INFORMATION: Supplied in pack of 1 oz.

Circle Diameter	Cat. No.	Pack of 1 oz.	Case of 10 Pack
12mm	**12-545-82**	176.73	1510.54
15mm	**12-545-83**	119.71	1023.13
18mm	**12-545-84**	105.15	898.74
22mm	**12-545-85**	87.95	778.35
25mm	**12-545-86**	87.20	771.53

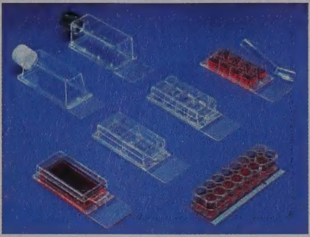
Nunc* Lab-Tek* Chamber Slide* System



From left to right: (top) 12-565-23 and 12-565-112; (middle) 12-565-15, 12-565-20, 12-565-22 and 12-565-18; (bottom) 12-565-110N

Convenient cell culture on microscope slides

Unique removable chamber lets you grow anchorage-dependent cells right on the microscope slide which can be used later for staining and microscopic examination. Select from three styles; all are sterile.

Chamber Slide Systems

- 1-, 2-, 4-, and 8-well configurations; all measure 25 × 75mm
- Available with a Permanox* solvent-resistant plastic tissue culture-treated slide or a glass slide (16-well format available with glass slide only) suitable for adherent cell culture
- Both styles feature a writing surface for easy identification, detachable upper structure and cover
- Medical-grade silicone sealing gasket can be removed for cover slipping

SlideFlask Chamber (shown with black cap in photo)

- Employs tissue culture-treated polystyrene slide attached to 18 × 50mm flask structure via ultrasonic weld—allowing for long-term, leak-free incubation
- Upper flask structure snaps away easily after culture—freeing slide for microscopic examination

The Flaskette* Chamber (shown with white cap)

- Glass slide with a silicone gasket and a 20 × 50mm upper flask structure
- Can be sealed to exclude air—useful when embedding cells in resin for electron microscopy

From left to right: 12-565-472, -471; (bottom) 12-565-401; (top) 12-565-470

Enhanced for culturing and viewing living cells

- Nonremovable polystyrene media chambers secured to a No. 1 borosilicate cover glass
- Thin cover glass provides optimum optical characteristics required for high-magnification microscopy
- Sterile

Nunc* Lab-Tek* II CC2* Chamber Slide* System

12-565-1, -2, -3, -4

Designed for growing and viewing primary neurons or poorly adherent cell lines

- Enhanced version of the Nunc Lab-Tek II Chamber Slide System enables cell growth directly on a glass microscope slide
- Chemically modified CC2 growth surface mimics biological coatings like polylysine; remains stable and consistent for over one year without refrigeration
- Tabbed cover allows gas exchange while minimizing evaporation
- Completely sterile
- Removal tool separates chamber from glass; adhesive remains with wells so slide is ready for a cover slip

INCLUDES:

Removal tool

Nunc* Lab-Tek* II Chamber Slide* System

Miniature cell culture vessels with growth-enhancing RS wash

12-565-5, -6, -7, -8

Consist of a removable media chamber attached to a standard glass microscope slide (25 × 75mm)—grow cells directly on slides. Slides are specially treated with a unique RS wash to ensure a consistent growth surface.

- Completely sterile and available in 1-, 2-, 4-, or 8-well configurations
- Tabbed cover fits on top of the chamber to allow gas exchange while minimizing evaporation
- Removal tool (included) makes it easy to separate the chamber from slide
- Superfrost* marking area facilitates labeling

INCLUDES:
Removal tool

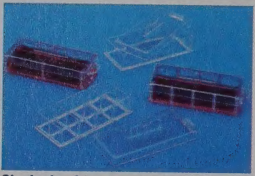
Nunc* Lab-Tek* II Chambered Cover Glasses

Enhanced for culturing and viewing living cells



Clockwise from top: 12-565-335, -337, -338, -336

- Nonremovable polystyrene media chamber securely mounted to extra-thin (No. 1.5) borosilicate cover glass for optimum high-power inverted microscopic viewing
- Gas exchange achieved with minimal evaporation through tabbed polystyrene cover

ORDERING INFORMATION:
Shipped sterile in convenient stackable incubation trays.

BD BioCoat* Precoated Glass Coverslips

Optically clear, thin glass coverslips coated with a variety of extracellular matrix substrates

- Exhibit low background fluorescence—ideal for immunofluorescence microscopy
- Constructed of No. 1 German glass; nontoxic to neurons
- Each lot of cellware has been tested and found negative for bacteria and fungi

APPLICATIONS:
Fluorescence imaging of live cells, confocal microscopy, high resolution and inverted microscopy, phase contrast microscopy

BD Falcon* Culture Slides

For in situ DNA amplification/hybridization, tissue and tumor typing/pathology, or any study requiring a small, accessible culture area

- Polystyrene chamber affixed to a specially cleaned and triple-rinsed glass microscope slide (25 × 75mm)
- Safety Removal Tool separates wells from slide; gasket remains with plastic vessel and doesn't interfere with further processing
- Sterile

08-774-24 and 08-774-25 with Safety Removal Tool (included)

ORDERING INFORMATION:
Available with 1, 2, 4, or 8 wells, numbered for easy identification. Supplied with handled polystyrene lid. Packaged in disposable incubation trays. Each tray holds 12 slides.

INCLUDES:
Handled polystyrene lid, safety removal tool

Nunc* SonicSeal * System

Ideal for small-scale cell cultures

12-565-9

- Made from durable Permanox* plastic
- Features a 4-well media chamber sonically welded to a treated microscope slide
- Seal is 100% leak-tested; can be released using the supplied opener
- Specially treated slides ensure cell attachment and proliferation
- Provide better chemical resistance to fixatives and staining solvents than regular polystyrene slides; require an aqueous-based mounting medium when cover slipping
- Slides are nonautofluorescent and will accept most fluorescent labels
- One-way lid orientation with anti-evaporation rings prevents sample mix-up and cross-contamination
- Sterile

Working Volume	Growth Area	Mfr. No.	Cat. No.	Pack of 16	Case of 6 Pack

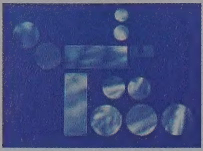
*Trademark. See Trademark Reference.

Prices subject to change.

Nunc* Thermanox* Cover Slips

Tissue culture-treated on one side to provide an excellent culturing environment

- Highly resistant to solvents including those commonly used for electron microscopy
- Cover slips will not shatter when cut with scalpel or microtome
- Radiation sterilized



12-565-2 Series, 12-565-87, 12-565-281A

BD BioCoat* Treated Culture Slides

Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology

- Supplied with preapplied extracellular matrices, facilitating cell adaption to in vitro cultivation
- Microporous membranes permit diffusion of ions, low-molecular-weight proteins and other substances to both apical and basolateral cell surfaces, simulating the natural environment of cells in vivo
- Low pore-density, track-etched polyethylene teraphthalate (PET) membranes offer convenient viewing of living cells with a phase-contrast microscope and have low-binding properties that minimize small molecule loss

ORDERING INFORMATION:

Supplied in ready-to-use BD Falcon* Companion Tissue Culture Plates

STORAGE CONDITIONS:

Stable for at least three months from date of shipment when stored at 2°–8°C (36°–46°F) unless otherwise specified.

NOTE:

These products are for research use only and are not intended for diagnostic purposes.

INSERTS

Millipore* Millicell* Culture Inserts with Hanging Geometry

Uniquely designed flanges suspend the insert within culture plate well for superior growth, ease of pipetting

- General-purpose for growth and differentiation of various cell types
- Polystyrene holder with polyethylene terephthalate (PET) membrane
- Allow cells to access media from the apical and basolateral sides in culture plates to closely mimic growth, structure, and function in vivo
- Ready-to-use: no extra cellular matrix (ECM) coating necessary
- Tissue culture-treated
- Gamma irradiated

PIRP Series

NOTE:

Incompatible with strong acids, strong bases, and certain organic solvents.

Millipore* Millicell* Culture Plate Inserts

Designed for improved cell differentiation and expanded applications involving analytical cell biology

PIHA 012 50

- Microporous membranes allow access to cell monolayer from both apical and basolateral domains; promote enhanced cell attachment, growth, and differentiation of attachment-dependent and suspension cultures
- Ready-to-use Millicell inserts fit most 6- or 24-well plates and are easily prepared for SEM and TEM techniques; compatible with standard and fluorescent stains
- Effective growth area for 12mm diameter inserts, 0.6cm^2; and 4.2cm^2 for 30mm diameter inserts

Millicell-HATF and Millicell-PCF Inserts

- Don't require an extracellular matrix for attachment-dependent cells
- Polystyrene housing; supplied sterile and individually blister packed
- Millicell-HATF Inserts utilize a mixed cellulose esters membrane; Triton*-free
- Millicell-PCF Inserts utilize tissue culture-treated polycarbonate membranes for use in co-culturing applications as well as tumor cell invasion and metastasis studies

Millicell-CM Inserts

- Incorporate transparent hydrophilic PTFE Biopore* membranes for neural growth and embryo development work
- Inert and allow repeated viewing of living cells through the membrane

Millicell-PC Inserts

- Feature polycarbonate membranes (in 0.4 and 3.0µm pore size) for suspension cell culture

APPLICATIONS:

Transport and permeability studies, co-culture for cell-cell interaction studies, in vitro toxicity testing, tumor cell metastasis studies, and organotypic cultures

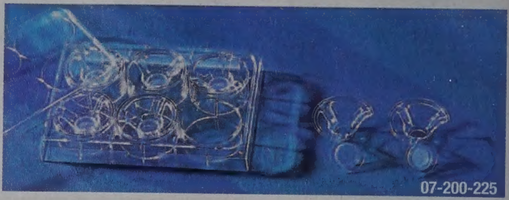
Corning* Snapwell* Culture Inserts



07-200-225

Two-piece polystyrene inserts with removable membranes

- 12mm culture-treated membrane available in polycarbonate or clear polyester
- Each modified Transwell* permeable support insert contains a removable membrane section that easily separates from its support
- Once cells are grown to confluence, the membrane section or ring is placed into a horizontal diffusion chamber

ORDERING INFORMATION:

Sterile culture inserts are packaged in 6-well cluster plates.

Membrane Material	Pore Size	Growth Area	Mfr. No.	Cat. No.	Case of 24

Clear Polyester	0.4µm	1cm^2	3801	**07-200-708**	149.82

Corning* Transwell-Clear* Permeable Supports

Clear polyester membrane allows excellent visibility for culture using phase-contrast microscopy

07-200-170

- Ideal for transport studies, chemotaxis, co-culture, and microbial pathogenesis studies
- Thin membrane (10µm) and straight pore structure provide consistent transport and cell migration
- Self-centering insert prevents media from wicking between the insert and the outer well
- Hangs from well to leave monolayers in the outer well undisturbed

LOOKING FOR PIPET TIPS?

Fisher Scientific carries pipet tips which are compatible with many brands and sizes of pipets. See the Pipetter Tips section.

*Trademark. See Trademark Reference.

Corning* Transwell*-COL Collagen-Treated Coated Membrane Insert

Transparent, collagen-treated microporous membranes promote cell attachment and spreading

- Designed for transport studies, co-culture, and other experimental procedures; improves visibility of cells during culture
- Membrane has an equimolar mixture of Types I and III collagen derived from bovine placenta—a biologically stabilized collagen which covers every fibril of the filter membrane matrix, maintaining porosity of the membrane

07-200-559

- Inside wall of the insert has also been treated to allow formation of a complete and integral monolayer; can be viewed by phase-contrast microscopy
- Tissue culture-treated

ORDERING INFORMATION:

Individually packed and supplied in package with tissue culture plates with lids; sterile

Corning* Transwell* Inserts and Dishes

Tissue culture-treated inserts supplied with 100mm diameter dishes

- Polycarbonate membrane is compatible with most organic fixatives and stains
- Insert diameter, 75mm; insert growth area, 44cm^2
- Sterile

07-200-173

APPLICATIONS:

Co-culture, drug transport, in vitro fertilization, and microbial pathogenesis studies

ORDERING INFORMATION:

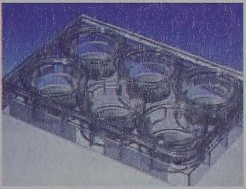
Individually wrapped. Twelve inserts (with dishes) per case.

Pore Size	Mfr. No.	Cat. No.	Case of 12
0.4µm	3419	**07-200-172**	321.76
3.0µm	3420	**07-200-173**	321.76

Corning* Transwell* Permeable Supports

For studying anchorage-dependent and -independent cells

- Microporous inserts come preloaded in Tissue Culture Plates
- Available tissue culture-treated in 6-, 12-, or 24-well formats
- Openings for pipet tips for convenient addition and removal of media and samples from both compartments
- Patented self-centering design provides independent access to both apical and basolateral membranes of the cell monolayer
- Polycarbonate membranes are compatible with most organic fixatives and stains



07-200-165

APPLICATIONS:

Epithelial and endothelial cell culture; transport, migration/invasion, co-culture, and microbial pathogenesis studies

Pore Size	Diameter	Growth Area	Mfr. No.	Cat. No.	Case of
For 6-well Plates					
0.4µm	24.5mm	4.7cm^2	3412	**07-200-165**	24/102.00
3.0µm	24.5mm	4.7cm^2	3414	**07-200-166**	24/104.00
8.0µm	24.5mm	4.7cm^2	3428	**07-200-169**	24/104.00
For 12-well Plates					
0.4µm	12mm	1.0cm^2	3401	**07-200-156**	48/191.05
3.0µm	12mm	1.0cm^2	3402	**07-200-157**	48/191.05
12.0µm	12mm	1.0cm^2	3403	**07-200-158**	48/191.05
For 24-well Plates					
0.4µm	6.5mm	0.33cm^2	3413	**07-200-147**	48/177.76
3.0µm	6.5mm	0.33cm^2	3415	**07-200-148**	48/177.76
5.0µm	6.5mm	0.33cm^2	3421	**07-200-149**	48/177.76
8.0µm	6.5mm	0.33cm^2	3422	**07-200-150**	48/177.76

Nunc* Tissue Culture Inserts

Membrane-based cylindrical inserts designed for use with standard tissue culture plates and dishes

Media bathes both top and bottom cell layers, simulating cell growth structure and function as found in the in vivo environment. Inserts allow cultures to be readily moved from one vessel to another, making it easier to establish and control co-culture of different cell types. All membranes are treated and biologically tested for adherent cell culture, radiation sterilized, and individually wrapped.

12-565-80

Anopore* Membrane Inserts

- Utilize a rigid, hydrophilic 0.02 or 0.2µm filter that offers excellent transparency when wet—ideal for microscopy and photography
- Maximum surface porosity, 40 to 50%
- 0.02µm inorganic filter ensures free diffusion of macromolecules with a molecular weight of ≤0.5kDa with good transparency characteristics
- Membranes can be easily removed from polystyrene housing for autoradiography or scintillation counting using Nunc Membrane Removal Tool (Cat. No. 12-565-288A)
- Membranes are chemically resistant to many organic solvents and won't interfere with fluorescent assays
- 8-well Strip insert conveniently fits in MicroWell* 96-well Plates, allowing miniaturization of assays, thus reducing costs and reagents, while permitting automated assays with pipetters and plate readers

Polycarbonate Membrane Inserts

- Suitable for use in many cell culture applications, especially chemotaxis studies where a large pore size is required
- Transparency varies with pore size

Pore Size	Diameter	Mfr. No.	Cat. No.	Case of

BD BioCoat* Cell Culture Inserts

Supplied with preapplied extracellular matrices, facilitating cell adaption to in vitro cultivation

- Designed to closely mimic in vivo environments and enhance expression of cell-specific morphology
- Microporous membranes permit diffusion of ions, low-molecular-weight proteins and other substances to both apical and basolateral cell surfaces, simulating the natural environment of cells in vivo
- Low pore-density, track-etched polyethylene teraphthalate (PET) membranes offer convenient viewing of living cells with a phase-contrast microscope and have low-binding properties that minimize small molecule loss

ORDERING INFORMATION:

Supplied in ready-to-use BD Falcon* Companion Tissue Culture Plates.

STORAGE CONDITIONS:

Stable for at least three months from date of shipment when stored at 2° to 8°C (36°–46°F) unless otherwise specified. Do not freeze.

NOTE:

These products are for research use only and are not intended for diagnostic purposes.

Collagen I, Rat Tail Cell Culture Inserts

Ideal for applications involving adhesion, growth and differentiation of neuronal and transfected cell lines

- Each lot is tested for the ability to promote attachment and spreading of HT-1080 human fibrosarcoma cells
- Tested and found negative for bacteria and fungi
- Cellware is also tested for ability to promote firm attachment of rat cerebellar granule cells

ORDERING INFORMATION:

Bulk quantities are also available; contact your Fisher Scientific Customer Service Representative.

FluoroBlok* Fibronectin Cell Culture Inserts

Detect migrated cells below membrane using a fluoresence plate reader

Inserts and Cellware are tested for their ability to promote attachment and spreading of BHK-21 hamster kidney cells.

NOTE:

The human plasma used in preparing this product was tested and found negative for HBsAg and HIV antibody.

Cellware Variety Packs

Useful in determining optimal substrates for growth or differentiation of specific cell types or to study interactions between cells and various ECM components

Multiwell Plate Variety Packs

- Variety Pack I contains four 6-well Multiwell plates—each coated with one of the following: Collagen I, Fibronectin, Laminin, and Poly-D-Lysine—plus one BD Falcon* tissue culture-treated 6-well plate
- Variety Pack II contains five treated 6-well plates, each coated with one of the following: Collagen I, Collagen IV, Fibronectin, Laminin, and Poly-D-Lysine

Cultureslide Variety Packs

- Contain twelve BD Falcon* slides coated with Collagen I, Fibronectin and Poly-D-Lysine
- All are stable for at least three months after date of shipment when stored at 2° to 8°C (36° to 46°F)

Description	Mfr. No.	Cat. No.	Price
Multiwell Plate Variety Packs			
Variety Pack I	354417	**08-774-132**	Cs. of 5/81.61

BD BioCoat* Cell Culture Inserts, Contd.

Cell Culture Inserts Variety Pack

Supplied in ready-to-use BD Falcon* Companion Tissue Culture Plates

Supplied with preapplied extracellular matrices, facilitating cell adaption to in vitro cultivation.

- With in 0.45 and 3.0µm pore sizes with 24-well companion plates
- Variety Pack 1 contains Collagen I, Fibronectin, Laminin, and control inserts
- Variety Pack II contains Collagen I, Collagen IV, Fibronectin, Laminin, and control inserts

INCLUDES:

24-well companion plates

NOTE:

Do not freeze. These products are for research use only and are not intended for diagnostic purposes.

Cell Culture Inserts	Inserts Per Plate	No. of Plates	Mfr. No.	Cat. No.	Case of
Variety Pack I					
24-well	12	4	354437	**08-774-142**	48/288.46
Variety Pack II					
24-well	12	5	354436	**08-774-141**	60/304.08

Matrigel* Cell Culture Inserts

Each lot is tested for the ability to promote tube formation of Fetal Bovine Heart Endothelial cells (FBHEC)

BD Matrigel* Matrix is a soluble basement membrane extracted from Engelbreth-Holm-Swarm mouse tumor which, when reconstituted at room temperature, forms a gel.

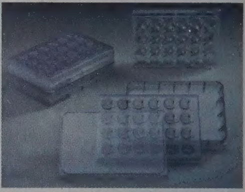
- Especially suited for culture of polarized cells, such as epithelial cells
- Coating promotes differentiation of hepatocytes, mammary epithelial cells and smooth muscle cells; also promotes capillary tubule formation of endothelial cells and neurite regeneration
- Can be used for angiogenesis assays

Cell Culture Inserts	Inserts Per Plate	No. of Plates	Mfr. No.	Cat. No.	Case of 24
6-well plate	6	4	354443	**08-774-117**	307.56
24-well plate	12	2	354447	**08-774-118**	258.84

LOOKING FOR FLUOROMETERS?
See Fluorometers section of this catalog.

BD Falcon* HTS Multiwell Insert Systems

Save time and labor in HTS protocols—grow, handle, and analyze 24 samples simultaneously



- Available in 1, 3, and 8µm pore sizes
- Feature a generous, automation-compatible sampling port which allows sampling above and below membranes
- Insert tray is removable from the feeder tray by most robotic arms—reducing the risk of contamination
- 24-well insert tray distributes media uniformly to each well

INCLUDES:

24-well insert plate, 24-well plate or single-well feeder tray, and lid

NOTE:

Additional feeder trays available (can be used with 08-781, 08-772-1, or 08-772-51, see next page).

Pore Size	Mfr. No.	Cat. No.	Pack of

8µm	351185	**08-780**	5/397.54

BD Falcon* 24- and 96-Multiwell FluoroBlok* Cell Culture Inserts and Insert Systems

Collect data without plate washing, cell scraping, and counting; chart cell migration or bioavailability in real time without dismantling or destroying the insert

FluoroBlock Inserts

- Homogeneous fluorescence assay system
- Chart cell migration or bioavailability in real time without dismantling or destroying the insert
- Each insert is fitted with a fluorescence blocking BD FluoroBlok* membrane
- Migrated cells below the membrane are easily detected by a fluorescence plate reader while those remaining above the membrane are made "invisible"

ORDERING INFORMATION:

Available in 1, 3, and 8µm pore sizes. One-piece 24- or 96-Multiwell insert system (insert plate, 24-well plate or single-well feeder tray, and lid) or 24-well individual cell culture inserts.

ACCESSORIES

Companion Plates for BD Falcon* Cell Culture Inserts

Patented companion plates feature a one-way, "labyrinth" lid design and condensation rings to minimize evaporation and contamination

- For use with BD Falcon Cell Culture Inserts and BioCoat* Inserts
- Companion plate wells have notches that hold the insert in place, permit pipet dispensing into the plate well, and ensure proper lid fit
- Sterile, tissue culture-treated, nonpyrogenic
- May be used with or without cell culture inserts

No. of Wells	Growth Area	Mfr. No.	Cat. No.	Case of 50
6	4.65cm²	353502	**08-771-24**	113.62
12	1.07cm²	353503	**08-771-22**	132.50

BD Falcon* Cell Culture Inserts

Cell culture on permeable supports results in greater morphological and/or physiological differentiation of many cell types

Clockwise from top: 08-771, 08-770, 08-771-10

Provide independent access to the basolateral and apical domains of polar cells. Track-etched polyethylene terephthalate (PET) membranes have individual, cylindrical pores and are tissue culture-treated on both sides for cell growth. PET housing is not tissue culture-treated in order to limit cell growth on the side walls of the insert.

- Translucent membranes for 0.4 and 3.0µm pore sizes have high pore density (HD) and are recommended for transport studies
- Transparent membranes are recommended for visualization of live cells by light microscopy
- Flanges on insert rim facilitate handling
- Gamma-irradiation sterilized
- Transport studies, immunocytochemistry, electron microscopy, migration and invasion, and co-culture

ORDERING INFORMATION:

Individually packaged in color-coded, peel-open medical-style packaging

NOTE:

For best results, use with tissue culture-treated BD Falcon Companion Plates.

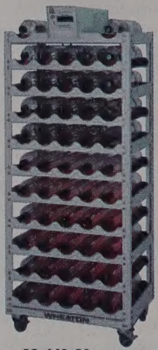
CELL CULTURE EQUIPMENT

Wheaton Cost Buster High Volume Production Roller Apparatus

Provides maximum cell culture production capacity in a minimum amount of space

- Accommodates roller bottles from 112 to 121mm in diameter and up to 550mm in length
- Each roller is driven by nonslip belts and pulleys for positive traction; ideal for use with lightweight plastic bottles
- Soft start feature minimizes cell disruption
- Bottle speed: 0.25 to 5.3rpm (other speeds available by special order; contact your Fisher Scientific Customer Service Representative)
- Controls and drive units are located on top of the apparatus for easy access
- Open frame design allows better airflow, minimizing top-to-bottom temperature gradients
- Maximum temperature for use is 40°C (104°F)



06-440-22

ORDERING INFORMATION:

Dimensions: (L × W × H): 30⅞ × 24¼ × 74⁹⁄₁₆" (78 × 61.5 × 189cm). Weight: 250 lb. (113.4kg). Electrical requirements: 100–120VAC 50/60H.

CERTIFICATIONS:

UL listed; conforms to UL, CSA, and CE standards; CE marked

Mfr. No.	Cat. No.	Each
349000-A	**06-440-22**	7784.82

Wheaton Compact Roller System for Mini Bottles

Designed for small-scale mixing and agitation, this space-saving roller is ideal for use in standard incubators and in coldrooms

22-288-524

Transistorized solid-state circuitry allows exact speed control of bottles and compensates against sudden or prolonged line-voltage changes. Roller shafts are mounted in self-lubricating nylon bearings for extended life.

Features

- Single-deck unit accommodates up to four 38 to 60mm dia. × 240mm long bottles
- Accommodates 38 × 200mm culture tubes for the growth and observation of single chicken or rat embryos
- Variable speed control from 3 to 45rpm (for 38mm dia. bottle), and 2 to 30rpm (for 60mm dia. bottle)
- Maximum temperature for use: 40°C (104°F)

ORDERING INFORMATION:

Dimensions (L × W × H): 12¼ × 12¾ × 7⅛" (32 × 32.5 × 18cm). For 100/120V 50/60Hz, 14w. Accepts up to two Mini Bottle Deck Kits (06-440-27, sold separately).

CERTIFICATIONS:

UL listed, CSA approved

Mfr. No.	Cat. No.	Each
W348923-A	**22-288-524**	1069.76

WARNING

Using this equipment in a CO_2 environment may necessitate more frequent replacement of motor brushes.

Wheaton Modular Cell Production Roller Apparatus

Flexible systems let you keep pace with scale-up and production of monolayer cell cultures

Standard models

- Consist of a base drive unit and five-position roller deck to which up to eight additional roller decks can be added
- Hold up to 90 roller bottles from 108 to 121mm in diameter and up to 550mm in length
- Powerful DC motor with soft start speed control drives the bottles through a series of durable nonslip belts
- Locking speed control knob prevents accidental change in rotation rates

All-position drive models

- Feature a positive traction drive system—each roller is individually driven
- Option may be field retrofitted in standard models (see accessory kit 02-911-570)

ORDERING INFORMATION:

For 120V, 50/60Hz, 35w. Weight of base unit with one deck: 70 lb. (32kg); each additional deck is 21 lb. (10kg). Dimensions of base unit with one deck: 24⅜L × 29¾W × 13½"H (62 × 76 × 34cm); each additional deck is 7⅛" (18.1cm) high.

NOTE: Best all-position drive performance is achieved with plastic bottles.

Model	Mfr. No.	Cat. No.	Each
Standard

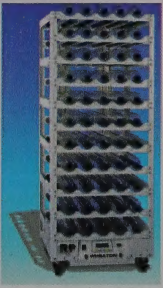
Wheaton R$_2$P* Roller Culture Apparatus

Go from research to production without having to change protocols and revalidate

Ideal for pharmaceutical or vaccine production. Simply add decks and optional features as needed.



02-911-549

- Large digital display and keypad enable easy input and monitoring of settings
- Units continually display the bottle rpm setting and actual bottle rpm
- Programmable soft start and stop feature avoids premature cell detachment; settings can be saved in one of ten memory locations or easy recall
- Rotational speed and drivetrain are continuously monitored; built-in rotation alarm can be tied to an existing monitoring system and provides both visual and audible warning of out-of-tolerance conditions
- All-position drive accepts glass or plastic bottles 110 to 121mm in diameter and up to 550mm long
- Optional CART$_2$* computer software monitors, controls, and records data on up to 2047 units
- With only 6" (15.2cm) between decks, it can accommodate up to 110 850 cm^2 bottles on eleven decks and still fit into most standard incubators, including The Breeder* (22-288-530), and Wheaton Roll-In Incubator (11-690-1A)

ORDERING INFORMATION:
Weight of drive unit with one deck: 53 lb. (24kg); each additional deck is 16½ lb. (7.5kg). Dimensions of drive unit with one deck is 24½L × 31W × 13½"H (62 × 79 × 34.5cm); each additional deck is 6"H (15.2cm). Electrical requirements: 110/120VAC, 50/60Hz, 35w.

CERTIFICATIONS:
UL listed. Conform to UL, CSA, and CE Standards.

NOTE:
Additional configurations are available; contact your Fisher Scientific Customer Service Representative for more information.

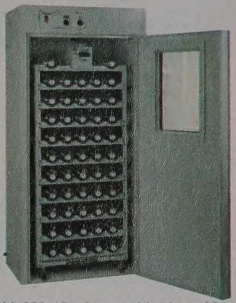
Wheaton Roll-In Incubator

Convenient, space-saving design for small production runs



11-690-1B, shown with 52-position roller apparatus (06-440-22), not included.

- Forced air circulation with digital temperature control provides temperature uniformity to ±0.5°C (empty incubator, no shelves)
- Independent overtemperature safety protection prevents culture loss
- Also features double-walled construction and built-in window
- Holds up to six shelves (order separately)

ORDERING INFORMATION:
Electrical requirements: 115V 60Hz

Wheaton Compact Roller System for Small Bottles

Extremely compact unit with adjustable rollers needs little benchtop space

22-288-525

- Well suited for research work; may be used in a CO$_2$ incubator.
- Handles two vessels 108-121mm in diameter and up to 290mm long
- Outside rollers can be moved inward to roll vessels as small as 75mm in diameter
- Bottle speed: 0.1 to 3.8rpm (based on a 110mm bottle)
- Maximum temperature for use: 40°C (104°F)

ORDERING INFORMATION:
Dimensions: L × W × H: 12¼ × 12¾ × 7⅛" (32 × 32.5 × 18cm). Electrical requirements: 120VAC 50/60Hz, 14w. Net Weight: 18 lb. (8kg).

FOR CELL WASHERS, see page 399

BEFORE YOU BUY BENCHTOP CENTRIFUGES

IMPORTANT TERMS TO KNOW

Sample Format – Make sure that the centrifuge supports the type of container the sam is in (i.e., blood tube, centrifuge tube, microplate, or PCR strip).

Capacity – The centrifuge should also support the total sample volume to be processed. The more samples processed per run, the greater your processing efficiency.

Rotor – With multiple rotor types available – fixed-angle, swinging-bucket, and micropl – it is important to determine the type of rotor needed to support your sample format an separation requirements.

RCF/G-force – Relative centrifugal force, or G-force, is the measurement of the force app to a sample within a centrifuge. Different protocols call for different G-force settings, so check the range supported by the centrifuge to make sure it meets your requirements.

Applications Versatility – Consider all of the applications the centrifuge may be used for, including the types of rotors, accessories and consumables. The more tasks a centrifuge can perform, the better your return on investment.

SAFETY FEATURES

Biocontainment – Understand your facilities' regulations with respect to biocontainment and ensure that all relevant accessories are tested and certified by internationally recognized safety organizations such as CAMR in Porton Down, UK.

Anti-Corrosive Material – Carbon fiber is a durable, lightweig alternative to conventional metallic rotors which, over time, can corrode and become a safety hazard. Carbon fiber is noncorrosive, offering significantly greater safety and durability.

Ease of Cleaning – For maximum safety, a centrifuge rotors, and accessories should be cleaned regularly. Choose a model with a watertight keypa and smooth surfaces that can be wiped down easily.

*Most centrifuges support multiple tube styles. 50mL conical tube used to illustrate representative capacity only.

Optional Carbon Fiber Rotors

FEATURES TO LOOK FOR

Compact footprint – Purchasing a compact centrifuge – or even a floor-standing unit – is a good way to conserve precious bench space.

Throughput – For optimum efficiency, look for rotors and adapters that accommodate the maximum number of samples per run.

Rotor Versatility – Choosing a centrifuge that accommodates a variety of rotors allows you to perform multiple tasks with a single unit. If you change rotors frequently, look for a model that allows you to change rotors quickly, without the use of tools.

User-friendly Controls and Bright Displays – Intuitive keypads and large displays make it easy to set parameters and monitor run conditions from across the lab.

120V Operation – Make sure the unit you select meets typical 120V US power receptacles if required.

For a full selection of Thermo Scientific® Centrifuges, see pp. 351, 354, 356, 358, 361-363, 369-371, 378, 380-381, 388-389, 391, 393, 399.

CENTRIFUGES

GENERAL PURPOSE

Thermo Scientific* Sorvall* Legend* T Plus/RT Plus Centrifuges

75-004-377

Versatile, 3L-capacity centrifuges deliver high rcf for tissue culture, virological tests, DNA/protein precipitations and other applications

Available in refrigerated or ventilated models, with the widest range of accessory rotors and adapters available for unmatched versatility.

- Capacity: 3L (4 × 750mL) with optional swinging bucket rotor 75-006-445 and round buckets 75-006-441 (order separately)
- Maximum speed/RCF: 15,000rpm/24,400×G
- Microprocessor soft-touch keypad control with large digital LED display for speed, rcf and run time
- Variable speed control from 300 to 15,000rpm in 10rpm increments
- Run time: 0 to 9 hrs., 59 min., continuous operation
- 4-program memory plus pretemp program
- Refrigerated model provides uniform temperature control from -9° to +40°C (15.8° to 104°F) for temperature-sensitive samples with CFC-free refrigerant

Safety Features

- Low profile working height for easy loading and unloading
- Automatic rotor recognition and electronic imbalance detection
- Dual lid-locking mechanism (soft-touch closure with lid interlock)
- Galvanized steel chassis with armored interior chamber
- Maintenance-free brushless drive motor runs quietly

ORDERING INFORMATION:

All units for 120V 50/60Hz; accessory fixed-angle, swinging bucket, microliter and microplate rotors and adapters are available separately online. All rotors are biocontainment approved.

REQUIRED ACCESSORIES:

Rotor (sold separately at right and on following pages)

CERTIFICATIONS:

24-Place Fixed-Angle Aluminum Rotor with Cover

24 × 1.5 to 2.0mL capacity

75-003-332

For use with Thermo Scientific* Sorvall* Legend* RT Plus and Stratos Centrifuges.

- Max speed/RCF in Legend RT Plus: 15,000rpm/21,890×G; in Stratos: 17,000rpm/28,110×G
- Angle: 45°
- Using accessory adapters (see microtube adapters below), accommodates 0.2 to 0.6mL microliter tubes
- Autoclavable

INCLUDES:

Rotor and screw-tight biocontainment lid

Capacity	Cat. No.	Each
24 x 1.5/2.0mL	**75-003-332**	1379.22

Microtube Adapters

For use with Thermo Scientific* Sorvall* Micro 17/Micro21*, Legend* T/RT Plus, Stratos and Primo/Primo R centrifuges in the rotors listed below. Accommodate tube sizes from 0.2 to 0.6mL.

- **Micro 17/17R and Micro 21/21R:** All rotors
- **Legend T/RT Plus and Stratos:** 75-003-332
- **Primo/Primo R:** 75-007-592, 75-007-593, and 75-007-599

For Tubes	Color	Cat. No.	Pack of 24
0.2mL	Gray	**76-003-750**	95.78
0.25/0.4mL	Red	**76-003-759**	95.78
0.5/0.6mL	Turquoise	**76-003-758**	95.78

Two-Place Sealed Highplate Rotor

Capacity: 2 × 1 filter plates or 2 × 5 microplates

75-006-444

For use with Thermo Scientific* Sorvall* Legend* T/RT Plus Centrifuges.

- Max. speed/RCF: 5250rpm/5084×G

INCLUDES:

Rotor and two screw-tight biocontainment covers

Capacity	Cat. No.	Each
2 × 1 filter plates or 2 × 5 microplates	**75-006-444**	2437.31

Four-Place Swinging Bucket Bioshield Rotor with Cover

4 × 250mL capacity (rectangular buckets)

75-006-435

For use with Thermo Scientific* Sorvall* Legend* T/RT Centrifuges.

- Max speed/RCF: 5350rpm/5820×G
- Autoclavable aluminum body with stainless-steel outer casing
- Accessory adapters allow rotor to accept volumes from 1.5 to 250mL

INCLUDES:

Rotor, pair of screw-tight biocontainment lids, lubricant

Capacity	Cat. No.	Each
4 × 250mL	**75-006-435**	3686.47

ACCESSORIES

Six-Place Fixed-Angle Highconic* Rotor with Cover

6 × 50mL capacity

75-003-057

For use with Thermo Scientific* Sorvall* Legend* T Plus/RT Plus and Stratos Centrifuges. 45° angle design enhances pelletization and reduces processing time. Separates sample at bottom of tube, rather than on walls, to produce a compact pellet and well-clarified supernatant.

- Maximum speed/RCF: 8500rpm/10,020×G
- Biocontainment approved
- When equipped with accessory adapters, accepts tubes from 1.5 to 50mL, including 15 and 50mL Falcon tubes
- Autoclavable

INCLUDES:
Rotor, lid and grease

Capacity	Cat. No.	Each
6 × 50mL	**75-003-057**	2698.55

Six-Place Fixed-Angle Rotor with Cover

6 × 94mL capacity

75-003-334

For use with Thermo Scientific* Sorvall* Legend* T Plus/RT Plus and Stratos Centrifuges.

- Max. speed/RCF, Model T Plus: 10,500rpm/12,450; Model RT Plus: 12,000rpm/16,260×G; Stratos: 15,000rpm/25,410×G
- Angle: 26°
- Autoclavable aluminum body
- Accessory adapters accommodate tubes from 1.5 to 50mL

INCLUDES:
Rotor, screw-tight biocontainment lid, trunnion grease

Capacity	Cat. No.	Each
6 × 94mL	**75-003-334**	2568.46

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

Four-Place Swinging Bucket Rotor

Stainless-steel rotor body only

75-006-434

For use with Thermo Scientific* Sorvall* Legend* T Plus/RT Plus. Accepts either 250mL rectangular buckets (75-006-446), 750mL round buckets (75-006-441), microplate carriers (75-006-449), conical tissue culture buckets (75-006-497) or multiple buckets (75-006-470 and 75-006-471); order separately. Autoclavable.

- **With rectangular buckets.** Capacity: 4 × 250mL. Max. speed/RCF; 3750rpm/2990×G. Max. tube O.D. × L: 62 × 125mm
- **With round buckets.** Capacity: 4 × 750mL. Max. speed/RCF; 4150rpm/3700×G. Max. tube O.D. × L: 100 × 146mm
- **With microplate carriers.** Capacity: Four plates. Max. speed/RCF; 4150rpm/3061×G
- **With tissue culture buckets.** Capacity: 4 × 250mL conical.; Max. speed/RCF: 3750rpm/3350×G
- **With 20-place multiple buckets.** Capacity: 20 × 10 to 15mL; Max. speed/RC: 3750rpm/3020×G
- **With 25-place multiple buckets.** Capacity: 25 × 5 to 7mL; Max. speed/RCF: 3750rpm/2810×G

ORDERING INFORMATION:
Available in two styles: with tool (supplied; secures rotor to centrifuge) or without tool (has screw-tight knob to secure rotor). Optional tube adapters handle wide variety of tubes with volumes as low as 1.5mL.

Style	Cat. No.	Each
Without tool	**75-006-434**	1725.30
With tool	**75-006-445**	1725.30

Buckets

Round or rectangular buckets for use with Four-Place Swinging Bucket Rotors 75-006-445 and 75-006-434.

ORDERING INFORMATION:
Sold individually; order correct quantity to equip rotor. Sealing lids sold separately. Accessory adapters accept assorted tube styles and volumes from 1.5 to 250mL.

Shape	Capacity	Max. O.D. × L	Cat. No.	Each
Round	750mL	100 × 146mm	**75-006-441**	423.59
Rectangular	250mL	62 × 125mm	**75-006-446**	489.72

Sealing Caps

For use with rectangular bucket 75-006-446 or round bucket 75-006-441 in Four-Place Swinging Bucket Rotors 75-006-445 or 75-006-434.

- Provide aerosol-tight biocontainment for buckets
- Polyetherimide

Shape	For Use with	Cat. No.	Each
Round	75-006-441	**75-006-421**	395.03
Rectangular	75-006-446	**75-006-448**	389.00

*Trademark. See Trademark Reference.

Prices subject to change.

ACCESSORIES, cont'd.

Microplate Carrier

Capacity: 4 × 4 standard microplates (or one deepwell plate)

For use with Four-Place Swinging Bucket Rotors 75-006-441 and 75-006-446.

- Maximum speed/RCF: 4150rpm/3060×G
- Maximum carrier height: 60mm

Cat. No.	Each
75-006-449	668.71

Multiple Buckets

For high-capacity blood collection tubes; use with Four-Place Swinging Bucket Rotors 75-006-445 and 75-006-434.

- Two sizes available: 20 × 10 to 15mL or 25 × 5 to 7mL
- Maximum speed/RCF: 3750rpm/2810×G (25-place bucket) or 3020×G (20-place bucket)

ORDERING INFORMATION:
Buckets sold individually; order correct quantity to equip rotor.

Capacity	Max. Speed	Max. Force	Max. Tube O.D. × L	Cat. No.	Each
25 × 5/7mL	3750rpm	2810×G	14 × 120mm	**75-006-470**	636.50
20 × 10/15mL	3750rpm	3020×G	17 × 140mm	**75-006-471**	636.50

Tissue Culture Bucket

For use with Four-Place Swinging Bucket Rotors 75-006-445 and 75-006-434

- Maximum speed/RCF: 3750rpm/3350×G
- Accepts 250mL conical tissue culture tubes
- Max. tube O.D. × L: 61 × 70mm

ORDERING INFORMATION:
Buckets sold individually; order correct quantity to equip rotor.

Capacity	Cat. No.	Each
250mL	**75-006-497**	293.85

Tube Adapter for Rectangular Buckets

For use with four-place Bioshield rotor 75-006-435 and with four-place rotor 75-006-445 when equipped with rectangular bucket 75-006-446.

NOTE:
Adapters sold individually; order correct quantity to equip rotor.

For Tubes	Tube Type	Max. O.D. × L	No. of Slots	Cat. No.	Each
1.5/2.0mL	Microliter	13 × 50mm	56	**75-006-452**	120.66

100mL	DIN	66 × 120mm	1	**75-006-462**	117.72

Tube Adapters for Round Buckets

For use with four-place rotors 75-006-445 and 75-006-434 when equipped with round bucket 75-006-441.

- Maximum tube length (in chart) is with biocontainment lid 75-006-421 in use

NOTE:
Adapters sold individually; order correct quantity to equip your rotor.

† Conical tubes require additional conical adapter pad, not included.

New High-Throughput Tube Adapters for Round Buckets

High-capacity adapters fit 750mL Round Bucket (75-006-441) to spin 5, 7 and 10mL blood collection tubes and 50mL conical tubes.

Visit www.fishersci.com and search for 11-210-821

Carbon Fiber Rotors

Ultralight rotors allow easier handling and faster rotor changes for higher throughput

For use with Thermo Scientific* Sorvall* Legend* R/RT Plus Centrifuges.

- Resist corrosion and withstand repeated autoclaving
- Tube adapters sold separately

Description	Max. Speed	Max. Force	Cat. No.	Each
6 x 250mL Fixed-Angle Carbon Rotor	10,000rpm	15,316×G	**75-006-517**	3600.00

8 x 50mL Fixed-Angle Conical Tube Carbon Rotor	12,000rpm	16,743×G	**75-006-516**	2800.00
48 x 1.5/2.0mL Microtube Carbon Rotor	15,000rpm	24,400×G	**75-006-527**	1920.00

Thermo Scientific* Sorvall* Legend* T3/RT3 Centrifuges

Benchtop models deliver safe, efficient high throughput for industrial, research and clinical labs

Optional accessories meet stringent biocontainment requirements.

Operating Features

- Capacity: 3L (4 × 750mL)
- Max. Speed/RCF, T3: 7800rpm/9115×G; RT3: 8000rpm/9588×G
- Microprocessor control system ensures continuous speed regulation for high-quality separations
- Intuitive, watertight control panel with digital display
- 99 min. timer with HOLD feature for continuous runs
- Brushless induction motor delivers quiet operation with minimal maintenance
- Space-saving design

Safety Features

- Audible/visual alarms alert user to operating anomalies
- Rotor imbalance detector with automatic shutoff
- Automatic rotor recognition controls maximum allowable speed
- Double-lid locking system and armored chamber ensure operator safety

Refrigerated Model RT3

- Provide excellent cooling performance, even at maximum speed
- Pre-cool function
- Temperature Range: -9°C to +40°C
- Ozone-free, CFC-free refrigerant

ORDERING INFORMATION:
Optional rotors and adapters are sold separately (see below and following pages)

REQUIRED ACCESSORIES:
Rotor (sold separately)

COMPLIANCE:
IEC 1010-1, IEC 1010-2-020

CERTIFICATIONS:

ACCESSORIES

4-Place Swinging Bucket Rotor

Versatile high-throughput rotor

For use with the Thermo Scientific* Sorvall* Legend* T3 and RT3. Accepts buckets or carriers to spin tubes, bottles, microplates and special containers.

- Capacity: 4 × 750mL
- Designed to be loaded into centrifuge with buckets/carriers already in place
- Sealed buckets 05-376-262 offer biohazard protection
- Transparent sealing caps allow visual detection of biological risks

ORDERING INFORMATION:
Tube adapters sold separately

INCLUDES:
Rotor body only

05-376-260

05-376-300

REQUIRED ACCESSORIES:
Buckets or carriers (order separately)

COMPLIANCE:
Sealed bucket 05-376-262 conforms to CAMR, Porton Down (UK) standards for biological containment.

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

LOOKING FOR LIQUID HANDLING PRODUCTS?

Fisher Scientific offers unsurpassed selection for all of your liquid handling and dispensing needs. From simple dispensers to state-of-the-art ergonomic pipetters, you'll find all these products in the following sections: Pipet Fillers, Pipets, Pipetters, and Pipetter Tips.

Thermo Scientific* Sorvall* Legend* Mach 1.6* Benchtop Centrifuges

Mid-sized (1.6L) general-purpose centrifuges are ideal for clinical, microbiological, biotechnological, pharmaceutical and general lab environments

Choose from ventilated model Mach 1.6 or refrigerated model 1.6R. A selection of five optional rotors allows maximum versatility.

Operating Features

- 1.6L capacity (4 × 400mL)
- Max. speed/RCF: 15,000rpm/24,652×G
- Soft-touch keypad controls (EASYset*)

Safety Features

- Ergonomic low-profile and space-saving design
- Automatic rotor recognition and electronic load imbalance detection
- Soft-Touch lid closure mechanism
- Quiet, maintenance-free brushless drive

75-004-317, 75-004-337

Centrifugation Glossary

Capacity—Maximum volume of liquid that a rotor can hold with all chambers filled

Centrifugal Force (symbol G)—a unit of measurement for samples undergoing the stress of acceleration in a centrifuge; it is the force exerted on a rotating body or particle, tending to pull it away from the center of rotation.

RCF (Relative Centrifugal Force)—the force that the sample undergoes. It is dependent on the speed of rotation (Q) in rpm and the rotating radius (r).

Calculating RCF

RCF can be determined from the speed (rpm) and the rotational radius using the following formula:
$G = RCF = (1.12 \times 10^{-5})rN^2$.
where G = relative centrifugal force, r = rotational radius (cm), N = rotating speed (rpm)

Rotor Types

- **Swinging Bucket**—suitable for cell culturing applications because sediment forms on the bottom of the tube. Versatile rotors that typically can be fitted with round or rectangular buckets and a wide range of tube adapters.
- **Fixed-Angle**—ideal for pelleting; collects sediment diagonally in the tube. Achieve higher rpm/rcf than other rotor types. Often supplied with biocontainment lid for working with hazardous samples.
- **Microplate**—used for nucleic acid separations, oligos concentrations and protein or peptide recovery; accepts pairs of standard or deepwell microplates.
- **Drum**—holds tube racks and spins samples in horizontal position
- **Trunnion**—similar to swing-bucket rotors; equipped with sleeves to hold centrifuge tubes. Sleeves fit into trunnion rings mounted to rotor body and swing out during centrifugation.

Commonly Used Centrifuge Tubes

- **Conical-bottom**—ideal for cell culturing and ammonium sulfate precipitations.
- **Oak Ridge**— best suited for high-speed centrifugation and lipid extraction.
- **Round-bottom**— have a uniform wall thickness for a more secure fit than conical tubes; withstand higher G-forces.

ACCESSORIES

4-Place Swinging Bucket Rotor

For use with Thermo Scientific* Sorvall* Legend* Mach 1.6* Centrifuges.

- Rotor body only; buckets and biocontainment lids sold separately
- Choose rectangular or round buckets
- Adapters sold separately

75-002-000 rotor body with round buckets 75-002-002

75-002-000 with rectangular buckets 75-002-001

Description	Cat. No.	Each
Swinging bucket rotor body	**75-002-000**	1434.15

Buckets and Lids

For use with 4-Place Swinging Bucket Rotor 75-002-000, above.

- Choose rectangular or round buckets
- Rectangular Bucket (75-002-001) capacity: 150mL
- Round Bucket (75-002-002) capacity: 400mL
- Aerosol-tight lids are suitable for biocontainment use

REQUIRED ACCESSORIES:

Buckets and lids are sold separately. Buckets are sold individually; order correct quantity for your rotor. Lids are sold in pairs.

Description	Fits Cat. No.	Cat. No.	Price

6-Place Highconic* Rotor

For use with Thermo Scientific* Sorvall* Legend* Mach 1.6* Centrifuges.

- Capacity: 6 × 94mL
- Max. Speed/RCF: 10,150rpm/14,513×G
- Biocontainment approved
- Adapters sold separately

75-002-006

INCLUDES:

Rotor and lid

Max. Capacity	Cat. No.	Each
6 × 94mL	**75-002-006**	2410.88

Thermo Scientific* Sorvall* Legend* T1/RT1 Centrifuges

Compact 1.2L models for routine, high-capacity, high-throughput processing

Chose from ventilated model T1 or refrigerated model RT1, both with patented Auto-Lock* quick rotor exchange.

Operating Features

- Capacity: 4 × 280mL
- Max. Speed/RCF: 14,600rpm/23,113×G
- Microprocessor control system ensures continuous speed regulation for high-quality separations
- Intuitive user-friendly control panel and digital display
- Quick-recall keys provide single-keystroke access to frequently used programs
- Pre-cool function
- Brushless induction motor delivers whisper-quiet operation with minimal maintenance
- Space-saving design

Safety Features

- Automatic rotor recognition
- Load imbalance dectection
- Full-coast (no brake) capability for smooth sotps

Auto-Lock Rotor Exchange

- Rotor can be changed in as little as five seconds
- Secures rotor in place with minimal effort
- No tools required—rotor snaps and locks into place; unfastens instantly
- Allows easy, efficient cleaning of rotor and bowl

Refrigerated Model RT1

- Temperature Range: -9°C to +40°C
- Ozone-free, CFC-free refrigerant

Thermo Scientific* Sorvall* Stratos Benchtop Centrifuges

High-speed refrigerated centrifuges

Wide selection of accessory biocontainment rotors for exceptional versatility.

Operating Features

- Capacity: 720mL (4 × 180mL)
- Max. speed/RCF: 23,300rpm/50,377×G
- Touch keypad control panel and digital display for time, speed and force
- Temperature control from -9° to +40°C
- Variable speed control from 300 to 23,300rpm (10rpm increments)
- Timed runs to 9 hr., 59 min.
- Quick-run key for short spins
- Acceleration and braking curves: 9/9
- Memory stores up to nine programs plus precool program
- Accept loads up to 4 × 180mL (or four microplates) when equipped with four-place swinging bucket rotor 75-003-047 (order separately)
- With optional microliter rotors, accept a maximum of 24 × 1.5/2.0mL tubes

Safety Features

- Dual lid locking mechanism
- Automatic rotor recognition and electronic load imbalance detection
- Active drive damping ensures sample integrity in the event of tube breakage
- CFC-free refrigerant
- Low-noise, brushless induction motor is maintenance-free

Thermo
SORVALL Biofuge stratos

75-005-293

ORDERING INFORMATION:

Dimensions (D × W × H): 23⅜ × 25¼ × 15⅝" (60 × 64 × 40cm).
Net weight: 295 lb. (134kg): Accessories, including fixed-angle, bucket and microplate rotors and adapters, are sold separately; below and on following page all rotors are designed to provide biocontainment protection.

INCLUDES:

Centrifuge only

REQUIRED ACCESSORIES:

Rotor (sold separately)

Electrical Requirements	Max. Speed	Max. Force	Cat. No.	Each
120V 50/60Hz	22,000rpm	44,910×G	**75-005-293**	12,781.00
208V 50/60Hz	23,300rpm	50,377×G	**75-005-294**	12,781.00

ACCESSORIES

24-Place Fixed-Angle Aluminum Rotor with Cover

24 × 1.5 to 2.0mL capacity

For use with Thermo Scientific* Sorvall* Legend* RT and Stratos Centrifuges.

- Max. speed/RCF in Legend RT: 15,000rpm/21,890×G; in Stratos: 17,000rpm/28,110×G
- Angle: 45°
- Using accessory adapters (see Thermo Scientific* Sorvall* Microtube Adapters), accommodates 0.2 to 0.6mL microliter tubes
- Autoclavable

INCLUDES:

Rotor and screw-tight biocontainment lid

Capacity	Cat. No.	Each
24 x 1.5/2.0mL	**75-003-332**	1379.22

24-Place Fixed-Angle Rotor

24 × 1.5mL capacity

For use with Thermo Scientific* Sorvall* Stratos Centrifuges.

- Max. speed/RCF: 23,300rpm/50,377×G
- Angle: 45°

Capacity	Cat. No.	Each
24 × 1.5mL	**75-003-331**	1379.22

Round Bucket

For use with Four-Place Swinging Bucket Rotor 75-003-047. Capacity per bucket: 180mL.

ORDERING INFORMATION:

Sold in pairs; order correct quantity to equip rotor. Aerosol-tight lids (75-008-173) sold separately. Optional adapters accept assorted tube styles and volumes from 1.5mL to 100mL.

Capacity	Cat. No.	Each
180mL	**75-008-172**	321.86

Contd. on next page.

ACCESSORIES

Four-Place Swinging Bucket Rotor

4 × 180mL capacity (round buckets)

For use with Thermo Scientific* Sorvall* Stratos Centrifuges.

- Swinging bucket rotor body
- Max. speed/RCF: 5000rpm/4863×G
- Accessory adapters allow rotor to accept volumes from 1.5 to 100mL

Capacity	Cat. No.	Each
4 × 180mL	**75-003-047**	1054.00

Tube Adapters

For use with in Four-Place Swinging Bucket Rotor 75-003-047 with Round Bucket 75-008-172. Accommodate tube sizes from 1.5 to 100mL, plus US urine tubes.

ORDERING INFORMATION:
Adapters are sold individually; order correct quantity to equip rotor.

Capacity	Max. O.D. × L	No. of Slots	Color	Cat. No.	Each
12 × 1.5/2mL	11 × 42mm	48	Black	**75-008-190**	60.96
9 × 7mL	13 × 125mm	36	Yellow	**75-008-189**	60.96
7 × 7mL blood	13 × 126mm	28	Gray	**75-008-188**	62.79

1 × 25mL universal	26 × 121mm	4	Green	**75-008-196**	60.96
1 × 50mL Falcon	30 × 133mm	4	Green/Yellow	**75-008-183**	62.79
1 × 50mL	36 × 132mm	4	Green	**75-008-182**	60.96
1 × 100mL	45 × 128mm	4	Blue	**75-008-181**	60.96
2 × US urine	17mm	8	Brown/Red	**75-008-195**	60.96

8-Place Fixed-Angle Rotor

8 × 50mL capacity

For use with Thermo Scientific* Sorvall* Stratos Centrifuges.

- Max. speed/RCF: 15,000rpm/26,920×G
- Angle: 34°

75-003-335

- Accessory adapters accommodate tubes from 1.5 to 38mL (sold separately)

INCLUDES:
Rotor and screw-tight aerosol cover

Capacity	Cat. No.	Each
8 × 50mL	**75-003-335**	2568.46

Thermo Scientific* Sorvall* Primo*/Primo R Benchtop Centrifuges

Compact multipurpose centrifuges for microliter, high-speed and general-purpose applications

Available with or without refrigeration.

Operating Features

- Capacity: 400mL (4 × 100mL)
- Max. speed/RCF: 15,000rpm/21,890×G
- Touch keypad control with digital display
- Variable speed control from 300 to 15,000rpm (by 10rpm); can also set rcf
- Timed runs up to 9 hrs., 59 min.
- Quick run feature for short spins
- Memory retains current settings
- Acceleration/braking curves: 2/9
- With optional rotor/adapter combinations, accept tubes from 0.2 to 100mL

Safety Features

- Dual lid-locking mechanism (soft-touch closure with lid interlock)
- Automatic rotor recognition and electronic imbalance detection system
- Maintenance-free brushless drive motor runs quietly (less than 60dBA)

Primo (nonrefrigerated)

- Dimensions (L × W × H): 18¾ × 15 × 12⅝" (48 × 38 × 32cm); weight: 88 lb. (40kg); for 120V 50/60Hz

Refrigerated Primo R

- Delivers uniform temperature control from -9° to +40°C for temperature-sensitive samples
- CFC-free refrigerant
- Dimensions (L × W × H): 19⅜ × 22¾ × 12¼" (49 × 58 × 31cm); weight: 153 lb. (70kg); for 120V 50/60Hz

75-005-448

ORDERING INFORMATION:
Primo centrifuges are compatible with a selection of biocontainment-approved fixed-angle, swinging bucket, microliter and microplate rotors and adapters (order separately, see next page).

INCLUDES:
Centrifuge only

REQUIRED ACCESSORIES:
Rotor (sold separately)

Model	Cat. No.	Each
Primo	**75-005-184**	3364.75
Primo R	**75-005-448**	8678.91

*Trademark. See Trademark Reference.

Prices subject to change.

ACCESSORIES

4-Place Swinging Bucket Rotor

Autoclavable rotor body only

75-007-591

For use with Thermo Scientific* Sorvall* Primo*/Primo R Benchtop Centrifuges.

- Capacity: 4 × 100mL round buckets (75-007-555); order separately
- Maximum speed/RCF: 4000rpm/2590×G

ORDERING INFORMATION:

Optional tube adapters handle wide variety of tubes with volumes from 1.5mL to 50mL.

Capacity	Cat. No.	Each
4 × 100mL	**75-007-591**	855.00

Round Buckets

For use with Four-Place Swinging Bucket Rotor 75-007-591

Capacity: 100mL.

ORDERING INFORMATION:

Sold individually; order correct quantity to equip rotor. Biocontainment lids (75-007-598) sold separately. Optional adapters accept assorted tube styles and volumes from 1.5mL to 50mL. No adapter is required to hold 100mL bottle.

Capacity	Cat. No.	Each
100mL	**75-007-555**	236.40

6-Place Fixed-Angle Highconic* Rotor with Cover

6 × 50mL capacity

For use with Thermo Scientific* Sorvall* Primo*/Primo R Benchtop Centrifuges.

Unique 45° angle design enhances pelletization and reduces processing time. Separates sample at bottom of tube, rather than on walls, to produce a compact pellet and well-clarified supernatant.

- Maximum speed/RCF: 8500rpm/10,015×G
- Autoclavable and biocontainment approved

ORDERING INFORMATION:

When equipped with accessory adapters (sold separately), accepts tubes from 1.5 to 50mL, including 15- and 50mL BD Falcon* tubes.

INCLUDES:

Rotor and lid

Capacity	Cat. No.	Each
6 × 50mL	**75-007-588**	2431.00

Thermo Scientific* Sorvall* HT6 Centrifuge

High-capacity, low-speed refrigerated floor centrifuge

Delivers traceable sample processing for clinical, genomics/proteomics, biochemistry, research, pathology, and RIA. High Reproducibility Factor (HRF) guarantees run-to-run reproducibility with absolute sample temperature control.

- Capacity: 6L (6 × 100mL)
- Max. Speed/RCF: 4250rpm/5735×G
- Intuitive VIDEOset interface with easy-to-read screen, online help and programmability
- 24-program memory accommodates multiple user protocols
- Advanced thin film technology offers superior temperature control for sample integrity
- Powerful refrigeration assures dependable results at full load, regardless of rotor or speed
- CQCS Network Quality Control System provides sample and unit traceability to GLP, GMP and ISO9000 via PC

ORDERING INFORMATION:

For information on delivery and installation, contact your Fisher Scientific Customer Service Representative. Optional rotors (sold separately, see following page): RP6 windshielded swinging bucket rotor with round or rectangular buckets in sealed or unsealed styles (Cat. Nos. 11-178-135, -136, -138, -140), and RHK4B swinging bucket rotor for RIA tubes (11-178-255).

REQUIRED ACCESSORIES:

Rotor (sold separately)

Description	Cat. No.	Each
HT6 Centrifuge	**11-178-191**	23,896.00

11-178-191

SPECIFICATIONS

Capacity	6L (6 × 1000mL)
Max. Speed	4250rpm
Max. RCF	5735×G
Control Type	Microprocessor with self-diagnostics
Display	VIDEOset graphics with info/error messages in two languages
Memory	24, individual password
Profiles	10 acceleration/10 braking
Refrigerated	Yes
Temperature Range	-20° to +40°C in 1°C increments
Timer	1 sec. to 99 min. 59 sec.; 1 min. to 99 hr. 59 min., plus HOLD
Dimensions (D × W × H)	35 × 31 × 37" (90 × 78 × 94.5cm)
Electrical Requirements	208V 60Hz

ACCESSORIES

6-Place Windshielded Swinging Bucket Rotor

For use with the Thermo Scientific* Sorvall* HT6 Centrifuges. Choice of rectangular or round buckets. Rectangular buckets include stainless-steel tray for microtubes, flat-bottom tubes and microplates.

- Capacity: 6 × 1000mL (with round buckets); 54 × 96-well microplates (with sealed rectangular buckets)
- Max. speed/RCF: 4250rpm/5735×G

ORDERING INFORMATION:
Tube adapters available separately.

INCLUDES:
Rotor body only

REQUIRED ACCESSORIES:

Fisher Scientific* accuSpin* Models 3/3R Benchtop Centrifuges

Large capacity centrifuges (3L) for everyday use

Provide versatility for a lab's changing needs. Available with or without refrigeration.

Operating Features

- Capacity: 3L (4 × 750mL)
- Maximum speed/RCF: 15,000rpm/21,890×G (Model 3R)
- Touch keypad with intuitive microprocessor controls
- LED digital display for start/stop curves, speed/force, time, and temperature (3R only)
- Timed and continuous-run modes, plus quick-spin feature
- 4-program memory plus a pre-temp program
- Nine preset start/stop curves
- Manufactured with ISO 9001:2000-certified process

Safety features

- Automatic rotor recognition and electronic load imbalance detection
- Steel housing and armored interior for superior protection
- Low profile (12½" [32cm]) working height for easy rotor access
- Electronic lid-locking system secures lid during operation
- Maintenance-free brushless motor runs quietly

Refrigerated accuSpin 3R

- Variable temperature control from -9° to +40°C
- CFC-free refrigerant
- When equipped with optional Microliter Rotor 13-100-524, reaches maximum speed of 15,000rpm (21,890×G)

ORDERING INFORMATION:

Optional accessories (order separately, see following page) include:

24 × 1.5/2mL Microliter Rotor (13-100-524, for Fisher Scientific accuSpin3R only)

Four-Place Swinging Bucket Rotor 13-100-518 (equip with either 750mL round buckets 13-100-520, rectangular buckets 13-100-522, or microplate carrier 13-100-523)

Tube adapters available for all rotors; based on rotor/adapter combination, centrifuges can handle vessel volumes from 0.5 to 250mL

Model	Cat. No.	Each
accuSpin 3	**13-100-517**	5554.87
accuSpin 3R (refrigerated)	**13-100-516**	8160.77

LOOKING FOR LIQUID HANDLING PRODUCTS?

Fisher Scientific offers unsurpassed selection for all of your liquid handling and dispensing needs. From simple dispensers to state-of-the-art ergonomic pipetters, you'll find all these products in the following sections: Pipet Fillers, Pipets, Pipetters, and Pipetter Tips.

13-100-516

REQUIRED ACCESSORIES:
Rotor (sold separately)

WARRANTY:
12 months parts and labor

COMPLIANCE:
IEC 1010

CERTIFICATIONS:
CE marked, CSA

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

ACCESSORIES

24-Place Microliter Rotor

24 × 1.5/2.0mL capacity

For use with Fisher Scientific* accuSpin* Model 3R Centrifuge only.

- Maximum speed/RCF: 15,000rpm/21,890×G
- Angle: 45° Biocontainment approved and autoclavable

Capacity	Cat. No.	Each
24 × 1.5/2.0mL	**13-100-524**	1384.90

Four-Place Swinging Bucket Rotor

For use with Fisher Scientific* accuSpin* Model 3/3R Centrifuges. Accepts round or rectangular buckets, or microplate carrier (order separately).

- **With round bucket (13-100-520):** 4 × 750mL capacity; speeds to 4150rpm/3700×G
- **With rectangular bucket (13-100-522):** 4 × 250mL capacity; speeds to 3750rpm/2990×G
- **With microplate carrier (13-100-523):** accepts 4 × 4 plates; speeds to 4150rpm/3060×G

INCLUDES:
Rotor body only

REQUIRED ACCESSORIES:
Buckets or microplate carrier (sold separately)

Capacity	Cat. No.	Each
4 × 250 to 750mL	**13-100-518**	1778.85

Buckets, Microplate Carriers and Lids

For use with swinging bucket rotor 13-100-518.

ORDERING INFORMATION:
Bucket lids sold separately.

Description	Capacity	Max. Speed/RCF	Cat. No.	Each
Round Bucket	750mL	4150rpm/3700×G	**13-100-519**	412.71

Fisher Scientific* accuSpin* Model 400 Benchtop Centrifuge

Versatile, economical centrifuge handles microvolumes or general purpose small-volume separations

Three optional rotors make unit suitable for labs with shared-use environments or changing needs.

Operating Features

- Capacity: 400mL (4 × 100mL)
- Maximum speed/RCF: 13,000rpm/16,060×G
- Variable microprocessor-based speed control
- Touch keypad with intuitive controls and digital display for speed, time and braking
- Adjustable timer and quick-spin feature
- Manufactured with ISO 9001:2000-certified processes

Safety Features

- Automatic rotor recognition and electronic imbalance detection
- Steel housing and armored interior chamber
- Electronic lid-locking system secures lid during operation
- Maintenance-free brushless motor runs quietly (0dbA)

13-100-557

ORDERING INFORMATION:

Accessories (sold separately, see following page) include:

6 × 50mL Six-Place Fixed-Angle Rotor (13-100-559)
4 × 100mL Swinging Bucket Rotor (13-100-569 with buckets 13-100-570)
24 × 1.5mL Microliter Rotor (13-100-558)

Tube adapters available for all rotors; based on rotor/adapter combination, centrifuge can handle tube volumes from 0.2 to 50mL.

REQUIRED ACCESSORIES:

Rotor (sold separately)

WARRANTY:

12 months parts and labor

COMPLIANCE:

IEC 1010

CERTIFICATIONS:

CE marked, CSA

15mL conical	1	**13-100-567**	70.12

24-Place Microliter Rotor

24 × 1.5mL capacity

For use with Fisher Scientific* accuSpin* Model 400 centrifuge.

- Maximum speed/RCF: 13,000rpm/16,060×G
- Angle: 40°
- Autoclavable
- Accepts tube adapters (sold separately) to accommodate 0.2 to 0.6mL microtubes

13-100-558

INCLUDES:
Rotor and biocontainment-certified lid

Capacity	Cat. No.	Each
24 × 1.5mL	**13-100-558**	757.20

4-Place Swinging Bucket Rotor

4 × 100mL capacity

For use with Fisher Scientific* accuSpin* Model 400 centrifuge.

- Maximum speed/RCF: 4000rpm/2590×G

REQUIRED ACCESSORIES:
Round buckets (13-100-570) and biocontainment lids (13-100-571), sold separately.

13-100-569, shown with 13-100-570 and -571 (not included)

Description	Cat. No.	Each

Thermo Scientific* IEC* CL31/CL31R Multispeed Centrifuges

Offer exceptional performance and versatility in a quiet, compact 1.2L size

NEW

Features Auto-Lock* quick rotor exchange. Choose from ventilated model CL31 or refrigerated model CL31R.

Operating Features

- Capacity: 4 × 280mL
- Max. Speed/RCF: 14,600rpm/23,113×G
- Microprocessor control system ensures continuous speed regulation for high-quality separations
- Intuitive user interface with digital display
- Quick-recall keys provide single-keystroke access to five frequently used programs
- G-force run control ensures transferability of protocols from other centrifuges without cross-referencing to rpm
- 99 min. timer
- HOLD mode for continuous runs and PULSE mode for quick spins
- Superior ventilation system protects samples from heat buildup
- Brushless induction drive delivers quiet operation with minimal maintenance
- Space-saving design

Auto-Lock Rotor Exchange

- Makes changing protocols and cleaning quick and efficient
- No tools required—rotor snaps and locks into place; unfastens instantly
- Rotor can be changed in as little as five seconds

Refrigerated Model CL31R

- Temperature Range: -9°C to +40°C
- Ozone-free, CFC-free refrigerant

APPLICATIONS:

Classrooms, cleanrooms, toxicology, biotech, water quality analysis, food quality testing and control, drug screening, clinical chemistry/hematology

ORDERING INFORMATION:

Optional rotors and accessory adapters are available online. All accessories are sold separately.

REQUIRED ACCESSORIES:

Rotor (sold separately)

COMPLIANCE:

IEC 1010, IEC 1010-2-020

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

Thermo Scientific* IEC* CL40/40R and FL40/40R Centrifuges

NEW

Benchtop and floor models deliver safe, efficient high throughput for industrial, research and clinical labs

Available with a broad array of rotors and accessories for high-volume tube and microplate applications.

Operating Features

- Capacity: 3L (4 × 750mL)
- Max. Speed/RCF, CL40/FL40: 7800rpm/9863×G; CL40R/FL40R: 8000rpm/10,375×G
- Microprocessor control system ensures continuous speed regulation for high-quality separations
- User-friendly, watertight interface with digital display
- 99 min. timer with HOLD feature for continuous runs
- Superior ventilation system protects samples from heat buildup
- Brushless induction drive delivers quiet operation with minimal maintenance
- Space-saving design

Safety Features

- Audible/visual alarms
- Rotor imbalance detector with automatic shutoff
- Automatic rotor recognition controls maximum allowable speed
- Double-lid locking system and armored chamber ensure operator safety

Floor Models FL40 and FL40R

- Benchtop capabilities in a free-standing design
- Locking wheels for portability and secure placement
- Small footprint saves floor space
- Gas spring-assisted lid opens and closes easily at convenient 34" (86cm) working height

Refrigerated Models CL40R and FL40R

- Provide excellent cooling performance, even at maximum speed
- Temperature Range: -9°C to +40°C
- Ozone-free, CFC-free refrigerant

APPLICATIONS:

Cleanrooms, pharmaceutical labs, genomic research, tissue/cell culture, biotechnology, toxicology, water quality analysis, food quality testing, drug screening, clinical chemistry

Thermo Scientific* IEC* Multi and Multi RF* High-Performance Centrifuges

High-performance, high-speed benchtop centrifuges

A wide range of accessory rotor options makes these units ideal for protein chemistry, molecular biology, and general research applications. Advanced features, including g-force control and At-Speed timer, deliver consistent repeatable results. Choose from refrigerated or ventilated models.

Operating Features

- Capacity: 1L (4 × 250mL)
- Max. speed/RCF: 16,800rpm/30,300×G
- Keypad control with digital display
- Max. tubes: 48 × 1.5/2.0mL
- Speed control: 500 to 16,800rpm by 50rpm
- G-force control: 50 to 30,300×G by 50×G
- Timer: 1 sec. to 99 hrs., 59 min. 59 sec. plus Auto-Reset
- SHORT-SPIN feature for quick separations
- Acceleration/Deceleration: Fast, slow, user-defined
- RS-232 port
- Manufactured with ISO 9001:2000-certified processes

Advanced Features

- Re-Run calculates the total integrated centrifugal effect experienced by a sample both during acceleration and while at speed, and then replicates the effect for additional samples
- At-Start* timer permits timing at the start of a run; At-Speed timer starts timing when the sample reaches operating speed
- Program control: 98 user inputs with SAVE/LOCK
- Quick braking from operating speed to open cover in 30–60 seconds

Safety Features

- Diagnostics: automatic rotor recognition, load imbalance, lid open, refrigeration/power failure
- Maintenance-free, low-noise (less than 62dBA) brushless motor
- Gasketed guard bowl for spill protection
- Cover interlock secures lid during operation
- Suction feet aid stability

Compact Multi Centrifuges (Ventilated)

- Dimensions: 25¾L × 20½W × 15"H (65 × 52 × 40cm)

05-375-74, 05-375-71

MultiRF Centrifuges (Refrigerated)

- Automatic quick cool/warm program
- Variable temperature control from -9° to +40°C by 1°C
- Cool samples to +4°C in less than 7 minutes
- Dimensions: 25¾L × 30¾W × 15"H (65 × 78 × 40cm)

INCLUDES:

Centrifuge only

REQUIRED ACCESSORIES:

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

LOOKING FOR LIQUID HANDLING PRODUCTS?

Fisher Scientific offers unsurpassed selection for all of your liquid handling and dispensing needs. From simple dispensers to state-of-the-art ergonomic pipetters, you'll find all these products in the following sections: Pipet Fillers, Pipets, Pipetters, and Pipetter Tips.

ACCESSORIES

48-Place Sealed Fixed-Angle Rotor

48 × 1.5 to 2.0mL capacity

For use with Thermo Scientific* IEC* Multi and Multi RF* Centrifuges. Use for gel recovery, lipid removal, nucleic acid precipitates, oligos concentration, protein and peptide recovery.

05-375-78
(microtubes sold separately)

- Maximum speed/RCF: 16,800rpm/30,300×G
- Accepts up to 48 × 1.5 and 2.0mL microtubes directly
- Angle: 45°; radius: 9.6cm

ORDERING INFORMATION:
Also accepts 0.25 and 4.0mL microtubes when equipped with adapter 05-152-4. To accommodate 0.5mL PCR tubes and BD* Microtainers*, use adapter 05-152-03. Adapters available separately online.

INCLUDES:
Rotor and aerosol-tight lid

Capacity	Max. Speed	Max. Force	Mfr. No.	Cat. No.	Each
48 ×1.5/2mL	16,800rpm	30,300×G	8848	**05-375-78**	1249.00

Eight-Place Sealed Fixed-Angle Rotor

8 × 50mL capacity

For use with Thermo Scientific* IEC* Multi and Multi RF* Centrifuges. Ideal for removing insoluble material, protein and peptide recovery, cell lysates and oligos concentration.

05-375-79
(Adapter and tubes sold separately)

- Maximum speed/RCF: 15,100rpm/25,200×G
- Directly accepts up to 8 × 50mL tubes, conical-bottom Falcon* or Corning* tubes
- Angle: 25°; radius 9.9cm

ORDERING INFORMATION:
Adapters (05-375-20, available online) reduce capacity to accept up to 8 × 15mL Falcon or Corning conical tubes.

INCLUDES:
Rotor and aerosol-tight lid

Capacity	Max. Speed	Max. Force	Mfr. No.	Cat. No.	Each
8 × 50mL	15,100rpm	25,200×G	8850	**05-375-79**	2313.00

Four-Place Swinging Bucket Rotor

4 × 250mL capacity

For use with Thermo Scientific* IEC* Multi and Multi RF* Centrifuges. Ideal for separating cellular components, removing insoluble material, bacterial and mammalian harvesting, lysates, tissue and cell homogenates.

- Maximum speed/RCF: 5300rpm/5150×G
- Radius: 17.5cm
- Includes four buckets to accommodate Aerocarrier* sealed tube carriers to accommodate tubes from 1.5 to 250mL

05-375-76

INCLUDES:
Rotor body and four buckets

Capacity	Max. Speed	Max. Force	Mfr. No.	Cat. No.	Each
4 × 250mL	5300rpm	5150×G	8947	**05-375-76**	2213.00

Oil Test Rotor Systems

Fisher Scientific offers two different rotors for oil testing with the older model Thermo Scientific* IEC* HN-SII centrifuge. Choose a system for conical (05-152-2) or pear-shaped (05-152-1) tubes. Systems include rotor, attached trunnion rings and four oil tubes and meet ASTM* standards. **NOTE:** This centrifuge is no longer available.

Visit www.fishersci.com and search for Oil test rotors

*Trademark. See Trademark Reference.

Prices subject to change.

ACCESSORIES

Aerocarrier* Adapters

For use in 05-375-76 (with Thermo Scientific* IEC* Multi/Multi RF*) and 05-375-45 (with Fisher Scientific Centra*-CL3/-CL3R) swinging-bucket rotors.

- With threaded transparent sealing cover with O-ring to provide aerosol containment when running toxic, infectious, or sterile samples
- Polypropylene, can be cleaned with bleach or decontamination washes

ORDERING INFORMATION:

Carriers are sold in packs of two; purchase the proper number to fully equip rotor.

Two-Place Doubledeep* Microplate Rotor

For use with Thermo Scientific* IEC* Multi and Multi RF* Centrifuges. Capacity: 2 × 5 shallow microplates, 2 × 2 stacked deepwell microplates (43mm maximum H), and one filter plate assembly with standard footprint of 86 × 128mm

- Maximum speed/RCF: 4400rpm/3050×G
- Radius: 14.2cm
- Total stacked assembly must be less than 90mm high

INCLUDES:

Rotor and two Doubledeep microplate carriers to use for nucleic acid precipitate, oligos concentration, protein and peptide recovery.

LOOKING FOR TUBES?

Plastic? Glass? Microvolume? Fisher Scientific offers a wide selection of centrifuge tubes in a variety of sizes, materials and styles. You'll find them in the Tubes section.

LOOKING FOR LIQUID HANDLING PRODUCTS?

Fisher Scientific offers unsurpassed selection for all of your liquid handling and dispensing needs. From simple dispensers to state-of-the-art ergonomic pipetters, you'll find all these products in the following sections: Pipet Fillers, Pipets, Pipetters, and Pipetter Tips.

Eppendorf* 5804/5810 Series Multipurpose Centrifuges

Benchtop centrifuges accommodate a variety of rotors for impressive application versatility

Virtually three centrifuges in one, with high-capacity volume for cell harvesting, high-speed centrifugation for separating cell lysates, and microvolume capability for DNA precipitations. Featuring powerful maintenance-free motors, compact Model 5804 and large-capacity Model 5810 are available with or without refrigeration.

05-400-61

Operating Features

- Capacity: 1.6L (4 × 400mL) for Models 5810/5810R
- Maximum speed/RCF: 14,000rpm/20,800×G
- Spin up to 48 × 15mL conical tubes (Model 5810 only) or up to 30 microtubes per run
- Touch-keypad control and digital display for speed/RCF, run time, program number and temperature (refrigerated Models 5804R/5810R only)
- With 34-program memory
- Run modes: Timed (up to 99 minutes in 1-minute increments) or continuous run
- Choice of 10 acceleration/braking profiles

Safety Features

- Low-profile design for convenient access to rotor chamber
- Motorized lid-lock
- Automatic rotor recognition and unbalanced load sensor with alert
- Low-noise (<60dB), maintenance-free motor

Refrigerated Models 5804R and 5810R

- CFC-free refrigeration system
- Variable temperature control from -9° to +40°C (16° to 104°F)
- Fast Cool function cools the rotor chamber from ambient down to 4°C within 15 minutes
- Standby refrigeration keeps the rotor chamber at set temperature
- Maintain temperatures as low as +4°C (39°F) at max. speed under heavy load
- Choose 15A or faster-cooling 20A versions

Compact Models 5804/5804R

- Accept tubes from 0.2 to 100mL
- Dimensions: 22L × 19W × 13"H (56 × 48 × 33cm); Model 5804R measures 25"W (63.5cm)

Large Capacity Models 5810/5810R

- Accept tubes and bottles from 0.2 to 400mL (with accessory adapters, sold separately)
- Can handle loads of up to 48 × 15mL conical tubes
- Dimensions: 24L × 21W × 13"H (61 × 53 × 33cm); Model 5810R refrigerated model measures 28"W (71cm)

Tube adapters and bucket covers (05-400-109) available separately.

INCLUDES:

Four tube buckets to accommodate tubes from 1.5 to 100mL when equipped with accessory adapters

Capacity	Mfr. No.	Cat. No.	Each
4 × 100mL	022637401	**05-400-94**	1365.00

Contd. on next page.

*Trademark. See Trademark Reference.

ACCESSORIES

Aerosol-tight Bucket Covers

For use with 100mL buckets supplied with 05-400-94 swinging bucket rotor. Covers fit over each bucket individually to provide an aerosol-tight seal.

Mfr. No.	Cat. No.	Pack of 2
022637428	**05-400-109**	114.43

Tube Adapters

Fit in buckets supplied with 05-400-94 swinging bucket rotor to accept tubes from 1.5 to 100mL.

NOTE:
Adapters are sold in packs of two. Order the proper number of adapters to fully equip your rotor.

For Tubes	Max. O.D. × L	No. of Slots	Mfr. No.	Cat.	Pack of 2
1.5 to 2mL	11 × 111mm†	12	022637525	**05-400-96**	197.00
7mL	13 × 108mm†	9	022637541	**05-400-97**	197.00
15mL	16 × 108mm†	7	022637568	**05-400-98**	197.00
15mL (conical)	17.5 × 121mm†	4	022637606	**05-400-100**	202.00
50mL (conical)	31 × 122mm†	1	022637665	**05-400-103**	202.00
80 to 100mL	45 × 114mm†	1	022637720	**05-400-106**	197.00

† Maximum dimensions when used in buckets without aerosol-tight covers. When covers are used, the maximum tube length accepted is reduced slightly.

Six-Place Fixed-Angle Rotor

6 × 85mL capacity

For use with 5804 and 5810 Series Centrifuges.

- Maximum speed/RCF: 11,000rpm/15,500×G (12,000rpm/18,500×G in Model 5810R)
- Directly accepts 85mL Oak Ridge tubes measuring 38 dia. × 120mm long

ORDERING INFORMATION:
Adapters are also available to accept tubes from 1.5 to 50mL (order at **www.fishersci.com**).

Capacity	Mfr. No.	Cat. No.	Each
6 × 85mL	022637207	**05-400-81**	1955.00

30-Place Fixed-Angle Rotor

30 × 1.5 to 2.0mL capacity

For use with 5804 and 5810 Series centrifuges.

- Maximum speed/RCF: 14,000rpm/20,800×G
- Directly accept 1.5 to 2.0mL microcentrifuge tubes measuring 11.5 dia. × 50mm long
- With quick-release lid or aerosol-tight cover

ORDERING INFORMATION:
Will also accept 0.5 and 0.4/0.25mL tubes when equipped with accessory adapters (05-406-10 and 05-406-25, respectively; order at **www.fishersci.com**).

Lid Type	Capacity	Mfr. No.	Cat. No.	Each
Quick-release	30 × 1.5–2.0mL	022637002	**05-400-88**	960.00
Aerosol-tight	30 × 1.5–2.0mL	022637100	**05-400-89**	1300.00

Deep-Well Swinging Bucket Rotor

Capacity: two deep-well assemblies or 10 microplates (filter and catch-plate stacks)

For use with 5804 and 5810 Series Centrifuges.

- Maximum speed/RCF: 3600rpm/1900×G
- Can be used with Eppendorf Perfectprep* Plasmid 96 Spin Kits (E003200 5900 and E003200 5950), "sandwiching" the membrane plate and deep-well block for a perfect fit in the rotor

05-401-04

INCLUDES:
Two buckets that hold up to 85mm high plates—perfect for tall deep-well blocks or multiwell assemblies such as 96-well nucleic acid isolation kits and filtration.

Capacity	Mfr. No.	Cat. No.	Each
Two deep-well assemblies	022638564	**05-401-04**	1690.00

Four-Place Swinging Bucket Microplate Rotor

Capacity: 16 microplates

For use in Model 5810 Series Centrifuges only.

- Maximum speed/RCF: 4000rpm/2750×G
- Maximum total plate height: 45mm

INCLUDES:
Four microtiter plate buckets, each accomodating up to four standard microplates for a maximum of 16 microplates per run

Capacity	Mfr. No.	Cat. No.	Each
16 plates	022638041	**05-400-80**	2280.00

Super High-Capacity Four-Place Swinging Bucket Rotor

Capacity 4 × 400mL

For use in 5810 Series Centrifuges only.

- Maximum speed/RCF: 4000rpm/3250×G
- Accepts up to 48 × 15mL conical tubes or 100 × 7mL tubes

04-987-252

ORDERING INFORMATION:
Tube adapters and aerosol-tight covers are available separately.

INCLUDES:
Four buckets that accept accessory adapters for tube sizes from 2.6 to 400mL.

Capacity	Mfr. No.	Cat. No.	Each
4 × 400mL	022638602	**04-987-252**	2640.00

Contd. on next page.

Eppendorf* 5810 Series Centrifuges, Contd.

ACCESSORIES

Tube Adapters

Fit 400mL buckets supplied with 04-987-252 rotor.

NOTE:
Adapters are supplied in packs of two. Order correct quantity to equip rotor.

For Tubes	Max. O.D. × L	No. of Slots	Mfr. No.	Cat. No.	Pack of 2
2.6–7mL tubes	13 × 108mm	25	022638700	**04-987-253**	249.00
7–17mL tubes	17.5 × 118mm	16	202638726	**04-987-254**	249.00
15mL conical	17.5 × 121mm	16	022638742	**04-987-255**	249.00
50mL conical	31 × 122mm	5	022638769	**04-987-256**	249.00
400mL bottles	81 × 133mm	1	022638785	**04-987-257**	202.00

Four-Place Swinging Bucket Rotor

4 × 250mL capacity

For use with Eppendorf* 5810 Series Centrifuges only.

- Maximum speed/RCF: 4000rpm/3200×G

ORDERING INFORMATION:
Aerosol-tight covers (05-400-65) are available separately to provide individual containment of each bucket. Microplate buckets (05-400-79) also available to spin microplates.

INCLUDES:
Four buckets which directly accept accessory adapters for 1.5 to 250mL tubes

Capacity	Mfr. No.	Cat. No.	Each
4 × 250mL	022638009	**05-400-64**	1860.00

Aerosol-tight Bucket Covers

For use with buckets supplied with 05-400-64 swinging bucket rotor. Covers fit over buckets individually to provide an aerosol-tight seal.

Mfr. No.	Cat. No.	Pack of 2
022638033	**05-400-65**	112.42

Tube Adapters

Fit in buckets supplied with 05-400-64 swinging bucket rotor to accept tubes from 1.5 to 250mL.

NOTE:
Adapters are sold in packs of two. Be sure to order the proper number of adapters to fully equip your rotor.

For Tubes	Max. O.D. × L†	No. of Slots	Mfr. No.	Cat. No.	Pack of 2
175–250mL	62 × 136mm	1	022638441	**05-400-78**	265.00
50mL (conical)	31 × 122mm	3	022638343	**05-400-73**	254.00
15mL (conical)	17.5 × 127mm	9	022638289	**05-400-70**	254.00
3–15mL	16 × 121mm	12	022638262	**05-400-69**	242.00
4–7mL	13 × 121mm	15	022638246	**05-400-68**	242.00
1.5–2.0mL	11 × 122mm	16	022638220	**05-400-67**	225.00

† Maximum dimensions when used in buckets without aerosol-tight covers. When covers are used, the maximum tube length accepted is reduced slightly.

Microplate Buckets

For use with 05-400-64 rotor to spin microplates.

- Each bucket accepts up to four standard microplates for a maximum of 16 microplates per run
- Maximum rotor speed/force: 4000rpm/2750×G
- Buckets can also be used in 05-400-80 rotor

Mfr. No.	Cat. No.	Pack of 4
022638068	**05-400-79**	1150.00

*Fisherbrand** 50mL HIGHER-SPEED TUBES

Graduated, conical-bottom polypropylene tubes withstand higher g-forces–up to 9400 ×G. You can find them in the Tubes section.

06-443-20

MORE TUBE ADAPTERS ONLINE

Visit www.fishersci.com and search for Eppendorf 5810

BEFORE YOU BUY MICROCENTRIFUGES

Rely on Eppendorf—a pioneer and industry leader in centrifugation—to provide you with the latest in microcentrifuge technology, safety features and application flexibility.

IMPORTANT TERMS TO KNOW

RCF (Relative Centrifugal Force)—The "true" value of a centrifuge's speed, RCF is determined by factoring both the RPM of the motor and radius of the sample. RCF values can be transferred from one centrifuge to another in order to achieve the same pelleting result.

SAFETY FEATURES

"Class A" GFCI Suitable—New building and electrical codes call for the use of the lower amperage "Class A" GFCIs, which are designed to protect users in the event of an electrical short. Centrifuges should be designed not to accidentally trip this low amperage breaker during operation.

Conforms to IEC1010-020—This safety regulation provides assurance that the centrifuge has been designed—and tested—to protect users in the event of a rotor failure. Typical features include lid locks and armor plating around the chamber bowl and lid.

Rotor Recognition—Centrifuges with multiple rotor options should be equipped with rotor recognition, so that the centrifuge properly identifies the rotor and sets the maximum allowable speed. This feature eliminates the possibility of "oversetting" the speed for a particular rotor.

Certified Aerosol-tight Containment—A centrifuge's rotor and bucket design should be independently tested and certified with regard to their containment of potentially dangerous substances, such as blood, viruses, bacteria, etc.

APPLICATION	MINISPIN/ MINISPIN PLUS	5418	5424	5430	5415 R	5417 R
Refrigerated	No	No	No	No	Yes	Yes
Fixed-Angle Rotor						
rcf max. (x g)	12,100/14,100	16,873	21,130	30,130	16,100	25,000
rpm max.	13,400/14,500	14,000	15,000	17,500	13,200	16,400
Tubes/vessels/plates						
1.5-2.0mL Eppendorf Tubes	12	18	24	30	24	30 (F)/8 (A)
8-place PCR Strips	2		4	8		6
15mL Falcon®				6		
50mL Falcon®				6		
MTP / PCR-plates				2*		

F = Fixed Angle
A = Swing Bucket

Note: The proper adapters are required to obtain maximum capacity. Please check the appropriate rotor and/or adapter combination for proper capacity and sizing.

*Max. Loading Height: 29mm.

05-400-005
05-403-90

FEATURES TO LOOK FOR

LED Digital Display—Generously sized RCF/RPM and Time values provide easy-to-read, accurate, and unambiguous parameter settings.

Quiet Operation—Running with the rotor lid on or off, you want your centrifuge to perform your daily routine work as quietly as possible.

"At Set" Function—Start the timer when the preset speed is reached—independent of ramp rate settings and rotor load—for reproducible runs.

Refrigeration—Your centrifuge should be able to run at maximum speed and still maintain 4 °C.

Optional rotors—Alternative rotors—e.g., for proper support of spin columns and/or PCR strips/tubes—increase the flexibility and usability of your centrifuge.

Warranty—Your centrifuge is probably the most commonly used, "day-to-day" piece of laboratory equipment—it should, therefore, be completely reliable and dependable. A good warranty is often a good indicator of quality.

MICRO

Thermo Scientific* Sorvall* Legend* 23R Microcentrifuge

High-capacity, high-performance refrigerated microcentrifuge

Ideal for high-RCF sample volume processing in microbiology, molecular biology, genetics and biochemistry.

- Capacity: 4 × 200mL
- Max. Speed/RCF: 23,000rpm/36,668×G
- Menu-driven controls with digital display
- Temperature range: -8° to +40°C
- Precise temperature control ensures no sample degradation and improved separations
- Refrigeration system maintains samples at 4°C even at maximum speed
- AutoLock 5-second rotor change
- Quiet-running motor

NEW

00554

ORDERING INFORMATION:

Optional rotors include fixed-angle, microliter, swinging bucket and drum styles. All rotors and tube adapters sold separately, below.

REQUIRED ACCESSORIES:

Rotor (sold separately, below)

Description	Cat. No.	Each
Legend 23R Microcentrifuge	00554	6630.00

SPECIFICATIONS

Capacity	800mL (4 × 200mL)
Display	Digital
Max. Speed	23,000rpm
Max. RCF	36,668×G
Refrigerated	Yes
Temperature Range	-8° to +40°C
Dimensions	25L × 23W × 14¾"H (63.5 × 58.4 × 37.3cm)
Net Weight	187 lb. (85kg)
Electrical Requirements	120V 60Hz

ACCESSORIES

Fixed-Angle Microliter Rotors

For use with Thermo Scientific* Sorvall* Legend* 23R Micro Centrifuge.

- With capacities from 24 to 100mL
- Sealed rotors supplied with lid (00556)
- Sealable rotors sold without covers; optional lid (00533), sold separately
- Cat. No. 00558 is a lightweight, high-capacity, carbon-fiber rotor

00558

00468

Thermo Scientific* Sorvall* Legend* Micro 17/17R and Micro 21/21R Microcentrifuges

Powerful units deliver exceptional capacity, performance and safety in a compact, user-friendly design

Support fast, efficient microvolume processes such as nucleic acid preps, protein isolation and reaction setup. Wide selection of high-capacity rotors and two speed options make these centrifuges ideal for complex as well as simple protocols.

- Capacity 24 × 1.5/2.0mL
- Choice of two RCF options (17,000×G/21,100×G) in ventilated or refrigerated styles
- Intuitive controls with bright digital display
- Fast acceleration and braking reduces run times (approx. 12 seconds); allows faster throughput
- Sleek, space-saving design
- Rugged construction withstands vigorous cleaning and autoclaving for years of dependable service
- Refrigerated models (17R, 21R) offer temperature control from -9° to +40°C
- Rotor and ClickSeal* biocontainment lid included; rotor lid clicks shut to ensure secure sample containment

ORDERING INFORMATION:
Other available rotors: 36 × 0.5mL with lid (75-003-436), 8 × 8 PCR with lid (75-003-489), 4 × 8 PCR with biocontainment lid (75-003-440), dual row 18 × 2.0/0.5mL (75-003-418). To order see below.

ACCESSORIES

Rotors

For use with Thermo Scientific* Sorvall* Legend* Micro 17/17R and Micro 21/21R Series Centrifuges.

- 24-place rotor accepts 1.5/2.0mL tubes, including minipreps
- Convenient 18-place dual row rotor accepts 0.5 and 2.0mL tubes, eliminating adapters
- Special high-capacity rotors support PCR, micro and hematocrit capillary tubes
- Select rotors supplied with ClickSeal* biocontainment lid
- Replacement lids available separately

ORDERING INFORMATION:
Tube adapters available separately.

Description	Cat. No.	Each
Rotors		
24 × 1.5/2.0 mL Rotor with Biocontainment Lid	**05-375-102**	650.00
37 × 0.5 mL Rotor with Screw-on Lid	**05-375-155**	650.00

Replacement Lids		
ClickSeal* Biocontainment Lid†	**05-375-107**	221.24
Screw-on Lid‡	**05-375-108**	221.24

For rotors 05-375-155, 05-375-156, and 05-375-154

Microtube Adapters

For use with Thermo Scientific* Sorvall* Legend* Micro 17/17R and Micro 21/21R, Legend T/RT Plus, Stratos and Primo*/Primo R Centrifuges in the rotors listed below accommodate tube sizes from 0.2 to 0.6mL.

- **Micro 17/17R and Micro 21/21R:** All rotors
- **Legend T/RT Plus and Stratos:** 75-003-332 rotors
- **Primo/Primo R:** 75-007-592, 75-007-593, and 75-007-599 rotors

For Tubes	Color	Cat. No.	Pack of 24
0.2mL	Gray	**76-003-750**	95.78
0.25/0.4mL	Red	**76-003-759**	95.78
0.5/0.6mL	Turquoise	**76-003-758**	95.78

Thermo Scientific* Sorvall* Legend* 14 Microcentrifuge

NEW

Compact personal centrifuge, an affordable solution for pharmaceutical, biotechnology and academic research applications

Excels in wide range of applications including nucleic acid purification, PCR cleanup, plasmid mini-prep, protein processing and forensics. Fast spin-up/spin-down saves time and increases process efficiency.

11-210-807

- Capacity: 12 × 0.5/2.0mL tubes
- Maximum speed/RCF: 14,600rpm/14,500×G
- Compact, stylish design
- Single knob control for fast, accurate settings
- Large LED display provides easy viewing of all parameters
- Rotors and tubes can be inserted and removed with minimal effort
- Brushless motor delivers years of quiet, maintenance-free operation

INCLUDES:

Autoclavable, corrosion-resistant plastic rotor

Description	Cat. No.	Each
Microcentrifuge	**11-210-807**	1200.00

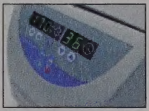
Fisher Scientific* accuSpin* Micro 17/Micro 17R Microcentrifuges

NEW

Compact, economical high-speed microcentrifuges; ideal for nucleic acid research and other microliter volume separations

- Capacity: 48mL (24 × 1.5/2.0mL tubes)
- Maximum speed/RCF: 13,300rpm/17,000×G
- Ventilated or refrigerated models
- Easy-to-use controls with digital display
- Adjustable 99-min. timer and quick-spin feature for short runs
- Memory retains last setting for repeatable runs
- Supplied with rotor and biocontainment lid
- Micro 17: ventilated
- Micro 17R: refrigerated; temperature range -9° to +40°C

13-100-676, 13-100-675



ORDERING INFORMATION:

Replacement microliter rotor (13-100-679), lid (13-100-681), and optional 4 × 8 PCR rotor (13-100-680) available separately, below.

INCLUDES:

Rotor and biocontainment lid

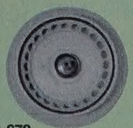
ACCESSORIES

Rotors



13-100-679

For use with Fisher Scientific* accuSpin* Micro 17 and Micro 17R centrifuges. The 24-place rotor is included with all Micro 17/Micro 17R units.

INCLUDES:

ClickSeal* biocontainment cover

Description	Cat. No.	Each
24 × 1.5/2.0mL Rotor with cover	**13-100-679**	600.00
4 × 8 PCR Tube Strip Rotor with cover	**13-100-680**	650.00
ClickSeal Biocontainment Cover	**13-100-681**	220.00

Fisher Scientific* Minicentrifuge

Economical personal benchtop centrifuge for budget-conscious labs

For quick spindowns from walls or caps of centrifuge tubes, microfiltration of HPLC samples and cell separations, and short-term coldroom use.

05-090-100 with 05-090-101 rotor

- Capacity: 12mL (6 × 2.0mL)
- Maximum speed: 6600rpm with microtube rotor
- Maximum RCF: 2200×G with PCR strip rotor
- Small footprint: 6⅜ × 6¼" (16.2 × 15.9cm)
- ON/OFF switch delivers immediate acceleration and deceleration
- Clear polycarbonate lid allows maximum visibility
- Supplied with two rotors:
  - Circular fixed-angle rotor spins 6 × 1.5/2.0mL tubes (also includes six 05-090-103 adapters to spin 0.5mL tubes)
  - Strip rotor accepts two 8 × 0.2mL thermal cycler tube strips or 16 individual 0.2mL tubes
- Off-white base with nonskid rubber feet

INCLUDES:

Strip rotor and fixed-angle rotor, power cord

CERTIFICATIONS:

CE marked

Electrical Requirements	Cat. No.	Each
115/240V 50/60Hz	**05-090-100**	385.00

SPECIFICATIONS

Maximum Speed	6600rpm
Maximum RCF	2200×G
Rotor Capacity	Circular: 6 × 1.5/2.0mL tubes (6 × 0.5 with supplied adapters) Strip: Two 8 × 0.2mL tube strips or 16 × 0.2mL tubes
Speed Control	ON/OFF switch
Dimensions (with lid closed)	6⅜L × 6¼W × 4"H (16.2 × 15.9 × 10.2cm)
Replacement Rotors	Six-place fixed angle (05-090-101) and 16 × 0.2mL strip (05-090-102)

ACCESSORIES

Replacements for parts supplied with Fisher Scientific* Minicentrifuge 05-090-100

- 6-place fixed-angle rotor 05-090-101 for 1.5/2.0mL tubes
- PCR strip rotor 05-090-102 accommodates two 8-place strips or 16 tubes, 0.2mL
- Rubber adapters 05-100-103 fit 0.5mL tubes in 05-090-101 rotor

05-090-101

Description	Cat. No.	Each
6-place Fixed-angle Rotor	**05-090-101**	53.80
PCR Tube Strip Rotor	**05-090-102**	54.74
0.5mL Tube Adapters for 05-090-101	**05-090-103**	32.48

Eppendorf* Model 5430 Microcentrifuges

State-of-the-art features, including simplified controls and a variety of rotors for application-specific microcentrifugation

Ergonomic single-function buttons make programming and operation quick and convenient.

- Capacity: 60mL (30 × 1.5/2.0mL)
- Max. speed/RCF: 17,500rpm/30,130×G
- Large multiple-status LCD with Windows*-style menus and pictogram symbols (see Menu Options)
- Variable speed control from 100 to 17,500rpm in 100rpm increments
- Timer: 1 min. to 9 hr. 59 min. with HOLD for continuous run
- Automatic lid opening at end of run for quick access to samples
- Equipped with a choice of certified aerosol-tight rotors, or centrifuge only

05-400-016

Menu Options

- Soft ramp/brake
- End-of-run alarm with adjustable volume
- At Set feature allows timer to start counting when START button is depressed or when motor reaches preset speed
- Adjustable short-spin setting
- Parameter lock to prevent accidental changes
- Enhanced display allows user to view settings and real-time results simultaneously
- Multilingual selection (English, French, Spanish, and German)
- Screen saver/power saver option

Choice of control systems

- Soft-touch rotary knob version allows quick, easy dialed settings
- Keypad version has a smooth, easy-to-clean surface

Rotor options (all sold separately)

- 18-place miniprep spin column rotor and lid (05-400-012)
- 4 × 8 tube PCR strip rotor (05-400-014)
- 24-place coated aerosol-tight fixed angle rotor and lid (05-400-010) for improved chemical resistance (phenol, acetic acid, sodium hydrochlorite)

ORDERING INFORMATION:

Dimensions: 16L × 12½W × 9½"H (40 × 32 × 24cm). Net weight: 81 lb. (37kg). Accessories available separately on next page.

INCLUDES:

LOOKING FOR MORE?

Millipore* Montage* - PCR Filter Unit removes primers, salts and uniacorporated dNTPs with a single, 15-minute spin. Find it in the PCR section (UFC7PCR50).

LOOKING MICROCENTRIFUGE TUBES?

Fisher Scientific has the right microtube for your application. Choose from plastic tubes in a wide range of shapes, sizes and cap styles. Check them out in the Tubes section.

LOOKING FOR A HEMATOCRIT CENTRIFUGE?

Fisher Scientific offers several models that deliver quick, accurate, quantitative hematocrit results.

Visit www.fishersci.com and search for Hematocrit

Eppendorf* Model 5424 Microcentrifuges

Compact microcentrifuges with advanced features and choice of rotary or digital control systems for easy use

Optional rotors accommodate microcentrifuge tubes, miniprep spin columns and PCR tubes.

05-400-005

- Capacity: 48mL (24 × 1.5/2.0mL)
- Max. speed/RCF: 15,000rpm/21,130×G
- Five-digit speed display
- Variable speed control from 100 to 15,000rpm in 100rpm increments
- Timer: 1 min. to 9 hr. 59 min. with HOLD for continuous run
- Controls also include Short Spin, braking, At-Set and adjustable volume alarm
- Automatic lid opening at end of run for easy sample removal
- Contoured rotor bowl design minimizes noise

Choice of control systems

- Soft-touch rotary knob version allows quick, easy dialed settings
- Keypad version has a smooth, easy-to-clean surface

Rotor options (all sold separately)

- 18-place miniprep spin column rotor and lid (05-400-012)
- 4 × 8 tube PCR strip rotor (05-400-014)
- 24-place coated aerosol-tight fixed angle rotor and lid (05-400-010) for improved chemical resistance (phenol, acetic acid, sodium hydrochlorite)

ORDERING INFORMATION:

Dimensions: 12⅝L × 9¼W × 8⅞"H (32 × 23.6 × 22.7cm). Net weight: 29½ lb. (13.4kg). Available with or without standard 24-place rotor (05-400-008); other rotors sold separately on next page.

Eppendorf* Model 5424 Microcentrifuges, Contd.

ACCESSORIES

Rotors and Lids

For use with Eppendorf* Model 5424 Microcentrifuges.

Standard 24-place Rotor (05-400-008)

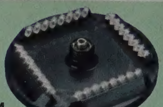
- 20 × 1.5/2.0mL capacity
- Max. speed/RCF: 15,000rpm/21,130×G
- Supplied with aerosol-tight lid (05-400-009)

Coated 24-place Rotor (05-400-010)

- Same as 05-400-008, but with coating that improves chemical resistance and makes rotor easier to clean
- Supplied with aerosol-tight coated lid (05-400-011)

18-place Miniprep Spin Column Rotor (05-400-012)

- Deep lip design supports open microtube lids
- Capacity: 18 × 1.5/2.0mL tubes
- Max. RCF: 18,111×G
- Supplied with lid (05-400-013)



04-400-014

05-400-008

4-position PCR Strip Rotor (04-400-014)

- Quickly knocks down liquids and properly supports thinwall PCR tubes
- Capacity: 4 × 8-place PCR tube strips
- Max. RCF: 18,615×G

Eppendorf* Models 5415D/5415R Microcentrifuges

Compact lab workhorses fit easily on benchtop or in coldroom

Available with or without refrigeration. Refrigerated Model 5415R cools samples quickly and safely.

- Capacity: 48mL (24 × 1.5/2.0mL)
- Maximum speed/RCF: 13,200rpm/16,110×G
- Digital display for time and speed (rpm or rcf); 5417R also displays temperature
- Timed-run (30 seconds to 99 minutes), adjustable short-spin and continuous-run modes
- Variable speed control to maximum in 200rpm increments
- Quick acceleration and deceleration
- Maintenance-free brushless motor runs quietly—less than 60dB

Model 5415D

- With 24-place rotor
- Dimensions: 12L × 9W × 9"H (31 × 23 × 23cm)
- Net weight: 18¾ lb. (8.5kg)

Refrigerated Model 5415R

- Variable temperature control from 0° to 40°C (32° to 104°F)
- Maintains 4°C (39°F) at maximum speed for sample protection
- Stand-by cooling keeps samples at the designated temperature, even after the run has finished
- FAST COOL function cools the centrifuge to 4°C within 16 minutes
- Motorized lid latch closes the lid automatically to ensure uniform temperature
- Dimensions: 11⅜L × 17¾W × 9"H (29 × 45 × 23cm)
- Net weight: 46¾ lb. (21.2kg)
- Rotor sold separately

ORDERING INFORMATION:

Both models will accept a 24-place rotor for 1.5 to 2.0mL tubes or a 36-place rotor for Microtainer* or standard 0.5mL tubes. Rotors are autoclavable at 121°C (250°F) and come with snap-on polypropylene lids. Accessories sold separately, see next page.

ACCESSORIES

24-Place Fixed-Angle Rotor with Snap-on Lid

24 × 1.5 to 2.0mL capacity

For use with Eppendorf* 5415D/5415R microcentrifuges; as supplied with 05-40-100 microcentrifuge.

- Maximum speed/RCF: 13,200rpm/16,110×G
- Directly accepts 1.5 to 2.0mL tubes, or smaller-sized tubes when equipped with accessory adapters
- Autoclavable to 121°C (250°F)

ORDERING INFORMATION:
Aerosol-tight biocontainment lid (05-400-123) available online

INCLUDES:
Rotor and snap-on lid

Capacity	Mfr. No.	Cat. No.	Each
24 × 1.5 to 2.0mL	022636502	**05-400-122**	525.00

24-Place Fixed-Angle Rotor with Aerosol-Tight Lid

24 × 1.5 to 2.0mL capacity

For use with 5415D/5415R centrifuges.

- Maximum speed/RCF: 13,200rpm/16,110×G
- Autoclavable to 121°C (250°F)

ORDERING INFORMATION:
Accepts smaller tubes with accessory adapters, sold separately.

INCLUDES:
Metal aerosol-tight lid for vapor containment

Capacity	Mfr. No.	Cat. No.	Each
24 × 1.5 to 2.0mL	022636596	**13-688-198**	735.00

36-Place Fixed-Angle Rotor with Cover

36 × 0.5mL capacity

- Maximum speed/RCF: 13,200rpm/16,110×G
- Also accepts 0.2mL PCR tubes when equipped with accessory adapters (below)
- Autoclavable

Capacity	Mfr. No.	Cat. No.	Each
36 × 0.5mL	022636600	**05-400-127**	815.00

Tube Adapters

Fit directly in 05-400-127 rotor to accommodate 0.2mL PCR tubes. Adapters are supplied in packs of six. Order the proper quantity to fully equip the rotor.

022652061	**05-400-400**	597.00

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

Eppendorf* MiniSpin* and MiniSpin Plus* Microcentrifuges

Economical desktop centrifuges are ideal for research or classroom work

05-401-07

Quickly and easily perform routine separations such as pelleting precipitated DNA. Fit in just half a square foot of benchtop space.

Operating Features

- Capacity: 24mL (12 × 2.0mL)
- Maximum speed/RCF: 14,500rpm/14,000×G
- Digital speed/time controls
- Timed, continuous-run, or short-spin modes
- Memory retains most recent settings for repeatable runs

Safety Features

- Lid interlocking system prevents accidental opening during operation
- Natural rotor airflow minimizes heat buildup to protect samples
- Brushless motor runs quietly (<60dB)

Supplied Rotor

- Autoclavable aluminum with metal lid suitable for spinning miniprep/spin columns
- For 12 × 1.5/2.0mL tubes
- Accepts adapters (05-400-124, -125, -126; sold separately) for 0.2 to 0.5mL tubes

MiniSpin

- Maximum speed/RCF with supplied rotor: 13,400rpm/12,100×G
- 30-min. timer, settable in 15-sec. increments
- Short-spin mode fixed at maximum speed

MiniSpin Plus

- Maximum speed/RCF with supplied rotor: 14,500rpm/14,000×G
- Toggle digital readout between g-force and rpm
- 99-min. timer (15-sec. increments) with continuous mode option and variable-speed short-spin mode

INCLUDES:
12-place rotor with cover

COMPLIANCE:
Meet international safety standards for centrifuges (IEC 1010-2-020)

CERTIFICATIONS:
CE, CSA

Electrical Requirements	Mfr. No.	Cat. No.	Each
MiniSpin			
115V 60Hz	022620100	**05-401-09**	1199.00
MiniSpin Plus			
115V 60Hz	022620207	**05-401-07**	1399.00
220V 60Hz	022620258	**05-401-08**	1399.00

Eppendorf* Model 5417R Microcentrifuges

Compact refrigerated unit accepts a variety of rotors for exceptional versatility

05-406-8A

Operating Features

- Capacity: 60mL (30 × 2.0mL)
- Maximum speed/RCF: 16,400rpm (25,000×G)
- Microprocessor-controlled keyboard with five-digit LED display for speed in either rpm or RCF
- Timer: 0 to 99 minutes in 1-minute increments, two-digit display
- SHORT button for quick spins
- SOFT START/STOP function protects delicate samples
- Temperature control range from -9° to +40°C (16° to 104°F)
- FAST COOL function quickly reduces temperature in the rotor chamber from ambient to 4°C in less than 20 minutes

Safety Features

- Automatic rotor recongition and load imbalance sensor
- Maintenance-free, brushless motor runs quietly

REQUIRED ACCESSORIES:
Rotor (sold separately, see following page)

COMPLIANCE:
IEC 1010

ACCESSORIES

8-Place Swinging Bucket Rotor

8 × 1.5 to 2.0mL capacity

05-406-41

For use with Eppendorf* 5417R Series Microcentrifuges. Provides flat pelletization for DNA recipitations and immunoprecipitations.

- Max. speed/RCF: 10,000rpm/10,600×G

ORDERING INFORMATION:

Using accessory adapters (sold separately), the rotor can accommodate 0.5mL, 0.25/0.4mL, Microtainer* and 0.2mL PCR tubes.

INCLUDES:

Cover

Capacity	Mfr. No.	Cat. No.	Each
8 × 1.5 to 2.0mL	022636138	**05-406-41**	1130.0

24-Place Fixed-Angle Rotor with Aerosol-Tight Cover

24 × 1.5 to 2.0mL capacity

For use with Eppendorf* 5417 Series Microcentrifuges. Supplied metal lid (13-688-199) provides secure containment of potentially hazardous aerosols from materials such as HIV and radioactive samples.

- Maximum speed/RCF: 16,400rpm/25,000×G
- Directly accepts 1.5 to 2.0mL tubes

13-688-197

ORDERING INFORMATION:

With accessory adapters (sold separately), can also accommodate 0.5mL, 0.25/0.4mL, Microtainer* and 0.2mL PCR tubes.

INCLUDES:

Lid

Capacity	Mfr. No.	Cat. No.	Each
24 × 1.5 to 2.0mL	022636570	**13-688-197**	810.00

Aerosol-tight Lid

Replacement metal lid for 24-place fixed-angle rotor 13-688-197. Provides aerosol containment.

Mfr. No.	Cat. No.	Each
022636782	**13-688-199**	215.81

30-Place Fixed-Angle Rotor with Cover

30 × 1.5 to 2.0mL capacity

05-406-13

For use with Eppendorf* 5417 Series Microcentrifuges. Ideal for containing hazardous materials such as HIV, TB and radioactive samples.

- Maximum speed/RCF: 14,000rpm/20,800×G
- Accepts up to 30 × 1.5 to 2.0mL tubes directly or 0.5mL, 0.25/0.4mL, Microtainer* and 0.2mL PCR tubes with accessory adapters (see below)

Quick-release lid or aerosol-tight cover

Lid Type	Capacity	Mfr. No.	Cat. No.	Each
Aerosol-tight	30 × 1.5 to 2.0mL	022636057	**05-406-14**	945.00
Quick-release	30 × 1.5 to 2.0mL	022636006	**05-406-13**	615.00

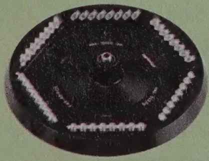
Tube Adapters

- For use with fixed-angle rotors 05-406-13 and 05-406-14 and swinging bucket rotor 05-406-41 (for Model 5417R), and fixed-angle rotors 05-400-122 and 13-688-198 (for Models 5415D/5415R)
- Adapters fit any Eppendorf* rotor with slots to hold 1.5 to 2.0 microcentrifuge tubes with maximum 11mm O.D.

For Tubes	Mfr. No.	Cat. No.	Pk. of 6
0.5mL or Microtainer*	022636227	**05-400-124**	27.16
0.25 to 0.4mL	022636243	**05-400-125**	27.16
0.2mL PCR	022636260	**05-400-126**	27.16

PCR-Strip Rotor

6 × 8-tube strip or 48 × 0.2mL PCR tube capacity



05-406-42

For use with Eppendorf* 5417 Series Microcentrifuges. Ideal rotor for centrifuging PCR tubes.

- Maximum speed/RCF: 10,000rpm/10,600×G
- Rotor directly accepts either 0.2mL PCR tubes or 8-tube strips

Capacity	Mfr. No.	Cat. No.	Each
6 × 8–tube strips or 48 × 0.2mL tubes	022636146	**05-406-42**	1080.00

LOOKING MICROCENTRIFUGE TUBES?

Fisher Scientific has the right microtube for your application. Choose from plastic tubes in a wide range of shapes, sizes and cap styles. Check them out in the Tubes section.

CLINICAL

Fisher Scientific* Centrific* Model 228 Benchtop Centrifuges

Consistent, reproducible results for a variety of applications

04-978-228Q centrifuge with supplied 04-978-232Q rotor

Compact benchtop units provide an economical alternative to higher-priced clinical centrifuges. Ideal for routine blood separations in physicians' offices and small clinics. Also handles applications in educational and industrial labs.

- Capacity: 90mL (6 × 15mL)
- Maximum speed (fixed)/RCF: 3300rpm/1380×G
- Timer: 15 min. maximum, settable from 0 to 15 min. with 30-sec. resolution
- HOLD position for untimed, continuous runs
- Reaches maximum speed in less than 15 sec. with a full load
- Supplied with six-place, 6 × 15mL fixed-angle rotor with buckets and numbered tube positions
- Stainless-steel motor shaft with permanently lubricated ball bearings for extended life

ORDERING INFORMATION:

Accessory buckets (04-978-233Q) and tube adapters (04-978-23Q) sold separately. Buckets accept tubes with dimensions of 13 to 17.3mm dia. × 100 to 133mm long and also accept 7, 10, and 15mL BD Vacutainer* tubes. Tube adapters accept 4 or 5mL tubes; no tube cushions are needed.

INCLUDES:

6-place fixed-angle rotor

WARRANTY:

One year

CERTIFICATIONS:

CSA approved

6 × 15mL	**04-978-232Q**	83.57

Buckets

For 04-978-232Q rotor.

- Hold tubes 13 to 17.3mm dia. × 100 to 133mm long, including 7, 10, or 15mL Vacutainer* tubes
- Accept 04-978-23 Tube Adapters (sold separately) to accommodate 75 to 100mm long tubes

Cat. No.	Pack of 6
04-978-233Q	61.30

Thermo Scientific* IEC* CL30/CL30R Centrifuges

High-capacity, low-speed benchtop units with quick rotor exchange offer versatility and solid performance in daily use

NEW

Unique quick-change rotor system allows user to swap rotors, change protocols or perform cleaning tasks with ease. Choose from ventilated or refrigerated units. The CL30 series functionally replaces Thermo Scientific* IEC* Centra* -CL3/-CL3R models.

05-376-100

Operating Features

- Capacity: 4 × 280mL
- Max. Speed/RCF: 14,600rpm/23,113×G
- Microprocessor control ensures continuous speed regulation for high-quality separations
- Intuitive interface with digital display
- Quick-recall keys offer push-button access to frequently used programs
- G-force run control ensures transferability of protocols from other centrifuges without cross-referencing to rpm
- 30 sec.-to-99 min. timer with HOLD feature for continuous runs
- Brushless induction drive delivers quiet operation with minimal maintenance
- Space-saving design

Safety Features

- Automatic rotor recognition
- Load imbalance detection

Auto-Lock Rotor Exchange

- Facilitates quick protocol changes and easy cleaning
- No tools required—rotor snaps and locks into place; unfastens instantly
- Rotor can be changed in as little as five seconds

Refrigerated Model CL30R

- Temperature range: -9°C to +40°C
- Ozone-free, CFC-free refrigerant

Contd. on next page.

Thermo Scientific* IEC* CL30/CL30R Centrifuges, Contd.

APPLICATIONS:
Classrooms, cleanrooms, toxicology, biotechnology, water quality analysis, food quality testing and control, drug screening, clinical chemistry/hematology

Thermo Scientific* IEC* CL10 Centrifuges

NEW

Complete basic centrifuges combine economy and performance for low-speed, routine clinical applications

Compact size and simple controls make them ideal for small and medium labs and medical offices. Choice of rotor options expands the range of applications supported.

05-376-199

Operating Features

- Capacity: 4 × 135mL
- Max. Speed/RCF: 6500rpm/3684×G
- Microprocessor control system ensures continuous speed regulation for high-quality separations
- User-friendly interface with digital display
- 1 to 99 min. timer with HOLD feature for continuous runs
- Superior ventilation system protects samples from heat buildup
- Brushless induction drive delivers quiet operation with minimal maintenance
- Space-saving design

Safety Features

- Automatic rotor load imbalance detection system prevents accidents
- Automatic rotor recognition prevents disallowed speeds
- Aerosol-tight accessories contain sample securely for biosafety protection

Electrical Requirements	Cat. No.	Each
120V 60Hz	**05-376-199**	2345.00
230V 50/60Hz	**05-376-318**	2345.00

APPLICATIONS:
Satellite labs, classrooms, tissue/cell culture, cleanrooms, physician/veterinary offices, clinical trials, microbiology

ORDERING INFORMATION:
Optional rotors and accessory adapters are available separately below and on the following page.

REQUIRED ACCESSORIES:
Rotor (sold separately)

COMPLIANCE:
IEC 1010-1, IEC 1010-2-020; Accessories have been tested by CAMR Portion Down

CERTIFICATIONS:
CE

Thermo Scientific* IEC* Centra* CL2 Benchtop Centrifuge

Compact, simple and economical benchtop centrifuge for basic research and clinical applications

Features At-Speed* timing mode for greater quality control over sample preparation.

Thermo
Centra CL2

05-101-7

Operating Features

- Capacity: 300mL (6 × 50mL)
- Maximum speed/RCF: 8500rpm/4680×G
- Microprocessor-controlled membrane touch panel for setting speed and run time
- LCD readout for both speed and run time
- Variable speed control: 1000 to 8500rpm in 100rpm increments
- Timer: 30 min.
- Run time can be set from 5 sec. to 1 min. (in 5-sec. increments), from 1 to 5 min. (15-sec.), and from 5 to 30 min. (1-min.)
- HOLD position for continuous runs
- At-Speed timing mode: When activated, unit delays countdown until rotor reaches operating speed
- Accepts variety of tube sizes from 1.5 to 50mL based on rotor/adapter configuration (rotors and adapter sold separately)

Safety Features

- Cover interlock prevents lid from being opened until rotor reaches a complete stop
- Quiet-running motor generates less than 52dBA

ORDERING INFORMATION:

Dimensions: 15¾L × 13¼W × 10¾"H (40 × 34 × 27.5cm). Net weight: 24 lb. (11kg). Accessory rotors and tube adapters sold separately at right and on following page.

REQUIRED ACCESSORIES:

Rotor (sold separately)

COMPLIANCE:

Complies with IEC 1010-2-020; meets OSHA Bloodborne Pathogen Final Rule when equipped with 05-101-9 Rotor with Aerocarrier* tube inserts

CERTIFICATIONS:

ACCESSORIES

Four-Place Swinging Bucket Rotor

4 × 50mL Capacity

05-101-9

For use with Thermo Scientific* IEC* Centra* CL2 Benchtop Centrifuge.

- For tubes from 5 to 50mL
- Operates at speeds to 3900rpm
- Maximum RCF of 2200×G

ORDERING INFORMATION:

Sealed tube inserts sold separately

INCLUDES:

Permanently attached trunnion rings which hold Aerocarrier* sealed tube inserts (sold separately) to accept tubes from 5 to 50mL

COMPLIANCE:

Meets OSHA Bloodborne Pathogen Final Rule.

Capacity	Max. Speed	Max. RCF	Mfr. No.	Cat. No.	Each
4 × 50mL	3900rpm	2200×G	02360F	**05-101-9**	675.00

Aerocarrier* Sealed Tube Adapter

Complete, self-contained polypropylene holders

For use with Thermo Scientific* IEC* Centra* CL2 Benchtop Centrifuge. Use in 05-101-9 swinging bucket rotor.

- Screw-on cap with O-ring closure for complete aerosol containment
- Transparent lid lets you check tube for breakage before opening lid
- If breakage occurs, tube inserts can be autoclaved or decontaminated with diluted household bleach

COMPLIANCE:

Inserts meet OSHA Bloodborne Pathogen Final Rule

Four-Place Swinging Bucket Rotor Packages

Two packages are available offering a combination of 05-101-9 rotor and Aerocarrier* tube inserts.

Tissue Culture Package

- Rotor
- Four inserts each for 15 and 50mL Falcon* and Corning* conical tubes

Blood Tube Package

- Rotor
- Four inserts for 7 to 10mL blood tubes
- Four inserts for 5 to 7mL blood tubes

COMPLIANCE:

Meet OSHA Bloodborne Pathogen Final Rule

Package	Mfr.No.	Cat. No.	Each
Tissue Culture	523670F	**05-101-10**	980.00
Blood Tube	523680F	**05-101-11**	980.00

ACCESSORIES

Six-Place Rotor System

6 × 50mL capacity

For use with Thermo Scientific* IEC* Centra*-CL3/-CL3R, Centra-CL2, and HN-SII centrifuges.

05-155-19

- Angle 45°
- Accepts 6 × 50mL Falcon/Corning* conical tubes or other tubes measuring 30 dia. × 133mm long
- Can also be used in older models Thermo Scientific IEC Centra-MP4/-MP4R, Centra-CL4, -4B, -4, -HN, HN-S, HN, H, and Clinical

INCLUDES:
Six shields and cushions

REQUIRED ACCESSORIES:
05-375-60 Shaft Adapter to use with Thermo Scientific* IEC* Centra-CL3/-CL3R (sold separately)

Mfr. No.	Cat. No.	Each
58012F	05-155-19	767.00

12-Place Microtube Rotor System

12 × 1.5/2.0mL capacity

For use with Thermo Scientific* IEC* Centra*-CL3/-CL3R, Centra-CL2, and HN-SII centrifuges.

- Accepts up to 12 × 1.5/2.0mL microtubes, or tubes as small as 0.4 to 0.5mL when equipped with supplied adapters
- Also fits older models Thermo Scientific IEC Centra-MP4/-MP4R, Centra-CL4, -4B, -4, -HN, HN-S, HN, H, and Clinical

INCLUDES:
Rotor and 12 adapters

REQUIRED ACCESSORIES:
05-375-60 Shaft Adapter needed to use with Therno Scientific IEC Centra-CL3/-CL3R (sold separately)

Mfr. No.	Cat. No.	Each
008410F	05-104J	788.00

12-Place Rotor System

12 × 15mL capacity

For use with Thermo Scientific* IEC* Centra-CL3/-CL3R, Centra-CL2, and HN-SII centrifuges.

- Angle: 45°
- Accepts 15mL Falcon/Corning* conical tubes or Millipore* Centricon* filtration devices
- Also fits older models Thermo Scientific IEC Centra-MP4/-MP4R, Centra-CL4, -4B, -4, -HN, HN-S, HN, H, and Clinical

INCLUDES:
Rotor, 12 shields and cushions

REQUIRED ACCESSORIES:
05-375-60 Shaft Adapter needed to use with Thermo Scientific IEC Centra-CL3/-CL3R (sold separately)

Mfr. No.	Cat. No.	Each
003356	05-155-20	965.00

Four-Place Rotor System

4 × 50mL capacity

For use with Thermo Scientific* IEC* Centra*-CL3/-CL3R, Centra-CL2, and HN-SII centrifuges.

05-155-15

- Accepts 4 × 50mL Falcon/Corning* conical tubes
- Rotor also fits older models Thermo Scientific IEC Centra-MP4/-MPR4, Centra-CL4, -4B, -HN, Clinical, HN-S, HN, H

INCLUDES:
Four-place rotor, trunnion rings, shields, and cushions

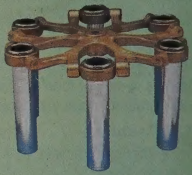
REQUIRED ACCESSORIES:
05-375-60 Shaft Adapter needed to use with Thermo Scientific IEC Centra-CL3/-CL3R (sold separately)

Mfr. No.	Cat. No.	Each
521510F	05-155-15	739.00

Six-Place Rotor System

6 × 15mL capacity

For use with Model Thermo Scientific* IEC* Centra*-CL3/-CL3R, Centra-CL2, and HN-SII.



05-155-18

- Accepts 15mL Falcon/Corning* conical tubes or other tubes measuring up to 17 O.D. × 127mm long
- Rotor can also be used in older models Thermo Scientific IEC Centra-MP4/-MP4R, Centra-CL4, -4B, -HN, Clinical, HN-S, HN, H

INCLUDES:
Rotor, open shields, and cushions

REQUIRED ACCESSORIES:
05-375-60 Shaft Adapter needed to use with Thermo Scientific IEC Centra-CL3/-CL3R (sold separately)

Mfr. No.	Cat. No.	Each
522120F	05-155-18	670.00

LOOKING FOR A SHAFT ADAPTER?

Adapter 05-375-60 is required to use these rotors with the Thermo Scientific* IEC* Centra*-CL3/-CL3R centrifuges.

Eppendorf* 5702 Series Centrifuges

Provide exceptional value for low-speed centrifugation of tubes to 85mL

Quickly and economically spin popular cell culture and blood tubes in a choice of optional rotors. Choose from ventilated and refrigerated models, or unique Model 5702RH which combines heating and refrigerating capabilities.

Operating Features

- Capacity: 340mL (4 × 85mL)
- Max. speed/RCF: 4400rpm (3000×G)
- Handles 30 × 10mL blood tubes or 20 × 15mL conical tubes
- Compact, space-saving design
- Convenient control knobs set desired time and speed (rpm or RCF); settings can be changed during run, or locked
- Digital display
- Motorized "soft-touch" lid unlocks at end of run for one-hand access
- Timed or quick-spin modes
- Maintenance-free drive

Refrigerated Model 5702R Adds:

- Variable temperature control from -9°C to +40°C (16° to 104°F)
- Fast-Cool function eliminates waiting times for unit to reach set temperatures
- Standby cooling maintains chamber temperature when unit is not in use
- Two blue-lit program buttons to store/recall frequently used parameters
- Two timer modes: standard mode begins counting when START button is pressed; AT SET RPM timer begins counting when centrifuge reaches nominal speed

Heating/Refrigerated Model 5702RH

Includes all features of Model 5702R, plus:

- Accurately maintains temperatures higher than room temperature
- Centrifuges temperature-sensitive cells under defined temperature conditions
- Active heating to 40°C
- Standby heating
- Temperature deviation in stationary state at 4°C and at 37°C of ≤1°C

INCLUDES:

Centrifuge only

REQUIRED ACCESSORIES:

Rotor (sold separately at right and on following page)

Models 5702R/5702RH	22¾D × 15W × 10¼"H (58 × 38 × 26cm)

05-400-300

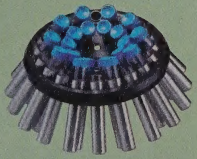
ORDERING INFORMATION:

Rotor options: Choose from 4 × 85mL Swinging Bucket Rotor (05-400-328) with round or square aerosol-tight buckets (sold separately); 8 × 15mL Swinging Bucket Rotor (05-400-301); 10 × 15mL Fixed-Angle Rotor (05-400-305); 24 × 1.5/2.0mL Fixed-Angle Rotor (05-400-370); 18 × 1.0/2.0mL Cryogenic Tube Rotor (05-400-371); or 30 × 15mL Fixed-Angle Rotor (05-400-304). Rotors are designed for quick acceleration and minimal heating of samples, are autoclavable, and can be used with all three models. All rotors and accessories sold separately.

ACCESSORIES

30-Place Fixed-Angle Rotors

30 or 10 × 15mL capacity



05-400-304

- Max. speed/force: 4400rpm/2750×G
- 05-400-304 includes 30 steel adapter sleeves, 20 cushions for conical tubes and 30 cushions for round-bottom tubes
- 05-400-305 includes 10 steel adapter sleeves, 10 cushions for conical tubes and 10 cushions for 15mL round-bottom tubes

Capacity	Mfr. No.	Cat. No.	Each
30 × 15mL	022639404	**05-400-304**	575.00
10 × 15mL	022639421	**05-400-305**	410.51

Tube Adapters

For use with fixed-angle rotors 05-400-304 and 05-400-305. Steel adapter sleeves without cushions accept 15mL conical or round-bottom tubes.

NOTE: Sleeves and adapters are sold in packs of 10. Be sure to order the proper number to fully equip your rotor.

Description	For Tubes	Mfr. No.	Cat. No.	Pack of 10
Steel Sleeves	15mL	022639439	**05-400-307**	219.82
Cushions	15mL conical	022639447	**05-400-306**	139.52
Cushions	15mL round-bottom	022639455	**05-400-308**	34.20

ACCESSORIES

Eight-Place Swinging Bucket Rotor

8 × 15mL capacity

For use Eppendorf* 5702 series centrifuges.

- Max. speed/RFC: 4400rpm/2800×G
- Accept conical or round-bottom tubes with appropriate adapters

05-400-301

Capacity	Mfr. No.	Cat. No.	Each
8 × 15mL	022639501	**05-400-301**	255.96

Tube Adapters

Fit in bucket supplied with 05-400-301 swinging bucket rotor to accept 15mL glass or conical tubes.

For Tubes	Mfr. No.	Cat. No.	Pack of 8
Glass	022639510	**05-400-302**	27.16
Conical	022639528	**05-400-303**	111.42

Four-Place Swinging Bucket Rotor

4 × 85mL capacity

- Max. speed/RFC: 4400rpm/3000×G (with round bucket 05-400-320)
- Can be used with round buckets with optional aerosol-tight lids or high-capacity square buckets for round-bottom tubes
- Round buckets accommodate conical and round-bottom tubes from 1.1 to 85mL
- Square buckets (05-400-309) accommodate round-bottom tubes from 5 to 25mL and can reach speeds up tp 4400rpm/2750×G

05-400-318

REQUIRED ACCESSORIES:
Buckets; purchase with rotor or separately

Model	Mfr. No.	Cat. No.	Each
With 4 × 85mL round buckets	022639048	**05-400-318**	650.00
Without buckets	022639064	**05-400-328**	430.54

Round Buckets

For use with 05-400-328 swinging bucket rotor or as replacements for buckets supplied with 05-400-318. Accommodate conical and round-bottom tubes from 1.1 to 85mL with appropriate adapters.

Capacity	Mfr. No.	Cat. No.	Pack of 4
4 × 85mL	022639081	**05-400-320**	585.00

Aerosol-tight Bucket Covers

For use with 05-400-320 round buckets. Covers fit over buckets individually to provide an aerosol-tight seal.

Mfr. No.	Cat. No.	Pack of 2
022639293	**05-400-319**	94.50

Tube Adapters for Round Buckets

Fit in round bucket 05-400-320 to accept tubes from 1.1 to 85mL. **NOTE:** Adapters are sold in packs of two. Be sure to order proper number to fully equip your rotor.

For Tubes	For Tube Outside Dia.	No. of Slots	Mfr. No.	Cat. No.	Pack of 2
1.1 to 1.4mL	8.5mm	5	022639285	**05-400-326**	261.00
2 to 7mL	12.5mm	4	022639242	**05-400-317**	261.00

StatSpin* CritSpin* Microhematocrit System

Whisper-quiet compact system provides rapid, simple and safe hematocrits for office, lab or clinic

System offers complete cell packing with a preset, two-minute spin cycle that meets NCCLS Standard.

- Digital reader with large HCT display simplifies tube reading and minimizes error
- Readings are available as percent (to 0.5%) or decimal equivalent (to 0.005)
- Readings are unaffected by tube diameter, size or material
- Rotor installs and removes instantly; no tools required
- Tube balancing is not required with this vibration-free operation
- High-intensity, fiber-optic light brightly illuminates tubes while loaded in the rotor
- Cover interlock system prevents access until the rotor has completely stopped

CritSpin System:

CritSpin centrifuge, 12-place hematocrit rotor with transparent lid, CritSpin Digital Reader, start-up supply of capillary tubes and sealing clay, universal power supply, and interconnecting cable.

CritSpin Centrifuge:

12-place hematocrit rotor with transparent lid, card-style reader, start-up supply of capillary tubes and sealing clay, and universal power supply; CritSpin Digital Hematocrit Reader; 75mm adapter and universal power supply.

ORDERING INFORMATION:

Centrifuge and Digital Hematocrit Reader available separately or together as System (22-269-292).

COMPLIANCE:

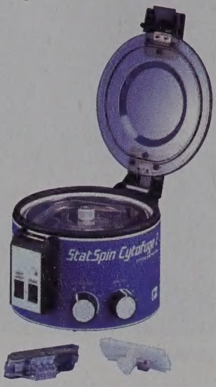
StatSpin* CytoFuge* 2 Personal Cytocentrifuge System

Concentrates cells from body fluids onto microscope slides with a level of cell recovery, clarity and detail that cannot be achieved with direct smear techniques

Consistent samples are processed quickly and quietly; monolayer cell presentations preserve excellent morphological detail. Offers a choice of filter- or gasket-seal concentrators to handle all specimens from routine body fluid preparations to multiple cell concentrations or controls on the same slide. The broad range of selectable speeds and run times allow precise reproduction of most procedures.



22-001-1

Operating Features

- Maximum speed/RCF: 4000rpm/1060×G
- Intuitive speed and cycle time controls
- Cover interlock prevents operation if cover is not completely closed; automatically releases upon cycle completion
- Automatic acceleration and braking rates assure rapid, gentle starts and stops
- Quiet-running and compact to fit any hood or benchtop space
- Unit and rotor can be easily disinfected

Rotor Features

- Requires no trunnion carriers or clamps
- High-strength chassis and unbreakable see-through lid ensure mechanical containment
- Leak-resistant and gasketed for improved biohazard containment

Disposable Polypropylene Filter Concentrators

- Hinged backing plate simplifies assembly
- Integral cellulose fiber filter card absorbs fluids at a controlled rate during centrifugation
- Cells are greatly concentrated into a monolayer with minimal loss in the filter material
- Reusable filter concentrators can be used 20 times; replace filter card before each use

Disposable/Reusable Cell Concentrators

- Available in both one- and three-well formats
- Silicone gasket-sealed for excellent application versatility and economy
- Transparent plastic
- Autoclavable versions available

INCLUDES:

Centrifuge, 100/240V power supply, four-place rotor w/cover, four filter concentrators w/clips, four one-well cell concentrators w/gaskets, four three-well cell concentrators w/gaskets, 10 cell concentrator clips, four cell concentrator backing plates.

THERMO SCIENTIFIC* IEC* ACCESSORIES

Fisher Scientific offers a selection of rotors and adapters for older Thermo Scientific IEC centrifuges, including the Centra* series, HN-SII, K and EXD. For these products, as well as Centrac* and Ultrac* adapters, go online!

Visit www.fishersci.com and search for Thermo Scientific IEC Accessories

SERVICE AGREEMENTS

Fisher Scientific offers several types of service agreements for the equipment featured here. For details on these agreements, equipment repairs and calibration services, see the Services section.

For immediate assistance, call 1-800-395-5442.

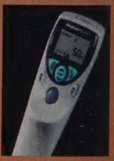
LOOKING FOR MORE?

Fisher Scientific offers more choices online, including the Fisher HealthCare/Drucker Horizon series centrifuges—perfect for clinical labs and physicians' offices.

Visit www.fishersci.com and search for Fisher HealthCare/Drucker

LOOKING FOR LIQUID HANDLING PRODUCTS?

Fisher Scientific offers unsurpassed selection for all of your liquid handling and dispensing needs. From simple dispensers to state-of-the-art ergonomic pipetters, you'll find all these products in the following sections: Pipet Fillers, Pipets, Pipetters, and Pipetter Tips.



CELL WASHERS

Thermo Scientific* Sorvall* CW2 Plus Cell Washer

Compact, automated system quickly and efficiently washes blood cells for antiglobulin reagent tests

Fits easily on most desks or benchtops.

Operating Features

- Intuitive user interface
- Microprocessor control and digital display of time and wash cycles
- Fast, automatic wash cycle with quick acceleration/braking
- Replaceable tube holders
- Supplied autoclavable rotor doubles as an incubator rack
- Single distributor for standard tubes
- Saline level detection/alarm system
- Agitates automatically after each decant (cycle is also manually operable)
- Flexible, single-speed manual mode for general pelleting applications

22-243-600

Low Maintenance

- Easy-to-clean, high-impact, corrosion-resistant housing
- Quiet, maintenance-free brushless drive
- Lifetime lubrication of all moving parts

INCLUDES:
Rotor

CERTIFICATIONS:
CSA NRTL, CSA, CE

Weight lb. (kg)	39.3 (17.8) crated; 34 (15.4) uncrated

ACCESSORIES

FIBER*Lite** Centrifuge Rotors

Carbon fiber rotors are lightweight, durable alternatives to metallic rotors

Available in fixed-angle (FA) or swinging bucket (SB) styles for the centrifuges listed in the table below.

- Weigh half as much as metallic rotors for easier handling, less wear on centrifuge drive
- Accelerate and decelerate faster for shorter run times and more efficient processing
- Excellent insulative properties permit samples to be run at a constant temperature throughout centrifugation process
- Resist corrosion from alkalis and organic solvents
- Accept standard bottle and tube sizes
- Autoclavable and coldroom compatible
- Clean easily with standard detergents
- Hub-specific: each rotor is designed for a particular centrifuge model

Standard Models

- With straight top and lid

Enhanced Liquid Containment (ELC Models)

- Special lid and curved annulus
- Annulus designed with volume equal to one bottle from that rotor, contains fluid leaks that might occur during centrifugation
- Eliminates imbalance problems and spindle damage from fluids leaking into centrifuge chamber; also provides convenient lifting handle

WARRANTY: Limited lifetime

Ordering Information on next page.

CHROMATOGRAPHY

DISSOLUTION

SUN-SRi Dissolution Test Vessels

Precision formed with flat flange and hemispherical bottom

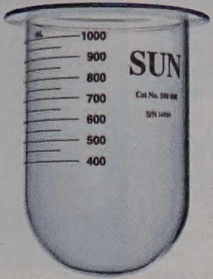
- Type 1, Class A borosilicate glass
- Glass vessels are serialized

COMPLIANCE:

Meet all specifications of USP XXIV, Monograph 711

Description	Mfr. No.	Cat. No.	Each
Clear, 1000mL, No Graduations	100 002	**22-037-015**	75.18
Clear, 1000mL, Graduated†	100 008	**14-823-122**	132.55
Amber, 1000mL, No Graduations	100 006	**14-823-121**	164.57

† Graduated in 50mL increments from 400 to 1000mL.

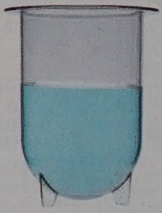


14-823-122

SUN-SRi Plastic Dissolution Vessel

For media preparation

- Comprised of clear styrene/acrylic/nitrile (SAN) plastic
- 1L capacity with molded feet and no graduations
- Chemically resistant to aqueous media such as 25% hydrochloric acid to 10% sodium hydroxide solutions



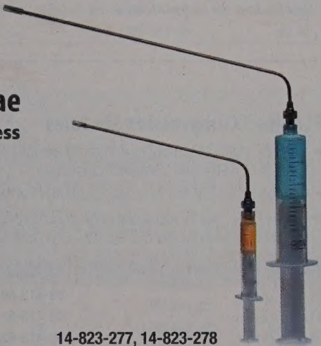
14-823-123

Description	Mfr. No.	Cat. No.	Each
1000mL, No Graduations	100 010	**14-823-123**	113.35

SUN-SRi Dissolution Testing Cannulae

Angled for easy access to samples

- Type 316 stainless steel
- Luer-Lok* connection for easy attachment
- Tip sleeve allows secure filter attachment



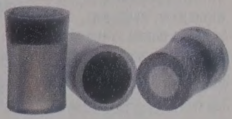
14-823-277, 14-823-278

Description	Mfr. No.	Cat. No.	Each
Cannula with 4⅜" Needle for 900mL Volume	401 350	**14-823-277**	73.74
Cannula with 7½" Needle for 500mL Volume	401 352	**14-823-278**	78.98

SUN-SRi Filter Tips

Economical dissolution filters

- Polyethylene with a limited porous area
- Fit securely on the end of a ⅛" cannula or sample probe



14-823 Series

Description	Mfr. No.	Cat. No.	Case of 1000
2µm Filter Tip	203 972	**14-823-233**	204.82
5µm Filter Tip	203 980	**14-823-234**	204.82

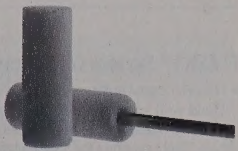
SUN-SRi SunFlo* Dissolution Filters

Made of Ultra High Molecular Weight (UHMW) foamed porous polyethylene

- Full flow design removes small particulates
- Fit securely on the end of a ⅛" cannula or sample probe



14-823-26 and -27 Series

Description	Mfr. No.	Cat. No.	Pack of 100	Mfr. No.	Cat. No.	Case of 1000

Biotage* FLASH+* Chromatography Systems

09-413-63 with 09-413-79 ZIF-SIM10 and Test-tube Rack
(rack available as an optional accessory; sold separately, next page)

Designed for efficient performance, cartridge-based flash chromatography systems purify sample loads from 5mg to 5g

- Patented Zero Insertion Force (ZIF*) head assembly technology on compression modules improves sample purification by using axial compression on preadsorbed sample cartridges
- High-yield, high-performance purification
- Ideal for applications involving purification throughout multistep solution-phase synthesis in which complex mixtures can possibly occur
- Customizable and easily upgraded
- Inert stainless-steel and PTFE flow path for broad solvent compatibility
- Up to 100psig operation for faster flowrates and improved peak resolution
- Cartridge insertion and removal are easily accomplished

FLASH+ systems offer three methods for loading samples for purification:

1. Direct liquid injection onto the cartridge using the three-way injection valve
2. With patented Samplet* loading cartridges for preparation of multiple samples in advance
3. With patented Zero Insertion Force-Sample Injection Modules (ZIF-SIM*) for low-solubility samples such as oils

Core Components

- FLASH Start-up Kit
- Injection valve
- Solvent reservoir
- Choice of compression module

NOTE:
FLASH+ chromatography systems are customizable and can be upgraded at any time. Simply choose the precise set of components or correct component upgrade for your laboratory's specific requirements.

† Must purchase one each of A; choose one from B.

FLASH+* System Core Components

- FLASH+ Start-Up Kit with 12L × 4½W × 10"H (30.5 × 11.4 × 25.4cm) stand with swing-out arm and dispenser with Luer outlet port, 6' (1.8m) of ¼" (6.4mm) O.D. blue air tubing, air line adapter, four (two 2mL and two 10mL) syringes for sample loading, two stopcock valves, reservoir gasket, fittings, and adapters
- **Three-way Vertical Injection Valve** with Luer-Lok* adapter for liquids
- **Air Regulator** to regulate flowrates from 0 to 60psig
- **Stainless-steel Solvent Reservoirs** with solvent shut-off and relief valves (use 1L [0.3 gal.] for FLASH 12+*, 25+*, and 40+* compression modules; 4L [1.1 gal.] is used with the FLASH 65i* compression module only)

Description	Cat. No.	Each
FLASH+ Start-Up Kit	09-413-76	389.90
Three-Way Vertical Injection Valve	09-413-74	363.71
Air Regulator	09-413-75	146.22
1L Solvent Reservoir	09-413-77	1077.00
4L Solvent Reservoir	09-413-78	1077.00

FLASH+* Compression Modules

- With ZIF head assembly to distribute sample and solvent flow evenly through FLASH+ and Samplet* cartridges
- Choose from FLASH 12+*, 25+*, and 40+* with short or medium barrels
- FLASH-Pac+* set includes one each of FLASH 12+, 25+, and 40+ head assemblies; and one each of the 12+, 25+, and 40+ short and medium barrels

Description	Cat. No.	Each
FLASH 12+S	09-413-60	871.00
FLASH 12+M	09-413-61	922.00
FLASH 25+S	09-413-62	974.00
FLASH 25+M	09-413-63	1025.00
FLASH 40+S	09-413-64	1108.00
FLASH 40+M	09-413-65	1133.00
FLASH-Pac+* Set (contains one each of the 12+ S/M, 25+ S/M, and 40+ S/M Compression Modules)	09-413-67	4115.00

Contd. on next page.

Biotage* FLASH Chromatography Systems, Contd.

Additional FLASH+* Barrels

- For use with Compression Modules
- All FLASH+ compression modules include a head assembly and one short or medium barrel, depending on size ordered
- Barrels are interchangeable, so additional barrels of the same diameter can be ordered if the operator wants the ability to use both cartridge lengths

Description	Cat. No.	Each
FLASH 12+*S	**09-413-68**	337.51
FLASH 12+M	**09-413-69**	389.90
FLASH 25+*S	**09-413-70**	415.09
FLASH 25+M	**09-413-71**	441.29
FLASH 40+*S	**09-413-72**	467.48
FLASH 40+M	**09-413-73**	493.68

Zero Insertion Force-Sample Injection Modules (ZIF-SIM*) Modules and Tubing Kit

- Feature ZIF head assembly technology
- Add additional purification capabilities; use for simple, effective loading of liquid, oil, closely eluting, and low-solubility samples
- Choice of three silica capacities

09-413-79, 09-413-80, 09-413-81

INCLUDES:

ZIF head assembly; 20 disposable sample-loading barrels (each containing a bottom frit); top frits; polypropylene frit insertion tool; tubing kit (09-413-85; with Luer fitting with ⅛" tubing and ⅛" knurled nut [can also be purchased separately]); user's manual

Description	Holds	Cat. No.	Each
ZIF-SIM10* Module	0.09 oz. (2.5g)	**09-413-79**	510.00
ZIF-SIM35* Module	0.4 oz. (10g)	**09-413-80**	630.00
ZIF-SIM60* Module	0.7 oz. (20g)	**09-413-81**	716.00
ZIF-SIM Tubing Kit	----	**09-413-85**	40.40

Biotage* Samplet* Cartridges

Small, prepacked sample-loading cartridges for use with FLASH+* purification cartridges

- Function like guard columns, protecting cartridge from contamination and improving performance
- Increase loading capacity, compound retention, and resolution
- Many can be prepared at one time, reducing total sample preparation time
- Eliminate time-consuming rotary evaporation method, which diminishes silica and sample handling
- Accommodate a large range of sample sizes
- Available in KP-Sil* (Silica), KP-C18-HS* (reversed phase), and KP-NH* (Amine) materials

09-413 Series

To Use:

- Dissolve sample in solvent, apply sample solution to Samplet cartridges, evaporate, and insert Samplet cartridges into FLASH+ cartridges
- If dissolution solvent is nonpolar, adsorb the reaction mixture onto Samplet cartridges and load wet into the FLASH+ cartridges

Model	O.D.	I.D. × L	Amount of Sorbent Material	Sample Volume	Cat. No.	Case of
KP-Sil (Silica)						
FLASH 12+*	12mm	10 × 20mm	0.5g	1mL	**09-413-31**	48/147.61

FLASH 40+	40mm	38 × 20mm	12g	10mL	**09-413-55**	20/498.71

ACCESSORIES

Test Tube Racks

- Use with any FLASH+* chromatography system to collect fractions
- Constructed of Sanalite* HDPE, the surface is chemical- and corrosion-resistant
- External dimensions: 13½L × 5W × 3½"H (34.3 × 12.7 × 8.9cm)

Tube Size (Dia. × Length)	No. of Holes	Cat. No.	Pack of 2
13 × 100mm	120	**09-413-86**	337.51
16 × 100mm	120	**09-413-87**	337.51
16 × 150mm	96	**09-413-88**	337.51
18 × 150mm	96	**09-413-89**	337.51
25 × 150mm	48	**09-413-90**	337.51

O-Rings

For use with various FLASH+ components; see ordering table to the right.

Material	For Use With	Cat. No.	Each
Chemraz* 107	Lower ZIF* Head of FLASH 12+* Compression Module	**09-414-08**	53.56
Chemraz 108	Upper ZIF Head of FLASH 12+ Compression Module, FLASH 12+ Barrel	**09-414-09**	43.51
Chemraz 206	ZIF-SIM35*, lower O-ring	**09-414-21**	88.00
Chemraz 208	Lower ZIF Head of FLASH 25+* Compression Module; ZIF-SIM35, upper O-ring	**09-414-10**	90.64
Chemraz 209	Upper ZIF Head of FLASH 25+ Compression Module; FLASH 25+ Barrel; ZIF-SIM60*, lower O-ring	**09-414-11**	100.94
Chemraz 215	Lower ZIF Head of FLASH 40+* Compression Module	**09-414-12**	101.97
Chemraz 218	Upper ZIF Head of FLASH 40+ Compression Module, FLASH 40+ Barrel	**09-414-13**	150.31
Chemraz 330	FLASH 65i* Compression Module	**09-414-14**	237.22

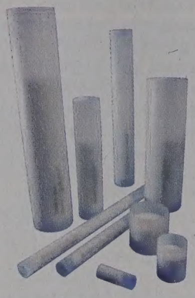
Biotage* FLASH+* HPFC Cartridges

Patented FLASH+ prepacked cartridges are flat on top and bottom for better performance

- Uniform particle-size distribution generates low elution bands
- Tolerate pressure to 100psig—enabling faster flowrates and use of higher viscosity solvents
- Recessed inlet provides room for Samplet* cartridges (sold separately)
- Food-grade polyethyene body
- Meet 21 CFR 177.1520 regulations; manufactured under strict ISO quality standards

Choice of Three Packing Materials

- **KP-Sil* Silica cartridges** feature 500m²/g surface area, 60Å porosity, 40 to 63µm particle size
- **KP-C18-HS* cartridges** are reversed phase, have 450m²/g surface area, 90Å porosity, 40 to 63µm particle size, contain 18% of carbon, and are endcapped
- **KP-NH* (Amine) cartridges** exhibit 320m²/g surface area, 100Å porosity, 40 to 75µm particle size; accept high sample loads of polar, amine-containing samples and allow minimal silanol interaction



09-413 Series FLASH+ Cartridges and 09-413 Series Samplet* cartridges (bottom right; sold separately, previous page)

Model	Sample Load	Volume (Overall)	I.D. × L (mm)	Cat. No.	Case of

Biotage* FLASHi* Series Cartridges

Cost-sensitive FLASHi Series cartridges for use with older chromatography technology

- Uniform particle-size distribution
- Prepacked cartridges are curved on top and bottom
- Large particle-surface area
- Food-grade polyethyene body for easy disposal
- Meet 21 CFR 177.1520 regulations; manufactured under strict ISO quality standards

Choose from Two Packing Materials

- **KP-Sil* silica cartridges** feature 500m²/g surface area, 60Å porosity, 40 to 63µm particle size
- **KP-C18-HS* cartridges** are reversed phase and have 450m²/g surface area, 90Å porosity, 40 to 63µm particle size, 18% of carbon, and are endcapped

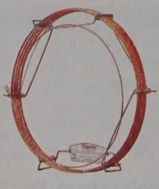
GAS CHROMATOGRAPHY COLUMNS

Thermo Scientific* Trace* GC Columns

Extremely reliable GC columns 100% guaranteed for high performance

All Trace columns undergo rigorous testing procedures and include traceable serialized certificate. Technical support is available from Thermo Scientific.



Trace* GC Column

TR-1MS GC Columns

- 100% dimethyl polysiloxane
- Low bleed, nonpolar column for mass spectrometric detection
- High robustness, high reproducibility
- 380°C maximum operating temperature
- Stable to air contamination
- Use for a wide variety of applications that rely on the difference in boiling point

TR-5MS GC Columns

- 5% phenyl polysilphenylene-siloxane
- Low bleed for high signal to noise ratio
- High robustness, high reproducibility
- 360/370°C maximum operating temperature
- Smaller I.D.s available for faster chromatography

TR-WaxMS GC Columns

- Polyethylene glycol (PEG) phase
- High robustness, high reproducibility
- 280/300°C maximum operating temperature
- High resistance to oxygen and thermal breakdown

TR-1701 GC Columns

- 14% cyanopropylphenyl polysiloxane mid-polarity column
- Low bleed, low surface activity
- 300°C maximum operating temperature
- Useful for pesticide analysis and other applications where a change in elution order is required for confirmation purposes

TR-FAME GC Columns

- 70% cyanopropyl polysilphenylene-siloxane
- Specifically designed for the separation of Fatty Acid Methy Esters (FAMEs)—provides excellent separation of cis/trans isomers and FAMEs with various degrees of unsaturation
- 260°C maximum operating temperature
- Low bleed and high polarity for MS use

TR-V1 GC Columns

- Cyanopropylphenyl polysiloxane
- Mid-polarity, thick film column ensures good retention and separation of volatile compounds at low oven temperatures—ideal for EPA Methods 624 and 608
- 300°C maximum operating temperature
- Low bleed suitable for MS detection

Restek* Rxi*-1ms Capillary Columns

Suggested Primary Applications for Rxi-1ms Columns

- Drugs of Abuse
- Essential Oils
- Hydrocarbons
- Pesticides
- PCB Congeners
- Sulfur Compounds
- Amines
- Solvent Impurities
- Simulated Distillation
- Oxygenates
- Gasoline Range Organics (GRO)
- Refinery Gases

Nonpolar phase, Crossbond* 100% dimethyl polysiloxane

- ▸ Fused silica capillary columns with exceptional inertness and reproducible retention
- ▸ Long lifetime
- ▸ Low bleed—improved signal-to-noise ratio, for better sensitivity and mass spectral integrity
- ▸ Equivalent to USP G2 phase

Restek* Rtx*-1 Capillary Columns

Suggested Primary Applications for Rtx-1 Columns:

Solvents
Petroleum Products
Pharmaceuticals
Waxes
Fuel Oils

Similar in polarity to DB-1 and HP-1

- Nonpolar; coated with crossbonded polydimethylsiloxane (100% dimethylpolysiloxane)
- Manufactured from high-quality fused silica tubing
- Surrounded by a rugged stainless-steel cage
- Excellent thermal stability for low bleed at high temperatures

Restek* Rtx*-5 Capillary Columns - 30m Length

Suggested Primary Applications for Rtx-5 Columns:

Pesticides
PCBs
Aromatic Hydrocarbons
Environmental Samples
Essential Oils

Similar to DB–5, SPB–5, HP–5, and Ultra2 columns

- Popular general-purpose stationary phase—5% diphenyl/ 95% dimethyl polysiloxane
- Crossbond* technology results in longer lifetimes and low bleed, and allows for solvent rejuvenation

Rtx*-5MS Capillary Columns, contd.

Developed specifically for GC/MS

- Nonpolar; 5% diphenyl/95% dimethyl polysiloxane
- Exceptionally low bleed at high temperatures
- Undergo rigorous QA testing to ensure they exceed the requirements of even the most sensitive MS

Restek* Rtx*-5 Amine Capillary Columns

Suggested Primary Application for Rtx-5 Amine Columns:
Basic and Neutral Compounds

Tubing surface is chemically altered to eliminate tailing of basic compounds

- Crossbond* 5% diphenyl/95% dimethylpolysiloxane
- Column priming not required
- No derivatization needed
- Deactivation technology enables analysis of neutral compounds, adsorptive compounds with oxygen groups susceptible to hydrogen bonding, and even mildly acidic compounds such as phenols
- Compatible with samples having a water matrix
- Individual test chromatograms, supplied with each column, show ultra-low bleed levels at temperatures up to 315°C (599°F)

I.D.	Film	Temp. Limits	Mfr. No.	Cat. No.	Each

Restek* Rtx*-5Sil MS Capillary Columns

Suggested Primary Application for Rtx-5Sil MS Columns:
Semivolatiles by GC/MS

Ideal "scouting column" for method development

- Equivalent to a (5% Phenyl)—methylpolysiloxane
- Utilizes arylene technology for ultra low bleed and improved thermal stability
- Delivers excellent results on a broad pH range and wide spectrum of functional groups
- Ideal for the baseline separation of benzo(b)- and benzo(k)-fluoranthene
- 0.28mm I.D. columns increase sample capacity without a significant loss in resolution and are recommended for semivolatile pollutant analysis
- Individual test chromatogram included

I.D.	Film	Temp. Limits	Mfr. No.	Cat. No.	Each

0.25mm	0.25µm	-60 to +330/350°C	12726	**06-709-914**	750.00

Restek* Rtx*-35 Capillary Columns

Suggested Primary Application for Rtx-35 Columns:
Pesticides
Amines
Nitrogen-containing Herbicides

Similar to DB–35, DB–35MS, HP–35, SPB–35, SPB–608

- Crossbond* 35% diphenyl/65% dimethyl polysiloxane
- 30m length
- High phenyl content makes these columns ideal for second column confirmation
- Ideal for confirmation analysis of pesticides and herbicides
- Recommended for U.S. EPA Methods 8141, 619, and 622; equivalent to USP Phase G42
- Includes individual test chromatogram

Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
0.25mm I.D.				
0.25µm	0 to 320°C	10423	**06-708-857**	420.00

3.00µm	0 to 260°C	10485	**06-708-935**	510.00

Restek* Rtx*-1701 Capillary Columns

Suggested Primary Applications for Rtx-1701 Columns:

Pesticides
PCBs
Alcohols
Oxygenates
Pharmaceuticals
Solvents

Using the Rtx-1701 column in conjunction with an Rtx-35/MXT*-35 or Rtx-5/MXT-5 column is ideal for confirmatory analysis

- Crossbond* 14% cyanopropylphenyl/86% dimethyl polysiloxane; ideal for the analysis of pesticides, solvents and drugs
- 30m length
- Low bleed
- Mix of cyano and phenyl functional groups increases the polarity of the column, making it useful for a wide variety of applications
- Include individual test chromatogram

Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
0.25mm I.D.

Restek* Rtx*-Wax Capillary Columns

Suggested Primary Applications for Rtx-Wax Columns:

FAMEs
Essential Oils
Polar Solvents

With excellent selectivity compared to other Carbowax* columns

- Polyethylene glycol phase (Crossbond* polyethylene glycol) with extended operating temperatures for the analysis of compounds having a wide volatility range
- High polarity
- Provide thermal stability with guaranteed low bleed to 250°C (482°F); low (20°C) minimum usable temperature
- Ideal for fatty acid methyl esters (FAMEs), sugar derivatives, and food and flavor analysis; fast and efficient for BTEX analysis
- Include individual test chromatogram

Restek* Stabilwax* Capillary Columns

Suggested Primary Applications for Stabilwax Columns:

FAMEs
Flavors
Acids
Essential Oils
Amines
Solvents
Xylene Isomers
BTEX

Polyethylene glycol phase resists damage from oxygen or moisture

- High thermal stability and inertness
- Crossbond* Carbowax* technology provides low bleed, increased column life, and solvent rinsability
- Ideal for the analysis of fatty acid methyl esters (FAMEs), sugar derivatives, and food and flavor analysis
- Include individual test chromatogram

Restek* Stabilwax*-DA Capillary Columns

Suggested Primary Application for Stabilwax-DA Columns:

Underivatized Free Fatty Acids

Similar in polarity to DB-FFAP, OV-351, NUKOL FFAP, HP FFAP

- Polyethylene glycol stationary phase has high thermal stability up to 250°C (482°F)
- Crossbond* Carbowax* technology provides low bleed, increased column life, and solvent rinsability
- Resist oxidation and thermal breakdown
- Allow free fatty acids from C1 to C20 to be analyzed without derivatization; also works well for some inorganic acids
- Individual test chromatogram is provided with each column

Stabilwax* Column

Restek* FAMEWAX* Capillary Columns

Suggested Primary Application for FAMEWAX Columns:

FAMEs

Application-specific columns for FAMEs

- Crossbond* polyethylene glycol
- Meet AOCS and AOAC method requirements
- Elution order of complex polyunsaturated fatty acid methyl esters (FAMEs) is comparable to that on other Carbowax* columns, but baseline resolution is achieved in significantly less time

I.D.	Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
0.25mm	0.25µm	20 to 250°C	12497	**06-709-787**	440.00
0.32mm	0.25µm	20 to 250°C	12498	**06-709-788**	480.00
0.53mm	0.50µm	20 to 250°C	12499	**06-709-789**	535.00

Restek* Rtx*-502.2 Capillary Columns

Suggested Primary Applications for Rtx-502.2 Columns:

Volatile Organic Pollutants
Gasoline Range Organics
Trihalomethanes
Light Hydrocarbons

Application-specific columns with unique selectivity for volatile organics

- Proprietary Crossbond* diphenyl/dimethyl polysiloxane phase
- Selectivity for volatile organic pollutants per US EPA Method 502.2, gasoline range organics (GRO) methods for monitoring underground storage tanks
- Separation of trihalomethanes
- Ideal polarity for light hydrocarbons and aromatics

Restek* Rtx*-624 Capillary Columns

Suggested Primary Applications for Rtx-624 Columns:

Volatile Organic Pollutants

Application-specific columns for volatile organic pollutants

- Crossbond* 6% cyanopropylphenyl/94% dimethyl polysiloxane
- Can be used with GC/MS system or PID in tandem with ELCD
- Excellent separation of the early-eluting gases

I.D.	Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each

Restek* XTI*-5 Capillary Columns

Suggested Primary Applications for XTI-5 Columns:

Semivolatiles
Pesticides
PCBs
Environmental Samples
Essential Oils

Similar to DB5-HT, DB5-XLT, PTE-5

- Crossbond* 5% phenyl; highest thermal stability and lowest bleed of any similar column
- Resolve closely eluting isomers
- Include test chromatogram

I.D.	Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
15m length

Restek* Rtx*-CLPesticides Capillary Columns

Designed to overcome the coelutions and analyte breakdown typically encountered in chlorinated pesticide analyses for EPA Methods 8081, 608, and CLP

- Application-specific columns for organochlorine pesticides and herbicides; exceed performance criteria for US EPA methods 8081, 608, CLP
- Low bleed—ideal for GC/ECD or GC/MS analyses
- Baseline separations in less than 25 minutes
- Stable to 340°C

Restek* Rtx*-CLPesticides Column Kits

Application-specific columns for organochlorine pesticides and herbicides

- Exceed performance criteria for US EPA methods 8081, 608, CLP
- Column bleed measured by ECD is extremely low at temperatures greater than 300°C
- Baseline separations in less than 25 minutes
- Stable to 340°C

0.25mm I.D. Rtx-CLPesticides Kit

- Rtx-CLPesticides Column, 0.25mm I.D., 30m length, 0.25µm
- Rtx-CLPesticides2 Column, 0.25mm I.D., 30m length, 0.20µm
- Universal Angled Y Press-Tight* Connector
- Siltek* Guard Column, 0.25mm I.D., 5m length

0.32mm I.D. Rtx-CLPesticides Kit

- Rtx-CLPesticides Column, 0.32mm I.D., 30m length, 0.50µm
- Rtx-CLPesticides2 Column, 0.32mm I.D., 30m length, 0.25µm
- Universal Angled Y Press-Tight Connector
- Siltek Guard Column, 0.32mm I.D., 5m length

0.53mm I.D. Rtx*-CLPesticides Kit

Restek* MXT-1 Sim Dist (metal, Siltek* treated) Capillary Columns

Stainless-steel capillary columns deactivated by proprietary process

- Meets all criteria for high-temperature simulated distillation, e.g., ASTM* Method D-6352
- Methyl silicone polarity

I.D.	Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
0.53mm	0.15µm	-60 to +400°C	70101	**06-713-286**	330.00

Restek* MXT-1HT Sim Dist (metal, Siltek* treated) Capillary Columns

Proprietary deactivation process applied to stainless-steel tubing

- Meets all resolution criteria for high temperature simulated distillation (e.g., ASTM* Method D-6352)
- Methyl silicone polarity
- Exhibits excellent peak shape and low bleed at 430°C

I.D.	Film Thickness	Temp. Limits	Mfr. No.	Cat. No.	Each
0.53mm	0.10µm	-60 to +430°C	70100	**06-713-284**	330.00

GAS CHROMATOGRAPHY ACCESSORIES

Thermo Scientific* Ferrules for Agilent* GCs

Inert, contaminant-free, and with tight dimensional requirements

- Use for Agilent* 5890, 6890, and 6850 instruments on injectors and detectors
- All ferrules are packaged in individual blister packs

100% Graphite Ferrules

- Soft material—can be compressed to grip with column; forms stable seal
- Porous to O_2 (not for GC/MS)
- Reusable

15% Graphite/85% Vespel* Ferrules

- Formed of a hard material that is mechanically robust and features a long lifetime
- Must retighten after initial temperature cycles
- For GC/MS interface
- Not reusable

03-050-2 series

Fits Column I.D.	Temp. Limit	Compare to Agilent No.	Mfr. No.	Cat. No.	Pack of 10

Thermo Scientific* GC Injection Port Liners

Precision manufactured for Agilent* and other leading instruments

- Improved reproducible vaporization
- Highly deactivated borosilicate glass
- Produced to exacting tolerances

FocusLiner* Injector Liners

- Contain quartz wool filters that improve the rate of vaporization, reducing the discrimination of high boiling analytes in the sample to provide high reproducibility
- Prevent nonvolatile components from entering the column, improving sensitivity and extending column lifetimes
- Lowers carryover
- Use to achieve Relative Standard Deviation (RSD) of <1%

Description	I.D. × O.D. × L	Packing Material	Compare to Agilent No.	Cat. No.	Pack of
Split/Splitless Glass FAST FocusLiner	2.3 × 6.3 × 78.5mm	Quartz Wool	20783	**453-A2-282**	25/328.00
Splitless Glass Liner with Recessed Gooseneck	2.0 × 6.3 × 78.5mm	No	5183-4712	**03-251-155**	5/77.00

Thermo Scientific* BTO* Septa

Durable, resealable, and with low bleed

- For use with Thermo Scientific Trace* and Focus* GCs and instruments from other manufacturers
- Supplied in individual contaminant-free blister packs
- Compare Cat. No. 31303230 to Agilent* Nos. 25183-4759, 701-0078, and 5080-8894-50

313-032-30

Material	Dia.	Injector Type	Temp. Limits	Cat. No.	Pack of 50
BTO* (Low Bleed Silicone)	11mm	Packed	400°C	**313-032-30**	72.83

Restek* Ferrules for Capillary Columns

Made of high-purity materials that will not contribute background impurities for sensitive and selective detectors

- Designed to seat securely in a variety of chromatography tube and pipe fittings.
- For 1⁄16" compression-type fittings.

06-717 Series

100% Graphite Ferrules

- High-density and contain no binders that can off-gas or absorb analytes
- With a smoother surface and cleaner edges than conventional graphite ferrules
- Ferrules are very soft and can be easily deformed for an effective seal with fused silica or glass columns
- Stable to 450°C (842°F)

Vespel*/Graphite Ferrules

- 60%/40% blend, offering the best combination of sealing performance and ease of workability
- Seal with minimal torque; preferred for vacuum and high-pressure uses such as GC/MS or other oxygen-sensitive detectors
- Hard material does not deform easily and may require retightening after several temperature cycles
- Reusable
- Stable to 400°C (752°F)

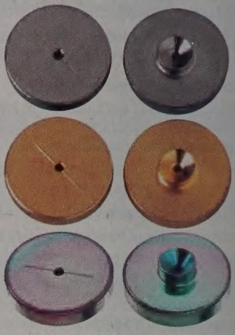
Restek* Inlet Seals

Replacement seals for Agilent* 5890/6890/6850 split/splitless injection ports

- Increase column lifetime because oxygen cannot permeate into the carrier gas
- Reduced noise benefits high-sensitivity detectors (ECDs or MSDs)
- Special grade of stainless steel that is softer and deforms more easily, creating a better seal
- Gold-plated seals offer better inertness than standard stainless steel
- Siltek* seals feature inertness similar to that of fused silica capillary columns
- All seals include washers
- 1.2mm inlet seal is recommended for use with Vespel*/graphite ferrules or when installing two columns using a two-hole ferrule
- 0.8mm inlet seal is recommended for use with graphite ferrules and single capillary column installation



06-718 and 06-717 Series

Restek* Inlet Liners for Split Injection

Designed with mixing chambers and tortuous flow paths to fully vaporize samples into a homogeneous vapor cloud before reaching split point

- Fully deactivated to prevent degradation or adsorption of active compounds
- Wool packing traps nonvolatile residue and prevents column contamination when analyzing dirty samples
- Liners with Siltek*–deactivated surface offer high temperature stability, better durability and low bleed
- O.D. × L of all liners: 6.3 × 78.5mm; I.D. 4mm

Split liners with wool

- Provide a large surface area to deliver a uniform vapor cloud to the split point
- Economical and reproducible performance
- Compatible with Agilent* 7673 autosampler

Precision* liners

- Offer high reproducibility and maximum vaporization
- Wool placed at the injection point helps wipe the needle during injection and stays in position during pressure pulses and injection

Restek* Split Liners for Agilent*/Finnigan* GCs: Cyclosplitter

For use with dirty samples

- Incorporate a cylindrical glass screw in the sample pathway to mix sample and trap nonvolatile residues
- 4mm I.D.
- Perform multiple injections before cleaning is required

Restek* Straight Inlet Liners for Splitless Injection

Used for samples containing a narrow<None>lar weight distribution and for those not prone to thermal decomposition

- Useful for splitless mode of operation and slow injections, small (<2μL) sample volumes, and high-boiling point solvent systems
- Compatible with Agilent*/Finnigan columns
- Liners should be packed with wool or fused silica beads to trap nonvolatile residue and prevent column contamination when analyzing dirty samples; also, packing in wool is recommended to aid in vaporization of high molecular weight compounds and to minimize discrimination
- O.D. × Length: 6.5 × 78.5mm

Restek* Siltek* Press -Tight* Connectors

Siltek deactivation for an inert pathway that maintains sample integrity

- Made from inert fused silica
- For use in connecting guard columns to analytical columns
- Fit Restek column outer diameters from 0.33 to 0.74mm (0.1 to 0.53mm inside diameter)
- Angled Press-Tight connector approximates the curvature of a capillary column to reduce strain on column-end connections

Restek* Intermediate-Polarity Deactivated Fused Silica Guard Columns and Transfer Lines

Most common solvents easily wet and create a uniform film on the tubing surface

- Wide range of applications
- Maximum temperature 325°C
- Diameters greater than 0.10mm tested with Grob test mix to ensure high inertness

Restek* Electronic Leak Detector

Microchip technology enables high sensitivity in an ergonomic, handheld unit

- Reliable thermal conductivity leak detector detects minute gas leaks that can go undetected by liquid leak detectors
- Highly sensitive; responds to leaks in less than two seconds
- Audible alarm plus LED bar graph readout
- Repositioned ON/OFF switch eliminates accidentally powering on the unit
- Probe tip design prevents debris from entering the unit
- Touch button autozero
- Internal battery charge capability
- Low-battery/battery charge indicator
- Operating temperature range: 32° to 120°F (0° to 45°C)
- Humidity range: 0 to 97%

06-750-001

INCLUDES:
Built-in rechargeable 9V NiMH battery, 10V battery charger

COMPLIANCE:
CE approved

Description	Mfr. No.	Cat. No.	Each
Leak Detector with 110V Battery Charger	22451	**06-750-001**	815.00

Gas	Minimum Detectable Leak Rate (atmcc/sec.)	Indicating LED Light Color
Helium	1.0×10^{-5}	Red
Nitrogen	1.4×10^{-3}	Yellow
Argon	2.2×10^{-3}	Yellow
Carbon Dioxide	1.1×10^{-3}	Yellow

WARNING
Electronic leak detector determines trace amounts of gas in a GC environment only. Unit is not designed for determining combustible gas leaks.

Visit www.fishersci.com and search for Chromatography Standards

Restek* GC Racer* System by Zip Scientific

Decrease run time by increasing the GC heating rate

- GC Racer's heating element enters the circuit when the controller, plugged into the PC board of the GC, detects a difference in programmed and actual heating rates
- For use with any capillary column
- Capillary column does not need to be removed during installation
- Agilent 5890: maintains heating rate of 70°C/min. up to 350°C or 60°C/min. up to 450°C
- Agilent 6890: maintains heating rate of 70°C/min. up to 400°C

06-712-131

For Use with	Mfr. No.	Cat. No.	Each
Agilent 5890 Series II (only)	23024	**06-712-131**	3050.00
Agilent 5890A (only)	23025	**06-712-132**	3050.00
Agilent 6890	23028	**06-712-135**	3050.00

SGE* 100% Graphite Ferrules

Use in Agilent Technologies* (HP) detectors and injectors at atmospheric pressure (e.g., FID)

- Soft 100% graphite is porous to oxygen
- Forms a stable seal with capillary columns
- Reusable on other capillary columns
- Maximum temperature: 450°C (842°F)
- Preconditioned under nitrogen for low-bleed performance
- SG-072635 and SG-072636 feature a short ferrule body style to fit standard HP injector/detector capillary nuts
- Not for GC/MS interface

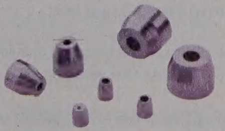
SG-0726 Series

Inside Dia.	Cat. No.	Pack of 10
0.5mm	**SG-072635**	23.92
0.8mm	**SG-072636**	23.92
¼"	**SG-072601**	23.92
⅛"	**SG-072602**	23.92

SGE* 15% Graphite/85% Vespel* Ferrules

Mechanically robust for long lifetimes

- Form strong grip with capillary column
- Maximum temperature: 300°C (572°F)
- Must retighten after initial temperature cycles
- Cannot be reused
- Preconditioned under nitrogen for low-bleed performance
- SG-073109 features short ferrule body style to fit standard Agilent Technologies* HP injector/detector capillary nuts



15% Graphite/85% Vespel Ferrules

For Column I.D. 0.53mm	0.8mm	**SG-072-655**	33.35

SGE* GC Inlet Liners

For Agilent Technologies* GC instruments

- All liners are deactivated using high temperature (420°C [788°F]) gas phase deactivation
- Supplied in blister packs to prevent contamination
- Reduced active sites mean no unwanted reaction in samples

FocusLiners*

- Include two tapered sections that secure the quartz wool plug for optimum needle tip wiping and sample transfer—also prevent quartz wool from shifting towards the septum or pushing down into the liner
- Provide excellent reproducibility
- Results in lower mass discrimination
- **Fast FocusLiners** have a narrow 2.3mm I.D. for use with 0.1mm I.D. capillary columns—narrow I.D. also results in smaller peak widths

Liners for Split Injection

Quartz wool in some split liners promotes analyte mixing and results in better quantitation, provides a large surface area that aids in liquid sample vaporization, acts as a trap to collect nonvolatile residue from sample, and prevents sample from hitting the bottom of the injector before volatilization.

Liners for Splitless Injection

Tapers in some splitless liners minimize contact of analytes with the bottom of the injection port –especially useful for very active compounds; also channel analytes into column for a more robust column installation.

SGE* GC Septa

Designed specifically for use in Agilent Technologies* (HP) GC instruments

CS Septa

- PTFE-coated silicone septa for low temperature applications
- Good durability, good resealing
- Excellent solvent resistance; good tear resistance
- Maximum temperature: 200°C (392°F)

TCS Septa

- PTFE-coated triple-layer silicone septa for medium to high temperature applications
- Good durability, very good resealing
- Excellent solvent resistance; very good tear resistance
- Maximum temperature: 280°C (536°F)

Auto-Sep* Septa

- Silicone septa for high-volume autosampler and manual use (especially for GC/MS)
- Excellent durability, resealing, solvent and tear resistance
- Maximum temperature: 320°C (608°F)

Auto-Sep T Septa

- PTFE-coated silicone septa for temperature program injectors and high-volume autosamplers (especially for GC/MS)
- Excellent durability, resealing, solvent and tear resistance
- Maximum temperature: 350°C (662°F)

HPLC COLUMNS

Thermo Scientific* Hypersil* Gold Columns

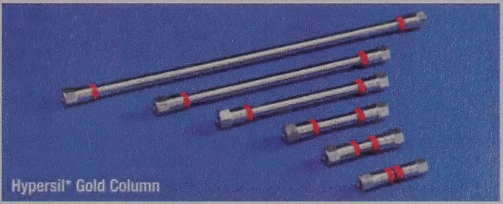
Ultrapure, silica-based columns with exceptional peak shape, sensitivity and resolution

- Provide very symmetrical peaks, even when analyzing compounds that give poor peak shape on traditional silica-based chemistries
- Manufacturing process creates an even surface that reduces unwanted interactions between analytes and acidic silanols
- Compare to Phenomenex* Luna*, Agilent* Zorbax*, Waters* SunFire*, and other similar columns
- Hypersil Gold columns with 1.9µm particle size are an alternative to Waters* Acquity* UPLC*—allow assays to be performed with a higher linear velocity through the column without loss in performance

Popular Phase Options

- **C18** offers high peak shape with generic gradients
- **C8** has similar selectivity to C18, but with less retention
- **aQ** can be used for challenging reverse phase separations employing highly aqueous mobile phases
- **PFP** offers extra retention for halogenated species
- **CN** can be used for both reversed and normal phase separations

C18 Column Packing—in 5 and 8Rm Particle Sizes



- Provide C18 selectivity and a predictable elution order
- Ideal for applications where resolution between compounds closely related in structure is very important—like in drug analyses
- Simplify separations and increase productivity
- Very symmetrical peak shapes offer enhanced sensitivity, even when analyzing compounds that give notoriously poor peak shape on traditional silica-based chemistries
- Available in many dimensions and lengths, including capillary, for analytical applications; columns with 8µm particle size and larger column dimensions can be used for preparative work

C18 Column Packing—in 1.9 and 3µm Particle Sizes

- Provide C18 selectivity and a predictable elution order
- Ideal for applications where resolution between compounds closely related in structure is very important—like in drug analyses
- Simplify separations and increase productivity
- Very symmetrical peak shapes offer enhanced sensitivity, even when analyzing compounds that give notoriously poor peak shape on traditional silica-based chemistries
- Available in many dimensions and lengths, including capillary, for analytical applications; columns with 8µm particle size and larger column dimensions can be used for preparative work
- 1.9µm particle size columns are especially designed for high throughput screening and ultra-high pressure LC applications

C8 Column Packing—in 3 and 5µm Particle Sizes

- Very symmetrical peak shapes offer enhanced sensitivity, even when analyzing compounds that give notoriously poor peak shape on traditional silica-based chemistries
- Similar selectivity to C18 columns with a predictable elution order, but with less retention
- Ideal when trying to analyze compounds in a shorter amount of time, or where smaller amounts of hydrophobicity are needed in order to successfully retain compounds of interest

Thermo Scientific* Hypersil* Gold Columns, Contd.

CN Column Packing—in 3 and 5µm Particle Sizes

- Outstanding sensitivity
- Less retention for faster analyses
- Ideal when trying to analyze a wide range of compounds very quickly or when selectivity enhancements are needed
- Use to analyze steroids in reversed phase to sugars and other polar entities in normal phase

PFP Column Packing—in 1.9, 3 and 5µm Particle Sizes

- The additional mechanisms of the PFP phase, such as steric selectivity of the analyte species and dipole interaction, offer alternative selectivity to C18
- Extra retention for halogenated species
- Unique selectivity for nonfluorinated polar compounds
- Ideal for use in analyzing compounds that are difficult to retain; have complex halogenated functionality like taxane samples; compounds containing hydroxyl, carboxyl, nitro, or other polar groups

Thermo Scientific* Hypersil* Gold Columns, Contd.

Hypersil* Gold aQ* Columns—in 1.9, 3 and 5µm Particle Sizes

- Comprised of a polar endcapped C18 phase for high retention of polar compounds
- Optimized peak shape, resolution, sensitivity, and efficiency
- Stability in 100% aqueous mobile phases
- Medium hydrophobicity
- 2 to 9pH range
- 12% carbon load
- USP L1
- 175Å pore size

Thermo Scientific* Hypersil* Gold C18 Kappa* Capillary Columns

Endcapped, ultrapure capillary columns with exceptional peak shape and resolution for LC and LC/MS

- Highly efficient; exhibit high performance and sensitive separation even when sample size is limited
- Rugged sleeve design for robustness
- Ideal for new method development or in such applications as drug analyses where active constituents and other trace components must be rigorously monitored

Thermo Scientific* Hypersil* Gold C18 Javelin* Guard Columns

Economical means to extend column life and improve performance

- Direct-connection, patented fingertight design has a 1⁄16" CPI tip that attaches directly to the inlet of the HPLC column with tubing or wrenches
- Requires no holder, allowing quick and easy replacement

Thermo Scientific* Hypersil* Gold Javelin* HTS Columns

Designed for high throughput metabolite screening; also ideal for walk up instruments and high throughput LC/MS

- 5µm particle size
- Short, slim design accommodates multiple columns in small valve settings
- Patented internal seat and fingertight fittings make columns convenient to use and easy to change
- 1/16" CPI tip for direct connection to the detector minimizes bandspreading
- Directly connect to column switching valve or detector inlet so many different phases can be evaluated for selectivity differences, helping to ensure positive metabolite identification through separation

I.D. × L	Cat. No.	Pack of 3	Cat. No.	Pack of 10

Thermo Scientific* Hypersil* BDS Columns

Economical, original, general-purpose Hypersil BDS columns that include Certificate of Authenticity

- Base deactivated and endcapped
- Long column lifetimes with excellent column-to-column and exceptional batch-to-batch reproducibility (data is available to prove its suitability for validated methods)
- Each column is individually tested to meet well-defined, high specifications
- Manufactured with ISO 9001:2000 certified processes

3µm C18 Columns

Ideal for the determination of pharmaceutical active components.

Thermo Scientific* Hypersil* BDS Drop-In Guard Cartridges

Left: 28103 Series
Right: 851-00 Guard Cartridge Holder

Convenient, economic, and effective protection for extending column lifetimes

- Fast and simple installation
- 10mm length provides column protection with minimal impact on chromatography
- Drop-In cartridges are available for all Thermo Scientific stationary phases
- Require the use of a Uniguard Direct-Connection* Drop-In Guard Cartridge Holder (sold separately; Cat. Nos. 851-00, 852-00, 850-00)

Thermo Scientific* Hypersil* Columns

- Highly efficient, proven reproducibility, long life
- Undergo multiple quality control tests to ensure high quality
- Ideal for use in QA/QC laboratories

Popular Phase Options

- **ODS (C18)** is suitable for nonpolar and moderately polar solutes including acids, neutrals, and lipophilic compounds; **ODS-2 (C18)** is a rugged and dependable alternative to L1 columns based on type A silica; endcapped
- **MOS (C8)** has a monolayer of C8 alkyl chain bonded to the silica surface and exhibits similar selectivity to C18, but is less retentive to provide reduced time for analyses—particularly for strongly hydrophobic analytes; **MOS-2 (C8)** is the endcapped version
- **SAS (C1)** is the least retentive of the Hypersil alkyl bonded phases; can be used in ion-pair separations
- **CPS (Cyano)** is a cyanopropyl phase column for both normal and reversed-phase HPLC; equilibrate rapidly and are not deactivated by small quantities of water; **CPS-2 (Cyano)** is the endcapped version
- **Phenyl** is a reversed-phase column for the analysis of aromatic and moderately polar compounds; **Phenyl-2** is the endcapped version
- **APS-2 (Amino)** is a versatile amino propyl phase column for use in weak ion exchange, reversed phase, and normal phase modes; can be used with common buffers and an organic modifier as a weak ion exchange material for analysis of anions and organic acids
- **Silica** has robust and reproducible base media for nonpolar and moderately polar organic compounds by normal phase
- **SAX** is a highly stable silica-based quarternary amine strong anion exchange column designed for aqueous and low pH mobile phases, and smaller organic molecules

For Ordering Information for the columns described above, see pp. 424 (right) to 430.

Thermo Scientific* Hypersil* Drop-In Guard Cartridges—CPA, Phenyl, APS-2, SAX

Convenient, economical, and effective protection for extending column lifetimes

- Fast and simple installation
- 10mm length provides column protection with minimal impact on chromatography applications
- Drop-In cartridges are available for all Thermo Scientific stationary phases
- Require the use of a Uniguard* Direct-Connection* Drop-In Guard Cartridge Holder (Cat. Nos. 852-00, 850-00; sold separately)

Thermo Scientific* BioBasic* Reversed-Phase Columns

High-performance stationary phase offering different selectivity

- Extra-dense bonding chemistry gives a highly stable, reproducible surface for reliable results
- 300Å pore size for improved performance in biomolecule applications; also use for small separations in food additives, aromatic acids, small organic acids, and in LC/MS
- Stainless-steel column hardware

Thermo Scientific* BioBasic* SEC Size Exclusion Columns

Ideal for molecular weight determinations of peptides, proteins, and water-soluble polymers; also for direct automated analysis of serum or urine samples

- Polymeric-coated, silica-based media
- Mechanically rigid for highly efficient separations with minimal secondary interactions
- 60Å and 120Å pore sizes can also be used for sample clean-up from biological matrices

733, 734, 735, 736 Series

Pore Size	I.D.	Length	Cat. No.	Each
60Å	7.8mm	150mm	**73305-157846**	690.25
120Å	7.8mm	300mm	**73405-307846**	901.25
300Å	7.8mm	150mm	**73505-157846**	690.25

BioBasic SEC Guard Columns

Pore Size	I.D. × L	Cat. No.	Each
60Å	7.8 × 30mm	**73305-037821**	334.75
120Å	7.8 × 30mm	**73405-037821**	334.75
300Å	7.8 × 30mm	**73505-037821**	334.75
1000Å	7.8 × 30mm	**73605-037821**	334.75

Thermo Scientific* BioBasic* Ion Exchange Columns

Choice of two proprietary, protein-friendly, polymeric ion exchange ligands bound to pure deactivated silica

- Provide high performance for proteins, peptides and nucleic acids
- Stable under demanding pH conditions
- AX has an ion exchange ligand of polyethyleneimine (PEI) and a capacity of 0.22mEq/g; use for normal phase and hydrophilic interaction chromatography (HILIC)
- SCX has an ion echange ligand of sulfonic acids and a capacity of 0.07mEq/g; excellent for cation exchange chromatography

AX Anion Exchange Columns

For the separation of proteins, peptides, other anionic species and highly polar molecules

- Proprietary, protein-friendly, ion exchange ligands of polyethyleneimine (PEI) bound to pure deactivated silica
- Low hydrophobicity
- Capacity of 0.22mEq/g; 3% carbon load
- Use for normal phase and hydrophilic interaction chromatography (HILIC)
- Stable under demanding pH conditions (2 to 8 pH range)

Thermo Scientific* BioBasic* Kappa* Columns

Particle size: 5µm

- Highly efficient capillary columns
- Inert stainless-steel sleeve
- Most columns have standard female endfittings that are compatible with 10-32 male nuts and 1⁄16" (1.6mm) O.D. capillary tubing; flexible 0.18 I.D. × 100mm long column has 1⁄32" (0.8mm) PEEK* male endfittings that allow it to be looped from port to port on the injector
- Proprietary bonding procedure ensures high phase coverage and resolution with shorter column lengths when compared to other 300Å columns
- Packings designed to give longer lifetimes and withstand harsh mobile phase and clean-up conditions
- Meet the sensitivity needs of demanding LC/MS applications, especially proteomics analysis at the nanomol and picomol level, as well as with microelectrospray and nanospray

Thermo Scientific* Hypercarb* Columns

Ideally suited to solve "problem" separations

- Use for difficult samples
  - Retention of very polar compounds
  - Resolution of closely related analytes
  - Analyses at pH extremes
- 100% porous graphitic carbon stationary phase—columns consist of fully porous spherical carbon particles comprised of flat sheets of hexagonally arranged carbon atoms
- Stable from pH 1 to 14 at ultrahigh temperatures in a wide range of solvents
- Can be used in both reversed and normal phase HPLC and LC/MS applications
- Separate highly polar compounds that are difficult to retain and resolve on silica-based alkyl phases
- Successful in the analysis of stereoisomes/diastereoisomers and positional isomers
- Use MS-friendly mobile phases

Thermo Scientific* Hypercarb* Kappa* Capillary Columns

100% porous graphite carbon for extended separation capabilities

- Exceptional retention of very polar analytes
- Separates structurally related substances
- pH stable from 0 to 14
- Excellent for high temperature applications (up to 200°C)

Thermo Scientific* Hypercarb* Drop-In Guard Cartridges

Convenient, economic, and effective protection for extending column lifetimes

- Fast, simple installation
- 10mm length provides column protection
- Drop-in cartridges are available for all Thermo Scientific stationary phases
- Require the use of a Uniguard Direct-Connection Drop-In Guard Cartridge Holder (Cat. Nos. 851-00, 852-00, 850-00; sold separately)

Left: 35005 Series
Right: 851-00 Guard Cartridge Holder

I.D.	Length	Cat. No.	Pack of 2
3µm Particle Size

Prices subject to change.

Restek* Allure* Columns with Aqueous C18 Column Packing

Excellent choice when analyzing a wide range of compounds, as in LC/MS screening methods

- 5µm particle size, 60Å pore size
- Developed for maximum retention during LC/MS applications
- High retention, large surface area
- Not endcapped
- Also available in guard cartridge configurations
- **Aqueous C18 Columns** feature a highly retentive and selective phase for separating polar analytes, including polar acidic compounds
- Compatible with highly aqueous (up to 100%) mobile phases
- Base deactivated

Alltech* Prevail* HPLC Columns

Stable in 100% aqueous mobile phases

- General-purpose, reversed-phase columns
- Can be used with mobile phases from 100% aqueous to 100% organic
- Provide excellent retention of nonpolar analytes
- Stable bonding chemistry provides high efficiency, long column life and cleaner separations by reducing silanol interaction
- Use with mobile phases from 100% aqueous to 100% organic

LOOKING FOR FITTINGS, FRITS AND FERRULES?

Don't sweat the small stuff. You can find all the right fittings, frits or ferrules you need online.

Visit www.fishersci.com and search for Ferrule

Alltech* Alltima* Columns

Analyze acids, bases, and neutrals in one run

- Base-deactivated to eliminate activated silanols and reduce peak tailing
- Polymerically bonded and double endcapped for long life—even when using harsh mobile phases
- Retain capacity and selectivity after being washed for 500 hours with an acetonitrile/trifluoroacetic acid mobile phase
- When used in strongly basic compound applications, columns generally do not require mobile-phase modifiers, such as triethylamine, to produce sharp symmetrical peaks
- Also available in guard column and Rocket* column configurations

Alltech* Platinum* Rocket* Columns

Short wide-bore format is designed for high-throughput and high-speed methods

- Methods run three to five times faster than on conventional columns with equal or better resolution
- Work well on any HPLC system without requiring special tubing, injectors or detectors for proper performance

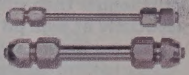
Whatman* Partisil* HPLC Columns

Irregularly shaped media in analytical, semipreparative, and preparative columns



05-713 Series

- Compatible with all HPLC and LC/MS instrumentation
- Neutral pH silica gel improves peak symmetry without the need for mobile phase modifiers
- Uniform particle sizing minimizes backpressure
- Efficiencies for Partisil 5µm media:: 50,000 N/M; Partisil 10µm media: 20,000 N/M

Standard Analytical Columns

- Allow direct scale-up or scale-down to Magnum* columns
- Applied with Whatman Compression Screw (WCS) fittings

RĀC* II Second-Generation Rapid-Analysis Columns

- Analytical columns for faster separations with reduced solvent consumption
- Special endfitting eliminates unswept corners to maximize resolution and peak symmetry
- Operate at low backpressure, even at high flowrates, for longer life
- Connect to LC instrumentation with WCS fittings

Magnum 9* Columns

- Semipreparative columns for microgram-to-gram quantities
- Coned outlet allows high load capacity with minimal peak distortion
- Compatible with HPLC instruments, allowing you to use the same equipment for both analytical and preparative work

PAC	0.85% N
SAX	0.85% NR5+
SCX	0.40% S

Hamilton PRP*-1 (100Å) Reversed Polymer Phase Columns

Lasts longer than silica-based C8 or C18 phase, especially at high pH levels (8 to 13)

14-816 Series

- Silanol free; no stationary phase coating for higher reproducibility
- Range of column sizes eases scale-up
- Remains stable with 0 to 100% organic modifier
- Stable from pH 0 to 14
- Maximum pressure, 5000psi
- Pore size, 100Å
- Stainless-steel or more inert PEEK* columns
- Common applications include analysis of DNA, catecholamines, amino acids, chlorophenols, sulfas, and water-soluble vitamins

Hamilton PRP*-X100 Anion Exchange Columns

Separate inorganic or organic anions at concentrations from 10ppb to 1000ppm without chemical suppression

14-816 Series

- Features PRP-X100, a strong base ion exchanger (exchange capacity, 0.2mEq/g) that is stable from pH 1 to 13 and in 0 to 100% concentration of organic modifier
- 5000psi maximum pressure; flowrate range: 0 to 8mL/min.
- Longer life than silica columns
- Can be used on virtually any HPLC system
- Applications include analysis of weak acid counter ions like borate, silicate, and cyanide, and stronger anions like bromide, fluoride, chloride, and sulfate

HPLC ACCESSORIES

Thermo Scientific* Hypersil* Javelin* Filters

One-piece filter protects HPLC systems

- Direct-connection design for maximum efficiency
- Replace entire disposable filter unit for easy changes
- Recommended for use as dedicated filters for a column rather than the HPLC system
- 1⁄16 in. CPI tip attaches directly to HPLC column inlet without tubing or wrenches
- 0.5µm porosity

I.D.	Cat. No.	Pack of 4
3.0mm	**88700**	63.00
4.6/4.0mm	**88400**	63.00

Thermo Scientific* Hypersil* PEEK* Capillary Tubing

Pre-cut and color-coded for easy identification and use

- Broad chemical compatibility
- Biocompatible
- Easily cut to desired length
- Appropriate for many HPLC applications
- Resistant to most organic solvents, but nitric acid, sulfuric acid, dichloromethane, THF and DMSO are not recommended

I.D.	Color	Length	Cat. No.	Each
0.005"	Red	5cm	**03-050-105**	7.50
0.005"	Red	10cm	**03-050-106**	8.50
0.005"	Red	20cm	**03-050-107**	9.75
0.005"	Red	30cm	**03-050-108**	9.75
0.005"	Red	50cm	**03-050-109**	10.75

Restek* Last-Drop* Filter

Allows more analyses per batch of mobile phase and helps reduce hazardous waste

- Flat filter element sits parallel to the bottom of the mobile phase reservoir, allowing the filter to draw 98% of the mobile phase without drawing air into the system
- Filter O.D.: 22.1mm

06-712-85 Series

Porosity	Mfr. No.	Cat. No.	Each
2µm	25314	**06-712-857**	62.00
10µm	25315	**06-712-858**	62.00

Restek* High-Pressure Frit-Type In-Line Filters

Designed for ease of use, low dead volume and flexibility

- Stand-alone version of the Trident* column protection system
- Uses a replaceable, PEEK*-encapsulated Type 316 stainless-steel frit with a surface area of 12mm^2 to fit 1⁄16" O.D. tubing using a CPI connector
- Standard filter comes with 2.0µm porosity/frit is replaceable with 0.5µm frit

06-712-616

06-719-062

Description	Mfr. No.	Cat. No.	Pack of
In-line Filter with 2.0µm Frit	25041	**06-712-616**	1/53.00
Replacement Frits			
0.5µm	25023	**06-719-063**	5/32.00
2.0µm	25022	**06-719-062**	5/27.00

Alltech* SofGrip* HPLC Fittings

Ergonomic fittings are extremely comfortable and easy to hand-tighten

- One-piece integrated ferrule design
- Consist of soft elastomer cushion wrapped around Graph-Tite* (graphitized-PEEK*) fitting; durable, biocompatible polymer is inert to nearly all HPLC and IC solvents
- Forms a leak-free seal with any 10-32 port, regardless of stop depth
- Choice of standard one-piece or No-Slip* that incorporates barrel tines into the bore of the fitting (No-Slip fittings lightly grip tubing during column changes or plumbing modifications)
- Two lengths and five colors for color coding
- Assortment includes two of each color

Black	40516	**AT40516**	100.88

Alltech* No-Slip* One-Piece Fittings

No-Slip barrel tines lightly grip tubing to keep the fitting in place when changing columns or sample loops

- Form leak-free connections with a convenient one-piece design—no ferrules needed
- Works with all 10-32 ports; automatically adjusts to correct stop depth when connected
- Accepts 1⁄16" O.D. tubing
- Graph-Tite* (carbon-reinforced fittings PEEK*) are three times stronger than PEEK and provide excellent durability
- Completely inert to HPLC and IC solvents; 100% biocompatible
- Maximum temperature: 100°C
- Finger-Tight* version for use in pressures up to 5000psig
- Hex-head version designed for higher pressures up to 8000psig

Alltech* Standard One-Piece Fittings

Color-coded fittings clearly identify fluid connections, form reliable connections without tools, and have a universal design

- Use with all 10-32 ports—regardless of stop depth
- Accept 1⁄16" O.D. tubing
- Maximum temperature: 100°C
- PEEK* fittings are chemically inert and biocompatible with nonextractable dyes
- Graph-Tite* (carbon-reinforced PEEK) fittings are three times stronger and more durable than PEEK
- Finger-Tight* version for use with pressures up to 5000psig
- Hex-head version for use with pressures up to 8000psig

Alltech* Stainless-Steel HPLC Fittings

Various lengths for special needs

- Stagger different nut lengths to allow for wrench access without being hindered by adjacent nuts
- Manufactured of 300 Series stainless steel with 10-32 type threading
- Maximum temperature: 500°C
- Maximum pressure: 7000psig (standard format caps and plugs); 10,000psig (high-pressure format plugs)

Alltech* Color-Coded PEEK* Tubing

High-strength PEEK metal-free tubing ideal for high-pressure applications

- Chemically inert, biocompatible
- Appropriate for a wide variety of LC applications, especially those requiring metal-free conditions
- Striped tubing is colored on outside only so no dye contacts the fluid path
- Solid tubing is colored with nonextractable dye that will not interfere with analyses
- Maximum temperature: 100°C (212°F)

Omnifit "T" Series Bottle Caps

Easy to use and versatile range of caps requires no fittings

- Luer ported, straight through tubing
- Simply push ⅛" O.D. hard wall tubing through the ports
- For 1⁄16" O.D. hard wall tubing, use OF9LA adapter supplied with cap
- Use OF9BA series adapter for softwall tubing
- Anti-twist design prevents tubing from kinking when removing cap
- Each port also accepts male Luer connectors
- With polypropylene screw cap and chemically inert solid PTFE body

OF932T2

ORDERING INFORMATION:

Available with Luer port or Luer port and fluorocarbon check valve and 10µm porosity PTFE inlet filter, enabling air to flow into the bottle while preventing particulate contamination, and preventing harmful vapors from escaping.

NOTE:

Not recommended for use under pressure with Luer products fitting as no Luer lock is employed.

GPI Thread Size	No. of Ports	Cat. No.	Each
Without Check Valve and Filter			
GL32	Two	**OF932T2**	32.48
GL38-430	Two	**OF938T2**	34.13
GL38-430	Three	**OF938T3**	36.11

GL45	Two	**OF945T2**	37.43
GL45	Three	**OF945T3**	39.41
GL45	Four	**OF945T4**	41.40
With Check Valve and Filter			
GL38	Two	**OF938T2F**	43.60
GL38	Three	**OF938T3F**	45.58
GL38	Four	**OF938T4F**	47.56
GL45	Two	**OF945T2F**	46.91
GL45	Three	**OF945T3F**	48.87
GL45	Four	**OF945T4F**	50.86

Omnifit "Q" Series Bottle Caps

Easy operation on/off valves offer a simple way to connect tubing

- ¼"-28 ports with a stainless-steel thread insert to enable repeated connect/disconnect
- Easily control the flow of liquid into and out of the bottle with integrated valves
- Each fluid line can be switched on or off independently
- Anti-twist design ensures no kinked tubing during cap removal
- With polypropylene screw cap, chemically inert solid PTFE body, ⅛ O.D. × 0.06" I.D. tubing

OF932Q3V

ORDERING INFORMATION:

"Q" Series Bottle Caps with valved ports include PCTFE rotors to permit manual shutoff.

REQUIRED ACCESSORIES:

Use OF9VF check valve and filter assembly to prevent harmful vapors from escaping and to stop contamination from entering the bottle.

GPI Thread Size	No. of Ports	Cat. No.	Each
Without Valved Ports			
GL38-430	Two	**OF938Q2**	44.03
GL38-430	Three	**OF938Q3**	50.09

GL45	Four	**OF945Q4V**	149.22

Omnifit "C" Series Bottle Caps

Include the Omnifit Cap system for easy and versatile tubing connection

- Omnifit connection cap system accepts ¼"-28 threaded fittings and 0.5 to 4.0mm O.D. hardwall tubing
- 4.0mm hardwall tubing can be connected directly into cap using supplied PTFE cones
- Each fluid line has a control valve port with PCTFE rotors to permit manual shutoff
- Chemically inert solid PTFE body, polypropylene screw caps and Omnifit connection caps, 0.06 O.D. × 1.5mm I.D. tubing

OF945C4V

REQUIRED ACCESSORIES:

Use OF9VF check valve and filter assembly to prevent harmful vapors from escaping and to stop contamination from entering the bottle.

GPI Thread Size	No. of Ports	Cat. No.	Each
GL38-430	Two	**OF938C2V**	95.64

Kontes* Ultra-Ware* HPLC Reservoirs

Designed for the preparation, storage, and delivery of liquid chromatography mobile phases

- Manufactured from Type I, Class A borosilicate glass with external plastic safety coating
- Safety coating has UV blocking agent that blocks light transmittance up to 385nm, preventing photodegradation of light-sensitive solvents
- Screw thread: GL45-4
- Maximum temperature: 120°C
- Available in flat or conical bottoms; conical-bottom reservoirs deliver virtually all of the mobile phase without having to tilt reservoir and risk solvent spill

K953901 Series

Reservoir Capacity	Diameter × Height	Cat. No.	Each
Conical Bottom			
1L	13.0 × 27.5cm	**K953901-1002**	140.46
2L	15.0 × 31.9cm	**K953901-2002**	216.30
5L	20.5 × 37.3cm	**K953901-5002**	373.61
Flat Bottom			
1L	11.1 × 20.5cm	**K953902-1002**	97.27
2L	13.8 × 25.0cm	**K953902-2002**	124.31
5L	18.6 × 32.0cm	**K953902-5002**	278.10

Kontes* Ultra-Ware* Three-Hole Cap Systems

Borosilicate glass and PTFE construction give excellent chemical resistance to HPLC mobile phases

- Supplied with three-hole cap, conical bottom reservoir, standard fittings kit, and PTFE tubing
- Reservoir has autoclavable plastic safety coating that absorbs UV up to 385nm—preserves UV-sensitive mobile-phase components
- PTFE cap body is supplied with a TFE/propylene O-ring (Kalrez* O-ring is available for use with aggressive organic solutions; contact your Fisher Scientific Customer Service Representative for more information)
- Connecting threads on top and bottom of cap use ¼-28 flangeless fittings and adapters
- Filtration of the mobile phase directly into the reservoir requires additional purchase of a filtration cap and appropriate solvent pickup adapter

K953980 Series

Reservoir Capacity	Diameter × Height	Cat. No.	Each
1L	5 × 11" (13 × 29cm)	**K953980-1002**	373.61
2L	6 × 15" (15 × 37cm)	**K953980-2002**	456.49
5L	8 × 18" (20.5 × 45cm)	**K953980-5002**	610.98
20L	12¾ × 21¼" (31.5 × 54cm)	**K953980-2003**	1376.45

Kontes* Filtration Cap System

Inline filtration cap system with solvent pickup adapter eliminates traditional pour-and-wait filtration

- Supplied with a filtration cap, standard solvent pickup adapter, and borosilicate glass, conical-bottom reservoir
- Designed to filter HPLC mobile phase directly into the reservoir using 47mm membrane filters
- Reservoir has autoclavable plastic safety coating that absorbs UV up to 385nm—preserves UV-sensitive mobile phase components
- Glass-filled PTFE cap body is supplied with a TFE/propylene O-ring and a ¼" PFA (perfluoroalkoxy resin) hose barb; excellent chemical resistance to HPLC mobile phases

K953976 Series

Reservoir Capacity	Diameter × Height	Cat. No.	Each
1L	13 × 40cm	**K953976-1002**	550.57
2L	15 × 48cm	**K953976-2002**	616.60
5L	20.5 × 56cm	**K953976-5002**	748.63

HPLC SYSTEMS

Shimadzu* LC-2010AHT/CHT HPLC System

Fully integrated, high-throughput system with near-zero sample carryover

The LC-2010HT is available in the standard model, LC-2010AHT, or the sample-cooled model, LC-2010CHT

Components include:

High-Throughput Autosampler

- Repeatability within 0.3% RSD (under certain conditions)
- Carryover within 0.01% (under certain conditions)
- Injection cycle 15s
- Two sample racks for 1.5mL vials standard equipment

220-91397 Series

Reservoir Tray

- Accommodates six 1L bottles
- Storage drawer

System Controller

- Graphical User Interface (GUI)
- Wizard function

Pump Unit

- Dynamic Inlet Check Valve for improved flow rate stability
- Quaternary solvent value for low pressure gradient formation

Column oven

- Heats and cools up to two columns
- Double temperature control mechanism for minimal temperature deviation

UV-VIS Detector with Thermostatted Flow Cell

- Baseline noise ±0.25 × 10^{-5}AU or lower (under certain conditions)
- Built-in mercury lamp

Also included:

- 5-Line Low-Volume Degasser
- Mixer

Description	Mfr. No.	Cat. No.	Each
LC-2010AHT, Standard Model	220-91397-11	**220-91397-11**	28,000.00
LC-2010CHT, With Sample Cooler	220-91397-12	**220-91397-12**	32,000.00

For Specifications, see next page.

Shimadzu* LC-2010 AHT/CHT HPLC System, Contd.

Pump	
Type	Serial dual plunger, microvolume (10RL on primary side, 5RL on secondary)
Flowrate	0.001 to 5mL/min.
Flowrate Accuracy	±2% or ±2µL/min., whichever is larger
Flowrate Precision	±0.075% RSD or 0.2minSD, whichever is larger
Degasser	
No. of Lines	Five lines (four mobile phase plus one autosampler rinsing liquid)
Autosampler	
Volume Setting Range	0.1 to 100µL (standard); 1 to 2000µL (optional)
Type	Block heating with preheating of mobile phase
Temperature Range	Ambient -15°C to 60°C
Temperature Accuracy	±0.1°C
UV Detector	
Light Source	Deuterium; Mercury (for accuracy check)
Wavelength Range	190 to 600nm
Wavelength Accuracy	±1nm
Drift	1 × 10^{-4} AU/h (250nm, air in cell, constant room temp.)
Noise	±0.25 × 10^{-5} AU (2 sec. time constant, 250nm, air in cell)
System	
Electrical Requirements	AC 100-240V, 700VA, 50/60Hz
Dimensions (L × W × H)	500 × 430 × 605mm
Weight	47kg Standard Model, 52kg with Sample Cooler

ACCESSORIES

Sample Rack for LC-2010A/CHT

Insulated metal racks

- Capacity of 350 8 x 40 mm sample vials
- Can be used in SIL-HTA , SIL-HTC, LC-2010 or LC-2010HT
- Keyed for auto-recognition by the system

INCLUDES:

One left and one right rack

Description	Cat. No.	Each
For 8 × 40mm (1mL) vials	228-37532-91	340.00

Shimadzu* HPLC System Packages

Choose isocratic, binary or quaternary systems with autosampler or manual injector to suit your needs

Add a detector and column oven to complete the system.

Key components of these packages include:

CBM-20A Controller

- Web-based interface for remote set-up, control and monitoring
- Connect up to eight modules
- Auto-purge

SIL-20A Autosampler

- Ten second injection time
- 210 sample capacity, 1.5mL vials
- Near-zero carryover

Manual Injector

- 20µL loop included
- Mounting bracket to secure injector pump
- Switch to trigger data collection system

Choice of LC-20AT (Cat. No. 228-45001-32), LC-20AT Quaternary or LC20AB pumps:

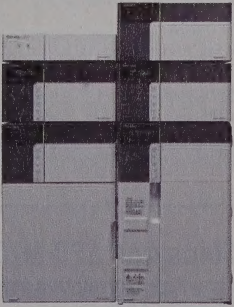
LC-20AT Quaternary

- Same features as LC-20AT but with built-in solvent valve
- Four-solvent valve for low pressure gradient formation

LC-20AB

- Binary solvent delivery unit
- Flow rate: 0.0001 to 10mL/min.
- Piston stroke volume: 10µL
- Motor resolution 3nL/step motor resolution

Key components of Food and Beverage Packages include RID-10A Refractive Index Detector or SPD-20AV Ultraviolet Detector (228-45004-32):



22091470 series

RID-10A Refractive Index Detector

- 4-partition detector design for high sensitivity in 3 modes
- Refractive index range: 1 to 1.75 RIU
- Noise: Less than 2.5 x 10^{-9} RIU
- Drift: Less than 1 x 10^{-7} RIU/hr
- Range: A mode 0.01 to 500 x 10^{-6}, P and L modes 1 to 5000 x 10^{-6}
- Flow cell volume: 9L

Contd. on next page.

Isocratic HPLC System with Manual Injector	CBM-20A	LC-20AT	RH-7725i manual injector with 20µL loop	Choose any Shimadzu detector	Degasser, reservoir tray and bottle set, any Shimadzu column oven, PEEK tubing kit	**220-91470-07**	12,000.00
Binary HPLC System with Autosampler	CBM-20A	LC-20AB	SIL-20A autosampler	Choose any Shimadzu detector	Degasser, reservoir tray and bottle set, any Shimadzu column oven, PEEK tubing kit	**220-91470-03**	28,000.00
Binary HPLC System with Manual Injector	CBM-20A	LC-20AB	RH-7725i manual injector with 20µL loop	Choose any Shimadzu detector	Degasser, reservoir tray and bottle set, any Shimadzu column oven, PEEK tubing kit	**220-91470-08**	18,000.00
Quaternary HPLC System with Autosampler	CBM-20A	LC-20AT	SIL-20A autosampler	Choose any Shimadzu detector	Degasser, reservoir tray and bottle set, any Shimadzu column oven, PEEK tubing kit	**220-91470-05**	26,000.00
Quaternary HPLC System with Manual Injector	CBM-20A	LC-20AT	RH-7725i manual injector with 20µL loop	Choose any Shimadzu detector	Degasser, reservoir tray and bottle set, any Shimadzu column oven, PEEK tubing kit	**220-91470-09**	16,000.00

Shimadzu* SPD-20A/20AV Absorbance Detectors

Temperature-controlled flow cell minimizes baseline drift and room temperature effects on signal-to-noise performance

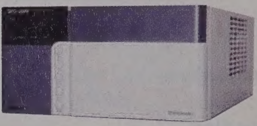
- Built-in mercury-vapor lamp
- Linear range extends to 2.5AU
- Noise of 0.5×10^{-5}AU or less

SPD-20A

- For UV analysis in 190 to 700nm range

SPD-20AV

- UV and visible range, 190 to 900nm
- Tungsten and Deuterium lamps can be lit simultaneously



228-4500 series

Model	Mfr. No.	Cat. No.	Each
SPA-20A	228-45003-32	**228-45003-32**	7210.00

Shimadzu* SPD-M20A Photodiode Array

Stray-light correlation enhanced for excellent linearity, 2.0AU

- Temperature-controlled flow cell
- Two slit widths: 1.2nm for high-resolution work and 8nm for qualitative studies
- Four analog output channels for multi-wavelength functionality
- Self-diagnostic features include wavelength accuracy and wavelength calibration
- Software control required for spectral library searches and peak purity determinations

Model	Mfr. No.	Cat. No.	Each
SPD-M20A	220-91403-01	**220-91403-01**	13,000.00

Model	SPD-M20A

Shimadzu* LC-20AD/AT Pumps

Specially machined plungers for hardness and chemical resistivity

- Plungers are mounted in a free-floating mechanism to ensure precise alignment of the plunger in the seal and pump head
- Max. discharge pressure 40MPa
- Constant pressure delivery
- Liquid-leakage sensor and high-/low-pressure limits
- Operating temperature range 4° to 35°C
- Maximum number of solvents supported in low-pressure mixing gradient is four

LC-20AD

- Parallel dual micro plunger, 10µL
- 3nL/step motor resolution

LC-20AT

- Tandem dual plunger

Model	Mfr. No.	Cat. No.	Each
LC-20AD	2284500032	**228-45000-32**	5974.00

Cat. No.	**228-45000-32**	**228-45001-32**
Type	Parallel-type dual plunger	Serial-type dual plunger
Plunger Capacity	10µL	Primary 47µL; Secondary 23µL
Flowrate Range	0.0001 to 10.0000mL/min.	0.001 to 10.000mL/min.
Flowrate Accuracy	No more than 1% or 0.5µL/min., whichever is greater	No more than 2% or 2µL/min., whichever is greater
Flowrate Precision	0.3% max.	0.3% max.
Pulsation (for water at 1.0mL/min. and 7MPa)	0.1MPa	0.3MPa
Dimensions (W × H × D)	260 × 140 × 420mm	260 × 140 × 420mm
Weight	10kg	11kg
Power Requirements	100VAC, 150VA, 50/60Hz	100VAC, 150VA, 50/60Hz

Shimadzu* RF-10AXL Fluorescence Detector

Compact, modular detector with Raman signal-to-noise ratio of 300 for excellent sensitivity and wavelength accuracy of ±2.0nm

- Ratio system compensates for lamp intensity fluctuation
- Rugged flow cell design with elevated back-pressure tolerance
- Built-in GLP functions include self-diagnostics, maintenance information (lamp-lit hours, lamp energy), and span calibration functionality
- Remote lamp ON/OFF function for lamp shutdown
- Input and output terminals enable the RF-10AXL to be added to any existing HPLC system
- Use stand-alone or with the SCL-10Avp System Controller (228-34350-92) to integrate with other VP Series components

INCLUDES:

Detector, manual, power cord, lamp and accessories

NOTE:

Contact your Fisher Scientific Customer Service Representative to help configure a system to best meet your application needs.

Cat. No.	Each
228-35353-92	9707.54

Spectral Bandwidth	15nm (excitation and emission)
Optical System	Single beam
Wavelength	
Range	200 to 650nm
Accuracy	±2nm
Repeatability	±0.2nm
Photometric	
Readout	Emission intensity
Range	Setting depends on emission intensity desired
Lamp	Xenon
Detector	Photomultiplier tube (signal side), photodiode (monitor side)
Monochromator	Holographic concave diffraction grating
Interface Port	Fiber optic to SCL-10Avp, RS-232 to external equipment
Electrical Requirements	100–240V 50/60Hz
Dimensions (L × W × H)	24 × 16 × 18" (61.0 × 40.6 × 45.7cm)

Shimadzu* FRC-10A Fraction Collector

Meets the demands of continuous, automated fraction collection

- Collects both analytical and preparative fractions
- Peltier temperature control keeps temperatures within a 4° to 70°C range
- Allows graphical set-up of fractionation parameters to eliminate guesswork of determining slope and level values
- Choose collection criteria including volume, threshold and peak purity
- Automatic adjustment for retention time shifts
- Slope-override capability enables continued collection even when the detector signal is off-scale

Cat. No.	Each
228-45070-92	3950.00

Drive System	Arm movement (X-Y) system
Capacity	144 5mL vials standard
Collection Mechanism	Solenoid valve (inc.) or direct through nozzle (w/o solenoid valve)
Flowrate	150mL/min. (water)
Collection	Programmed operation via SCL-10Avp System controller or manually
Modes	Basic (uses slope/level parameters) and Time Program (14 different functions available)
No. Collection Files	Up to 10 in memory
Collection Based on 2-Channel Generated Ratio Chromatogram	SPD-20A/AV dual-wavelength signal or signals from 2 detectors
Temperature Range	4 to 70°C
Volts	120V
Hertz	50/60Hz
Dimensions (L x W x H)	420 x 260 x 280mm (16.8 x 10.4 x 11.2")

Shimadzu* DGU-20A3/DGU-20A5 Membrane Degassers

Additional channel for degassing the rinse phase of the autosampler for increased injector accuracy and precision

- Powered by Prominence* series pumps and can be controlled by Shimadzu software
- Output of vacuum level allows monitoring and recording stability throughout a run

228-450 series

DGU-20A3

- Degassing channels: 3
- Internal volume: 380µL
- Operating temperature range: 4° to 35°C (non-condensing conditions)
- Power supplied by LC-20AB/AD/AT pump
- Dimensions: (L x W x H): 420 x 260 x 70mm (16.8 x 10.4 x 2.8")
- Weight: 5kg (11 lbs.)

DGU-20A5

- Degassing channels: 5
- Internal volume: 380µL
- Operating temperature range: 4° to 35°C (non-condensing conditions)
- Power supplied by LC-20AB/AD/AT pump
- Dimensions: (L x W x H): 420 x 260 x 70mm (16.8 x 10.4 x 2.8")
- Weight: 5.2kg (11.5 lbs.)

No. Degassing Channels	Mfr. No.	Cat. No.	Each
3-Channel Degasser	228-45018-32	**228-45018-32**	2060.00
5-Channel Degasser	228-45019-32	**228-45019-32**	2472.00

LabAlliance* Series III Binary Gradient HPLC System

Combines a Series II digital pump, a Series III digital pump, a Model 500 variable-wavelength UV detector, and an integral keypad controller with pump control capabilities

Series II and III Digital Pumps

- Single-piston pumps with low dead-volume pulse damper and rapid refill
- Self-flushing pumpheads actively wash area behind seals
- Series III pump also offers pressure-monitoring capabilities with user-settable upper/lower pressure limits and external control capabilities

Model 500 Variable UV/Visible Detector

- 12 switch-selectable absorbance ranges
- Low-noise electronics, high-noise rejection filtering, and low-loss optics ensure low noise and low drift
- Standard Type 316 stainless steel flow cell is 6mm, 9µL; located outside the main instrument housing for easy access
- Includes standard deuterium lamp for UV wavelengths; tungsten lamp may be purchased separately for visible wavelengths (contact your Fisher Scientific Customer Service Representative for details)

System Control Unit (SCU)

- Compact, handheld controller provides gradient control of the system
- Allows user to program gradient steps, run time, method linking, and number of cycles; multiple methods may be stored
- Compact, handheld; completely controls system, including the solvent delivery pump(s), run, and event

INCLUDES:

316 stainless-steel fluid path, injection valve with a 20µL loop, injector bracket, C18 column, column holder, gland nuts, ferrules, tubing

WARRANTY:

Three years

06-657-103

Electrical Requirements	Mfr. No.	Cat. No.	Each

SPECIFICATIONS

Series II and Series III Pumps	
Flowrate	0.01–10mL/min.
Pressure	0–6000psi
Dimensions	17½L × 10⅜W × 5½"H (44.5 × 26.4 × 14cm)
Weight	24 lb. (11kg)
Model 500 UV/Vis Detector	
UV Range	190–360nm (deuterium lamp)
Monochromator	Holographic grating
Bandwidth	6nm
Wavelength	±1nm
Dimensions	13¼L × 9¾W × 6¼"H (33.7 × 24.8 × 15.9cm)
Weight	20 lb. (9.1kg)

LabAlliance* Series III Digital Pump

Patented diaphragm-type, low-volume pulse damper and a rapid-refill cam make this pump virtually pulse-free—giving minimal baseline noise for the most demanding isocratic applications

- Integrate with existing system; the Series III is a direct replacement for many popular pumps
- Analytical and preparative flowrates; can be set by voltage or frequency inputs
- Use LED display and keypad to set and monitor flowrates, psi, and upper and lower pressure limits
- Micro-stepped motor
- Digital logic
- Interfaces with a 9- or 25-pin serial I/O COM port for computer connection
- Autoprime* one-button purging makes it easy to prime or purge the pump
- Automatic, self-flushing heads provide continuous washing behind the primary high-pressure seal

ORDERING INFORMATION:

Dimensions: 17½L × 10⅜W × 5½"H (28 × 13 × 15cm); weight: 24 lb. (10.9kg), electrical requirements: 110V 50/60Hz.

Choice of 50µL pumphead for 0.01 to 9.99mL/min. flowrates or a 200µL pumphead for 0.04 to 40mL/min. flowrates. Available in Type 316 stainless steel or biocompatible PEEK* (polyetherether ketone)

WARRANTY:

Three years

IC COLUMNS AND ACCESSORIES

Metrohm-Peak* Metrosep* Anion Dual Columns

IC anion columns for use in analyses with and without chemical suppression

MP61006040

Anion Dual IC 1-70

- Spherical hydroxyethyl methacrylate with quaternary ammonium groups
- 0.5mL/min. standard flow; 0.7mL/min. maximum flow
- Supplied in glass cartridge; special holder is required
- 9MPa maximum pressure
- 0 to 10% organic modifier
- 2 to 12pH range (briefly > 12)
- For applications where rapid separation is desired

Anion Dual 2

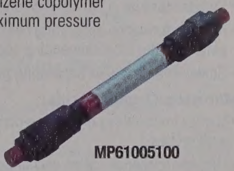
- Polymethacrylate with quaternary ammonium groups
- 0.8mL/min. standard flow; 1.2mL/min. maximum flow
- Steel cartridge—more robust than Dual 1-150 and 1-70
- 7MPa maximum pressure
- 0 to 20% organic modifier
- 1 to 12 pH range
- Primarily used for critical samples

Description	Particle Size	I.D. × L	Capacity	Cat. No.	Each
Metrosep Anion Dual 1 IC 1-70 Column	10µm	3.1 × 70mm	4µmol	**MP61006040**	423.15
Metrosep Anion Dual 2 Column	6µm	4.6 × 75mm	34µmol	**MP61006100**	1358.59
Metrosep Anion Dual 1 IC 1-70 Aluminum Cartridge Holder, 70mm	----	----	----	**MP62828120**	245.99
Metrosep Anion Dual 1 IC Guard Column Cartridge	----	----	----	**MP61006030**	453.62

Metrohm-Peak* Phenomenex* Star IC Anion Columns

For analyses with chemical suppression

- Columns with a polystyrene-divinylbenzene copolymer packing, 1-12pH range, and 7MPa maximum pressure



MP61005100

A300 IC

- Extremely short analysis times—standard ions can be determined in less than 8 minutes
- 1.5mL/min. standard flow; 2.0mL/min. maximum flow
- PEEK column body
- Also use to determine fluoride in the ppm range in the presence of a very large excess of lactate

A300 HC

- High-capacity version of the A300 IC
- 3.0mL/min. standard flow; 5.0mL/min. maximum flow
- PEEK steel jacket column body
- Particularly suitable for the determination of bromate in the ppb range

Description	Particle Size	I.D. × H	Capacity	Cat. No.	Each
A300 Column	7µm	4.6 × 100mm	29µmol	**MP61005100**	960.27
A300 HC Column	7µm	10 × 100mm	157µmol	**MP61005110**	1690.35

Metrohm-Peak* Columns for 761 SD Compact IC System

Columns and guard columns

Metrosep A Supp 4-250

- Carrier material is polyvinyl alcohol with quaternary ammonium groups
- Medium ion exchange capacity; sulfate elutes after 12 min.
- An extremely robust column with very good separating properties
- Applications include standard ions, water analysis and difficult matrices
- Capacity: 71µmol

MP61006500

Metrosep A Supp 4/5 Guard

- Guard column used to protect Metrosep A Supp 4 and Supp 5 columns

Metrosep RP Guard

- Guard column used to protect Metrosep anion columns

Description	Particle Size	I.D. x L	Cat. No.	Each
Metrosep A Supp 4-250 Column	9µm	4.0 x 250mm	**MP61006430**	934.11
Metrosep A Supp 4/5 Guard Column	5µm	4.0 x 5mm	**MP61006500**	208.08
Metrosep RP Guard Column	0.2µm	3.5 x 1.7mm	**MP61011020**	206.54
Metrosep RP Guard Spare Filter	----	----	**MP61011120**	523.76

Metrohm-Peak* Columns for 761 Compact IC System

Metrosep C 2-150

- Carrier material is silica gel with carboxyl groups
- The universal standard column used for cation analysis
- High separating performance in a short time

NOTE: This 150mm column will replace the Metrosep Cation 1-2 in the medium term. The elution sequence remains basically the same, although the separating performance and resolution are noticeably improved.

Metrosep A Supp 5-100, -150, and -250

- Carrier material is polyvinyl alcohol with quaternary ammonium groups
- High-performance separating column with an extremely high number of plates for the most demanding separating tasks
- Solves even complex separating problems easily and reproducibly

Metrosep Organic Acids

- Carrier material is polystyrene-divinylbenzene copolymer with sulfonic acid groups
- High-performance cation exchanger column for the determination of organic acids, fluoride (hydrofluoric acid), and dihydrogen phosphate (phosphoric acid)
- Solves difficult and complex separating problems, including those involving difficult matrices

Metrosep A Supp 4/5 S-Guard

- For protecting A Supp 4, 5 and 7 columns

Description	Particle Size	I.D. x L	Capacity	Cat. No.	Each
Metrosep Anion A Supp 5-100 Column	5µm	4.0 × 100mm	38µmol	**2MP61006510**	1070.63
Metrosep Anion A Supp 5-150 Column	5µm	4.0 × 150mm	70µmol	**2MP61006520**	1210.34
Metrosep Anion A Supp 5-250 Column	5µm	4.0 × 250mm	94µmol	**2MP61006530**	1138.59
Metrosep Cation C 2-150 Column	7µm	4.0 × 150mm	117µmol	**2MP61010220**	925.98
Metrosep Organic Acids Column	7µm	4.0 × 250mm	19µmol	**2MP61005200**	1765.80
Metrosep A Supp 4/5 Guard Column	5µm	4.0 x 5mm	----	**2MP61006540**	265.31

IC SYSTEMS

Metrohm-Peak* 761 Compact IC System

Rugged, economical analysis tool for isocratic separation of analytes ranging in multiple orders of magnitude.

With chemical suppression. Includes a powerful software package for full control, integration, and reporting, which also allows multiple users to create and save their methods and data independently. Accepts virtually all IC analytical and guard columns.

Small footprint, maximum power

- Dimensions (L × W × H): 13⅞ × 10⅛ × 17⅜" (35.5 × 25.9 × 44.6cm)
- Perfect integration of features in a small space
  - Convenient eluent organizer holds eluent and storage containers for regeneration of MSM, ensuring short tubing connections
  - Insulated column compartment
  - Low-pulsation double piston pump, flow range 0.2 to 2.5mL/min., maximum pressure 25MPa (250 bar, 3625 psi)
  - Built-in 6-way injection valve
  - Column
  - Metrohm Suppressor Module (MSM)
  - High-performance detector
  - Peristaltic pump
  - Data processing
- One connection to a free COM interface
- Built-in 22-bit A/D converter

Advanced Connectivity

- Eight remote I/O lines for controlling external instruments
- Rear panel has connections for the mains cable, detector, and RS-232-C interface of computer, interface for freely configurable remote lines, and ON/OFF switch
- Analog output for connection to external data systems
- Openings for attaching syringe or connecting sample changer are located on front panel

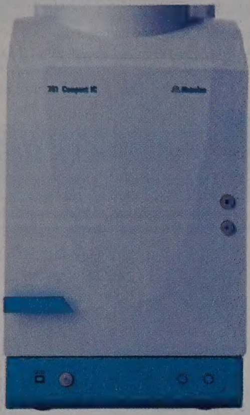
Rapid start

- Click on the required application in the menu and system is ready and configured

Contd. on next page.

*Trademark. See Trademark Reference.

Metrohm-Peak* 761 Compact IC System, Contd.



MP27610020

- Software contains more than 180 preloaded integration and calibration methods
- Application updates free of charge online via the Internet

Maximum performance for both simple and complex application work

- Allows detection of trace and highly concentrated analytes in a single analysis

Integrated with IC reagents and standards

- MPak* certified IC reagents are filtered, sterile and degassed with quick connect fittings for easy changeover
- MCal* certified IC standards are NIST* traceable and triple-checked for quality assurance
- Integration of reagents and standards virtually eliminates operator error and significantly increases productivity
- Automation capability can be added for ultimate high sample throughput

INCLUDES:

Injection valve, double-piston pump, column, Metrohm Suppressor Module (MSM), high-performance detector, peristaltic pump, data processing

WARRANTY:

10 years on MSM Suppressor Module

Description	Mfr. No.	Cat. No.	Each
With chemical suppression	2.761.0020	**MP27610020**	14,500.00

Measuring Range	0-1000µS
Detector Block Range	Single-digit ppb range
Detector Block Measuring Range	0-50µS, 0-250µS, 0-1000µS
Detector Cell Temperature Range	25-45°C in 5°C steps
Detector Temperature Stability	Better than 0.01°C
Maximum Pressure	25Mpa (250 bar, 3625 psi)
Low-Pulsation Double Piston Pump Flowrate	0.2 to 2.5mL/min.
Dimensions (L × W × H)	13⅞ × 10⅛ × 17⅜" (35.5 × 44.6 × 25.9cm)

Metrohm-Peak* 861 Advanced Compact IC Systems

Extremely compact and mobile with high sensitivity, low detection limits, comprehensive automation possibilities, easy operation

MP28610040

Flexibility of carbonate eluents with the baseline of a hydroxide eluent. Some models feature sequential suppression.

Two Models Available

- IC for anion and cation determinations without chemical suppression (MP28610010)
- IC with MSM II and Metrohm CO_2 Suppressor (MCS) for anion determinations with sequential chemical and CO_2 suppression (MP28610040)

Both Models Feature

- Eluent organizer
- Pulsation absorber
- Insulated column compartment (column heating)
- Low-pulsation serial dual-piston pump; no external gas supply required
- Built-in six-way injection valve; permits automatic or manual sample injection
- PEEK and PTFE flowpath

Communications and Operations

- Analog and digital output
- Eight remote output lines for controlling external devices
- Communication via RS-232C port
- Metrodata IC Cap software for a one-click operation with choice of languages
- Metrodata IC Net software for data evaluation and automated instrument control
- Measuring signal transferred to Metrodata IC Net software with built-in 22-bit analog/digital converter
- Free application updates from the Internet

MSM II Suppressor

- Pressure- and solvent-resistant module for chemical suppression
- Three suppressor chambers
- Built-in two-channel peristaltic pump
- Microcapillary packed bed

MCS Suppressor

- With built-in vacuum cell, gas-permeable PTFE AF membrane, and CO_2 absorber
- Removes carbonate from sample as well as CO_2 formed during suppression reaction
- Greatly reduces injection and carbonate peak; avoiding interferences and improving determination of rapidly eluting anions
- Increases sensitivity 30% or more
- Achieves detection limits from 0.7 to 1.9ppb for standard anions—with injection volume of 20µL
- For all applications in the routine IC analysis sector; can also be used in the R&D field
- Suitable for Metrohm Inline Sample Preparation (MISP) such as dialysis, ultrafiltration, and sample preconcentration

WARRANTY:

10 year warranty

LOW PRESSURE COLUMNS AND ACCESSORIES

Spectrum Spectra/Chrom* CF-1 Fraction Collector

Combines rugged, reliable mechanical features with highly sophisticated peak separation and collection capabilities

Use as a stand-alone unit for time, volume or drop fractioning; or in conjunction with an external detector (with a 1V output) as a user-friendly, programmable peak separator.

Three Collection Modes

- **Time-based fractions** for 0.1 to 999.9 minutes in 1-second intervals—for any fraction size between 6 seconds and 1000 minutes
- **Drop- or pumped-based volume fractions** can be collected from 1 to 9999 drops (or volumes) in 1 drop (or volume) increments
- **Pumped volume mode** available only when Model CF-1 is interfaced with Spectra/Chrom Model MP-1 or MP-2 (sold separately; contact your Fisher Scientific Customer Service Representative for information)

Integral Peak Detection Capabilities

- When connected to detector with 1V output, collector identifies and separates peaks from eluate stream

High-capacity Sampling

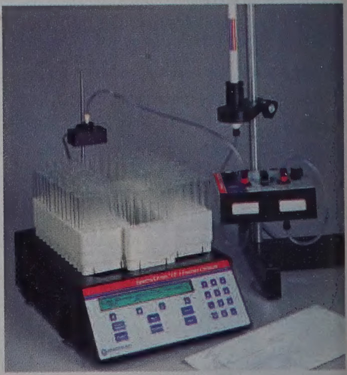
- Interchangeable racks hold up to 174 tubes ranging in size from 10 to 28mm—including scintillation vials
- Also features encoded tube positions

Operates in Cold or Hot Temperature Environments

- Heavy-gauge aluminum and plastic construction houses built-in heater circuits that eliminate internal condensation down to 0°C (32°F) —even in coldrooms with 100% humidity
- High-temperature rated electronic and mechanical parts enable continuous operation in environments with temperatures up to 40°C (104°F)

INCLUDES:

Power cord, aluminum support rod, drop counting unit, thirty 6-place racks for 12 or 13mm tubes (one red rack), fittings for 1/16 and 1/8" O.D. (1.5 and 3.2mm) and 1/16" dia. (1.5mm) tubing



11-187-37

Electrical Requirements	Mfr. No.	Cat. No.	Each
115V 50/60Hz	124845	**11-187-37**	2599.00

Data Communication	TTL
Net Weight	10 lb. (5kg)
L × W × H	15¾ × 11 × 4¾" (40 × 28 × 12cm)

† *Pumped volume mode available only when Model CF-1 is interfaced with Spectra/Chrom Model MP-1 or MP-2 or Microflow peristaltic pump.*

‡ *Capacity using rack set supplied with unit.*

Kontes* Chromaflex* Columns

Ideal for medium-pressure chromatography with aqueous mobile phases

- Threaded
- Feature PTFE-shielded O-rings and end fittings
- PTFE layer is curled over the O-ring to form a solvent- and leak-resistant seal
- Solvents contact only PTFE and borosilicate glass surfaces
- Available with three inside diameters (1.0, 2.5, and 4.8cm) and five lengths (15, 30, 60, 100, and 120cm)

INCLUDES:

Glass barrel, two PTFE end fittings with 20Rm porosity polyethylene bed supports, 5' (1.5m) of PTFE tubing (1/16" O.D. tubing with 1.0cm I.D. columns, 1/8" O.D. tubing with 2.5 and 4.8cm I.D. columns), two flangeless tubing nuts, two flangeless ferrules.

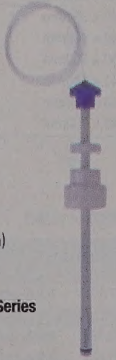
Kontes* Flow Adapters for Chromaflex* Columns

- Delivers sample and buffer directly to top of gel bed
- Ideal for concentration and pH gradients, reverse flow separations, and gravity flow separations that require a high level of resolution and reproducibility

INCLUDES:

20µm porosity HDPE bed support, TFE/propylene O-ring seal, stainless-steel adjusting rod, PTFE body and 5' (1.5m) of PTFE tubing.



K420836 Series

For Column I.D.	Tubing O.D.	Cat. No.	Each
1.0cm	1/16"	**K420836-0000**	146.67
2.5cm	1/16"	**K420836-1620**	247.34
2.5cm	1/8"	**K420836-0020**	247.34
4.8cm	1/8"	**K420836-0040**	348.57

Kontes* FlexColumn* Economy Columns

Ideal for use with FPLC* systems, peristaltic pumps, or gravity flow to 15psi.

Use columns with ion-exchange, affinity, gel filtration, and hydrophobic interaction media.

- Durable borosilicate glass
- Precision-ground column ends form positive seals with endcaps so they don't leak or "creep" under pressure
- Threaded, easy to remove reservoir cap won't pop off under pressure
- Reservoir accepts accessory funnels and glass reservoirs
- Luer-Lock* polypropylene inlet and outlet fittings
- Bed support has a 20µm polyethylene disc that retains most media for low-pressure aqueous chromatography
- Columns accept flow adapters for adjusting Flex Column bed height (order adapters separately)

NOTE:

Flow adapters not available for 0.7cm I.D. columns.

22 × 300mm	110mL	**K420300-0022**	25.16
22 × 400mm	150mL	**K420300-0023**	34.39

Kontes* Column for Neutral Oils Content

For determining the total neutral oil content in natural fats and oils consisting of triglycerides and unsaponifiable matter

- Uniquely designed flask (included) allows weighed sample to be transferred directly into column
- Free fatty acids and miscellaneous nonfat substances may be removed by passing the sample through a column of activated alumina; the losses may then be calculated
- Stopcocks have PTFE plugs; column has coarse porosity fritted disc
- Extension tube joint is $ 7/25, all others $ 19/22

Selecto* Preparative and Classic Column Chromatography Silica

60Å gels made from identical starting material, making scale-up easier

- pH of 7
- Surface area of 500 to 600m²/g
- Use active silica to meet needs for standardized initial conditions and high reproducibility
- Active silica gel with 32-63µm particle size is ideal for fast, simple purifying of organic samples

EMD Chemicals* Silica Gel 60 H 5-40µm

Consistent quality control in adsorbant manufacture

Material	Particle Size	Mfr. No.	Cat. No.	Each
Silica gel 60H	5 to 40µm	7736-3	**M77363**	260.64

Whatman* Silica Gel

For classic column or dry column chromatography

- Use dry column chromatography technique when TLC separations must be scaled up
- 60Å pore size; surface area, 450m²/g; pH, 5-6
- Without fluorescent indicator

05-713-69 Series

Quantity	Mfr. No.	Cat. No.	Each
70-230 Mesh			
1kg	4791-010	**05-713-693**	165.93
5kg	4791-050	**05-713-692**	609.86
230-400 Mesh

25kg	4790-250	**05-713-695**	1826.09

Whatman* Purasil Silica Gel

High-purity silica gel for flash chromatography

- Narrow particle size distribution and minimal fines enable fast separations
- High resolution
- Excellent flowrates
- Direct scalability
- 60Å pore size
- 60-80mL/g pore volume
- Surface area, 500-600m²/g
- pH (10% suspension): 7 ± 0.5

05-713 Series

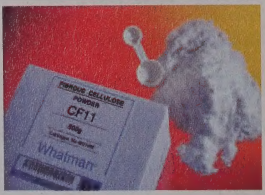
Particle Size	Mesh	Quantity	Cat. No.	Each
38-63µm	230-400	1kg	**05-713-812**	139.50
38-63µm	230-400	25kg	**05-713-813**	1351.16
63-210µm	70-230	1kg	**05-713-814**	139.50
63-210µm	70-230	25kg	**05-713-815**	1351.16

Whatman* Advanced Ion Exchange Cellulose (AIEC) for Biopolymers

For separating proteins, nucleic acids, hormones, peptides, and antibodies

For Partition Chromatography: Cellulose Powder

- Use CC-31 for column separations and binder-free CC-41 for TLC
- Fibrous cellulose powder is suitable for column (medium fiber, CF-11) or batch (long fiber, CF-1) techniques



05-713-004

For Cation Exchange Separations: Carboxymethyl Cellulose

- Preswollen CM-52 is a high-capacity media for hormones, polypeptides, and other biopolymers bearing low to high positive charges
- Dry microgranular CM-32 is virtually identical to the preswollen form after precycling
- CM-52 and CM-32 are recommended for column separations

Bifunctional Cellulose

- Use P-11 for column separations of medium-size biopolymers

For Anion Exchange Separations: Diethylaminoethyl (DEAE) Cellulose

- DE-23 is suitable for negatively charged biopolymers
- Two preswollen microgranular DEAE media are available: DE-52 for proteins with medium negative charges and nucleic acids; and DE-53, a partially quarternized anion exchanger with a higher capacity than DE-52
- After precycling, dry microgranular DE-32 performs like preswollen media

Quarternary Amine Cellulose

- QA-52 is excellent for high-pH applications
- Strong anion exchanger, fully ionized under all pH conditions

SOLID-PHASE EXTRACTION

Thermo Scientific* HyperSep* Hypercarb* SPE Columns

Unique sorbents available for normal phase, reversed phase, and ion exchange extractions

- High reproducibility, efficiency, and versatility
- Controlled, even (40 to 60μm mean) particle size distribution within the bed eliminates channeling, providing a larger surface area of sorbent for interaction
- 60Å mean pore size for all except Florisil*
- Consistent high recoveries are free from contaminants and impurities
- Provides low column backpressure for automation-friendly SPE columns
- Chemically resistant polypropylene housing; two polyethylene frits support the sorbent column bed
- Conform to the industry standard configurations
- Use in biological, pharmaceutical, forensic, and environmental applications
- Not endcapped

Popular Phase Options

C18

- Trifunctional octadecyl
- Hydrophobic reversed phase
- Highly retentive
- For nonpolar to moderately polar compounds

C8

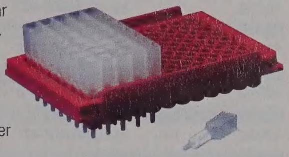
- Trifunctional octyl
- Hydrophobic reversed phase
- Less retentive alternative to C18 for polar and nonpolar compounds

Phenyl

- Trifunctional phenyl
- Hydrophobic reversed phase
- Alternative selectivity for enhanced retention of basic compounds
- Commonly used for nonpolar interactions

Silica

- Unbonded activated silica
- Hydrophilic normal phase
- Effectively separates compounds of very similar structure
- Adsorbs analytes from nonpolar solvents such as hydrocarbons, chloro- or fluoro-substituted hydrocarbons or less polar esters and ethers
- Also used as a cation exchanger of intermediate strength in zaqueous medium



Columns in Well Plate Format (sold separately)

SAX

- Trifunctional quaternary amine, 0.25 mEq/g, Cl^- counter ion
- Anion exchange
- For extraction of weak acids and negatively charged compounds from both aqueous and nonaqueous solutions
- Offers minimal nonpolar interactions

SCX

- Trifunctional benzene sulfonic acid, 0.32 mEq/g, H^+ counter ion
- Cation exchange
- With a low pK_a
- For extraction of charged basic compounds (basic drugs)
- Benzene ring provides high potential for nonpolar interactions

Verify*-CX

- Mixed mode containing C8 and benzenesulfonic acid
- Cation exchange, nonpolar
- For extraction of basic drugs
- Copolymerized on a rigid, purified silica gel support

Verify-AX

- Mixed mode, containing C8 and quaternary amine
- Anion exchange, nonpolar
- For extraction of acidic drugs and metabolites from biological matrices
- Copolymerized on a rigid, purified silica gel support

Contd. on next page.

Thermo Scientific* HyperSep* Hypercarb* SPE Columns, Contd.

Florisil

- Florisil phase; hydrophilic normal phase
- Isolates polar compounds from nonpolar matrices
- Magnesia-loaded silica gel for faster flow rates for large sample volumes
- Extremely polar

Aminopropyl

- Trifunctional aminopropyl, 0.31 mEq/g
- Normal phase, anion exhange
- Polar sorbent for both polar and anion exchange interactions
- Enhanced retention of strong anions
- Excellent retention of drugs, metabolites, and structural isomers

For HyperSep manifolds, look to our Web Site.

Visit www.fishersci.com and search for HyperSep

Thermo Scientific* HyperSep* Hypercarb* SPE Plates and Wells

For solid-phase extraction applications and separations where C18 is not appropriate or applicable

03-250-4 Series

- Unique flat, 100% porous graphitic carbon (PGC) with selectivity for structurally similar compounds, offering separation of compounds with simple solvents
- Stable across the 0 to 14pH range
- High batch-to-batch reproducibility
- Strong retention properties allow use of low bed weights for concentrated extracts
- Unique interaction mechanism with polar molecules
- Hydrophobic reversed phase; normal phase adsorption; polar retention (PREG)
- 30µm mean particle size
- 250Å mean pore size

ORDERING INFORMATION:

Thermo Scientific* HyperSep* Hypercarb* SPE Columns Tips and SpinTips

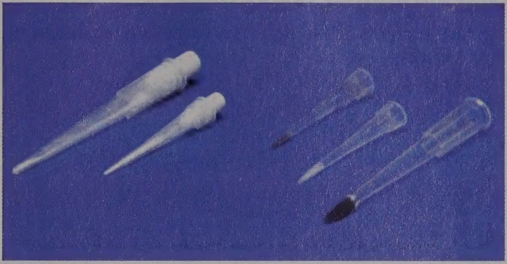
- Faster sample preparation with minimal sample loss
- No contamination from the supporting matrix
- Use for mass spectrometry, desalting, protein purification, MALDI, electrophoresis, HPCE, HPLC, and CEC

HyperSep Tips

- Patented micropipet tip in which the chromatographic material is directly attached to its inner surface
- Achieve separation in volumes as low as 100nL

HyperSep SpinTips

- Pipet tips with a 1 to 2µm wide slit at bottom that permits the liquid to pass through but retains the chromatographic material (20 to 30µm)
- Eliminate need for a filter; also eliminate dead volume
- Sample volumes as small as 0.1µL can be handled



03-250-4 Series

Restek* Resprep*-C8 and Resprep*-C18 SPE Disks

Extract analytes using high flow rates with significantly less clogging

- Glass fiber disks embedded with C8 or C18 bonded silica
- Extract semivolatile organic compounds
- Deep-pore design reduces clogging and allows faster flow rates
- Meet requirements for EPA methods 525.1, 506, 550.1, 549.1

Size	Mfr. No.	Cat. No.	Pack of

Alltech* Prevail* C18 Solid-Phase Extraction Columns

Water-wettable cartridges don't require preconditioning with an organic solvent—saves time and reduces handling and disposal of organic solvents

- Fully endcapped
- Use for aqueous samples, including dry metabolites from blood, hormones from body fluids, and pesticides from water
- **Extract-Clean*** columns feature larger bed weights and are typically used in processes employing a vacuum manifold
- **Maxi-Clean*** cartridges are small, portable, and ideal for methods using a vacuum or syringe

Alltech* SAX Maxi-Clean* Cartridges

Strong anion exchanger in acetate form

- Functional group tetramethyl ammonium
- Base: Styrene-divinylbenzene
- Capacity: 0.15mEq/100mg
- Retains negatively charged compounds
- 600mg bed weight

Description	Mfr. No.	Cat. No.	Pack of 100
SAX Maxi-Clean Cartridges	21908	**AT21908**	367.71

Alltech* Extract-Clean* and Maxi-Clean* IC Resin SPE Devices

Seven chemistries available in two formats

- Available in 0.5mL and 1.5mL bed volumes

Extract-Clean Columns

- Process multiple samples with vacuum manifold
- For labs with higher sample throughput requirements

Maxi-Clean Cartridges

- Use with any Luer tip syringe

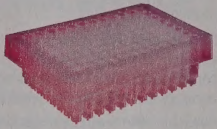
3M* Empore* 96-Well Extraction Disk Plates

High-performance extraction disk plates for high-throughput SPE



14-378 and 14-379 Series

- Process 96 samples in 8 × 12 plate formats compatible with liquid handling technologies and injection systems; samples can be extracted in approximately one hour or less
- Wells contain patented Empore standard-density particle-loaded membrane for efficient sample extraction followed by elution in 100µL with mobile phase or mobile phase compatible solutions
- Ideal for sample preparation prior to LC/MS and other high-throughput applications
- C2, C8, or C18 silica sorbents for nonpolar interactions with analytes from complex samples
- Universal resin (UR) sorbent plates contain polar functioning groups to promote a much more generic approach with high retention of acidic, neutral, and base analytes
- Use with 3M Empore Vacuum Manifold Assembly when extracting multiple samples
- Available with 1.2 or 2.5mL reservoir volumes with a 5.5µm disk diameter

Type	Mfr. No.	Cat. No.	Each	Case of 12

Filter Plate	6360	**14-378-74**	74.65	814.32

3M* Empore* Filter Aid 400

Nonporous, inert glass beads with average diameter of 40Rm designed for use with Empore Extraction Disks

3M Empore Filter Aid 400
3M Empore Filter Aid 400
14-378-6

- Improves flowrates and recoveries with water samples containing suspended solids
- When placed on top of Empore disks, beads act as a depth filter to inhibit migration of suspended solids to the surface of the disk
- Supplied with scoop

Size	Mfr. No.	Cat. No.	Each
1.5kg	FA400	**14-378-6**	85.45

3M* Empore* Extraction Disks

Reduce extraction time and solvent use for analytical preparation of aqueous environmental samples

- Provide up to 90% solvent reduction, excellent processing speed, and contamination-free extractions with accurate and reproducible results
- Available with a variety of packings in 47 and 90mm sizes

Anion Exchange-SR Extraction Disks

- Approved for use in EPA Methods 549.1 and 552.1
- Provide significantly faster extraction time with no negative effect on recoveries
- Replace liquid/solid procedures for the determination of haloacetic acids in water, as well as chlorinated herbicide Dalapon*

Size	Mfr. No.	Cat. No.	Pack of	Case of 3 Pk.
47mm	2252	**14-386-6**	20/236.13	662.05

C8 and C18 Extraction Disks

- Effective for extracting PCBs, PNAs, organochlorine pesticides, phenoxy acid herbicides, phthalates, and triazines
- **C8** disk is approved for use in EPA Method 549.1
- **C18** disks are approved for use in EPA Methods 506, 550.1, 525.2, 1613B, 508.1, and 3535; 14-386-3 is also approved for use in EPA Method 608

Size	Mfr. No.	Cat. No.	Pack of	Case of 3 Pk.
C8 Sorbent				
47mm	2214	**14-386**	20/191.89	538.01
C18 Sorbent				
47mm	2215	**14-386-2**	20/191.94	538.14
90mm	2315	**14-386-3**	10/279.01	782.25

Oil and Grease Extraction Disks

- Designed for use in EPA Method 1664
- Require almost half the solvent of traditional methods and do not form emulsions during sample preparation
- Reduce extraction times to an average of eight minutes/liter for most sample matrices

Size	Mfr. No.	Cat. No.	Pack of	Case of 3 Pk.
47mm	2270	**14-638-30A**	20/111.38	303.76
90mm	2370	**14-638-30B**	10/112.18	305.94

SDB-RPS Extraction Disks

- Approved for use in EPA Method 515.2
- Used to collect the more water-soluble analytes from water samples
- Adsorbent is effective for explosives, pesticides, phenolics, and drugs of abuse

Size	Mfr. No.	Cat. No.	Pack of	Case of 3 Pk.
